Masterful . . . [A] painstakingly researched, astonishingly erudite study...Tooze has added his name to the roll call of top-class scholars of Nazism. —Financial Times An extraordinary mythology has grown up around the Third Reich that hovers over political and moral debate even today. Adam Tooze's controversial book challenges the conventional economic interpretations of that period to explore how Hitler's surprisingly prescient vision--ultimately hindered by Germany's limited resources and his own racial ideology--was to create a German super-state to dominate Europe and compete with what he saw as America's overwhelming power in a soon-to- be globalized world. *The Wages of Destruction* is a chilling work of originality and tremendous scholarship that set off debate in Germany and will fundamentally change the way in which history views the Second World War.

The Multilateral Fund and the Global Environment Facility (GEF) were established to assist developing countries in financing the incremental costs of phasing out ozone-depleting substances. Both the Fund and the GEF require a strategic framework for the activities they finance to demonstrate that overall phaseout of these substances will be accomplished. The framework, known as the country program, establishes a national strategy and program of proposed activities. 200 e business hwy 23 walsco tx: *Cascades: How to Create a Movement that Drives Transformational Change* Greg Satell, 2019-04-26 What does it take to change the world? This book will show you how to harness the power of CASCADES to create a revolutionary movement! If you could make a change—any change you wanted—what would it be? Would it be something in your organization or your industry? Maybe something it's in your community or throughout society as a whole? Creating true change is never easy. Most startups don't survive. Most community groups never get beyond small local actions. Even when a spark catches fire and protesters swarm the

streets, it often seems to fizzle out almost as fast as it started. The status quo is, almost by definition, well entrenched and never gives up without a fight. In this groundbreaking book, one of today's top innovation experts delivers a guide for driving transformational change. To truly change the world or even just your little corner of it, you don't need a charismatic leader or a catchy slogan. What you need is a cascade: small groups that are loosely connected but united by a common purpose. As individual entities, these groups may seem inconsequential, but when they synchronize their collective behavior as networks, they become immensely powerful. Through the power of cascades, a company can be made anew, an industry disrupted, or even an entire society reshaped. As Satell takes us through past and present movements, he explains exactly why and how some succeed while others fail.

200 e business hwy 23 walsco tx: *Locks and Keys Throughout the Ages* Vincent J. M. Eras, 2019 Locks and Keys throughout the Ages is widely considered the best book ever written on the history and development of locks. It is illustrated throughout with photos from the famous and extensive Lips' Collection. It was written in 1957 by Vincent J.M. Eras, the director of one of the most respected and important lock manufacturing companies in the world at that time, the Lips' Safe and Lock Manufacturing Company (now part of the ASSA ABLOY Group, along with Yale, Chubb, and many other once independent manufacturers). The author was not only a master locksmith who held several important patents, but he was also an avid collector and was passionate about the history and development of locking mechanisms. His extensive knowledge of the field comes across on every page. In fact, Eras had been in the lock manufacturing business for 58 years before he wrote this book. In the preface he states: I consider it a gratifying task to place on record my experiences and through this book save them from oblivion. At the same time an excellent opportunity is presented to show the reader my collection of antique and modern locks - the tangible result of more than 50 years travelling, searching and study in many countries. In over 280 black-and-white photos and drawings Vincent Eras brings us on a grand tour of the development of locks from prehistoric to modern times and also explains to us, in words and illustrations, how their

mechanisms work. This is a high-quality hardcover reprint of the 1957 edition of the book done by special arrangement with ASSA ABLOY. The typeface has been completely re-done and the photographs have been corrected using the latest digital correction technology. The quality is equal to and, in many cases, better than the original 1957 edition. A reprint of this book was done in the UK in the 1970s but the quality was poor. Artisan Ideas is very glad to be able to make this fascinating book available to the public again. Hardcover, 184 pages, 284 black-and-white photos and designs.
