(The following section would constitute the bulk of the 1000-word document – a sample section is provided below to illustrate the structure. The actual key would contain numerous sections, each following this format and covering different aspects of the assessment.)

Sample Section: Analyzing Hamlet's Tragic End

1. Section Introduction: This section examines the tragic downfall of Hamlet, Prince of Denmark, focusing on the interplay of his character flaws, external forces, and the resulting consequences. We will analyze his procrastination, his intellectualism, and his inability to act decisively as contributing factors to his tragic end.

1. Question Breakdown: Discuss the extent to which Hamlet's own flaws contribute to his tragic demise. Support your answer with textual evidence.

1. Detailed Answer: Hamlet's tragic end is largely a result of his own internal struggles and flaws. His

overwhelming intellect and tendency towards introspection lead to inaction, delaying his revenge and ultimately contributing to the deaths of many, including himself. His indecisiveness, often stemming from his profound melancholy and philosophical questioning, prevents him from effectively confronting Claudius. His famous "To be or not to be" soliloquy exemplifies this paralysis. He spends excessive time contemplating rather than acting, allowing opportunities to slip away and escalating the conflict. Further, his melancholic nature isolates him, weakening his ability to form alliances and hindering his pursuit of justice. His failure to act decisively, coupled with his inability to navigate the complex political landscape of the Danish court, results in a chain of tragic events that ultimately claim his life. The play's final scene, showcasing the mass deaths and the bleak future of Denmark, underscores the devastating consequences of Hamlet's flawed character.

1. Alternative Answers & Explanations: Some might argue that external forces, such as Claudius's treachery and Gertrude's unwitting complicity, are primarily responsible for Hamlet's death. While these external factors are undeniably significant in shaping the tragic events, they do not negate the role of Hamlet's internal flaws. The argument that Hamlet's flaws are the primary contributors recognizes the interplay of agency and circumstance but emphasizes the internal struggles that drive his actions and ultimately lead to his downfall.

1. Common Errors: A common error is to solely focus on external factors without adequately addressing Hamlet's internal conflicts. Students should avoid simply summarizing the plot and instead analyze how Hamlet's character contributes to the tragic outcome. They must provide textual evidence to support their claims and demonstrate a nuanced understanding of the interplay between character and circumstance.
