delta airtel business jets: **Rhapsody in Junk** Marilyn Jeffers Walton, 2007-05 This book is the culmination of three year's of research in four countries. By meticulously combing the archive records in England, Germany, Poland and the United States, Marilyn Jeffers Walton has reconstructed the final mission of her father and his crew and located the German cemetery where one crewmate, killed the day the plane was shot down, was buried. She searched for and found the remaining men of the crew of Rhapsody in Junk and reunited them after sixty years. Interviews with the crew and fellow prisoners of war contributed puzzle pieces, put together bit by bit, that enabled her to find where they were captured and interrogated. By searching old records, letters, diaries and mission records, she was finally able to return to Germany and find the crash site of her father's B-24 where pieces of the plane still remained. To her astonishment, she met the woman who watched her father bail out and saw the very field where he landed. During her return to Germany, she connected emotionally with the people of the peaceful farm community of Wagersrott where her father was taken prisoner over six decades before. In her quest to reconstruct the mission and her father's prisoner of war experiences, Walton presents not only his story but the stories of the British and German people who both suffered greatly, all caught up in the dictates of a mad man. Revealed within the pages is a first-hand account of the bombing of Dresden from a German couple who survived it. Walton's odyssey through Europe allowed her to discover the rich fabric of the people

who endured and survived the war and to weave their stories into a multi-faceted mosaic that reflects the personal experiences of World War II.

delta airtel business jets: *Elite Mobilities* Thomas Birtchnell, Javier Caletrio, 2013-08-22

Small in number but great in influence, mobile elites have shaped the contours of global capitalism. Today these elites continue to flourish globally but in a changing landscape. The current economic crisis—and rising concerns about the moral legitimacy of extreme wealth—coincides with stern warnings over the risks posed by climate change and the unsustainable use of resources. Often an out-of-bounds topic in critical social science, elites are thought of as too inaccessible a group to interview and too variable a minority to measure. This groundbreaking collection sets out to challenge this perception. Through the careful examination of the movements of the one per cent through the everyday spaces of the ninety-nine per cent, *Elite Mobilities* investigates the shared zones elites inhabit alongside the commons: the executive lounge in the airport, the penthouse in the hotel, or the gated community next to the slum. Bringing together the pioneer scholars in critical sociology today, this collection explores how social scientists can research, map, and 'track' the flows and residues of objects, wealth and power surrounding the hypermobile. *Elite Mobilities* sets a new benchmark in social science efforts to research the powerful and the privileged. It will appeal to students and scholars interested in mobilities, transport, tourism, social stratification, class, inequality, consumption, and global environmental change.
