designer business card holder: Design Is How It Works Jay Greene, 2010-07-29 It's not just what it looks like and feels like. Design is how it works.-Steve Jobs There's a new race in business to embrace design thinking. Yet most executives have no clue what to make of the recent buzz about design. It's rarely the subject of business retreats. It's not easily measurable. To many, design is simply a crapshoot. Drawing on interviews with top executives such as Virgin's Richard Branson and Nike's Mark Parker, Jay Greene illuminates the methods of companies that rely on design to stand out in their industries. From the experiences of those at companies from Porsche to REI to Lego, we learn that design isn't merely about style and form. The heart of design is rethinking the way products and services work for customers in real life. Greene explains how: -Porsche pit its designers against each other to create its bestselling Cayenne SUV -Clif listened intently to customers, resulting in the industry-changing Luna energy bar -OXO paid meticulous attention to the details, turned its LiquiSeal mug from an abysmal failure into one of its greatest successes -LEGO started saying no to its designers-saving its brick business in the process Greene shows how important it is to build a culture in which design is more than an after-the-fact concern-it's part of your company's DNA. Design matters at every stage of the process. It isn't easy, and it increases costs, but it also boosts profits, sometimes to a massive extent. In an increasingly competitive marketplace, design represents the best chance you have of transcending your competitors.

designer business card holder: Present-Day Corporate Communication Rudolf Beger, 2018-06-22 This book serves as an easy-to-read, up-to-date practical guide on professional corporate communication. The key market for this book is the Asia-Pacific region, mainly because there is a gap in know-how in corporate communication among many industry sectors. In addition, at present, one cannot find a lot of educational literature about corporate communication in the market. Therefore, this guidebook closes that gap. In Asia, companies are starting to realize the importance of corporate communication in all areas (external and internal corporate communication, crisis communication (Example: TEPCO) and political communication / government relations / lobbying). This is triggered not only by the recent high profile and success of targeted (political) communication in the USA, but also by the notorious export-orientation of many Asian companies and their increasingly multi-national orientation (fostered by M&A and foreign investments). In addition, the increasing importance of online communication and digital/social media is an important reason why existing guidebooks on corporate communication have to be reassessed and modernized. This book focuses on all major aspects of modern corporate communication, including online / digital communication, and covers new developments, such as “fake news”, “post-truths”, “political correctness”, “the art of bridging” and other new phenomena in the world of (corporate) communication. Simple cartoon-style drawings supplement the text in order to facilitate reading and learning. Corporate communication professional, as well as students and professors in business/management programs, will be given tools to effectively and successfully plan and implement corporate communication strategies and tactics in all major areas.
