diet and wellness plus app: Anti-Diet Christy Harrison, 2019-12-24 Reclaim your time, money, health, and happiness from our toxic diet culture with groundbreaking strategies from a registered dietitian, journalist, and host of the Food Psych podcast. 68 percent of Americans have dieted at some point in their lives. But upwards of 90% of people who intentionally lose weight gain it back within five years. And as many as 66% of people who embark on weight-loss efforts end up

gaining more weight than they lost. If dieting is so clearly ineffective, why are we so obsessed with it? The culprit is diet culture, a system of beliefs that equates thinness to health and moral virtue, promotes weight loss as a means of attaining higher status, and demonizes certain ways of eating while elevating others. It's sexist, racist, and classist, yet this way of thinking about food and bodies is so embedded in the fabric of our society that it can be hard to recognize. It masquerades as health, wellness, and fitness, and for some, it is all-consuming. In *Anti-Diet*, Christy Harrison takes on diet culture and the multi-billion-dollar industries that profit from it, exposing all the ways it robs people of their time, money, health, and happiness. It will turn what you think you know about health and wellness upside down, as Harrison explores the history of diet culture, how it's infiltrated the health and wellness world, how to recognize it in all its sneaky forms, and how letting go of efforts to lose weight or eat perfectly actually helps to improve people's health—no matter their size. Drawing on scientific research, personal experience, and stories from patients and colleagues, *Anti-Diet* provides a radical alternative to diet culture, and helps readers reclaim their bodies, minds, and lives so they can focus on the things that truly matter.

diet and wellness plus app: *Fat Girls in Black Bodies* Joy Arlene Renee Cox, Ph.D., 2020-09-29 Combatting fatphobia and racism to reclaim a space for womxn at the intersection of fat and Black To be a womxn living in a body at the intersection of fat and Black is to be on the margins. From concern-trolling--I just want you to be healthy--to outright attacks, fat Black bodies that fall outside dominant constructs of beauty and wellness are subjected to healthism, racism, and misogynoir. The spaces carved out by third-wave feminism and the fat liberation movement fail at true inclusivity and intersectionality; fat Black womxn need to create their own safe spaces and community, instead of tirelessly laboring to educate and push back against dominant groups. Structured into three sections--belonging, resistance, and acceptance--and informed by personal history, community stories, and deep research, *Fat Girls in Black Bodies* breaks down the myths, stereotypes, tropes, and outright lies we've been sold about race, body size, belonging, and health. Dr. Joy Cox's razor-sharp cultural commentary exposes the racist roots of diet culture, healthism, and the ways we erroneously conflate body size with personal responsibility. She explores how to reclaim space and create belonging in a hostile world, pushing back against tired pressures of going along just to get along, and dismantles the institutionally ingrained myths about race, size, gender, and worth that deny fat Black womxn their selfhood.

diet and wellness plus app: The New Mediterranean Diet Cookbook Martina Slajerova, Thomas DeLauer, Nicholas Norwitz, Rohan Kashid, 2021-03-30 The New Mediterranean Diet Cookbook is your guidebook to the ultimate superdiet, an evidence-based keto diet that emphasizes a diversity of fish, healthy fats, and a rainbow of colorful vegetables—with 100 delicious recipes for everything from snacks to dinner. The Mediterranean diet has long been touted as one of the world’s healthiest diets, renowned for its protective effects against heart disease, cancer, and other chronic illnesses. However, its heavy inclusion of grains and carbohydrates can contribute to obesity and is a drawback for many. Also shown to have many health benefits, the ketogenic diet stimulates the fat-burning and longevity-promoting state of ketosis by limiting carbs and emphasizing high-fat foods. While the keto diet is about the proportion of macronutrients (fats, protein, carbohydrates) in the food you eat, the Mediterranean diet is about specific food types: seafood, olive oil, colorful vegetables, and other anti-inflammatory foods. This book is about living and eating at the intersection of these complementary diets so you can reap the benefits of both. While both diets advocate significant amounts of healthy fats and protein, the new Mediterranean approach to keto significantly shifts the fat profile of the diet to emphasize the monounsaturated and omega-3 fats that health experts agree promote living a long disease-free life. It also includes colorful vegetables, providing a diversity of nutrients and flavor. The result is an enhanced Mediterranean diet that stokes metabolism, supports the gut and microbiome, and is anti-inflammatory, anti-aging, and nutrient-dense. Improve your overall health while enjoying delectable dishes including: Superfood Shakshuka Blender Cinnamon Pancakes with Cacao Cream Topping Green Goddess Salad Pancetta Wrapped Sea Bass Sheet Pan Crispy Salmon Piccata Fierce Meatball Zoodle Bolognese Nordic Stone Age Bread Chocolate Hazelnut “Powerhouse” Truffles With The New Mediterranean Diet Cookbook, you’ll learn how to balance your macronutrients, what foods are considered the new Mediterranean superfoods, and how to make tasty dishes to keep you satisfied all day.

Last spring, after a particularly grueling schedule and lapse of overindulgence, Gwyneth Paltrow was feeling fatigued and faint. A visit to her doctor revealed that she was anemic, vitamin D deficient, and that her stress levels were sky high. He prescribed an elimination diet to clear out her system and help her body heal. But this meant no coffee, no alcohol, no dairy, no eggs, no sugar, no shellfish, no deep-water fish, no wheat, no meat, no soy, nothing processed at all! An avid foodie, Paltrow was concerned that so many restrictions would make mealtime boring, so, together with Julia Turshen, she compiled a collection of 185 delicious, easy recipes that followed her doctor's guidelines. And it worked! After changing her diet, Paltrow healed totally, felt more energetic and looked great. Now, in *It's All Good*, she shares the go-to dishes that have become the baseline for the restorative diet she turns to whenever she feels she needs it. diet and wellness plus app: *Fearing the Black Body* Sabrina Strings, 2019-05-07 Winner, 2020

Body and Embodiment Best Publication Award, given by the American Sociological Association
Honorable Mention, 2020 Sociology of Sex and Gender Distinguished Book Award, given by the American Sociological Association
How the female body has been racialized for over two hundred years
There is an obesity epidemic in this country and poor Black women are particularly stigmatized as “diseased” and a burden on the public health care system. This is only the most recent incarnation of the fear of fat Black women, which Sabrina Strings shows took root more than two hundred years ago. Strings weaves together an eye-opening historical narrative ranging from the Renaissance to the current moment, analyzing important works of art, newspaper and magazine articles, and scientific literature and medical journals—where fat bodies were once praised—showing that fat phobia, as it relates to Black women, did not originate with medical findings, but with the Enlightenment era belief that fatness was evidence of “savagery” and racial inferiority. The author argues that the contemporary ideal of slenderness is, at its very core, racialized and racist. Indeed, it was not until the early twentieth century, when racialized attitudes against fatness were already entrenched in the culture, that the medical establishment began its crusade against obesity. An important and original work, *Fearing the Black Body* argues convincingly that fat phobia isn't about health at all, but rather a means of using the body to validate race, class, and gender prejudice.
