**doing business as dallas county:** **The Texas Triangle** Henry Cisneros, David Hendricks, J. H. Cullum Clark, William Fulton, 2021-05-14 This important new study examines the intricately linked phenomena of interwoven population growth, economic power, quality education, business leadership, and fiscal significance as exemplified in the "Texas Triangle," a network of metropolitan complexes that are reshaping the destiny of Texas and adding a strong pinnacle in the global system of economic mega-centers. The Texas Triangle consists of three metropolitan complexes: Dallas-Fort Worth at the northern tip, Houston-Galveston at the southeastern point, and Austin-San Antonio at the southwestern edge. It consists of four US Census-designated metropolitan statistical areas and includes 35 urban counties that comprise those areas. The Texas Triangle soon will include four of the ten most populous cities in the United States. Together these metro areas represent the fifteenth largest economy in the world. The authors describe the trajectories of each of the Texas Triangle metros in which they live and work and integrate them into a larger dynamic of functioning cohesion and effective collaboration. The Texas Triangle offers community leaders, elected officials, policy makers, and others a more nuanced understanding of an important moment in America's continuing urban development. With broader perspectives for how community-building advances the public interest, this book lays important foundations for matching the path of economic prosperity to an informed sense of what is possible.

**doing business as dallas county:** The State of Black Progress Star Parker, 2024-03-19 Black Americans have arguably arrived at the height of their cultural prominence. In politics, entertainment, academia, and nearly every sphere of influence, "black issues" dominate the national discussion. Yet many black Americans are suffering more than ever from the blight of poverty, physical and mental health struggles, lack of opportunity, and failing schools. How do these signs of success on the surface coexist with social stagnation on the ground in the black community? This edited volume, sponsored by the Center for Urban Renewal and Education and featuring contributions from W.B. Allen, Judge Janice Rogers Brown (ret.), Ian Rowe, Sally Pipes, Stephen Moore, and others, addresses this question in light of American values and the history of constitutional jurisprudence. In the 1860s, black America was promised emancipation but continued to experience subjugation. In the 1960s, black America was promised equality but was frequently exploited. Racial discrimination played a role, but in the intervening decades misguided progressive policies and the normalization of victimhood rhetoric has proven even more disastrous. By failing to live up to American ideals, our nation denied many black Americans their chance at the American Dream. The scholars and luminaries who contributed to this volume believe that what has been lost can be recovered. If our nation recognizes the history of our current predicament, embraces the

founding principles that made America an economic powerhouse, and commits to an agenda of empowering fiscal, educational, and faith and family affirming policies, then black Americans can overcome the obstacles that most hamper progress in their communities.
