entouch llc yoga massage wellness: *Climate Change Ethics and the Non-Human World* Brian G. Henning, Zack Walsh, 2020-02-25 This book examines from different perspectives the moral significance of non-human members of the biotic community and their omission from climate ethics literature. The complexity of life in an age of rapid climate change demands the development of moral frameworks that recognize and respect the dignity and agency of both human and non-human

organisms. Despite decades of careful work in non-anthropocentric approaches to environmental ethics, recent anthologies on climate ethics have largely omitted non-anthropocentric approaches. This multidisciplinary volume of international scholars tackles this lacuna by presenting novel work on non-anthropocentric approaches to climate ethics. Written in an accessible style, the text incorporates sentiocentric, biocentric, and ecocentric perspectives on climate change. With diverse perspectives from both leading and emerging scholars of environmental ethics, geography, religious studies, conservation ecology, and environmental studies, this book will offer a valuable reading for students and scholars of these fields.

entouch llc yoga massage wellness: Men, Masculinities and Honour-Based Abuse Taylor & Francis Group, 2021-08-02 This book explores the largely neglected relationship between men, masculinities and honour-based abuse (HBA). There is a common misconception that HBA - whether physical violence, emotional abuse or so-called 'honour' killings - occurs only against women. This book addresses the gap in the current literature concerning the relationship between men, masculinities and HBA. With contributions from an international and interdisciplinary range of both academics and professionals, the book examines HBA and forced marriages specifically from male-victim perspectives, both in the UK and internationally. Providing a clear understanding of the main theoretical and sociological explanations of HBA against male victims, the book demonstrates that, although men are indeed the main perpetrators of HBA, state agencies must address the fact that many men are also victims. This book is essential reading for students, academics, and practitioners alike.
