eslsca business school paris yasser ramzi: Institutional Arrangements for Conservation, Development and Tourism in Eastern and Southern Africa René van der Duim, Machiel Lamers, Jakomijn van Wijk, 2014-11-16 This book presents an overview of different institutional arrangements for tourism, biodiversity conservation and rural poverty reduction in eastern and southern Africa. These approaches range from conservancies in Namibia, community-based organizations in Botswana, conservation enterprises in Kenya, private game reserves in South Africa, to sport hunting in Uganda and transfrontier conservation areas. The book presents a comparative analysis of these arrangements and highlights that most arrangements emerged in the 1990s through either a decentralized or centralized change trajectory that was sponsored by donors. They aim to address some of the challenges of the 'fortress' types of conservation by combining principles of community-based natural resource management with a neoliberal approach to conservation, evident in the use of tourism as the main mechanism for accruing benefits from wildlife. The book illustrates the empirical relevance of these novel arrangements by presenting their growth in numbers and discuss how these arrangements differ in their form. With respect to the conservation and development impacts of these arrangements, we show that they have secured large amounts of land for conservation, but also generated governance challenges and disputes on tourism benefit sharing, affecting the stability of these arrangements to generate socioeconomic and conservation benefits.

eslsca business school paris yasser ramzi: How Organizations Manage the Future Hannes Krämer, Matthias Wenzel, 2018-06-27 This pioneering edited collection explores the question of how organizations manage the future. Moving away from traditional research which focuses on the past, the editors problematize the future as an inherent but under-examined part of organizing. Arguing that the future acts as both a driver of and a performative result of organizing, the book asks how organizations conceptualize and deal with the future and what processes are in place to handle things to come. With empirical research examining the practices, discourses and concepts that play key roles, organizations and their approaches are scrutinized. A timely compendium of theoretical discussion and practical implications on the relevance of the future, this book is essential reading for those interested in organization, sociology and management studies.
