fortifi business capital llc: Good Strategy Bad Strategy Richard Rumelt, 2011-07-19 Good Strategy/Bad Strategy clarifies the muddled thinking underlying too many strategies and provides a clear way to create and implement a powerful action-oriented strategy for the real world. Developing and implementing a strategy is the central task of a leader. A good strategy is a specific and coherent response to—and approach for—overcoming the obstacles to progress. A good strategy works by harnessing and applying power where it will have the greatest effect. Yet, Rumelt shows that there has been a growing and unfortunate tendency to equate Mom-and-apple-pie values, fluffy packages of buzzwords, motivational slogans, and financial goals with “strategy.” In Good Strategy/Bad Strategy, he debunks these elements of “bad strategy” and awakens an understanding of the power of a “good strategy.” He introduces nine sources of power—ranging from using leverage to effectively focusing on growth—that are eye-opening yet pragmatic tools that can easily be put to work on Monday morning, and uses fascinating examples from business, nonprofit, and military affairs to bring its original and pragmatic ideas to life. The detailed examples range from Apple to General Motors, from the two Iraq wars to Afghanistan, from a small local market to Wal-Mart, from Nvidia to Silicon Graphics, from the Getty Trust to the Los Angeles Unified School District, from Cisco Systems to Paccar, and from Global Crossing to the 2007–08 financial crisis. Reflecting an astonishing grasp and integration of economics, finance, technology, history, and the brilliance and foibles of the human character, Good Strategy/Bad Strategy stems from Rumelt’s decades of digging beyond the superficial to address hard questions with honesty and integrity.

[It] should be mandatory reading... — Minnesota Star Tribune More severe storms and rising seas will inexorably push the American coastline inland with profound impact on communities, infrastructure, and natural systems. In A New Coast, Jeffrey Peterson draws a comprehensive picture of how storms and rising seas will change the coast. Peterson offers a clear-eyed assessment of how governments can work with the private sector and citizens to be better prepared for the coming coastal inundation. Drawing on four decades of experience at the Environmental Protection Agency and the United States Senate, Peterson presents the science behind predictions for coastal impacts. He explains how current policies fall short of what is needed to effectively prepare for these changes and how the Trump Administration has significantly weakened these efforts. While describing how and why the current policies exist, he builds a strong case for a bold, new approach, tackling difficult topics including: how to revise flood insurance and disaster assistance programs; when to step back from the coast rather than build protection structures; how to steer new development away from at-risk areas; and how to finance the transition to a new coast. Key challenges, including how to protect critical infrastructure, ecosystems, and disadvantaged populations, are examined. Ultimately, Peterson offers hope in the form of a framework of new national policies and programs to support local and state governments. He calls for engagement from the private sector and local and national leaders in a “campaign for a new coast.” A New Coast is a compelling assessment of the dramatic changes that are coming to America’s coast. Peterson offers insights and strategies for policymakers, planners, and business leaders preparing for the intensifying impacts of climate change along the coast.

fortifi business capital llc: The Age of Surveillance Capitalism Shoshana Zuboff, 2019-01-15 The challenges to humanity posed by the digital future, the first detailed examination of the unprecedented form of power called surveillance capitalism, and the quest by powerful corporations to predict and control our behavior. In this masterwork of original thinking and research, Shoshana Zuboff provides startling insights into the phenomenon that she has named surveillance capitalism. The stakes could not be higher: a global architecture of behavior modification threatens human nature in the twenty-first century just as industrial capitalism disfigured the natural world in the twentieth. Zuboff vividly brings to life the consequences as surveillance capitalism advances from Silicon Valley into every economic sector. Vast wealth and power are accumulated in ominous new behavioral futures markets, where predictions about our behavior are bought and sold, and the production of goods and services is subordinated to a new means of behavioral modification. The threat has shifted from a totalitarian Big Brother state to a ubiquitous digital architecture: a Big Other operating in the interests of surveillance capital. Here is the crucible of an unprecedented form of power marked by extreme concentrations of knowledge and free from democratic oversight. Zuboff's comprehensive and moving analysis lays bare the threats to twenty-first century society: a controlled hive of total connection that seduces with promises of total certainty for maximum profit -- at the expense of democracy, freedom, and our human future. With little resistance from law or society, surveillance capitalism is on the verge of dominating the social order and shaping the digital future -- if we let it.

fortifi business capital llc: Democracy and Education John Dewey, 1916 . Renewal of Life by Transmission. The most notable distinction between living and inanimate things is that the former maintain themselves by renewal. A stone when struck resists. If its resistance is greater than the force of the blow struck, it remains outwardly unchanged. Otherwise, it is shattered into smaller bits. Never does the stone attempt to react in such a way that it may maintain itself against the blow, much less so as to render the blow a contributing factor to its own continued action. While the living thing may easily be crushed by superior force, it none the less tries to turn the energies which act upon it into means of its own further existence. If it cannot do so, it does not just split into smaller pieces (at least in the higher forms of life), but loses its identity as a living thing. As long as it endures, it struggles to use surrounding energies in its own behalf. It uses light, air, moisture, and the material of soil. To say that it uses them is to say that it turns them into means of its own conservation. As long as it is growing, the energy it expends in thus turning the environment to account is more than compensated for by the return it gets: it grows. Understanding the word control in this sense, it may be said that a living being is one that subjugates and controls for its own continued activity the energies that would otherwise use it up. Life is a self-renewing process through action upon the environment.

fortifi business capital llc: Century of Endeavour Roy H. W. Johnston, 2003 This work is the study of a family's century long involvement with Irish self rule and political freedom. Joe Johnston (1890-1972), from a Tyrone Presbyterian small-farm background, had 3 elder brothers who made their careers in the Indian Civil Service. The family were 'Home Rule within the Empire' supporters in the Ulster liberal tradition. After studying classics and ancient history in Trinity College Dublin (TCD) and then in Oxford, JJ became a Fellow of Trinity in 1913. He then published his anti-Carson book Civil War in Ulster, attacking the process which culminated in the 1914 Larne gun-running. He contributed significantly to the emergent national movement. He wrote critically about 1930s economic policies, and went on the serve in the Irish Senate/Sennad from 1939 to 1954. His son RJ (b.1929) was a pioneer of the student left in TCD in the 1940s, and was associated with the post-war attempt to bring European Marxist thinking into the Irish labour movement, with the foundation of the Irish Workers League in 1948. After a period in London in the early 1960s, he returned to Dublin, this time as a research scientist, and helped Cathal Goulding in his attempt to get the 1960s generation of republicans to go political, in a democratic left-wing mode, decoupling from the Stalinist incubus. He helped set the stage for the emergence of the Civil Rights approach to reform in Northern politics, as a means of opening up an all-Ireland perspective. His opponents in the Republican movement, the Provisionals, opted for violence . In the ensuing decades he participated in various politicising processes which may, in the end, show the counter-productive nature of the role of the gun in politics, in Ireland and elsewhere. Roy Johnston lives in Dublin and continues to be politically active. An important addition to any library of 20th century Irish Studies Professor J.Skelly

fortifi business capital llc: You Had Me at Pet-Nat Rachel Signer, 2021-10-19 From the publisher of Pipette Magazine, discover a natural wine-soaked memoir about finding your passion—and falling in love. It was Rachel Signer's dream to be that girl: the one smoking hand-rolled cigarettes out the windows of her 19th-century Parisian studio apartment, wearing second-hand Isabel Marant jeans and sipping a glass of Beaujolais redolent of crushed roses with a touch of horse mane. Instead she was an under-appreciated freelance journalist and waitress in New York City, frustrated at always being broke and completely miserable in love. When she tastes her first pétillant-naturel (pét-nat for short), a type of natural wine made with no additives or chemicals, it sets her on a journey of self-discovery, both deeply personal and professional, that leads her to Paris, Italy, Spain, Georgia, and finally deep into the wilds of South Australia and which forces her, in the face of her Wildman, to ask herself the hard question: can she really handle the unconventional life she claims she wants? Have you ever been sidetracked by something that turned into a career path? Did you ever think you were looking for a certain kind of romantic partner, but fell in love with someone wild, passionate and with a completely different life? For Signer, the discovery of natural wine became an introduction to a larger ethos and philosophy that she had long craved: one rooted in egalitarianism, diversity, organics, environmental concerns, and ancient traditions. In You Had Me at Pét-Nat, as Signer begins to truly understand these revolutionary wine producers upending the industry, their deep commitment to making their wine with integrity and with as little intervention as possible, she is smacked with the realization that unless she faces, head-on, her own issues with commitment, she will not be able to live a life that is as freewheeling, unpredictable, and singular as the wine she loves.

fortifi business capital llc: The Land of Enterprise Benjamin C. Waterhouse, 2017-04-11 This groundbreaking account of the development of American business from the colonial period to the present explains that the history of the United States can best be understood not as a search for freedom—but as a search for wealth and prosperity. The Land of Enterprise charts the development of American business from the colonial period to the present. It explores the nation’s evolving economic, social, and political landscape by examining how different types of enterprising activities rose and fell, how new labor and production technologies supplanted old ones—and at what costs—and how Americans of all stripes responded to the tumultuous world of business. In particular, historian Benjamin Waterhouse highlights the changes in business practices, the development of different industries and sectors, and the complex relationship between business and national politics. From executives and bankers to farmers and sailors, from union leaders to politicians to slaves, business history is American history, and Waterhouse pays tribute to the unnamed millions who traded their labor (sometimes by choice, often not) or decided what products to consume (sometimes informed, often not). Their story includes those who fought against what they saw as an oppressive system of exploitation as well as those who defended free markets from any outside intervention. The Land of Enterprise is not only a comprehensive look into our past achievements, but offers clues as to how to confront the challenges of today’s world: globalization, income inequality, and technological change.

Such growth should spark self-discovery, acquired discipline, and positive but difficult transition. Unfortunately, it often becomes an agonizng battle between the tendencies of a lonely entrepreneur and certain immutable laws of growth. The result is confusion, frustration, stagnation, loss of employee morale, and, at worst, financial failure. The good news is that Doug Tatum knows exactly what it takes to get through No Man's Land: a map, a high place from which to orient yourself, and navigational rules to help you track your progress. Through case studies and stories of successes and failures, No Man's Land will help you learn how to: • Align your growing company with its market. • Execute the necessary changes in your management. • Confirm that your financial model is scalable. • Attract money and make smart decisions about financing your business. If you're an entrepreneur, this book will help you make your company all it can be and all you want it to be.
