green circle wellness clinic: *Oncology Esthetics* Morag Currin, 2014

green circle wellness clinic: *Total Recovery* Gary Kaplan, 2014-05-06 About 100 million Americans live with some form of chronic pain—more than the combined number who suffer from diabetes, heart disease, and cancer. But chronic pain has always been a mystery. It often returns at the slightest provocation, even when doctors can't find anything wrong. Oddly enough, whether the pain is physical or emotional, traumatic or slight, our brains register all pain as the same thing, and these signals can keep firing in the nervous system for months, even years. In *Total Recovery*, Dr. Gary Kaplan argues that we've been thinking about disease all wrong. Drawing on dramatic patient stories and cutting-edge research, the book reveals that chronic physical and emotional pain are two sides of the same coin. New discoveries show that disease is not the result of a single event but an accumulation of traumas. Every injury, every infection, every toxin, and every emotional blow generates the same reaction: inflammation, activated by tiny cells in the brain, called microglia. Turned on too often from too many assaults, it can have a devastating cumulative effect. Conventional treatment for these conditions is focused on symptoms, not causes, and can leave patients locked into a lifetime of pain and suffering. Dr. Kaplan's unified theory of chronic pain and depression helps us understand not only the cause of these conditions but also the issues we must address to create a pathway to healing. With this revolutionary new framework in place, we have been given the keys to recover.

green circle wellness clinic: *Communities in Action* National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Population Health and Public

Health Practice, Committee on Community-Based Solutions to Promote Health Equity in the United States, 2017-04-27 In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. Communities in Action: Pathways to Health Equity seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

Vulnerable to systemic burnout when overstressed, the Hunter's modern challenge is to conserve energy for the long haul. With the optimal diet and lifestyle, the Warrior can overcome the quick-aging metabolic genes and experience a second, "silver," age of health. GenoType 6 The Nomad A GenoType of extremes, with a great sensitivity to environmental conditions—especially changes in altitude and barometric pressure, the Nomad is vulnerable to neuromuscular and immune problems. Yet a well-conditioned Nomad has the enviable gift of controlling caloric intake and aging gracefully. The author of the international bestseller Eat Right 4 Your Type again breaks new ground with the first diet plan based on your unique genetic code. Without expensive tests or a visit to the doctor, The GenoType Diet reveals previously hidden genetic strengths and weaknesses and provides a precise diet and lifestyle plan for every individual. green circle wellness clinic: The Cancer Revolution Leigh Erin Connealy, 2018-07-17 Integrative health pioneer offers her groundbreaking approach to treating (and preventing) cancer, based on 6 Revolutionary Findings, with a practical program and strategies. When it comes to cancer, conventional doctors are trained to treat their patients exclusively with surgery, radiation, and chemotherapy. These methods are grueling on the whole body--and they don't treat beyond the tumor or the cancer itself. The focus is on the disease, not the whole person--and because of this, the outcomes in conventional medicine can be bleak. But it doesn't have to be this way. Dr. Leigh Erin Connealy has developed a whole-person approach to treating cancer--and these treatments have helped thousands of patients through her Cancer Center for Healing. In *The Cancer Revolution*, Dr. Connealy shows you how to get to the root causes of cancer and the practical steps you can take to get back on the path to healing--from balancing your body's chemistry with nutritional supplements, following a healthy food plan, detoxifying your body and home, exercising regularly, getting deep restful sleep every night, practicing stress reduction techniques, and putting together a supportive healing team. Chemotherapy and radiation have their place in treatment, but in many cases, they are simply not enough, because cancer isn't caused by one thing, but by many different factors. All of these causes must be addressed, not just the tumor. *The Cancer Revolution* will equip you to make impactful, achievable lifestyle choices that fight the root of the disease, and that offer hope for recovery and a cancer-free life.

green circle wellness clinic: *The Immunotype Breakthrough* Heather Moday, 2021-12-21 A respected immunologist, allergist, and functional medicine doctor breaks down the latest science on immunity, offering "the most important guide available" (Mark Hyman, MD) to balancing your system for optimal health and longevity. To most of us, the immune system is seemingly unknowable—it's an invisible, complex network of cells, receptors, and messengers, and there's no standard way to see if it's functioning as it should. Yet in spite of this, it affects every aspect of our health, influencing (and sometimes even causing) nearly every disease known to humanity. Much

has been made about “boosting” immunity, but what exactly does that mean, and what if boosting isn't really what your unique system needs? In *The Immunotype Breakthrough*, Dr. Heather Moday explains that for most, immune system balance is key. Drawing on a wealth of cutting edge research and fascinating case studies, Dr. Moday explains that the immune system is fluid and significantly influenced by our behaviors, diet, habits, and environment. She identifies four primary Immunotypes—Smoldering, Weak, Hyperactive, and Misguided—that underlie the immune imbalances that commonly lead to disease, chronic inflammation, infection, allergies, and autoimmunity. By identifying your personal immunotype—where you fall on this immunity spectrum—you can intervene by making focused, individualized, natural lifestyle changes to ensure it functions optimally. Featuring engaging and accessible science, practical and customizable takeaways, and interactive quizzes to help you zero in on your specific needs, *The Immunotype Breakthrough* is a revolutionary program for creating an individualized lifestyle and diet that will lead to immune resilience, vitality, and longevity.

More than 117 million Americans, including children, are struggling with chronic health problems--and the numbers keep rising. In *A Nation of Unwell*, Dr. Gedroic--a Harvard-trained doctor in Morristown, New Jersey--explains how to stem the tide of rising chronic disease and illnesses today without depending on prescription medications. The problem is not with our bodies, she says, but instead with the way modern medicine currently diagnoses and treats illness and disease, making many believe there is no possibility of recovery. The body is like a seesaw, explains Dr. Gedroic. Our individual seesaw can get tipped from a nutrient-deficient diet, an unhealthy gut, toxins in the environment around us, and rampant inflammation. When our body gets out of balance, symptoms begin. Symptoms are the body's only way of communicating with us, explains Dr. Gedroic in *A Nation of Unwell*, which has been lauded by top doctors and best-selling authors Dr. Deepak Chopra, Dr. Andrew Weil, and Dr. Mehmet Oz. Rather than medicating symptoms to quiet these symptoms, we need to discover their root causes to be able to treat the body and help the body recover its health, for good. In *A Nation of Unwell*, Dr. Gedroic reveals: How to listen to and understand your symptoms and disease in a whole new way How to determine what your body needs when symptoms begin--and why it's important to question the long-term need for a prescription medication that treats only symptoms and not the root causes of an illness How to give your diet, personal care products, lifestyle, and environment a makeover for better health, starting today. How to get started on the path to wellness with a simple two-week plan. With *A Nation of Unwell*, health and wellness are truly within everyone's reach.
