In *Pride and Joy*, child psychologist Kenneth Barish brings together the best of recent advances in clinical and neuroscience research with the author's three decades of experience working with children and families. He shows how a deeper appreciation of our children's emotions offers parents a new understanding of their children's development and better solutions to the problems in their lives. Barish offers advice to parents on how we can restore more joyfulness and pride in our relationships with our children and how we can help children bounce back from disappointment and defeat. He shows how we can repair family relationships that have been damaged by frequent anger and resentment and how we can preserve our children's idealism and their concern for others--how we can raise children who feel good about themselves and also care about the needs and feelings of others. Barish also offers advice on how to solve problems of daily family life--establishing rules and limits, doing homework and going to sleep, winning and losing at games, our children's reluctance to talk to us, their tantrums and lack of motivation, and their addiction to television and video games. He presents down-to-earth recommendations for solving these common family problems--problems that too often erode the joyfulness of our children and our pleasure in being parents. *Pride and Joy* is both informative and highly practical, and a balanced answer to the extreme methods that too often dominate parenting debates. Few parenting books address the central issues of concern to today's parents while also offering parents as much day-to-day advice.

Award-winning gender and sexuality scholar Lillian Faderman traces the evolution of the meaning from Puritan ideas of God's plan for women to the sexual revolution of the 1960s and its reversals to the impact of such recent events as #metoo, the appointment of Amy Coney Barrett to the Supreme Court, the election of Kamala Harris as vice president, and the transgender movement. This wide-ranging 400-year history chronicles conflicts, retreats, defeats, and hard-won victories in both the private and the public sectors and shines a light on the often-overlooked battles of enslaved women and women leaders in tribal nations. As she underlines, the idea of womanhood in America continues to be contested.

**harris walz sticker mind your own damn business: The Tiger and the Cage** Emma Bolden, 2022-10-18 For readers of Susannah Cahalan's *Brain on Fire* and Porochista Khakpour's *Sick*, this exquisitely wrought debut memoir recounts a lifelong struggle with chronic pain and endometriosis, while speaking more broadly to anyone who's been told "it's all in your head" In Catholic grade school, Emma Bolden has a strange experience with a teacher that unleashes a short-lived, persistent coughing spell—something the medical establishment will later use against her as she struggles through chronic pain and fainting spells that coincide with her menstrual cycle. With *The Tiger and the Cage*, Bolden uses her own experience as the starting point for a journey through the institutional misogyny of Western medicine—from a history of labeling women "hysterical" and parading them as curiosities to a lack of information on causes or cures for endometriosis, despite more than a century of documented cases. Recounting botched surgeries and dire side effects from pharmaceuticals affecting her and countless others, Bolden speaks to the ways people are often failed by the official narratives of institutions meant to protect them. Bolden also interrogates a narrative commonly imposed on menstruating bodies: the expected story arc of marriage and children. She interrogates her body as a painful site she must mentally escape and a countdown she hopes to beat by having a child before a hysterectomy. Only later does she find language and acceptance for her asexuality and the life she needs to lead. Through all its gripping, devastating, and beautiful threads, *The Tiger and the Cage* says what Bolden and so many like her have needed to hear: I see you, and I believe you.

**harris walz sticker mind your own damn business: Collaborative Media** Jonas Löwgren, Bo Reimer, 2013-11-15 A thorough analysis of contemporary digital media practices, showing how people increasingly not only consume but also produce and even design media. With many new forms of digital media—including such popular social media as Facebook, Twitter, and Flickr—the people formerly known as the audience no longer only consume but also produce and even design media. Jonas Löwgren and Bo Reimer term this phenomenon collaborative media, and in this book they investigate the qualities and characteristics of these forms of media in terms of what they enable people to do. They do so through an interdisciplinary research approach that combines the social sciences and humanities traditions of empirical and theoretical work with practice-based, design-oriented interventions. Löwgren and Reimer offer analysis and a series of illuminating case studies—examples of projects in collaborative media that range from small multidisciplinary research experiments to commercial projects used by millions of people. Löwgren and Reimer discuss the case studies at three levels of analysis: society and the role of collaborative media in societal change; institutions and the relationship of collaborative media with established media structures; and tribes, the nurturing of small communities within a large technical infrastructure. They conclude by advocating an interventionist turn within social analysis and media design.

**harris walz sticker mind your own damn business: Politics Is for Power** Eitan Hersh, 2020-01-14 A brilliant condemnation of political hobbyism—treating politics like entertainment—and a call to arms for well-meaning, well-informed citizens who consume political news, but do not take political action. Who is to blame for our broken politics? The uncomfortable answer to this question starts with ordinary citizens with good intentions. We vote (sometimes) and occasionally sign a petition or attend a rally. But we mainly “engage” by consuming politics as if it’s a sport or a hobby. We soak in daily political gossip and eat up statistics about who’s up and who’s down. We tweet and post and share. We crave outrage. The hours we spend on politics are used mainly as pastime. Instead, we should be spending the same number of hours building political organizations, implementing a long-term vision for our city or town, and getting to know our neighbors, whose votes will be needed for solving hard problems. We could be accumulating power so that when there are opportunities to make a difference—to lobby, to advocate, to mobilize—we will be ready. But most of us who are spending time on politics today are focused inward, choosing roles and activities designed for our short-term pleasure. We are repelled by the slow-and-steady activities that characterize service to the common good. In *Politics Is for Power*, pioneering and brilliant data analyst Eitan Hersh shows us a way toward more effective political participation. Aided by political theory, history, cutting-edge social science, as well as remarkable stories of ordinary citizens who got off their couches and took political power seriously, this book shows us how to channel our energy away from political hobbyism and toward empowering our values.

Opposing groups, in their struggle to control the fate of the region and its resources, invoked different understandings of its past ♦ and different types of evidence ♦ to justify their actions. These controversies serve as case studies, as William Turkel examines how people interpret material traces to reconstruct past events, the conditions under which such interpretation takes place, and the role that this interpretation plays in historical consciousness and social memory. **harris walz sticker mind your own damn business: Smashing the Liquor Machine** Mark Lawrence Schrad, 2021-06-22 This is the history of temperance and prohibition as you've never read it before: redefining temperance as a progressive, global, pro-justice movement that affected virtually every significant world leader from the eighteenth through early twentieth centuries. When most people think of the prohibition era, they think of speakeasies, rum runners, and backwoods fundamentalists railing about the ills of strong drink. In other words, in the popular imagination, it is a peculiarly American history. Yet, as Mark Lawrence Schrad shows in *Smashing the Liquor Machine*, the conventional scholarship on prohibition is extremely misleading for a simple reason: American prohibition was just one piece of a global phenomenon. Schrad's pathbreaking history of prohibition looks at the anti-alcohol movement around the globe through the experiences of pro-temperance leaders like Vladimir Lenin, Leo Tolstoy, Thomás Masaryk, Kemal Atatürk, Mahatma Gandhi, and anti-colonial activists across Europe, Asia, Africa, and the Middle East. Schrad argues that temperance wasn't American exceptionalism at all, but rather one of the most broad-based and successful transnational social movements of the modern era. In fact, Schrad offers a fundamental re-appraisal of this colorful era to reveal that temperance forces frequently aligned with progressivism, social justice, liberal self-determination, democratic socialism, labor rights, women's rights, and indigenous rights. Placing the temperance movement in a deep global context, forces us to fundamentally rethink its role in opposing colonial exploitation throughout American history as well. Prohibitionism united Native American chiefs like Little Turtle and Black Hawk; African-American leaders Frederick Douglass, Ida Wells, and Booker T. Washington; suffragists

Elizabeth Cady Stanton, Susan B. Anthony, and Frances Willard; progressives from William Lloyd Garrison to William Jennings Bryan; writers F.E.W. Harper and Upton Sinclair, and even American presidents from Thomas Jefferson and Abraham Lincoln to Theodore Roosevelt and Woodrow Wilson. Progressives rather than puritans, the global temperance movement advocated communal self-protection against the corrupt and predatory liquor machine that had become exceedingly rich off the misery and addictions of the poor around the world, from the slums of South Asia to the beerhalls of Central Europe to the Native American reservations of the United States. Unlike many traditional dry histories, *Smashing the Liquor Machine* gives voice to minority and subaltern figures who resisted the global liquor industry, and further highlights that the impulses that led to the temperance movement were far more progressive and variegated than American readers have been led to believe.

In *TechGnosis*—a cult classic now updated and reissued with a new afterword—Erik Davis argues that while the realms of the digital and the spiritual may seem worlds apart, esoteric and religious impulses have in fact always permeated (and sometimes inspired) technological communication. Davis uncovers startling connections between such seemingly disparate topics as electricity and alchemy; online roleplaying games and religious and occult practices; virtual reality and gnostic mythology; programming languages and Kabbalah. The final chapters address the apocalyptic dreams that haunt technology, providing vital historical context as well as new ways to think about a future defined by the mutant intermingling of mind and machine, nightmare and fantasy.

**harris walz sticker mind your own damn business: The Political Brain** Drew Westen, 2008-05-06 *The Political Brain* is a groundbreaking investigation into the role of emotion in determining the political life of the nation. For two decades Drew Westen, professor of psychology and psychiatry at Emory University, has explored a theory of the mind that differs substantially from the more dispassionate notions held by most cognitive psychologists, political scientists, and economists -- and Democratic campaign strategists. The idea of the mind as a cool calculator that makes decisions by weighing the evidence bears no relation to how the brain actually works. When political candidates assume voters dispassionately make decisions based on the issues, they lose. That's why only one Democrat has been re-elected to the presidency since Franklin Roosevelt -- and only one Republican has failed in that quest. In politics, when reason and emotion collide, emotion invariably wins. Elections are decided in the marketplace of emotions, a marketplace filled with values, images, analogies, moral sentiments, and moving oratory, in which logic plays only a supporting role. Westen shows, through a whistle-stop journey through the evolution of the passionate brain and a bravura tour through fifty years of American presidential and national elections, why campaigns succeed and fail. The evidence is overwhelming that three things determine how people vote, in this order: their feelings toward the parties and their principles, their feelings toward the candidates, and, if they haven't decided by then, their feelings toward the candidates' policy positions. Westen turns conventional political analyses on their head, suggesting that the question for Democratic politics isn't so much about moving to the right or the left but about moving the electorate. He shows how it can be done through examples of what candidates have said -- or could have said -- in debates, speeches, and ads. Westen's discoveries could utterly transform electoral arithmetic, showing how a different view of the mind and brain leads to a different way of talking with voters about issues that have tied the tongues of Democrats for much of forty years -- such as abortion, guns, taxes, and race. You can't change the structure of the brain. But you can change the way you appeal to it. And here's how

**harris walz sticker mind your own damn business: Standing Up to Goliath** Rebecca Friedrichs, 2020-09-29 As seen on Fox & Friends! Rebecca Friedrichs tells real-life stories that expose state and national teachers' unions as the money and muscle behind the degradation of America's schools and culture. In a book that's both accessible and enlightening, Rebecca Friedrichs recounts her thirty-year odyssey as an elementary school teacher who comes face-to-face with the forces dividing and corrupting our schools and culture—state and national teachers' unions. An exciting true story that features real life testimonies of teachers, parents, and kids, as well as political and social commentary, Rebecca's journey leads her to the realization that the only hope for America's schools and families is returning authority to parents and teachers while lessening the grip of state and national unions that:

- Promote a culture of fear and bully teachers and parents into silence.
- Undermine parents' authority by sexually, socially, and politically indoctrinating kids.
- Use the apple-pie image of the PTA as a "front" to promote a partisan agenda.

These insights and more led Rebecca and nine other teachers to the US Supreme Court where their case, *Friedrichs v California Teachers Association, et al.*, sought to restore the First Amendment rights of all teachers and government employees. They argued no one should be forced to pay fees to abusive, politically driven unions, and were poised to change the very landscape of American education—until tragedy struck. Saddened but unbowed, Rebecca started a national movement, *For Kids and Country*, leading the charge of servant leaders who believe Judeo-Christian values (including kindness) and restoration of the teaching profession—possible only by rejecting state and national unions and forming "local only" associations—are the answers to America's woes. She invites you to join them. "America's teachers, parents, and kids deserve better," Rebecca writes. "If we want freedom, we're going to have to fight for it."

**harris walz sticker mind your own damn business: Faithful Resistance** Rick Ufford-Chase, 2016-05-23 Is it possible for a church that has been at the heart of Empire for as long as we have to make a course correction and move intentionally from the center of Empire to the margins? Rick Ufford-Chase has touched the deep longing that exists in so many of us who are Christian in the United States, and responded with ideas that offer a future we know God has in store for us but can't seem to imagine is really possible. This is a book we should read and discuss with friends who share our longing and are ready to take a risk. If this book stays in our heads, it fails and we fail. If we use it as a springboard for daring, it is quite likely to change everything about being church in the heart of Empire. Fourteen contributing authors offer their own ideas for ways to move the Christian church to a place of faithfulness in the midst of the empire, and Rick adds his own observations about the compromised condition of our church institutions with concrete suggestions for bringing us home to the heart of the gospel.
