Jonathan Reisman, M.D.—a physician, adventure traveler and naturalist—brings readers on an odyssey navigating our insides like an explorer discovering a new world with *The Unseen Body*. With unique insight, Reisman shows us how understanding mountain watersheds helps to diagnose heart attacks, how the body is made mostly of mucus, not water, and how urine carries within it a tale of humanity's origins. Through his offbeat adventures in healthcare and travel, Reisman discovers new perspectives on the body: a trip to the Alaskan Arctic reveals that fat is not the enemy, but the hero; a stint in the Himalayas uncovers the boundary where the brain ends and the mind begins; and eating a sheep's head in Iceland offers a lesson in empathy. By relating rich experiences in far-flung lands and among unique cultures back to the body's inner workings, he shows how our organs live inextricably intertwined lives—an internal ecosystem reflecting the natural world around us. Reisman offers a new and deeply moving perspective, and helps us make sense of our bodies and how they work in a way readers have never before imagined.

health and wellness book: The Light We Give Simran Jeet Singh, 2024-07-02 A National Bestseller "I love this book... It is rich in wisdom, religious and personal, and it is absolutely charming." —Anne Lamott, author of *Dusk, Night, Dawn* and *Help, Thanks, Wow* An inspiring approach to a happier, more fulfilling life through Sikh teachings on love and service. As a boy growing up in South Texas, Simran Jeet Singh and his brothers confronted racism daily: at school, in their neighborhood, playing sports, and later in college and beyond. Despite the prejudice and hate he faced, this self-described "turban-wearing, brown-skinned, beard-loving Sikh" refused to give in to negativity. Instead, Singh delved deep into the Sikh teachings that he grew up with and embraced the lessons to seek the good in every person and situation and to find positive ways to direct his energy. These Sikh tenets of love and service to others have empowered him to forge a life of connection and a commitment to justice that have made him a national figure in the areas of equity, inclusion, and social justice. *The Light We Give* lays out how we can learn to integrate ethical living to achieve personal happiness and a happier life. It speaks to those who are inspired to take on positive change but don't know where to begin. To those who crave the chance to be empathetic but are afraid of looking vulnerable. To those who seek the courage to confront hatred with love and compassion. Singh reaches beyond his comfort zone to practice this deeper form of living and explores how everyone can learn the insights and skills that have kept him engaged and led him to

commit to activism without becoming consumed by anger, self-pity, or burnout. Part memoir, part spiritual journey, *The Light We Give* is a transformative book of hope that shows how each of us can turn away from fear and uncertainty and move toward renewal and positive change.

health and wellness book: *Unlocking the Keto Code* Dr. Steven R. Gundry, MD, 2022-03-08
From the author of the New York Times bestselling *Plant Paradox* series comes this revolutionary take on the keto diet that debunks common myths and shows readers how to reap the rewards of keto with less restriction. Like many doctors and nutrition experts, bestselling author Dr. Steven Gundry has long endorsed the ketogenic diet—a style of eating that heavily restricts carbohydrate intake to make the body burn fat for fuel. Because ketosis offers a variety of health benefits, including weight loss, reduced risk of illness, and enhanced energy, Dr. Gundry believed his patients' efforts to adhere to the challenging regimen was worthwhile. That is, until his research uncovered a shocking truth: We've gotten keto all wrong. In *Unlocking the Keto Code*, Dr. Gundry reveals the biological mechanism that makes keto diets so successful: a cellular process known as "mitochondrial uncoupling." As it turns out, ketones are not the magical fuel source they've been made out to be; in fact, the body cannot run on ketones and fats alone. Over the long term, a very low carb-diet can lead to muscle wasting and poor cognitive health. Luckily, you don't have to

restrict all carbs to reap the benefits of ketosis; you simply have to have enough ketones and other plant compounds called polyphenols present in your body to “unlock” the process of mitochondrial uncoupling. In this insightful, empowering, eminently practical book. Dr. Gundry explains the many ways readers can ignite this process, from feasting on plant-based foods (carbs that are typically off-limits on a keto diet!) to enjoying ketone generating foods such as goat and sheep milk products, to implementing a timed eating schedule. You will even discover the real reason how superfoods, even apple cider vinegar, work their magic; and its not what they you think! Grounded in cutting-edge science, this is the book for all the people who have tried and failed on a keto diet; for vegetarians and vegans who want to go keto; and for anyone who wants to lose weight and enjoy better health while eating a wide variety of foods. With food lists, hacks, and all-new recipes, Unlocking the Keto Code makes going keto easy and enjoyable for the first time.

health and wellness book: In Defence of Food Michael Pollan, 2008-01-31 'A must-read ... satisfying, rich ... loaded with flavour' Sunday Telegraph This book is a celebration of food. By food, Michael Pollan means real, proper, simple food - not the kind that comes in a packet, or has lists of unpronounceable ingredients, or that makes nutritional claims about how healthy it is. More like the kind of food your great-grandmother would recognize. In Defence of Food is a simple invitation to junk the science, ditch the diet and instead rediscover the joys of eating well. By following a few pieces of advice (Eat at a table - a desk doesn't count. Don't buy food where you'd buy your petrol!), you will enrich your life and your palate, and enlarge your sense of what it means to be healthy and happy. It's time to fall in love with food again. For the past twenty years, Michael Pollan has been writing about the places where the human and natural worlds intersect: food, agriculture, gardens, drugs, and architecture. His most recent book, about the ethics and ecology of eating, is The Omnivore's Dilemma, named one of the ten best books of 2006 by the New York Times and the Washington Post. He is also the author of The Botany of Desire, A Place of My Own and Second Nature.
