house of wellness baraboo wi: *People of the Big Voice* Tom Jones, Michael Schmudlach, Matthew Daniel Mason, Amy Lonetree, George A. Greendeer, 2014-09-19 People of the Big Voice tells the visual history of Ho-Chunk families at the turn of the twentieth century and beyond as depicted through the lens of Black River Falls, Wisconsin studio photographer, Charles Van Schaick. The family relationships between those who "sat for the photographer" are clearly visible in these images—sisters, friends, families, young couples—who appear and reappear to fill in a chronicle spanning from 1879 to 1942. Also included are candid shots of Ho-Chunk on the streets of Black River Falls, outside family dwellings, and at powwows. As author and Ho-Chunk tribal member Amy Lonetree writes, "A significant number of the images were taken just a few short years after the darkest, most devastating period for the Ho-Chunk. Invasion, diseases, warfare, forced assimilation, loss of land, and repeated forced removals from our beloved homelands left the Ho-Chunk people in a fight for their culture and their lives." The book includes three introductory essays (a biographical essay by Matthew Daniel Mason, a critical essay by Amy Lonetree, and a reflection by Tom Jones)

and 300-plus duotone photographs and captions in gallery style. Unique to the project are the identifications in the captions, which were researched over many years with the help of tribal members and genealogists, and include both English and Ho-Chunk names.

house of wellness baraboo wi: Landscape Ecology in Theory and Practice Monica G. Turner, Robert H. Gardner, Robert V. O'Neill, 2007-05-08 An ideal text for students taking a course in landscape ecology. The book has been written by very well-known practitioners and pioneers in the new field of ecological analysis. Landscape ecology has emerged during the past two decades as a new and exciting level of ecological study. Environmental problems such as global climate change, land use change, habitat fragmentation and loss of biodiversity have required ecologists to expand their traditional spatial and temporal scales and the widespread availability of remote imagery, geographic information systems, and desk top computing has permitted the development of spatially explicit analyses. In this new text book this new field of landscape ecology is given the first fully integrated treatment suitable for the student. Throughout, the theoretical developments, modeling approaches and results, and empirical data are merged together, so as not to introduce barriers to the synthesis of the various approaches that constitute an effective ecological synthesis. The book also emphasizes selected topic areas in which landscape ecology has made the most contributions to our understanding of ecological processes, as well as identifying areas where its contributions have been limited. Each chapter features questions for discussion as well as recommended reading.

house of wellness baraboo wi: **Ten Days to Optimal Health** Kristina Amelong, 2006 This step-by-step guide to nutritional therapy and colon cleansing includes important self-help strategies for people who want to take responsibility for their own health and well-being. Author Kristina Amelong is a colon hydrotherapist and nutritional counselor who describes her own five-year battle with Irritable Bowel Syndrome and the tools she used to recover. The program that Kristina has designed includes the nutritional research work of Dr. Weston A. Price who studied the diets of fourteen traditional societies during the 1930s and 1940s. His goal was to understand what made human beings healthy and what allowed them to have perfect teeth. The food Kristina recommends to readers are the traditional foods that gave health to the populations that Price researched. When people remove accumulated waste material in their bowel, the body can regenerate with the nutrients available in the Weston A. Price diet. Detoxification and simple, nourishing foods cause people to thrive much like the disease-free native cultures that Price studied.

house of wellness baraboo wi: *What Works May Hurt—Side Effects in Education* Yong Zhao, 2018 Yong Zhao shines a light on the long-ignored phenomenon of side effects of education policies and practices, bringing a fresh and perhaps surprising perspective to evidence-based practices and policies. Identifying the adverse effects of some of the “best” educational interventions with examples from classrooms to boardrooms, the author investigates causes and offers clear recommendations. “A highly readable and important book about the side effects of education reforms. Every educator and researcher should take its lessons to heart.” —Diane Ravitch, New York University “A stunning analysis of the problems encountered in our efforts to improve education. If Yong Zhao has not delivered the death blow to naive empiricism, he has at least severely wounded it.” —Gene V. Glass, San José State University “This book is a brilliantly written analysis of

well-known educational change efforts followed by a concrete call for action that no policymaker, researcher, teacher, or education reform advocate should leave unread.” —Pasi Sahlberg, University of New South Wales, Sydney “Nothing less than the future of the republic is dealt with in this wonderful and crucial book about the field of educational research and policy.” —David C. Berliner, Arizona State University
