Nutritious and Delicious Dining: Food is an integral part of the Imagine Wellness experience. The community features a chef-prepared menu that caters to diverse dietary needs and preferences, ensuring that residents enjoy delicious, healthy meals in a welcoming atmosphere.

imagine wellness assisted living: *Social Isolation and Loneliness in Older Adults* National Academies of Sciences, Engineering, and Medicine, Division of Behavioral and Social Sciences and Education, Health and Medicine Division, Board on Behavioral, Cognitive, and Sensory

Sciences, Board on Health Sciences Policy, Committee on the Health and Medical Dimensions of Social Isolation and Loneliness in Older Adults, 2020-05-14 Social isolation and loneliness are serious yet underappreciated public health risks that affect a significant portion of the older adult population. Approximately one-quarter of community-dwelling Americans aged 65 and older are considered to be socially isolated, and a significant proportion of adults in the United States report feeling lonely. People who are 50 years of age or older are more likely to experience many of the risk factors that can cause or exacerbate social isolation or loneliness, such as living alone, the loss of family or friends, chronic illness, and sensory impairments. Over a life course, social isolation and loneliness may be episodic or chronic, depending upon an individual's circumstances and perceptions. A substantial body of evidence demonstrates that social isolation presents a major risk for premature mortality, comparable to other risk factors such as high blood pressure, smoking, or obesity. As older adults are particularly high-volume and high-frequency users of the health care system, there is an opportunity for health care professionals to identify, prevent, and mitigate the adverse health impacts of social isolation and loneliness in older adults. *Social Isolation and Loneliness in Older Adults* summarizes the evidence base and explores how social isolation and loneliness affect health and quality of life in adults aged 50 and older, particularly among low income, underserved, and vulnerable populations. This report makes recommendations specifically for clinical settings of health care to identify those who suffer the resultant negative health impacts of social isolation and loneliness and target interventions to improve their social conditions. *Social Isolation and Loneliness in Older Adults* considers clinical tools and methodologies, better education and training for the health care workforce, and dissemination and implementation that will be important for translating research into practice, especially as the evidence base for effective interventions continues to flourish.

imagine wellness assisted living: *The Maturing Marketplace* Euehun Lee, Anil Mathur, George Moschis, Jennifer Strautman, 2000-04-30 The buying habits of baby boomers really do differ from those of their parents. The authors show how marketers can use each group's consumption patterns to reach both markets most effectively. Another insight: buying habits of these groups differ according to the product or service offered. By analyzing each cohort's buying habits in various purchasing situations, the book dramatizes the need for customized marketing strategies. Based on two national surveys conducted by the Center for Mature Studies, Georgia State University, the book will be essential for marketing professionals and their academic colleagues. Moschis and his coauthors concentrate on food products, apparel, footwear, drugs and cosmetics, housing, technology products and telecommunications services, health care, travel and leisure, and financial and insurance services. They cover preferences for selected products and services, patronage habits, methods of purchasing, motives for preferences for specific brands and services and for payment methods, and reasons for buying direct. Each chapter addresses a specific product or service category and includes analyses of survey respondents by demographic and lifestyle characteristics and media use habits. The book concludes with a discussion of the implications of their research and the ways in which it will lead marketers to design more effective strategies, not only today but in the future.

imagine wellness assisted living: *Death Is But a Dream* Christopher Kerr, Carine Mardorossian, 2020-02-11 The first book to validate the meaningful dreams and visions that bring comfort as death nears. Christopher Kerr is a hospice doctor. All of his patients die. Yet he has cared for thousands of patients who, in the face of death, speak of love and grace. Beyond the physical realities of dying are unseen processes that are remarkably life-affirming. These include dreams that are unlike any regular dream. Described as more real than real, these end-of-life experiences

resurrect past relationships, meaningful events and themes of love and forgiveness; they restore life's meaning and mark the transition from distress to comfort and acceptance. Drawing on interviews with over 1,400 patients and more than a decade of quantified data, Dr. Kerr reveals that pre-death dreams and visions are extraordinary occurrences that humanize the dying process. He shares how his patients' stories point to death as not solely about the end of life, but as the final chapter of humanity's transcendence. Kerr's book also illuminates the benefits of these phenomena for the bereaved, who find solace in seeing their loved ones pass with a sense of calm closure. Beautifully written, with astonishing real-life characters and stories, this book is at its heart a celebration of our power to reclaim the dying process as a deeply meaningful one. *Death Is But a Dream* is an important contribution to our understanding of medicine's and humanity's greatest mystery.

imagine wellness assisted living: *The Big Shift* Marc Freedman, 2012-04-10 Marc Freedman, hailed by the New York Times as the voice of aging baby boomers [seeking] meaningful and sustaining work later in life, makes an impassioned call to accept the decades opening up between midlife and anything approximating old age for what they really are -- an entirely new stage of life, which he dubs the encore years. In *The Big Shift*, Freedman bemoans the fact that the discussion about longer lives in America has been entirely about the staggering economic costs of a dramatically aging society when, in reality, most of the nation's 78 million boomers are not getting old -- at least not yet. The whole 60- to 80-year-old period is simply new territory, he writes, and the people in this period constitute a whole new phenomenon in the 21st century. *The Big Shift* is animated by a simple premise: that the challenge of transitioning to and making the most of this new stage -- while deeply personal -- is much more than an individual problem; it's an urgent social imperative, one affecting all generations. By embracing this time as a unique period of life -- and providing guidance, training, education and support to the millions who are in it -- Freedman says that we can make a monument out of what so many think of as the leftover years. The result could be a windfall of talent that will carry us toward a new generation of solutions for growing problems in areas like education, the environment, and health care.

imagine wellness assisted living: *Mental Health and Relationships from Early Adulthood through Old Age* Paris S Strom, Robert D. Strom, 2024-05-14 This unique text encourages young adults to reflect on their prospective longevity for setting goals and making decisions, become aware of the aspirations and concerns of other generations, and consider personal direction in relation to peer group norms. The sources for learning about mental health and relationships include a blend of academic research, insights from literature, student interviews with older and younger relatives, and personal observations. Stages of adulthood including early adulthood, middle adulthood, retirement age, and old age, are described showing how people can pursue individual growth and nurture the mental health of relatives throughout life. The main themes of younger and middle-aged adults include stress, parenting, peer socialization, family conflict, career readiness, domestic abuse, intergenerational relationships, and mental health. In addition, the educational needs of older adults focus on mental health, family caregiving, grandparenting, physical and social health, problems of younger generations, retirement, loneliness and social isolation, elder abuse, death, grief, and recovery. All chapters conclude with a section about Generational Perspectives Activities, assignments with agenda for class and family discussions, problem-solving scenarios, key concepts, and criteria for self-evaluation. This will be of interest to undergraduate and graduate college students enrolled in lifespan courses offered by family studies, educational psychology, human development, counselling, social work, gerontology, nursing, and business.

imagine wellness assisted living: *Leading and Managing in the Social Sector* S. Aqeel Tirmizi, John D. Vogelsang, 2016-12-22 This book explores leadership and management in social sector

organizations, which include, NGOs, non-profits, social enterprises, social businesses, and cross-sector collaborations focusing on advancing human dignity and social justice. It provides social sector leaders with an overview of current trends, issues, and challenges in the field as well as best practices to foster effective programs, sustain organizations and meet the growing demands of the sector. The enclosed chapters cover topics such as cross-sector organizational design, innovation for client services, gender management dynamics, policy advocacy, and the growing social entrepreneurship movement. The social sector is currently in a vibrant, dynamic, and exciting stage. The sector's role and relevance to advancing human dignity and social justice is greater than ever. The number and types of social sector organizations have increased exponentially around the world and are offering extraordinary and much needed contributions toward an array of social issues. The traditional NGOs and non-profit organizations continue to be an integral part of the global civil society. At the same time, the emerging organizational forms under the social entrepreneurship umbrella are providing new momentum and excitement within and outside of the social sector. The interest in social entrepreneurship is encouraging existing social sector entities to actively embrace and encourage innovation. This interest is also inspiring a new breed of professionals and organizations to contribute to the social sector. This trend falls under the larger social sector dynamic promoting the creation of "hybrid" and emergent organizational forms, which cross and combine the traditional non-profit and for-profit domains. Despite the increased interest, the social sector still faces challenges around the world. CIVICUS – an international group promoting civil society organizations and groups-- recently reported a rise in the restrictions on civil society activities in a number of countries through worsening policy and legal environments. Funding challenges for the social sector are thus becoming more significant. At the same time, the calls for social sector accountability and emphasis on results and impact are growing. This book aims to offer approaches and tools which allow for the bridging of demands between creativity and accountability, between inspiration and results, and between gaining individual commitment and shared ownership of agendas and achievements, all of which are needed to effectively operate in the changing social sector.

imagine wellness assisted living: The Essence of Home William J. Brummett, 1997 Written for architects, designers, and anyone involved in planning and designing assisted living facilities, *The Essence of Home* offers a fresh look at an area of design that is becoming increasingly important as the elderly population continues to grow exponentially. Through in-depth interviews with residents, staff, administrators, and family members, as well as an exhaustive review of architectural and medical literature, author William Brummett has identified what it takes to make a facility feel like home. It is not enough to merely add cosmetic or decorative touches to the typical hospital or nursing home structure; rather, the facility must be designed specifically with a sense of home in mind, taking into account not only the physical capabilities and limitations of the residents, but the emotional and psychological needs as well. *The Essence of Home* looks at 38 significant problem-solving design considerations, and contains two in-depth case studies. Detailed illustrations and graphics provide a visual sense of the concepts discussed in the text. An annotated bibliography and comprehensive list of references provide additional sources of information.

imagine wellness assisted living: *Storying Later Life* Gary Kenyon, Ernst Bohlmeijer,

William L. Randall, 2010-12-20 In its brief but vigorous history, gerontology has spawned a broadening range of specializations. One of the newest of such specializations is narrative gerontology, so named for its emphasis on the biographical, or inside, dimensions of the experience of aging. Telling stories about our world, our relationships, and ourselves is fundamental to how we make meaning. Everything from our history to our religion and our memories to our emotions is linked to the tales we tell ourselves, and others, about where we have come from and where we are going. They are central to who we are. The biographical side of human life is every bit as critical to fathom as the biological side, if we seek a more balanced, positive, and optimistic perspective on what aging is about; if we would honor the dignity and complexity, the humanity and uniqueness of the lives of older persons, no matter what their health or economic standing. In this respect, a narrative approach is particularly suited to the exploration of such topics as meaning, spirituality, and wisdom, and the connections they share. This volume reflects a selection of new directions and insights, and constitutes a general broadening and deepening of narrative gerontology, exploring its implications for theory and research in the field of aging, and for the quality of life of older adults themselves. Such deepening indicates a greater refinement of thought, method, and intervention. The evolution of narrative gerontology is also evidenced by a significant increase in the number of faculty and graduate students engaged in research in this area, as well as by increasing collaboration among researchers, practitioners, and administrators in applying narrative insights to contexts such as long term care - indeed, healthcare in general. These initiatives have given rise to the phrase, narrative care as core care.

imagine wellness assisted living: *Wellness Counseling* Paul F Granello, 2013-04-09 This is the

eBook of the printed book and may not include any media, website access codes, or print supplements that may come packaged with the bound book. Developed by a professor who has been teaching a popular and innovative wellness counseling course for over a decade, this new text is organized into a format specifically designed to meet the needs of both counselor education graduate students and their teachers — making both teaching and learning the material easier and more intuitive. Giving a general but comprehensive overview of the subject of wellness, *Wellness Counseling* offers students a compelling balance of the science and research in the field, the theories that have emerged from this research, and the practical applications that we can take away from practicing these theories. Holistic, scientific, and ultimately concerned with the humanity of counseling, this text strives to be inclusive — especially of the psychological and social aspects of wellness that have gained more attention in recent years. The book is organized in three main sections. While Section One is concerned with the background of wellness as a healthcare paradigm in the United States and major theories of wellness, and historical context for wellness, Section Two

contains specific information on the social, physical, emotional, and cognitive domains of wellness. The last main section of the book synthesizes the first two sections of the book to extract practical applications of wellness in behavioral healthcare intervention counseling.

imagine wellness assisted living: *My Year of Rest and Relaxation* Ottessa Moshfegh, 2018-07-10 From one of our boldest, most celebrated new literary voices, a novel about a young woman's efforts to duck the ills of the world by embarking on an extended hibernation with the help of one of the worst psychiatrists in the annals of literature and the battery of medicines she prescribes Our narrator should be happy, shouldn't she? She's young, thin, pretty, a recent Columbia graduate, works an easy job at a hip art gallery, lives in an apartment on the Upper East Side of Manhattan paid for, like the rest of her needs, by her inheritance. But there is a dark and vacuous hole in her heart, and it isn't just the loss of her parents, or the way her Wall Street boyfriend treats her, or her sadomasochistic relationship with her best friend, Reva. It's the year 2000 in a city aglitter with wealth and possibility; what could be so terribly wrong? *My Year of Rest and Relaxation* is a powerful answer to that question. Through the story of a year spent under the influence of a truly mad combination of drugs designed to heal our heroine from her alienation from this world, Moshfegh shows us how reasonable, even necessary, alienation can be. Both tender and blackly funny, merciless and compassionate, it is a showcase for the gifts of one of our major writers working at the height of her powers.
