lake texoma dental care wellness: Atticus Finch Joseph Crespino, 2018-05-08 Who was the real Atticus Finch? A prize-winning historian reveals the man behind the legend The publication of Go Set a Watchman in 2015 forever changed how we think about Atticus Finch. Once seen as a paragon of decency, he was reduced to a small-town racist. How are we to understand this transformation? In Atticus Finch, historian Joseph Crespino draws on exclusive sources to reveal how Harper Lee's father provided the central inspiration for each of her books. A lawyer and newspaperman, A. C. Lee was a principled opponent of mob rule, yet he was also a racial paternalist. Harper Lee created the Atticus of Watchman out of the ambivalence she felt toward white southerners like him. But when a militant segregationist movement arose that mocked his values, she revised the character in To Kill a Mockingbird to defend her father and to remind the South of its best traditions. A story of family and literature amid the upheavals of the twentieth century, Atticus Finch is essential to understanding Harper Lee, her novels, and her times.

lake texoma dental care wellness: The Last Indian War Elliott West, 2011-05-27 This newest volume in Oxford's acclaimed Pivotal Moments series offers an unforgettable portrait of the

Nez Perce War of 1877, the last great Indian conflict in American history. It was, as Elliott West shows, a tale of courage and ingenuity, of desperate struggle and shattered hope, of short-sighted government action and a doomed flight to freedom. To tell the story, West begins with the early history of the Nez Perce and their years of friendly relations with white settlers. In an initial treaty, the Nez Perce were promised a large part of their ancestral homeland, but the discovery of gold led to a stampede of settlement within the Nez Perce land. Numerous injustices at the hands of the US government combined with the settlers' invasion to provoke this most accommodating of tribes to war. West offers a riveting account of what came next: the harrowing flight of 800 Nez Perce, including many women, children and elderly, across 1500 miles of mountainous and difficult terrain. He gives a full reckoning of the campaigns and battles--and the unexpected turns, brilliant stratagems, and grand heroism that occurred along the way. And he brings to life the complex characters from both sides of the conflict, including cavalymen, officers, politicians, and--at the center of it all--the Nez Perce themselves (the Nimiipuu, true people). The book sheds light on the war's legacy, including the near sainthood that was bestowed upon Chief Joseph, whose speech of surrender, I will fight no more forever, became as celebrated as the Gettysburg Address. Based on a rich cache of historical documents, from government and military records to contemporary interviews and newspaper reports, *The Last Indian War* offers a searing portrait of a moment when the American identity--who was and who was not a citizen--was being forged.

lake texoma dental care wellness: Columbia Crew Survival Investigation Report National Aeronautics and Space Administration, 2012-11-08 Human space flight is still in its infancy; spacecraft navigate narrow tracks of carefully computed ascent and entry trajectories with little allowable deviation. Until recently, it remained the province of a few governments. As private industry and more countries join in this great enterprise, we must share findings that may help protect those who venture into space. In the history of NASA, this approach has resulted in many improvements in crew survival. After the Apollo 1 fire, sweeping changes were made to spacecraft design and to the way crew rescue equipment was positioned and available at the launch pad. After the Challenger accident, a jettisonable hatch, personal oxygen systems, parachutes, rafts, and pressure suits were added to ascent and entry operations of the space shuttle. As we move toward a time when human space flight will be commonplace, there is an obligation to make this inherently risky endeavor as safe as feasible. Design features, equipment, training, and procedures all play a role in improving crew safety and survival in contingencies. In aviation, continual improvement in oxygen systems, pressure suits, parachutes, ejection seats, and other equipment and systems has been made. It is a core value in the aviation world to evaluate these systems in every accident and pool the data to understand how design improvements may improve the chances that a crew will survive in a future accident. The Columbia accident was not survivable. After the Columbia Accident Investigation Board (CAIB) investigation regarding the cause of the accident was completed, further consideration produced the question of whether there were lessons to be learned about how to improve crew survival in the future. This investigation was performed with the belief that a comprehensive, respectful investigation could provide knowledge that can protect future crews in the worldwide community of human space flight. Additionally, in the course of the investigation, several areas of research were identified that could improve our understanding of both nominal space flight and future spacecraft accidents. This report is the first comprehensive, publicly available accident investigation report addressing crew survival for a human spacecraft mishap, and it provides key information for future crew survival investigations. The results of this investigation are intended to add meaning to the sacrifice of the crew's lives by making space flight safer for all future generations. Many findings, conclusions, and recommendations have resulted from this investigation that will be valuable both to spacecraft designers and accident investigators. This report provides the reader an expert level of knowledge regarding the sequence of events that contributed to the loss of Columbia's crew on February 1, 2003 and what can be learned to improve the safety of human space flight for all future crews. It is the team's expectation that readers will approach the report with the respect and integrity that the subject and the crew of Columbia deserve.
