lake union wellness seattle: Accessible Vacations Simon J. Hayhoe, 2020-10-23 Having vision and hearing loss, or difficulties learning, remembering or getting around needn't stop us enjoying vacations to cultural places, either in our local cities or someone else's. Accessible Vacations is a problem-solving guide book on the most accessible museums, monuments and theaters for vacation visits or day-trips in twelve of the US's most visited cities. It describes accessible outings, activities, courses and exhibitions you may want to try out, and places to go and see great shows or movies using a simple five-step plan. Accessible Vacations is not exhaustive and won't sell you a hotel room or flight. It also won't tell you about diners in the local area, or the best souvenirs. It's written in the hope of making your life easier and more interesting in your leisure time, or to help in getting a cultural education. It also gives you a realistic, accessible picture of what's available in the US when you choose your destinations. Whether it's viewing paintings, watching musicals or walking trails, Accessible Vacations will show you that you can learn, find pleasure, develop personal interests, or build a life journey in the US's biggest cities. You just need to know where to go to make these activities possible, or how cultural places can help support you as elderly and frail folk. If you are a museum or theater professional, it will also let you know the

state of the art in the US, and which cities have the most accessible places. Accessible Vacations is in two main sections: •Section 1 includes ways you can get access to museums and theaters if you have problems with vision or hearing loss or difficulties with memory or learning, and includes information on: technologies, audio description, captions, special classes and performances, sign language, accessible mobile technologies. •Section 2 has a chapter each for a dozen big, accessible US cities, with listings of facilities for museums and theaters using this book's five-step plan. These cities were chosen because they are amongst the most visited in the US, they are spread throughout the country and they are the home of important cultural places that represent this country so well. They are also a mix of young and old cities, centres of the arts, different forms of art and centres of business. They include the east and west seaboard and the states of the north and south as well as the Mid-West.

lake union wellness seattle: The Art of Compassionate Business Bruno R. Cignacco, 2023-12-01 There are several well-ingrained assumptions regarding the dynamics of work and business activities, which can be refuted. Some examples of these widespread assumptions in business and work environments are employees being viewed as commodities, competitors perceived as threats, companies' resources seen as limited, and customers perceived as scarce and difficult. All this leads to the question: Is there a way to perform business activities more humanely? The second edition of this book challenges the reader to change the way they perform in business situations and become more focused on the human aspects of business activities. The users of this knowledge and those affected by them will undergo a profound transformation in the way they perform business activities. They will benefit from gradually testing and implementing the guidelines conveyed in this book, both in the business environment and in the workplace. When readers put these principles into practice, positive ripple effects are bound to affect other stakeholders of the organisation they work for or own. The author has refreshed all the concepts and examples introduced in the first edition which include aspects related to mission and vision, passion, business mindset, organisational learning, improvement of business conversations, use of constructive criticism, and betterment of relationships with the most relevant stakeholders (customers, suppliers, intermediaries, community, employees, etc.). The author also includes a discussion of creativity and the innovation process as well as other relevant aspects related to a healthy business environment and provides various real-life examples of companies which have adopted a loving attitude towards their stakeholders - which has become so important in the current business environment.

lake union wellness seattle: Building Seattle's State Route 99 Supertunnel Catherine Bassetti, Gregory Hauser, 2020-07-20 Building Seattle's State Route 99 Supertunnel: Journey from light to light is a photojournalistic book documenting the building of the State Route 99 deep-bore tunnel in Seattle, Washington—a historical transportation megaproject. 'Bertha' was the largest-diameter Earth Pressure Balance Tunnel Boring Machine at the time of delivery, and this project is the largest-diameter completed tunnel to-date. The underground drive ran beneath the downtown of Seattle for approximately two miles. This project provided the city with a new safe route, replacing the 65-year-old Alaskan Way Viaduct. The Viaduct was a major highway but was damaged during the 2001 Nisqually earthquake and deemed unsafe should future earthquakes occur. Though intended to be completed in two years, the endeavor was complicated as the TBM suddenly halted shortly after starting her journey, due to overheating and damage to the machine. The TBM was rescued from 120 feet below ground, via an Access Shaft. Once repaired, returned underground, and tested, it continued its route until reaching the final exit zone at the North Portal near the Seattle Center complex, on April 4, 2017. Governor Jay Inslee and other officials inaugurated the new SR 99 tunnel with a ribbon-cutting ceremony on February 2, 2019. The Alaskan Way Viaduct, a city fixture for 65 years, was demolished over the summer of 2019. Now the waterfront is unobstructed and plans for the renovation of the area commenced. Catherine Bassetti was the official on-site photographer for the project. This book covers all aspects of this Project from 2014-2019, including six work zones, all major events, and milestones. Also included are interviews with both key personnel and crew members of many trades. It includes narratives from the Labor Union workforce. Statements include those of State officials and major firms responsible for key engineering aspects. This book includes photographs of high quality and unique coverage following both the building of this high profile underground tunnel and the human stories of those who ultimately made it a success. This is a hardcover 'coffee table' First Edition with dust jacket in full color throughout. Concept, design, and photographs by the author, Catherine Bassetti.
