las brisas rehabilitation and wellness suites: **Volume Control** David Owen, 2019-10-29 The surprising science of hearing and the remarkable technologies that can help us hear better Our sense of hearing makes it easy to connect with the world and the people around us. The human system for processing sound is a biological marvel, an intricate assembly of delicate membranes, bones, receptor cells, and neurons. Yet many people take their ears for granted, abusing them with loud restaurants, rock concerts, and Q-tips. And then, eventually, most of us start to go deaf. Millions of Americans suffer from hearing loss. Faced with the cost and stigma of hearing aids, the natural human tendency is to do nothing and hope for the best, usually while pretending that nothing is wrong. In Volume Control, David Owen argues this inaction comes with a huge social cost. He demystifies the science of hearing while encouraging readers to get the treatment they need for hearing loss and protect the hearing they still have. Hearing aids are rapidly improving and becoming more versatile. Inexpensive high-tech substitutes are increasingly available, making it possible for more of us to boost our weakening ears without bankrupting ourselves. Relatively soon, physicians may be able to reverse losses that have always been considered irreversible. Even the insistent buzz of tinnitus may soon yield to relatively simple treatments and techniques. With wit and clarity, Owen explores the incredible possibilities of technologically assisted hearing. And he proves that ears, whether they're working or not, are endlessly interesting.

Government transactions—requesting a birth certificate, registering a property, or opening a business, for example—are the way that citizens and companies connect with the government. Efficient transactions enhance the business climate, citizen perception of government, and access to crucial public programs and services. In Latin America and the Caribbean, however, government transactions are often headaches. Public institutions rarely coordinate with each other, still rely on paper, and are more concerned about fulfilling bureaucratic requirements than meeting citizens' needs. *Wait No More* empirically confirms a reality known anecdotally but previously unquantified and offers a path to escape the bureaucratic maze.

Gibson, 2006-09 South of Phoenix's South Mountain, west of Interstate 10, north of the Gila River Indian Community, and east of Arizona state land lies the picturesque village of Ahwatukee-Foothills, home to some 87,000 people. Its proximity to adjacent cities, cultural centers, shopping, and dining

combines with these natural boundaries to give the area its beautiful topography, sense of peaceful isolation, and high desirability as a great place to live, work, and play. But long before there was a freeway, the area was part of the Kyrene farming community, a rural patchwork of hardy pioneer families typifying the country's agricultural way of life during the first half of the 20th century.

las brisas rehabilitation and wellness suites: Hemingway's Second War Alex Vernon, 2011-05-15 In 1937 and 1938, Ernest Hemingway made four trips to Spain to cover its civil war for the North American News Alliance wire service and to help create the pro-Republican documentary film *The Spanish Earth*. Hemingway's *Second War* is the first book-length scholarly work devoted to this subject. Drawing on primary sources, Alex Vernon provides a thorough account of Hemingway's involvement in the Spanish Civil War, a messy, complicated, brutal precursor to World War II that inspired Hemingway's great novel *For Whom the Bell Tolls*. Vernon also offers the most sustained history and consideration to date of *The Spanish Earth*. Directed by Joris Ivens, this film was a landmark work in the development of war documentaries, for which Hemingway served as screenwriter and narrator. Contributing factual, textual, and contextual information to Hemingway studies in general and his participation in the war specifically, Vernon has written a critical biography for Hemingway's experiences during the Spanish Civil War that includes discussion of the left-wing politics of the era and the execution of José Robles Pazos. Finally, the book provides readings of *For Whom the Bell Tolls* both in historical context and on its own terms. Marked by both impressive breadth and accessibility, Hemingway's *Second War* will be an indispensable resource for students of literature, film, journalism, and European history and a landmark work for readers of Ernest Hemingway.

las brisas rehabilitation and wellness suites: True Women Janice Woods Windle, 2012-03 Acclaim for *True Women* Janice Woods Windle has performed a family miracle. She recalls vivid scenes from her family's past, but also weaves them into a well-constructed novel. I know of no other book like it. Exciting storytelling. -James A. Michener Janice Woods Windle has looked into her own heritage and pulled out a great windstorm of a novel. *True Women* presents, a stable of women they breed best in Texas: strong, pound, vivid, unforgettable. With case studies from Rwanda, Ethiopia, South Sudan, South Africa, Australia, Cambodia,

Indonesia, Timor-Leste, Israel, Palestine, Argentina, Guatemala, El Salvador, the United States, Bosnia and Herzegovina, and Chechnya, the volume avoids a purely legal perspective to open the interpretation of post-genocidal societies, communities, and individuals to global and interdisciplinary perspectives that consider not only forgiveness and thus social harmony, but remembrance and disharmony. This volume will appeal to scholars across the social sciences with interests in memory studies, genocide, remembrance, and forgiveness.

They give special attention typologies and structures, social aspects. Strong building concepts and their interplay with the urban context and the inhabitants' individual spatial demands are also of great importance in the work of their firm ARTEC Architekten.

Ever since founding their firm in 1987, Götz and Manahl have contributed significantly to architectural discourse in Austria and abroad. Housing, a typology fundamentally shaping the city, is the core of their work. This manifesto-like book introduces the reader to the thinking and visions of ARTEC Architekten. It features a vast selection of projects, built and unrealized ones, through images and floor plans and sections, alongside six programmatic essays by Götz and Manahl. The book's design demonstrates visually what the texts elaborate upon in theory: their attitude to architecture's core topics, their design methods, and their ongoing engagement with history and present of habitation.
