liberty university online accounting: *Universal Economics* Armen Albert Alchian, William Richard Allen, 2018 Universal Economics is a new work that bears a strong resemblance to its two predecessors, University Economics (1964, 1967, 1972) and Exchange and Production (1969, 1977, 1983). Collaborating again, Professors Alchian and Allen have written a fresh presentation of the analytical tools employed in the economic way of thinking. More than any other principles textbook, Universal Economics develops the critical importance of property rights to the existence and success of market economies. The authors explain the interconnection between goods prices and productive-asset prices and how market-determined interest rates bring about the allocation of resources toward the satisfaction of consumption demands versus saving/investment priorities. They show how the crucial role of prices in a market economy cannot be well understood without a firm grasp of the role of money in a modern world. The Alchian and Allen application of information and search-cost analysis to the subject of money, price determination, and inflation is unique in the teaching of economic principles. No one has ever done price theory better than Alchian -- that is, no one has ever excelled Alchians ability to explain the reason, role, and nuances of prices, of competition, and of property rights. And only a precious few -- I can count them on my fingers -- have a claim for being considered to have done price theory as well as he did it. -- Donald Boudreaux, George Mason University. Armen A. Alchian (1914-2013), one of the twentieth century's great teachers of economic science, taught at UCLA from 1958 to 1984. Founder of the UCLA tradition in economics, he has become recognized as one of the most influential voices in the areas of market structure, property rights, and the theory of the firm. William R. Allen taught at Washington University prior to joining the UCLA faculty in 1952. Along with research primarily in international economics and the history of economic theory, he has concentrated on teaching economics. Universal Economics is his third textbook collaboration with Armen Alchian. Jerry L. Jordan wrote his doctoral dissertation under the direction of Armen Alchian. He was Dean of the School of Management at the University of New Mexico, a member of President Reagan's Council of Economic Advisors and of the U.S. Gold Commission, Director of Research of the Federal Reserve Bank of Saint Louis, and President and CEO of the Federal Reserve Bank of Cleveland.

It explored the grand scheme of world history as a product of real-life human beings pursuing their individual and collective interests. It also offered a global perspective on the past by focusing on both the distinctive characteristics of individual societies and the connections that have linked the fortunes of different societies. It has combined a clear chronological framework with the twin themes of traditions and encounters, which help to make the unwieldy story of world history both more manageable and more engaging. From the beginning, Traditions & Encounters offered an inclusive vision of the global past—one that is meaningful and appropriate for the interdependent world of contemporary times--

liberty university online accounting: Bureaucracy Ludwig Von Mises, 2017-04-25 Author Ludwig von Mises was concerned with the spread of socialist ideals and the increasing bureaucratization of economic life. While he does not deny the necessity of certain bureaucratic structures for the smooth operation of any civilized state, he disagrees with the extent to which it has come to dominate the public life of European countries and the United States. The author's purpose is to demonstrate that the negative aspects of bureaucracy are not so much a result of bad policies or corruption as the public tends to think but are the bureaucratic structures due to the very tasks these structures have to deal with. The main body of the book is therefore devoted to a comparison between private enterprise on the one hand and bureaucratic agencies/public enterprise on the other.

Authors may be tempted to sign the first version of a publication contract that they receive, especially if negotiating seems complicated, intimidating, or risky. But there is a lot at stake for authors in a book deal, and it is well worth the effort to read the contract, understand its contents, and negotiate for favorable terms. To that end, Understanding and Negotiating Book Publication Contracts identifies clauses that frequently appear in publishing contracts, explains in plain language what these terms (and typical variations) mean, and presents strategies for negotiating author-friendly versions of these clauses. When authors have more information about copyright and publication options for their works, they are better able to make and keep their works available in the ways they want--Publisher.

I see great changes taking place in our world, and the ripple effect has begun. The American people are seeking a higher standard for our land to rise up to, for you must truly come to define what it means to be an American. America is one of the greatest melting pots, for America does not belong to just you who have gained this honor through birth, America also belongs to those of other nations who have made it to these shores for a better life. It is at times difficult to be in such a predicament; especially, for those who've arrived in America at a very young age; that is belonging to two love. I shall not direct my efforts to point out the wrongs I have seen, but to let you see the beauty I carry in my heart, of maybe not your America, but the America I have found joy with; my America!

liberty university online accounting: Higher Education at Risk Sandra Featherman, 2023-07-03 Sandra Featherman believes that colleges are in denial about the severity of the threats to the current model of higher education. Based on her own experience as a president, as a trustee, and as a board member who has worked in private and public universities – and on interviews with the presidents of major institutions – she offers both a trenchant analysis of those threats and clear prescriptions about the painful but necessary decisions that colleges need to make to ensure they remain viable, accessible and affordable, and deliver a high-quality education. Sandra Featherman considers higher education to be at a game-changing moment. When markets don't function well – as is the case with today's college marketplace with offerings that cost too much and return too little – it opens the door to new types of suppliers, who offer new ways of providing what students are looking for, particularly the increasing cohort of mature, working students. In the face of new competitors – for-profit education companies, technology start-ups, and foreign universities vying for international students – trustees and senior level administrators are generally stuck in a traditional ethos and with decision-making processes unsuited to these times. They know what used to work, and find it easier to follow old ways than to make the difficult transition to new ways of delivering education. She lays out a strategy: that emphasizes the centrality of students and how to provide them with the most effective learning environment; that is clear-eyed about focusing on the core missions, and abandoning practices that constrain or impede them; and that requires constant self-monitoring to learn from and act upon what works. She offers a blueprint for redesigning institutions, for paring away what is unnecessary and cost ineffective, and for adopting the best technologies, all in the service of developing meaningful degree programs at an affordable price, and widening access for under-represented groups. She ranges over the implications of budget decisions, accreditation, and MOOCs; addresses government regulation and tuition costs; presents

promising new models; and concludes with 11 key recommendations that should be heeded by all higher education administrators and trustees.

Wilson, 2015-04-10 An annual prize is awarded for the best paper appearing in *Accounting Education*: an international journal, and this book contains the prize-winning papers for every year from 1992 to 2012. The journal's primary mission since the first issue was published in March 1992 has been to enhance the educational base of accounting practice, and all the papers in this book relate to that mission. These papers, reporting on research studies undertaken by accounting education scholars from around the world, build on research findings from the broader domain of education scholarship and embrace a wide array of topics - including: curriculum development, pedagogic innovation, improving the quality of learning, and assessing learning outcomes. Of particular interest are three themes, each of which runs through several of the papers: students' approaches to learning and learning style preferences; ethics and moral intensity; and innovation within the accounting curriculum. Accounting educators will find many ideas in the book to help them in enriching their work, and accounting education researchers will be able to identify many points of departure for extending the studies on which the papers report - whether comparatively or longitudinally. This book is a compilation of papers originally published in *Accounting Education*: an international journal.
