liguori accounting: Practice-Relevant Accrual Accounting for the Public Sector Hassan Ouda, 2020-10-23 This book addresses the necessary developments and adjustments that can be regarded as a promising starting point for making accrual accounting a more practice-relevant for the public sector entities. Specifically, the main focus is on Reshaping the application of accrual accounting principles and assumptions to fit the context of public sector entities; Developing a practice-relevant holistic accounting approach for governmental capital assets, which has been based on developing and reshaping the assets recognition criteria; Scope of general purpose financial reporting from an accountability perspective; Suggesting a sustainable accounting approach for reporting on the long-term fiscal sustainability; Developing a dynamic model for making public sector accrual accounting a more user practice relevant; and finally, Developing a theory of accounting information usefulness, which explains how cognitive aspects do influence the use/non-use of accounting information by the politicians. Fundamentally, the book has tackled these necessary developments and adjustments from both the producer's and the user's perspectives.

liguori accounting: The Routledge Handbook of Public Sector Accounting Tarek Rana, Lee Parker, 2023-11-03 The Routledge Handbook of Public Sector Accounting explores new developments and transformations in auditing, management control, performance measurement, risk management and sustainability work in the contemporary world of the public sector and the functioning of accounting and management in that realm. It focuses on critical analysis and reflection with respect to changing risk and crisis management patterns in the public sector in the current Covid- 19 and post- Covid- 19 era, across diverse social, political and institutional settings globally. This research-based edited book, targeted at scholars, professionals, teachers and consultants inthe fields of public sector accounting, auditing, accountability and management, offers high-level insights into the new architecture and execution of such activities in the emerging post-pandemic world. The chapters are written by leading scholars in the accounting and public administration disciplines internationally and provide important assessments, frameworks and recommendations concerning a wide variety of institutions, practices and policies with a view to addressing the many emerging societal, governmental and professional issues. Spanning theoretical, empirical and policy discussion contributions, the book’s chapters will be readily accessible to accounting, auditing and management audiences alike.

liguori accounting: *The Resilience of New Public Management* Irvine Lapsley, Peter Miller, 2024-02-06 The Resilience of New Public Management examines the role and significance of New Public Management (NPM) in contemporary society, and explores its emergence and resilience. Eminent scholars have said that NPM only existed from 1980-2000, and that we now live in a post-NPM world. This book tells a very different story. Evidence is presented in this book of 40 years of continuous NPM in public services, including government agencies,universities, and health care. NPM has diffused across sectors and globally since the 1980s, and in the process mutated to become modernization. It also coexists with alternative models of managing publicservices, including models such as digital era governance and network governance which were considered replacements for NPM. The capacity of NPM to mutate has caught many of its critics by surprise. This capacity for NPM to reinvent itself includes the adoption of Lean Management, the Toyota Production System. Early NPM adopter countries engaged with the use of Lean Management techniques, but late NPM adopters did not. The most recent alternative to NPM is Trust-based management, which has madesignificant advances in Scandinavian countries. However, Trust-based management is closely linked to proto-NPM and NPM practices and it has itself mutated to present itself as a friendlier and moresupportive version of NPM, which at the very least deserves close scrutiny. The above trends are indicative of the resilience of NPM, and its intuitive appeal for policymakers. Its advocates argue that NPM has the capacity to deliver policy outcomes, but this book shows that such claims and aspirations are not always matched by the evidence of NPM in action.

liguori accounting: *Handbook of Accounting, Accountability and Governance* Garry D. Carnegie, Christopher J. Napier, 2023-10-12 This Handbook explores how accounting, accountability and governance are interconnected, and demonstrates that they must operate effectively together in establishing good personal and organizational behaviour in entities of all types around the globe. It will be crucial for academic researchers working within the fields of accounting, economics, corporate governance, accountability, management and business and be beneficial for accounting, economics and management professionals seeking to clarify and expand upon their knowledge for effective application.

liguori accounting: Budgeting and Performance Management in the Public Sector Sara Giovanna Mauro, 2021-06-27 Public sector management and accounting scholarship has witnessed enormous change over the last four decades. Several reform paradigms have become well-known and disseminated worldwide, under acronyms such as NPM – New Public Management, NPG – New Public Governance, and PV – Public Value. At the start of a new decade, questions arise as to what will come next. This book reviews and investigates the key components of NPM, NPM and PV, and discusses what lies beyond these acronyms. It analyses the claimed benefits and drawbacks of each of the three paradigms, using reviews of the pertinent literature, as well as a raft of case studies.

The integration of theoretical and empirical insights contributes to a better understanding of what has changed and what has remained the same over the years. Specifically, this book stands out in its use of performance measurement and budgetary lenses to explore the multidimensional processes of reform and change in the public sector. By focusing on the crucially important transformations that have occurred in the field, reviewing several paradigms and analysing different practices from a longitudinal and comparative perspective, the book will be essential in guiding students and scholars of public management and accounting.

liguori accounting: The Role of the State and Accounting Transparency Mohammad Nurunnabi, 2016-03-17 Dr Mohammad Nurunnabi examines the factors that affect the implementation of International Financial Reporting Standards (IFRS) in developing countries and answers these specific research questions: - What is the relative impact of accounting regulatory frameworks and politico-institutional factors on the implementation of IFRS in developing countries? - How do cultural factors affect said implementation? - How does a study of implementing IFRS help to build an understanding of a theory of the role of the state in accounting change in developing countries? This follows a mixed methodology approach, in which interviews are conducted, IFRS-related enforcement documents and annual reports are evaluated. More than 138 countries have adopted IFRS, yet the International Accounting Standards Board (IASB) does not provide an implementation index. Financial reporting varies by country, even within the area of the world that has apparently adopted IFRS and Nurunnabi offers an important viewpoint that considers the issues of IFRS implementation from various perspectives. This is an invaluable resource for Undergraduate, Masters and PhD students, policy makers (at local, regional and international level) namely the IASB, World Bank, IMF, practitioners and users, giving them the necessary insight into the financial reporting environment and the state's attitude towards accounting transparency. Most importantly, this book contributes to military and democratic political regimes and the Max Weberian view of the theory of the role of the state's attitude towards accounting transparency.

liguori accounting: How Institutions Matter! Joel Gehman, Michael Lounsbury, Royston Greenwood, 2016-12-22 This double volume presents a collection of 23 papers on how institutions matter to socio-economic life. The effort was seeded by the 2015 Alberta Institutions Conference, which brought together 108 participants from 14 countries and 51 different institutions.

liguori accounting: Integrating Performance Management and Enterprise Risk Management Systems Rosanna Spanó, Claudia Zagaria, 2022-04-18 Integrating Performance Management and Enterprise Risk Management Systems offers a novel understanding of the multifaceted shades that surround the long called-for and yet not realised integration between performance management and enterprise risk management systems.

liguori accounting: Public Sector Reform and Performance Management in Developed Economies Zahirul Hoque, 2021-02-22 Over the past two decades, there has been a shift of paradigm in public administration and public sector accounting around the world with the increasing emphasis on outcomes as opposed to inputs and outputs focus. Understanding of how government departments and agencies develop and implement outcomes-based approaches to their services and programs to strengthen public accountability, financial scrutiny and good governance worldwide is limited. Covering a selection of international practices on outcomes-based approaches to government departments, agencies and public higher educational institutions in developed economies, this comprehensive compilation provides an essential reading in the public sector accounting, accountability and performance management field. The contributions are grouped into three jurisdictions: Australasia, UK and Europe, and North America. It incorporates outcomes-based practices in public services from advanced economies and will be of significant interest to global public sector regulators, consultants, researchers, and academic communities as well as academic researchers in public administration and development studies fields. The insights offered by a country-specific practice will also be useful to governments in other countries implementing similar systems and practices and facing similar socio-political environments. This book will also help to gain an understanding of the issues of government accountability from a management point of view as well as from a socio-political point of view.

liguori accounting: Management, Participation and Entrepreneurship in the Cultural and Creative Sector Martin Piber, 2020-06-24 This book elucidates and maps the societal impact of experience and heritage, participation, and entrepreneurship in the cultural sector. The contributions address and explore the relevance of culture, cultural entities, and heritage as collective memories and reservoirs of experience for other social systems, change and societal innovators like entrepreneurs. Insofar, cultural activities can be understood as a bridge between past experiences and future challenges. The first key focus is the participation of people in various contexts, initiatives, and projects. Such participation unleashes creativity and connects different societal layers – culture, economy, and innovation. Accordingly, a second focus is the entrepreneurial efforts and ideas that originate within arts and culture. Readers will find critical empirical and theoretical studies that challenge the current understandings of the cultural sector from different theoretical perspectives and with different methodological approaches. A variety of topics are explored within the thematic areas of cultural heritage, managerial practices, participation, and cultural entrepreneurship, as well as their inter-relations. Ultimately the aim is to provide the reader with a better understanding of the sometimes conflicting, sometimes mutually fertilizing areas of the arts, culture, business, management, and innovation. The book will be of interest to scholars, students, professionals, and policymakers.

liguori accounting: *Public Budgeting in Search for an Identity* Maria Francesca Sicilia, Ileana Steccolini, 2020-12-18 Public Budgeting in Search for an Identity: State of the Art and Future Challenges provides a state-of-the-art reflection on current trends in international public budgeting, representing an important pillar in the accumulation of knowledge on public sector budgeting processes, contents, evolutions and critical issues. Budgeting is central in public sector organizations. It performs a complex variety of functions, being the arena where multiple actors, cultures and professional identities interact, making it an extremely fascinating field and topic of investigation. There is a significant need and scope for exploring budgeting processes in the public sector today, as a consequence of the managerial waves of reforms that have taken place over the last few decades and the implementation of austerity programmes – as well as in light of current trends, including emerging challenges related to community care and wellbeing, rising inequality, people flows, climate change, pandemics, and the persistence of democratic deficits. The chapters in this volume address critical issues on this broad topic, offering new perspectives on current evolutions in public budgeting, including, among others, participatory budgeting, performance budgeting, the budgetary slack resources and the need to ensure balance between budget control and flexibility. These contributions show that public budgeting can, and must remain, the subject of enduring interest in our studies. The chapters in this book were originally published as a special issue of Public Management Review.

liguori accounting: Manager del futuro - 2 edizione Enzo Baglieri, 2023-11-28T00:00:00+01:00 Un buon manager deve possedere competenze tecniche e gestionali molto ampie e deve sviluppare visione strategica e consapevolezza della sostenibilità finanziaria, ambientale e sociale delle proprie decisioni. Il mestiere di manager richiede quindi attitudini, metodo e tanta preparazione. La formazione manageriale gioca, nello sviluppo di questa professionalità, un ruolo determinante, ancora troppo spesso sottovalutato. Immaginando un'azienda come una grande e complessa orchestra, in primo luogo un manager deve acquisire la consapevolezza circa le proprie aspettative professionali e le proprie inclinazioni attitudinali, per poter indirizzare il percorso di crescita tra l'orientamento al general management, da "direttore" delle diverse sezioni, e l'orientamento alla specializzazione, da "specialista", esperto di una disciplina e capace di integrarsi in un ambiente complesso. In secondo luogo, poiché nel ciclo di vita del nostro sviluppo professionale come leader responsabile, ci sono competenze e skill che dinamicamente diventano più essenziali di altre, è importante comprendere in quale fase investire in una o nell'altra direzione. Questa raccolta di contributi costituisce una bussola per comprendere meglio le differenze e le tipicità dei diversi percorsi di alta formazione manageriale e illustra quali sono le competenze essenziali per prepararsi alle sfide di questo mestiere in un futuro sempre meno prevedibile.

liguori accounting: Confession and Bookkeeping James Aho, 2012-02-01 Double-entry bookkeeping (DEB), modern capitalism's first and foremost calculative technology, was invented during the Middle Ages when profit making was morally stigmatized. James Aho examines the problematic of moneymaking and offers an explanatory understanding of the paradoxical coupling of profit seeking and morality by situating DEB in the religious circumstances from which it emerged, specifically the newly instituted sacrament of penance, that is, confession. Confession impacted the consciences of medieval businessmen both through its sacramental form and through its moral teachings. The form of confession produced widespread habits of moral scrupulosity (leading to compulsive record keeping); the content of confession taught that commerce itself was morally suspect. Scrupulous businessmen were thus driven to justify their affairs to church, commune, and themselves. With the aid of DEB, moneymaking was Christianized and Christianity was made more amenable to the pursuit of wealth. Although DEB is typically viewed exclusively as a scientifically neutral account of the flow of money through a firm, it remains as it was originally devised, a rhetorical argument.

liguori accounting: Tax Avoidance and Capital Structure Alessandro Gabrielli, 2023-05-23 This book provides a comprehensive overview of the implications of tax avoidance for a firm's capital structure, highlighting the key role played by free cash flow and agency conflicts. First, the book provides an outline of the theories and empirical evidence concerning the role of taxes in the Theory of Capital Structure. It reviews the studies investigating the relationship between agency conflicts and capital structure. The book explores the role of free cash flow and agency conflicts in the relationship between tax avoidance and capital structure. In the final section, the results of an empirical investigation conducted on a sample of U.S. public firms are also presented. The empirical research examines whether and how tax avoidance is associated with debt covenant violation across the stages of the corporate life cycle. Specifically, the research uses the concept of the corporate life cycle stage to analyse whether and how the association between tax avoidance and debt covenant violation varies in different agency settings. Consistent with the hypotheses drawn on the Agency Theory, the findings of the empirical research suggest life cycle stages moderate the association between tax avoidance and debt covenant violation. Overall, this book sheds light on the potential implications of tax avoidance activities for a firm's capital structure. The book will be of interest to both experienced and early-stage scholars interested in the topic. Moreover, the book will also be of interest to policymakers, investors, analysts, lenders, and other market participants.

liguori accounting: Trends, Challenges & Innovations in Management Dr Ramesh Kumar Miryala, 2015-03-15 Globalization has proliferated business with numerous challenges and opportunities, and simultaneously at other end the growth in economy, population, income and standard of living has redefined the scope of business and thus the business houses approaches. A highly competitive environment, knowledgeable consumers and quicker pace of technology are keeping business enterprises to be on their toes. Today management and its concepts have become key for survival of any business entity. The unique cultural characteristics, tradition and dynamics of consumer, demand an innovative management strategy to achieve success. Effective Management has become an increasingly vital ingredient for business success and it profoundly affects our day-to-day life. Today, the role of a business houses has changed from merely selling products and services to transforming lives and nurturing lifestyles. The Indian business is changing and so do the management strategies. These changing scenarios in the context of globalization will bestow ample issues, prospects and challenges which need to be explored. The practitioners, academicians and researchers need to meticulously review these aspects and acquaint them with knowledge to sustain in such scenarios. Thus, these changing scenarios emphasize the need of a broad-based research in the field of management also reflecting in management education. This book is an attempt in that direction. I sincerely hope that this book will provide insights into the subject to faculty members, researchers and students from the management institutes, consultants, practicing managers from industry and government officers.
