about face body laser wellness clinic: Crooked Cathryn Jakobson Ramin, 2017-05-09 The acclaimed author of *Carved in Sand*—a veteran investigative journalist who endured persistent back pain for decades—delivers the definitive book on the subject: an essential examination of all facets of the back pain industry, exploring what works, what doesn't, what may cause harm, and how to get on the road to recovery. In her effort to manage her chronic back pain, investigative reporter Cathryn Jakobson Ramin spent years and a small fortune on a panoply of treatments. But her discomfort only intensified, leaving her feeling frustrated and perplexed. As she searched for better solutions, she exposed a much bigger problem. Costing roughly \$100 billion a year, spine medicine—often ineffective and sometimes harmful —exemplified the worst aspects of the U.S. health care system. The result of six years of intensive investigation, *Crooked* offers a startling look at the poorly identified risks of spine medicine, and provides practical advice and solutions. Ramin interviewed scores of spine surgeons, pain management doctors, physical medicine and rehabilitation physicians, exercise physiologists, physical therapists, chiropractors, specialized bodywork practitioners. She met with many patients whose pain and desperation led them to make life-altering decisions, and with others who triumphed over their limitations. The result is a brilliant and comprehensive book that is not only important but essential to millions of back pain sufferers, and all types of health care professionals. Ramin shatters assumptions about surgery, chiropractic methods, physical therapy, spinal injections and painkillers, and addresses evidence-based rehabilitation options—showing, in detail, how to avoid therapeutic dead ends, while saving money, time, and considerable anguish. With *Crooked*, she reveals what it takes to outwit the back pain industry and get on the road to recovery.

about face body laser wellness clinic: The Murad Method Howard Murad, Dianne Lange, 2003-04-22 The renowned dermatologist's easy-to-follow, quick-results program to treat skin both inside and out, using widely available products Since 1972, Dr. Howard Murad has been studying the effects of the environment, nutrition, and lifestyle on skin and creating a skin-care program to slow the aging process. The Murad Method is the result of his three decades of clinical experience treating more than 40,000 men and women as well as independent research proving the effectiveness of the program. His unique approach to skin care combines external products and internal supplements in a simple regimen that will improve the texture and look of anyone's skin. This book clarifies the science behind what Dr. Murad believes is the next generation of skin care, an approach based on what he calls the Water Principle. Rather than relying on a single miracle ingredient, this breakthrough program includes a combination of exfoliants, polyphenols and other antioxidants, amino acids, fatty acids, and anti-inflammatory agents that enhance skin hydration. The Water Principle is the foundation of Dr. Murad's unique system for repairing and rejuvenating your skin. The skin is your body's largest organ, and The Murad Method is the first book to show you how its appearance directly reflects your overall health. The Murad Method has been clinically proven to: - boost hydration - reduce wrinkles - increase elasticity - improve sun protection By following a regimen that suits your skin type and requires just five minutes, morning and night, for five weeks, you will not only counter the damage that causes aging, but actually reverse the visible signs of aging and reduce wrinkles. Simple, clear charts show you how to customize an anti-aging regimen for your skin type and special concerns. You can assemble your own program, using either Murad or name-brand products. There is an extensive listing of products that contain the key ingredients Dr. Murad recommends in his anti-aging prescription to guide you. The information in this book will change the way you think about your skin--and give you the tools you need to make your skin look younger in five weeks.

about face body laser wellness clinic: Conspicuous Consumption in Africa Ilana van Wyk, Deborah Posel, 2019-05-01 A collection of essays examining cultures of consumption on the African continent From early department stores in Cape Town to gendered histories of sartorial success in urban Togo, contestations over expense accounts at an apartheid state enterprise, elite wealth and political corruption in Angola and Zambia, the role of popular religion in the political intransigence of Jacob Zuma, funerals of big men in Cameroon, youth cultures of consumption in Niger and South Africa, queer consumption in Cape Town, middle-class food consumption in Durban and the consumption of luxury handcrafted beads, this collection of essays explores the ways in which conspicuous consumption is foregrounded in various African contexts and historical moments. The essays in Conspicuous Consumption in Africa put Thorstein Veblen's concept under robust critical scrutiny, delving into the pleasures, stresses and challenges of consuming in its religious, generational, gendered and racialised aspects, revealing conspicuous consumption as a layered set of practices, textures and relations. This volume shows how central and revealing conspicuous consumption can be to fathoming the history of Africa's projects of modernity, and their global lineages and legacies. In its grounded, up-close case studies, it is likely to feed into current public debates on the nature and future of African societies – South African society in particular.

about face body laser wellness clinic: Mohs Micrographic Surgery Stephen N. Snow, George R. Mikhail, 2004 Mohs Micrographic Surgery, an advanced treatment procedure for skin cancer, offers the highest potential for recovery--even if the skin cancer has been previously treated. This procedure is a state-of-the-art treatment in which the physician serves as surgeon, pathologist,

and reconstructive surgeon. It relies on the accuracy of a microscope to trace and ensure removal of skin cancer down to its roots. This procedure allows dermatologists trained in Mohs Surgery to see beyond the visible disease and to precisely identify and remove the entire tumor, leaving healthy tissue unharmed. This procedure is most often used in treating two of the most common forms of skin cancer: basal cell carcinoma and squamous cell carcinoma. The cure rate for Mohs Micrographic Surgery is the highest of all treatments for skin cancer--up to 99 percent even if other forms of treatment have failed. This procedure, the most exact and precise method of tumor removal, minimizes the chance of regrowth and lessens the potential for scarring or disfigurement

about face body laser wellness clinic: *Consumerist Encounters* Sreedeeep Bhattacharya, 2020-08-14 Economic liberalization and globalization in India in the early 1990s resulted in a whirlwind of consumerist activities. New material and visual temptations swamped the markets. Expanding field of commodification infiltrated consumer minds through media imageries. New objects of desire aroused inhibited cravings. This engendered an accelerated and intensified relationship with things and images that permeate our everyday lives. *Consumerist Encounters* elucidates how our all-consuming relationship with objects and their representations have transformed rapidly over the last few decades in contemporary urban India. It argues that ephemerality, frivolousness, and multiplicity of choice regulate our flirtatious encounters with commodities and their images as we restlessly use, exhaust, dispose, and move on. Such a trend is illustrated by examining a plethora of commodity-centric phenomena such as exclusion through apparel, eroticization of body images, population of the T-shirt surface with graphics and text, rise of business process outsourcing, instantaneous seeing and sharing of images, and rejection of material goods in junkyards and ruins. These explorations collectively shed light on the constant negotiation of our identities, statuses, and mobilities in the image-saturated commodity landscape.
