accounting wsu: Giving Voice to Values in Accounting Tara Shawver, William Miller, 2018-10-11 There has been much written on the importance of responsibility accounting and integrated reporting to ensure business accountability, but not on how to be a responsible accountant. As the accounting profession is built on the foundation of maintaining public trust, making the right decisions when faced with a challenging dilemma has a major impact on the long-term performance and perception of the firm as well as personal credibility. Accountants make judgement calls on a regular basis: they are privy to highly confidential information regarding their clients and their clients' businesses. Unethical earnings management practices can easily lead to falsifying records, but how does the accounting professional avoid succumbing to these practices when faced with other pressures? Giving Voice to Values in Accounting is the first book to explain the ethical dilemmas faced by accountants in their day-to-day work and to provide clear guidance for accounting students and professionals in navigating through these issues. The Giving Voice to Values (GVV) framework focuses on resolving ethical conflict by encouraging individuals to act on their values. This book provides accounting educators, coaches, trainers and professionals with both the impetus and the tools to easily implement the GVV offering into their own work, their organizations and in the classroom.

accounting wsu: Handbook of Research on Facilitating Collaborative Learning Through Digital Content and Learning Technologies Keengwe, Jared, 2022-12-28 Digital content and learning technologies are now the norm at all levels of education. However, there is evidence to suggest that this digital shift is on a spectrum and the spectrum impacts learners in different ways. This means that some instructors who seek to integrate digital content may do so using traditional teaching methods while others use innovative practices to engage learners. Those who integrate innovative digital practices align their instructional practice with theories to facilitate student-centered pedagogies that support and improve the depth and scope of student learning. A primary characteristic of student-centered learning is facilitating collaborative learning using digital content and learning technologies to engage students as well as to enhance meaningful learning. The Handbook of Research on Facilitating Collaborative Learning Through Digital Content and Learning Technologies provides K-20 educators with alternative pedagogical and andragogical models that are innovative and incorporate digital content and learning technologies that promote constructive learning. Further, this book explores the relationship between constructivist learning, digital content, and learning technologies. A primary argument in this book is that constructivist teaching strategies such as collaborative learning coupled with digital content and purposeful learning technologies could benefit student learning in ways that are different from those practiced in traditional, non-digital learning environments. Covering topics such as instructional design, self-efficacy, and library engagement, this major reference work is an essential resource for pre-service teachers, teacher educators, faculty and administrators of K-20 education, librarians, researchers, and academicians.

Harrington, 2007-03-05 Food and Wine Pairing: A Sensory Experience provides a series of discussion and exercises ranging from identifying basic wine characteristics, including visual, aroma, taste (acid, sweetness, oak, tannin, body, etc.), palate mapping (acid, sweet, sour, bitter, and tannin), basic food characteristics and anchors of each (sweet, sour, bitter, saltiness, fattiness, body, etc). It presents how these characteristics contrast and complement each other. By helping culinary professionals develop the skills necessary to identifying the key elements in food or wine that will directly impact its matching based on contrast or similarities, they will then be able to predict excellent food and wine pairings.

accounting wsu: The Boy Who Shot the Sheriff Nancy Bartley, 2013-03-01 In 1931, a

12-year-old boy shot and killed the sheriff of Asotin, Washington. The incident stunned the small town and a mob threatened to hang him. Both the crime and Herbert Niccolls's eventual sentence of life imprisonment at the Washington State Penitentiary in Walla Walla drew national attention, only to be buried later in local archives. Journalist Nancy Bartley has conducted extensive research to construct a compelling narrative of the events and characters that make this a unique episode in the history of criminal justice in the United States. Niccolls became a cause for Father Flanagan of Boys Town, who took to the airwaves, imploring listeners to write Governor Hartley on the boy's behalf. The bitter campaign put Hartley in such a negative light that he lost his bid for reelection. Under a new and progressive warden, Niccolls thrived in prison. Inmates like physician Peter Miller and literary agent James Ashe became his tutors, finding that Niccolls had an insatiable appetite for knowledge. During the deadly 1934 prison riot at Walla Walla, several prisoners kept him from harm. Niccolls was finally released from prison in his early twenties. He went to work at 20th Century Fox in Hollywood, where he kept his secret for the rest of his long life. *The Boy Who Shot the Sheriff* explores this little-known story of a young boy's fate in the juvenile justice system during the bloodiest years in the nation's penitentiaries.
