akron general stow health and wellness: Roads to Health G. Geltner, 2019-08-02 In Roads to Health, G. Geltner demonstrates that urban dwellers in medieval Italy had a keen sense of the dangers to their health posed by conditions of overcrowding, shortages of food and clean water, air pollution, and the improper disposal of human and animal waste. He consults scientific, narrative, and normative sources that detailed and consistently denounced the physical and environmental hazards urban communities faced: latrines improperly installed and sewers blocked; animals left to roam free and carcasses left rotting on public byways; and thoroughfares congested by artisanal and commercial activities that impeded circulation, polluted waterways, and raised miasmas. However, as Geltner shows, numerous administrative records also offer ample evidence of the concrete measures cities took to ameliorate unhealthy conditions. Toiling on the frontlines were public functionaries generally known as viarii, or road-masters, appointed to maintain their community's infrastructures and police pertinent human and animal behavior. Operating on a parallel track were

the camparii, or field-masters, charged with protecting the city's hinterlands and thereby the quality of what would reach urban markets, taverns, ovens, and mills. *Roads to Health* provides a critical overview of the mandates and activities of the viarii and camparii as enforcers of preventive health and safety policies between roughly 1250 and 1500, and offers three extended case studies, for Lucca, Bologna, and the smaller Piedmont town of Pinerolo. In telling their stories, Geltner contends that preventive health practices, while scientifically informed, emerged neither solely from a centralized regime nor as a reaction to the onset of the Black Death. Instead, they were typically negotiated by diverse stakeholders, including neighborhood residents, officials, artisans, and clergymen, and fostered throughout the centuries by a steady concern for people's greater health.

Many antidepressants—the first line in our standard of care for treating depression—bring with them potential health risks, yet 1 in 6 Americans takes medication to alleviate feeling sad, anxious, stuck, or unable to focus or sleep. More and more, conventional medicine pathologizes how we respond to life's challenges—like feeling trapped in an unfulfilling job, grieving the death of a loved one, or being anxious about a bad relationship—telling us that they're symptoms of disease. Psychiatrist Jodie Skillicorn presents a new path, debunking the myth of the neurochemical imbalance and exploring the roots of depression, such as adverse childhood experiences (ACEs) and poorly managed day-to-day stress. Evidence-based and fully supported by current depression research, Dr. Skillicorn's holistic methods for beating depression—including nutrition, mindfulness, fostering meaningful connections, exercise, sleep, nature, and breathwork—empower readers to become agents of their own wholeness and healing.

Endoscopic therapy may soon allow less invasive bariatric revision procedures as well as a variety of primary obesity therapies for various patient populations. *Bariatric Endoscopy* reviews the management of obesity, normal post-surgical anatomy, endoscopic and medical management of post-surgical complications, and future endoscopic therapies for obesity management. akron general stow health and wellness: Our Lady of Kibeho Immaculee Ilibagiza, 2010-04-01
Thirteen years before the bloody 1994 genocide that swept across Rwanda and left more than a million people dead, the Virgin Mary and Jesus Christ appeared to eight young people in the remote village of Kibeho. Through these visionaries, Mary and Jesus warned of the looming holocaust, which they assured could be averted if Rwandans opened their hearts to God and embraced His love. Much like what happened at similar sites such as Fátima and Lourdes, the messengers of Kibeho were at first mocked and disbelieved. But as miracle after miracle occurred in the tiny village, tens of thousands of Rwandans journeyed to Kibeho to behold the apparitions. For years, countless onlookers watched as the Mother and Son of God spoke through the eight seers about God's love, sending messages that they insisted were meant not only for Rwandans, but for the entire world, to hear. Mary also sent messages to government and church leaders to instruct them how to end the ethnic hatred simmering in their country. She warned them that Rwanda would become "a river of blood" —a land of unspeakable carnage —if the hatred of the people was not quickly quelled by love. Some leaders listened, but very few believed: the prophetic and apocalyptic warnings tragically came true during 100 horrifying days of savage bloodletting and mass murder. After the genocide, and two decades of rigorous investigation, *Our Lady of Kibeho* became the first and only Vatican-approved Marian (that is, related to the Virgin Mary) site in all of Africa. But the story still remains largely unknown. Now, Immaculée Ilibagiza plans to change all that. She made many pilgrimages to Kibeho both before and after the holocaust, personally witnessed true miracles, and spoke with a number of the visionaries themselves. What she's discovered will deeply touch your heart.

Mark Mothersbaugh is a legendary figure for fans of both street art and music culture. Cofounder of

the seminal New Wave band DEVO, he was a prolific visual artist before the band's inception moving seamlessly between multiple mediums creating bold, cartoonish, strangely disturbed works of pop surrealism that playfully explore the relationship between technology and individuality. In the most comprehensive presentation of his work to date, Mark Mothersbaugh: Myopia features a lifetime of his creative inventions from the beginning of his artistic career in the 1970s to his most recent work, including early postcards, screen prints, decals, and DEVO ephemera as well as later paintings, photographs (such as the celebrated Beautiful Mutants series), sculpture, and rugs. Accompanied by a major six city traveling exhibition, this richly illustrated catalog positions Mothersbaugh as a pivotal figure in the history of both contemporary art and indie culture.
