mercy wellness spring branch: Communities in Action National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Population Health and Public Health Practice, Committee on Community-Based Solutions to Promote Health Equity in the United States, 2017-04-27 In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. Communities in Action: Pathways to Health Equity seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

mercy wellness spring branch: Next Medicine Walter Bortz, MD, 2011-01-03 Every year, the average American spends about \$7,300 on medical expenses. The typical Canadian pays \$2,700, the Briton only \$2,000. And yet, according to the World Health Organization, our healthcare system, in terms of total quality, ranks thirty-eighth in the world, right between Costa Rica and Slovenia. Not only do 40 million Americans lack health insurance, but more than 200,000 die each year because of medical mistakes. Our average life expectancy is lower than Cuba's. In Next Medicine, Dr. Walter Bortz zeroes in on why the American medicine is spiraling toward disaster. A physician with fifty years of experience and a leading authority on aging, Bortz argues that the financial interests of biotech and drug companies have distorted the healthcare system. Thanks to them, medicine today is economically motivated to treat disease rather than to prevent it. Heart disease, for example, is widely treated with drug interventions and invasive surgery--both of which are extravagantly profitable for pharmaceutical giants and hospitals. Daily exercise and a healthy diet, on the other hand, can prevent heart disease, and can be obtained by patients essentially for free--but there's no money in that. The medical-industrial complex has a vested interest in keeping us sick, and until that changes medicine will fail to effectively address the leading cause of disability and mortality today: chronic diseases like diabetes that are largely preventable. Bortz proposes a medical system that emphasizes personal responsibility and provides incentives for healthy lifestyle choices, along with new training for medical professionals. Through a lively narrative full of personal anecdotes and jarring statistics, Bortz makes a powerful case for a radically new medical system--one that is based on rigorous science and loosens the strangle hold of corporate interests on American health.

mercy wellness spring branch: The Well of Loneliness Radclyffe Hall, 2015-04-24 This early work by Radclyffe Hall was originally published in 1928 and we are now republishing it with a brand new introductory biography. 'The Well of Loneliness' is a novel that follows an upper-class Englishwoman who falls in love with another woman while serving as an ambulance driver in World War I. Marguerite Radclyffe Hall was born on 12th August 1880, in Bournemouth, England. Hall's first novel The Unlit Lamp (1924) was a lengthy and grim tale that proved hard to sell. It was only

published following the success of the much lighter social comedy *The Forge* (1924), which made the best-seller list of John O'London's Weekly. Hall is a key figure in lesbian literature for her novel *The Well of Loneliness* (1928). This is her only work with overt lesbian themes and tells the story of the life of a masculine lesbian named Stephen Gordon.

Meet Doctor Jens. She hasn't had a decent cup of coffee in fifteen years. Her workday begins when she jumps out of perfectly good space ships and continues with developing treatments for sick alien species she's never seen before. She loves her life. Even without the coffee. But Dr. Jens is about to discover an astonishing mystery: two ships, once ancient and one new, locked in a deadly embrace. The crew is suffering from an unknown ailment and the shipmind is trapped in an inadequate body, much of her memory pared away. Unfortunately, Dr. Jens can't resist a mystery and she begins doing some digging. She has no idea that she's about to discover horrifying and life-changing truths. Written in Elizabeth Bear's signature "rollicking, suspenseful, and sentimental" (Publishers Weekly) style, *Machine* is a fresh and electrifying space opera that you won't be able to put down.

mercy wellness spring branch: Reducing Risks for Mental Disorders Institute of Medicine, Committee on Prevention of Mental Disorders, 1994-01-01 The understanding of how to reduce risk factors for mental disorders has expanded remarkably as a result of recent scientific advances. This study, mandated by Congress, reviews those advances in the context of current research and provides a targeted definition of prevention and a conceptual framework that emphasizes risk reduction. Highlighting opportunities for and barriers to interventions, the book draws on successful models for the prevention of cardiovascular disease, injuries, and smoking. In addition, it reviews the risk factors associated with Alzheimer's disease, schizophrenia, alcohol abuse and dependence, depressive disorders, and conduct disorders and evaluates current illustrative prevention programs. The models and examination provide a framework for the design, application, and evaluation of interventions intended to prevent mental disorders and the transfer of knowledge about prevention from research to clinical practice. The book presents a focused research agenda, with recommendations on how to develop effective intervention programs, create a cadre of prevention

researchers, and improve coordination among federal agencies.

mercy wellness spring branch: *How I Survived a Chinese "Reeducation" Camp* Gulbahar Haitiwaji, Rozenn Morgat, 2022-02-22 The first memoir about the reeducation camps by a Uyghur woman. "I have written what I lived. The atrocious reality." — Gulbahar Haitiwaji to Paris Match Since 2017, more than one million Uyghurs have been deported from their homes in the Xinjiang region of China to "reeducation camps." The brutal repression of the Uyghurs, a Turkish-speaking Muslim ethnic group, has been denounced as genocide, and reported widely in media around the world. The Xinjiang Papers, revealed by the New York Times in 2019, expose the brutal repression of the Uyghur ethnicity by means of forced mass detention—the biggest since the time of Mao. Her name is Gulbahar Haitiwaji and she is the first Uyghur woman to write a memoir about the 'reeducation' camps. For three years Haitiwaji endured hundreds of hours of interrogations, torture, hunger, police violence, brainwashing, forced sterilization, freezing cold, and nights under blinding neon light in her prison cell. These camps are to China what the Gulags were to the USSR. The Chinese government denies that they are concentration camps, seeking to legitimize their existence in the name of the "total fight against Islamic terrorism, infiltration and separatism," and calls them "schools." But none of this is true. Gulbahar only escaped thanks to the relentless efforts of her daughter. Her courageous memoir is a terrifying portrait of the atrocities she endured in the Chinese gulag and how the treatment of the Uyghurs at the hands of the Chinese government is just the latest example of their oppression of independent minorities within Chinese borders. The Xinjiang region where the Uyghurs live is where the Chinese government wishes there to be a new "silk route," connecting Asia to Europe, considered to be the most important political project of president Xi Jinping.

mercy wellness spring branch: *Long Road to Mercy* David Baldacci, 2018-11-13 Introducing a remarkable new character from #1 New York Times bestselling writer David Baldacci: Atlee Pine, an FBI agent with special skills assigned to the remote wilds of the southwestern United States who must confront a new threat . . . and an old nightmare. Eeny, meeny, miny, moe. Catch a tiger by its toe. It's seared into Atlee Pine's memory: the kidnapper's chilling rhyme as he chose between

six-year-old Atlee and her twin sister, Mercy. Mercy was taken. Atlee was spared. She never saw Mercy again. Three decades after that terrifying night, Atlee Pine works for the FBI. She's the lone agent assigned to the Shattered Rock, Arizona resident agency, which is responsible for protecting the Grand Canyon. So when one of the Grand Canyon's mules is found stabbed to death at the bottom of the canyon-and its rider missing-Pine is called in to investigate. It soon seems clear the lost tourist had something more clandestine than sightseeing in mind. But just as Pine begins to put together clues pointing to a terrifying plot, she's abruptly called off the case. If she disobeys direct orders by continuing to search for the missing man, it will mean the end of her career. But unless Pine keeps working the case and discovers the truth, it could spell the very end of democracy in America as we know it... Love it! --Lisa Gardner Atlee Pine is unforgettable. --James Patterson David Baldacci's best yet. --Lisa Scottoline Heart-poundingly suspenseful. --Scott Turow A stunning debut. --Douglas Preston A perfect blend of action, secrets, and conspiracies. --Steve Berry Baldacci is at the top of his game. --Kathy Reichs

mercy wellness spring branch: Pragmatics of Human Communication: A Study of Interactional Patterns, Pathologies and Paradoxes Paul Watzlawick, Janet Beavin Bavelas, Don D. Jackson, 2011-04-25 The properties and function of human communication. Called "one of the best books ever about human communication," and a perennial bestseller, Pragmatics of Human Communication has formed the foundation of much contemporary research into interpersonal communication, in addition to laying the groundwork for context-based approaches to psychotherapy. The authors present the simple but radical idea that problems in life often arise from issues of communication, rather than from deep psychological disorders, reinforcing their conceptual explorations with case studies and well-known literary examples. Written with humor and for a variety of readers, this book identifies simple properties and axioms of human communication and demonstrates how all communications are actually a function of their contexts. Topics covered in this wide-ranging book include: the origins of communication; the idea that all behavior is communication; meta-communication; the properties of an open system; the family as a system of communication; the nature of paradox in psychotherapy; existentialism and human communication.

Principles of Management is designed to meet the scope and sequence requirements of the introductory course on management. This is a traditional approach to management using the leading, planning, organizing, and controlling approach. Management is a broad business discipline, and the Principles of Management course covers many management areas such as human resource management and strategic management, as well as behavioral areas such as motivation. No one individual can be an expert in all areas of management, so an additional benefit of this text is that specialists in a variety of areas have authored individual chapters.

mercy wellness spring branch: The Ministry of Healing Ellen Gould Harmon White, 1909 This book has been around a while. Since it was first published, a lot of other books about health have come and gone. Some of them have been bigger than this one, but none of them have ever been better. Perhaps you have noticed the explosion in diet and exercise publications. Today it is obvious that the pursuit of health and fitness is more than just a quick fad. Looking and feeling good isn't optional, for many people these days, it's a high lifestyle priority. The Ministry of Healing is a book that crusades for total fitness, not just physical fitness because we are human beings and are more

than just bodies. This book speaks to the needs of the whole person, body, mind and spirit. For a whole lot less than one visit to the Doctor, this classic on health will tell you how to manage stress, get well and prevent disease while feeling vibrantly alive. - The True Medical Missionary. mercy wellness spring branch: *Biomedical Ethics and the Law* James M. Humber, Robert F. Almeder, 2012-12-06 In the past few years an increasing number of colleges and universities have added courses in biomedical ethics to their curricula. To some extent, these additions serve to satisfy student demands for relevance. But it is also true that such changes reflect a deepening desire on the part of the academic community to deal effectively with a host of problems which must be solved if we are to have a health-care delivery system which is efficient, humane, and just. To a large degree, these problems are the unique result of both rapidly changing moral values and dramatic advances in biomedical technology. The past decade has witnessed sudden and conspicuous controversy over the morality and legality of new practices relating to abortion, therapy for the mentally ill, experimentation using human subjects, forms of genetic intervention, suicide, and euthanasia. Malpractice suits abound and astronomical fees for malpractice insurance threaten the very possibility of medical and health-care practice. Without the backing of a clear moral consensus, the law is frequently forced into resolving these conflicts only to see the moral issues involved still hotly debated and the validity of existing law further questioned. In the case of abortion, for example, the laws have changed radically, and the widely publicized recent conviction of Dr. Edelin in Boston has done little to foster a moral consensus or even render the exact status of the law beyond reasonable question.

Divided into thematic sections, part one covers the history and natural course of the care, policies and laws that have been developed over the years for persons with disabilities, as well as the biomechanics and technology of wheelchair sports and adaptive sports prostheses. The medical considerations of the adaptive athlete comprise part two, including injury epidemiology, emergent

care, and surgical and rehabilitative considerations. Part three, by far the most extensive section, discusses specific wheelchair and adaptive sports, including adaptive running, cycling, water sports and throwing sports, wheelchair basketball, softball and rugby, as well as adaptive combative and extreme sports. Selected topics, including event planning, advocacy and controversies such as doping, are covered in part four. A comprehensive yet practical text, *Adaptive Sports Medicine* is a go-to resource and will be an invaluable reference for any sports medicine or primary medicine practitioner working with this unique population.

mercy wellness spring branch: Age-Friendly Health Systems Terry Fulmer, Leslie Pelton, Jinghan Zhang, 2022-02 According to the US Census Bureau, the US population aged 65+ years is expected to nearly double over the next 30 years, from 43.1 million in 2012 to an estimated 83.7 million in 2050. These demographic advances, however extraordinary, have left our health systems behind as they struggle to reliably provide evidence-based practice to every older adult at every care interaction. Age-Friendly Health Systems is an initiative of The John A. Hartford Foundation and the Institute for Healthcare Improvement (IHI), in partnership with the American Hospital Association (AHA) and the Catholic Health Association of the United States (CHA), designed Age-Friendly Health Systems to meet this challenge head on. Age-Friendly Health Systems aim to: Follow an essential set of evidence-based practices; Cause no harm; and Align with What Matters to the older adult and their family caregivers.

mercy wellness spring branch: **The High House** Jessie Greengrass, 2022-01-04 Shortlisted for the 2021 Costa Novel Award In this powerful, highly anticipated novel from an award-winning author, four people attempt to make a home in the midst of environmental disaster. Perched on a sloping hill, set away from a small town by the sea, the High House has a tide pool and a mill, a vegetable garden, and, most importantly, a barn full of supplies. Caro, Pauly, Sally, and Grandy are safe, so far, from the rising water that threatens to destroy the town and that has, perhaps, already destroyed everything else. But for how long? Caro and her younger half-brother, Pauly, arrive at the High House after her father and stepmother fall victim to a faraway climate disaster—but not before they call and urge Caro to leave London. In their new home, a converted summer house cared for by Grandy and his granddaughter, Sally, the two pairs learn to live together. Yet there are limits to their safety, limits to the supplies, limits to what Grandy—the former village caretaker, a man who knows how to do everything—can teach them as his health fails. A searing novel that takes on parenthood, sacrifice, love, and survival under the threat of extinction, The High House is a stunning, emotionally precise novel about what can be salvaged at the end of the world.
