nbt bank business loans: Tajikistan's Difficult Development Path Martha Brill Olcott, 2012-11-27 Tajikistan teeters on the brink of failure. This mountainous and landlocked country, the poorest in Central Asia, confronts the challenges of good governance and economic survival. These domestic struggles become even more problematic as international forces prepare to withdraw from neighboring Afghanistan, leaving Central Asian countries to ensure regional stability. In Tajikistan's Difficult Development Path, Martha Brill Olcott traces the political, economic, and social change following the country's independence and international efforts to avert state collapse. The Tajik government's commitment to reform has been inconsistent, and substantial foreign assistance provided since the end of the country's civil war has not led to the desired economic and political development. Olcott concludes that the Tajik leadership faces a serious dilemma: fully embrace reform or continue moving toward state failure. Tajikistan's decision will have very real implications for this troubled region.

The external position continues to deteriorate, putting pressure on the somoni and eroding already low external buffers. The financial sector of Tajikistan is dominated by banks, which account for 84 percent of total financial sector assets. Dollarization in the financial sector has been increasing and remains a challenge for foreign exchange risk and credit risk management.

Asia and Pacific Dept, 2021-08-04 Swift implementation of containment measures, limited spillovers from tourism, and COVID-related fiscal spending financed by buoyant fishing revenues and donor grants have allowed Tuvalu—a fragile Pacific micro-state—avoid a recession in 2020. The economy is expected to expand by 2.5 percent in 2021,

supported by fiscal expenditures and resumption of infrastructure projects. But significant challenges remain: Tuvalu is vulnerable to the effects of climate change, its economy is dominated by the public sector, and its revenue base is narrow. Uncertainty around donor commitments complicates fiscal planning.
