nc laser wellness skincare: Mohs Micrographic Surgery Stephen N. Snow, George R. Mikhail, 2004 Mohs Micrographic Surgery, an advanced treatment procedure for skin cancer, offers the highest potential for recovery--even if the skin cancer has been previously treated. This procedure is a state-of-the-art treatment in which the physician serves as surgeon, pathologist, and reconstructive surgeon. It relies on the accuracy of a microscope to trace and ensure removal of skin cancer down to its roots. This procedure allows dermatologists trained in Mohs Surgery to see beyond the visible disease and to precisely identify and remove the entire tumor, leaving healthy tissue unharmed. This procedure is most often used in treating two of the most common forms of skin cancer: basal cell carcinoma and squamous cell carcinoma. The cure rate for Mohs Micrographic Surgery is the highest of all treatments for skin cancer--up to 99 percent even if other forms of treatment have failed. This procedure, the most exact and precise method of tumor removal, minimizes the chance of regrowth and lessens the potential for scarring or disfigurement.

nc laser wellness skincare: *Strategic Management of Health Care Organizations* Linda E.

Swayne, W. Jack Duncan, Peter M. Ginter, 2012-07-10 The 6th edition of this established text is streamlined to a more manageable format, with the Appendices moved to the web-site and a significant shortening of the main text. There is a greater focus on the global analysis of industry and competition; and analysis of the internal environment. In consultation with feedback from their adopters, the authors have concentrated on the fundamentals of strategy analysis and the underlying sources of profit. This reflects waning interest among senior executives in the pursuit of short-term shareholder value. As ever students are provided with the guidance they need to strategic planning, analysis of the health services environment (internal and external) and lessons on implementation; with additional discussion of organizational capability, deeper treatment of sustainability and corporate social responsibility and more coverage of the sources of organizational inertia and competency traps. This edition is rich in new examples from real-world health care organizations. Chapters are brought to life by the 'Introductory Incidents', 'Learning Objectives', 'Perspectives', 'Strategy Capsules', useful chapter summaries; and questions for class discussion. All cases and examples have been updated or replaced. In this edition the teaching materials and web supplements have been greatly enhanced, with power-point slides, to give lecturers a unique resource.

nc laser wellness skincare: Augmentation Mastopexy M. Bradley Calobrace, Bill G. Kortesis, Gaurav Bharti, Chet Mays, 2020-10-05 Breast augmentation paired with mastopexy is often regarded as a challenging procedure since it is essentially two surgeries in one. Because of the complexity of the dual procedure, as well as the careful planning required, many doctors avoid performing these surgeries together, instead preferring their patient to undergo two separate surgeries. These two procedures can be safely performed with methodical planning and intra operative execution. This book provides not only insight and instruction on a variety of mastopexy procedures and accompanying types of breast augmentation, but it will also help the clinician determine the optimal surgery for each individual patient. Primarily meant for practicing aesthetic plastic surgeons, Augmentation Mastopexy -- Mastering the Art in the Management of the Ptotic Breast will also find use among plastic surgery fellows and plastic surgery residents. Unlike some of the competitive literature that briefly touches on the topic or simply provides an overview, the information provided is methodical and comprehensive, providing a wealth of color images to accompany the techniques described. Case studies with long-term follow up are also included, offering not only an understanding of potential pitfalls but a veritable how-to for handling complications when they do arise.
