Body:

- I. Understanding Nevada Business Licenses and Uber

Uber Drivers as Independent Contractors in Nevada

In Nevada, Uber drivers are classified as independent contractors, not employees of Uber. This distinction significantly impacts your licensing requirements. You're essentially running your own small business, requiring appropriate licensing to operate legally.

- II. Determining Your Specific Licensing Needs

Nevada Business License Requirements for Transportation Services

The primary license you'll need is a Nevada business license. The specific requirements might vary slightly depending on your county and city of

operation. It's crucial to check with your local authorities for any additional local permits or business licenses.

III. The Application Process: Step-by-Step Guide

Accessing the Nevada Business License Application Portal

The application process usually begins online through the Nevada Secretary of State's website or your county's business licensing department. The online portal provides clear instructions and guides you through each step of the application.

Completing the Application Form Accurately

Accurate completion of the application form is vital. Ensure you provide all requested information correctly to avoid delays or rejections. Double-check all entries before submitting your application.

Submitting Your Application and Supporting Documents

Once completed, submit your application online or in person, depending on the specific instructions. You'll likely need to upload supporting documentation electronically.

IV. Required Documentation and Information

Necessary Identification and Proof of Residency

You'll typically need to provide a valid government-issued ID, such as a driver's license or passport, along with proof of your Nevada residency.

Vehicle Information and Insurance Documentation

The application will require information about your vehicle, including its make, model, year, and license plate number. Proof of adequate vehicle insurance, meeting Nevada's minimum liability requirements, is mandatory.

Federal Tax Identification Number (EIN) or Social Security Number (SSN)

You'll need to provide either your Federal Tax Identification Number (EIN) if you've established a business entity, or your Social Security Number (SSN) if operating as a sole proprietor.

V. Fees and Payment Methods

Understanding the Nevada Business License Fees

The cost of your Nevada business license will vary depending on your county and the type of business license you apply for. Check the relevant government website for the most up-to-date fee structure.

Available Payment Options for License Fees

Most jurisdictions offer various payment options, including online payment portals, credit card payments, and possibly checks or money orders.

VI. Maintaining Compliance and Renewals

Ongoing Compliance Requirements for Uber Drivers

After obtaining your license, maintaining compliance is crucial. This might involve periodic reporting, adhering to updated regulations, and ensuring your vehicle insurance remains valid.

Renewing Your Nevada Business License

Your Nevada business license will likely need renewal periodically. Be mindful of renewal deadlines to avoid penalties or license suspension. Check the renewal process outlined by the relevant licensing authority.

VII. Additional Licenses and Permits (if applicable)

Potential Need for Local Permits or Licenses

Depending on your city or county of operation, you might need additional local permits or licenses for transportation services. Contact your local government for details.

Understanding Transportation Regulations in Your Specific Area

Familiarize yourself with all applicable transportation regulations in your specific area. These regulations could cover parking restrictions, designated drop-off zones, and other operational considerations.

VIII. Tax Obligations and Reporting for Uber Drivers in Nevada

Understanding Self-Employment Tax Obligations

As an independent contractor, you'll be responsible for paying self-employment taxes, including income tax and self-employment tax (Social Security and Medicare taxes).

Accurate Record Keeping and Tax Reporting

Maintain detailed records of your income and expenses. Accurate record-keeping is crucial for accurate tax filing and avoiding potential tax penalties. Consult with a tax professional to ensure compliance.

Conclusion:

Obtaining a Nevada business license for operating as an Uber driver requires careful planning and adherence to the specific requirements. By thoroughly understanding the steps outlined in this guide, you can navigate the licensing process efficiently, ensuring legal compliance and a successful start to your Uber driving business. Remember to always consult official government websites and seek professional advice when needed.

Frequently Asked Questions (FAQs):

Q: Do I need a separate license for each city I operate in? A: Possibly. Check with each local municipality for their specific requirements.

Q: What happens if my license is not renewed on time? A: Your license may be suspended or revoked, potentially leading to fines.

Q: Can I get help with the application process? A: Many counties offer assistance programs or resources to guide you through the application process. Contact your local government for information.

Q: How often do I need to renew my business license? A: Renewal frequency varies by county and may be annual or biennial. Check your license or the relevant government website.

Q: What if I make a mistake on my application? A: Contact the licensing authority immediately to correct the error.

nevada business license for uber: The Innovator Versus the Collective Brian Phillips, 2016-06-13 Fundamentally, history is the consequence of ideas. Every movement, revolution, war, and era is ultimately defined and motivated by a guiding ideology. In this book, we will examine the ideas that have shaped (or are shaping) government policies toward numerous industries. We will examine mature industries and newer industries. In examining mature industries, we can trace the long-term consequences of government policies. We can see the cause and the effect. We can see which policies resulted in innovation and progress, and which did not. In identifying the results of past policies, we can predict the future consequences of today's policy debates. Virtually everyone claims to support innovation and progress. But claiming such support and advocating policies that make innovation possible are not the same thing. We cannot discern the difference merely on the basis of claims and professed intentions. We must look at the principles-the fundamental ideas-being advocated.

nevada business license for uber: Peers Inc Robin Chase, 2015-06-09 When Robin Chase cofounded Zipcar, she not only started a business but established the foundation for one of the most important economic and social ideas of our time: the collaborative economy. With this important book, she broadens our thinking about the ways in which the economy is being transformed and shows how the Peers Inc model is changing the very nature of capitalism. When the best of people power is combined with the best of corporate power to form Peers Inc organizations, a potent creative force is released. The Inc in these collaborations delivers the industrial strengths of significant scale and resources, and the Peers bring together the individual strengths of localization, specialization, and customization, unlocking the power of the collaborative economy. When excess capacity is harnessed by the platform and diverse peers participate, a completely new dynamic is unleashed. In Peers Inc, Robin Chase brings her provocative insights to work, business, the economy, and the environment, showing: How focusing on excess capacity transforms the economics of what's possible and delivers abundance to all How the new collaboration between the Inc and the Peers enables companies to grow more quickly, learn faster, and deliver smarter products and services How leveraging the Peers Inc model can address climate change with the necessary speed and scale How the Peers Inc model can help legacy companies overcome their shortening life cycle by inviting innovation and evolution Why power parity between the Peers and the Inc is a prerequisite for long-term success How platforms can be built within the existing financial system or outside of it What government can do to enhance economic possibility and protect people working in this new decentralized world Chase casts a wide net, illuminating the potential of the Peers Inc model to address broader issues such as climate change and income inequality, and proves the impact that this innovative economic force can have on the most pressing issues of our time.

nevada business license for uber: Issues in Global Business SAGE Publishing, 2021-03-03 In 2020, COVID-19 starkly demonstrated the global interconnectedness of business, as it disrupted supply chains and manufacturing operations, broadly shuttered retail stores, and led to restrictions on movement and travel around the world. Other events in 2019 also showcased the undeniable globalization of business, be it from the (un)expected ramifications of Brexit to the impacts of data breaches across various industries. Riots in Hong Kong over an extradition bill also sparked huge debate and controversy, and the U.S.-China trade war also caused concern. All of these events may have largely and immediately impacted one region, yet effects reverberate across larger swathes of the globe—ultimately affecting vast areas, industries, and sectors across the international landscape. Issues in Global Business explores all of these and more, across a wide range of topics, including the on-demand economy, global manufacturing, Bitcoin, data security, and many more. Coupled with a comprehensive overview of the business landscape around the world by Dr. Mamoun Benmamoun, an assistant professor at the Boeing Institute of International Business at Saint Louis University, this book provides students with the essential information they need to assess business practices

through an international lens.

And this tech/economics revolution will touch virtually every industry. What exactly will change? Jobs: Demand for commercial vehicle drivers, car dealers, mechanics, doctors, and many other professions will shrink Laws: Manually driving cars will be forbidden—and car ownership will be almost nonexistent Housing: Prices will drop and cities and towns will be planned differently Healthcare: Infrastructure will shrink as traffic accidents dramatically decline Global trade: China will become the world's biggest automotive exporter The Last Driver's License Holder Has Already Been Born provides the information and insight you need to position your company for these groundbreaking changes. It reveals the disruptive technologies now taking shape and provides a timeline of when they will take hold. It examines the impact on the industry itself, as well as adjacent sectors, including jobs and professions, city and street design, hospitals, insurances, politics, security, hospitality industry, the oil industry, real estate, and society at large. And it provides the knowledge and insight you need to keep yourself and your organization ahead of the curve—and in front of the competition.

Management is a broad business discipline, and the Principles of Management course covers many management areas such as human resource management and strategic management, as well as behavioral areas such as motivation. No one individual can be an expert in all areas of management, so an additional benefit of this text is that specialists in a variety of areas have authored individual chapters.

nevada business license for uber: Automobile Insurance Subrogation in All 50 States - Second Edition Gary L. Wickert, 2014-11-01 Automobile Insurance Subrogation: In All 50 States is the most thorough, comprehensive, and ambitious anthology of subrogation-related legal information and insurance resources ever put to paper. It is the last and most anticipated of the subrogation trilogy, and a book which will serve as the “bible” for any insurance company writing personal lines or commercial auto policies. It is destined to become the standard work and reference for attorneys, insurance companies, and subrogation industry professionals. Every year there are more than 7 million auto accidents in the United States with a financial toll of more than \$300 billion. Nearly 3 million people are injured and 42,636 people are killed. In the overwhelming majority of these accidents there is at least one party at fault. For virtually every one of these accidents, a policy of automobile insurance provides some sort of claim payments or benefits. In the vast majority of those claims, one or more insurance policies and/or applicable state law grants the insurer a right of subrogation against a negligent third party whose carelessness caused the accident. This book is the bible on subrogating those claims. This book covers the nuts and bolts of auto subrogation in all 50 states, covering every topic imaginable -- including PIP, Med Pay, UM/UIM, property claims, deductible reimbursement, no-fault subrogation and more. It surveys the laws of every state and

provides descriptions of every type of auto coverage imaginable, as well as the statutory, case law, and regulatory authority governing every aspect of auto subrogation. If you have subrogation responsibility involving auto claims, you need this book. It universally covers issues which are indelibly interwoven into the business of auto insurance, including a complete treatment of the laws of all 50 states and the District of Columbia relating to: • Basic and Statutory Subrogation Rights • Mandatory vs. Optional Insurance Coverage • No-Fault Laws, PIP, Mini-Torts, and Loss Transfer Laws • Tort Limitations • Medical Payments Coverage and Subrogation • Uninsured/Underinsured Motorist Coverage and Subrogation • Collision/Property Subrogation • Release of Tortfeasor by Insured • Accord and Satisfaction: Accepting Partial Payments from Tortfeasor • Made Whole Doctrine • Common Fund Doctrine • Economic Loss Doctrine • Deductible Recovery and Reimbursement • Collateral Source Rule • Contributory Negligence/Comparative Fault • Seat Belt Laws and Defenses • Rental Cars, Loaner Vehicles, and Test Drivers • Bailment/Parking Lot Liability • Negligent Entrustment • Facing Multiple Claims In Excess of Liability Policy Limits • Conflict of Laws/Interstate Subrogation • Recovery of Attorney's Fees and Costs • Statutes of Limitations It is a complete treatment -- A to Z -- of virtually every issue which the insurance claims or subrogation professional will face in the area of automobile insurance. It is like no legal treatise ever written and promises to be the most used reference in any insurance company.

nevada business license for uber: ERISA and Health Insurance Subrogation in all 50 States - 5th Edition Gary L. Wickert, 2013-01-01 ERISA and Health Insurance Subrogation In All 50 States is the most complete and thorough treatise covering the complex subject of ERISA and health insurance subrogation ever published. NEW TO THE FIFTH EDITION! • Updated To Include All The Newest Case Law! • Updated To Include Medicaid Subrogation and Preemption of FEHBA ! • New Plan Language Recommendations! • Complete Health Insurance Subrogation Laws In All 50 States • Covers The Application of ERISA In Every Federal Circuit The Fifth Edition of ERISA and Health Insurance Subrogation In All 50 States has been completely revised, edited, and reorganized. This was partly to reflect the new direction recent case decisions have taken regarding health insurance subrogation as well as the crystallization of formerly uncertain and nebulous areas of the law which have now received some clarity. An entirely new chapter entitled, "What Constitutes Other Appropriate Equitable Relief?" has been added and replaces the old Chapter 9, which merely dealt with Knudson and Sereboff. The new edition introduces new state court decisions addressing the issue of causation and whether and when a subrogated Plan seeking reimbursement must prove that the medical benefits it seeks to recover were causally related to the original negligence of the tortfeasor. An entirely new section was added concerning the subrogation and reimbursement rights of Medicare Advantage Plans, a statutorily-authorized Plan which provides the same benefits an individual is entitled to recover under Medicare. This includes recent case law which detrimentally affects the rights of such Plans to subrogate. Also added to the new edition is additional law and explanation regarding Medicaid subrogation, including the differentiation between "cost avoidance" and "pay and chase" when it comes to procedures for paying Medicaid claims. Significant improvements have been made to suggested Plan language which maximizes a Plan's subrogation and reimbursement rights. The suggested language stems from recent decisions and developments in ERISA and health insurance subrogation from around the country since the last edition. The new edition has been completely reworked both in substance and organization. Recent case law has necessitated consolidation of several portions of the book and elimination or editing of others. A new section entitled "Liability of Plaintiff's Counsel" has been added, which provides a clearer exposition on the laws applicable and remedies available when plaintiff's attorneys and Plan beneficiaries settle their third-party cases and fail to reimburse the Plan. Also new to the book are recently-passed anti-subrogation measures such as Louisiana's Senate Bill 169, § 1881, which states that no health insurer shall seek reimbursement from automobile Med Pay coverage without first obtaining the written consent of the insured. The new edition also goes into much greater detail on the procedures for and law underlying the practice of removal of cases from state court to federal court, and the

possibility of remand back to state court. This includes the Federal Courts Jurisdiction and Venue Clarification Act of 2011, effective Jan. 6, 2012, which amended federal removal, venue, and citizenship determination statutes in very significant ways. The new edition also delves into, for the first time, the role which the federal Anti-Injunction Act plays when beneficiaries sue in state court to enforce the terms of an ERISA Plan, while the Plan files suit in federal court seeking an injunction against the state court action. New case law and discussion on preemption of FEHBA subrogation and reimbursement claims have been added to Chapter 10 in the wake of new decisions regarding same.

They say you shouldn't ask your mom whether your business is a good idea, because she loves you and will lie to you. This is technically true, but it misses the point. You shouldn't ask anyone if your business is a good idea. It's a bad question and everyone will lie to you at least a little . As a matter of fact, it's not their responsibility to tell you the truth. It's your responsibility to find it and it's worth doing right . Talking to customers is one of the foundational skills of both Customer Development and Lean Startup. We all know we're supposed to do it, but nobody seems willing to admit that it's easy to screw up and hard to do right. This book is going to show you how customer conversations go wrong and how you can do better.

nevada business license for uber: *Between Public and Private Mobility* , 2016-03 TRB Special Report 319 analyzes the ways that innovative transportation services--including ridesharing, carsharing, bikesharing, and microtransit--are changing mobility for millions of travelers. Such services could reduce congestion and emissions from surface transportation if regulated wisely to encourage concurrent, instead of sequential, ridesharing. Rapidly growing transportation network companies (TNCs), such as Uber and Lyft, however, are disrupting conventional taxi and limousine services and are raising policy challenges related to personal security and public safety, insurance requirements, employment and labor issues, and accessibility and equity. The committee's report offers guidance to state and local officials responsible for policy setting and regulation of for-hire transportation services in each of these areas. The report also addresses the need for greater consistency in regulations across jurisdictions and calls for TNCs to share more information about the volume, the frequency, and the types of trips they are providing, to allow for informed regulation and planning of transportation services--provided by publisher.

nevada business license for uber: *The Fissured Workplace* David Weil, 2014-02-17 In the twentieth century, large companies employing many workers formed the bedrock of the U.S. economy. Today, on the list of big business's priorities, sustaining the employer-worker relationship ranks far below building a devoted customer base and delivering value to investors. As David Weil's groundbreaking analysis shows, large corporations have shed their role as direct employers of the people responsible for their products, in favor of outsourcing work to small companies that compete fiercely with one another. The result has been declining wages, eroding benefits, inadequate health and safety protections, and ever-widening income inequality. From the perspectives of CEOs and investors, fissuring--splitting off functions that were once managed internally--has been phenomenally successful. Despite giving up direct control to subcontractors and franchises, these large companies have figured out how to maintain the quality of brand-name products and services, without the cost of maintaining an expensive workforce. But from the perspective of workers, this strategy has meant stagnation in wages and benefits and a lower standard of living. Weil proposes ways to modernize regulatory policies so that employers can meet their obligations to workers while allowing companies to keep the beneficial aspects of this business strategy.

nevada business license for uber: *Regulatory Delivery* Graham Russell, Christopher Hodges, 2019-10-17 This ground-breaking book addresses the challenge of regulatory delivery,

defined as the way that regulatory agencies operate in practice to achieve the intended outcomes of regulation. Regulatory reform is moving beyond the design of regulation to address what good regulatory delivery looks like. The challenge in practice is to operate a regulatory regime that is both appropriate and effective. Questions of how regulations are received and applied by those whose behaviour they seek to control, and the way they are enforced, are vital in securing desired regulatory outcomes. This book, written by and for practitioners of regulatory delivery, explains the Regulatory Delivery Model, developed by Graham Russell and his team at the UK Department for Business, Energy and Industrial Strategy. The model sets out a framework to steer improvements to regulatory delivery, comprising three prerequisites for regulatory agencies to be able to operate effectively (Governance Frameworks, Accountability and Culture) and three practices for regulatory agencies to be able to deliver societal outcomes (Outcome Measurement, Risk-based Prioritisation and Intervention Choices). These elements are explored by an international group of experts in regulatory delivery reform, with case studies from around the world. Regulatory Delivery is the first product of members of the International Network for Delivery of Regulation.

nevada business license for uber: Transportation Network Companies and Taxis Craig A. Leisy, 2019-05-07 Transportation Network Companies and Taxis: The Case of Seattle is a modern economic case history and thorough analysis of the devastating impact of the transportation network company (TNC) industry (Uber and Lyft) on the taxicab industry in Seattle, Washington, beginning in 2014. The events that transpired and lessons learned are applicable to most large cities in North America, Europe and Australia. As the regulator of the taxicab and TNC industries in Seattle during this period, the author offers a unique insider perspective. The book also provides internal operating statistics on the TNC industry, which are available here for the first time. Despite the spectacular growth of the TNC industry, growth rates have steadily declined and may fall to zero by 2019 or 2020, while the taxicab industry appears to have begun a modest recovery. This book offers a thorough explanation of how and why this decline has happened. It explains the taxicab industry, economic deregulation, competitive market failure, market disruption, price elasticity of demand and other concepts. There is also a wealth of data, computations and analysis for the specialized reader. This book considers the past, present and future of the taxicab and TNC industries in Seattle, It is recommended for both the general reader and industry professionals.

Digital technologies have become omnipresent in our lives and we still do not fully know how to make the best use of the data these technologies could harness. Businesses leveraging big data appropriately could definitely gain a sustainable competitive advantage. With a balanced mix of texts and cases, this book discusses a variety of digital technologies and how they transform people and organizations. It offers a debate on the societal consequences of the yet unfolding technological revolution and proposes alternatives for harnessing disruptive technologies for the greater benefit of all. This book will have wide appeal to academics in technology management, strategy, marketing, and human resource management.

nevada business license for uber: The Mesh Lisa Gansky, 2010-09-23 A simple, powerful idea that's reinventing the way smart, adaptive companies do business. Most businesses follow the same basic formula: create a product or service, sell it, and collect money. What Lisa Gansky calls Mesh businesses throw this model out the window. Instead, these companies use social media, wireless networks, and data crunched from every available source to provide people with goods and services at the exact moment they need them, without the burden and expense of owning them outright. The Mesh gives companies a better understanding of what customers really want. Already, hundreds of successful Mesh companies are redefining how we interact with the people, goods, and services in our lives. These businesses are easier to start and spreading like wildfire, from bike sharing and home exchanges to peer-to-peer lending, energy cooperatives, and open source design. Consider: • ZipCar profits from streamlined car sharing • Kickstarter connects artists with funding

from enthusiastic supporters • Music Gym makes finding a recording studio as easy as joining a gym The Mesh reveals the next wave of information-enabled commerce, showing readers how to plug in and profit.

nevada business license for uber: Where Is My Flying Car? J. Storrs Hall, 2021-11-30 From an engineer and futurist, an impassioned account of technological stagnation since the 1970s and an imaginative blueprint for a richer, more abundant future The science fiction of the 1960s promised us a future remade by technological innovation: we'd vacation in geodesic domes on Mars, have meaningful conversations with computers, and drop our children off at school in flying cars. Fast-forward 60 years, and we're still stuck in traffic in gas-guzzling sedans and boarding the same types of planes we flew in over half a century ago. What happened to the future we were promised? In *Where Is My Flying Car?*, J. Storrs Hall sets out to answer this deceptively simple question. What starts as an examination of the technical limitations of building flying cars evolves into an investigation of the scientific, technological, and social roots of the economic stagnation that started in the 1970s. From the failure to adopt nuclear energy and the suppression of cold fusion technology to the rise of a counterculture hostile to progress, Hall recounts how our collective ambitions for the future were derailed, with devastating consequences for global wealth creation and distribution. Hall then outlines a framework for a future powered by exponential progress—one in which we build as much in the world of atoms as we do in the world of bits, one rich in abundance and wonder. Drawing on years of original research and personal engineering experience, *Where Is My Flying Car?*, originally published in 2018, is an urgent, timely analysis of technological progress over the last 50 years and a bold vision for a better future.

nevada business license for uber: Managing Sustainable Business Gilbert G. Lenssen, N. Craig Smith, 2018-03-07 This book offers 32 texts and case studies from across a wide range of business sectors around a managerial framework for Sustainable Business. The case studies are developed for and tested in executive education programmes at leading business schools. The book is based on the premise that the key for managing the sustainable business is finding the right balance over time between managing competitiveness and profitability AND managing the context of the business with its political, social and ecological risks and opportunities. In that way, a sustainable business is highly responsive to the demands and challenges from both markets and societies and managers embrace the complexity, ambivalence and uncertainty that goes along with this approach. The book presents a framework that facilitates the adoption of best business practice. This framework leads executives through a systematic approach of strategic analysis and business planning in risk management, issues management, stakeholder management, sustainable business development and strategic differentiation, business model innovation and developing dynamic capabilities. The approach helps broaden the understanding of what sustainable performance means, by protecting business value against sustainability risks and creating business value from sustainability opportunities.

In response, Johnson launched the popular blog Wealthysinglemommy.com to speak to other women who, like herself, wanted to not just survive but thrive as single moms. Now, in this complete guide to single motherhood,

Johnson guides women in confronting the naysayers in their lives (and in their own minds) to build a thriving career, achieve financial security, and to reignite their romantic life—all while being a kickass parent to their kids. The Kickass Single Mom shows readers how to:

- Build a new life that is entirely on their own terms.
- Find the time to devote to health, hobbies, friendships, faith, community and travel.
- Be a joyful, present and fun mom, and proud role model to your kids.

Full of practical advice and inspiration from Emma's life, as well as other successful single moms, this is a must-have resource for any single mom.

Unfortunately, it’s been quite a while since Google, or the majority of the Big Tech companies, lived up to this founding philosophy. Today, the utopia they sought to create is looking more dystopian than ever: from digital surveillance and the loss of privacy to the spreading of misinformation and hate speech to predatory algorithms targeting the weak and vulnerable to products that have been engineered to manipulate our desires. How did we get here? How did these once-scrappy and idealistic enterprises become rapacious monopolies with the power to corrupt our elections, co-opt all our data, and control the largest single chunk of corporate wealth—while evading all semblance of regulation and taxes? In Don’t Be Evil, Financial Times global business columnist Rana Foroohar tells the story of how Big Tech lost its soul—and ate our lunch. Through her skilled reporting and unparalleled access—won through nearly thirty years covering business and technology—she shows the true extent to which behemoths like Google, Facebook, Apple, and Amazon are monetizing both our data and our attention, without us seeing a penny of those exorbitant profits. Finally, Foroohar lays out a plan for how we can resist, by creating a framework that fosters innovation while also protecting us from the dark side of digital technology. Praise for Don’t Be Evil “At first sight, Don’t Be Evil looks like it’s doing for Google what muckraking journalist Ida Tarbell did for Standard Oil over a century ago. But this whip-smart, highly readable book’s scope turns out to be much broader. Worried about the monopolistic tendencies of big tech? The addictive apps on your iPhone? The role Facebook played in Donald Trump’s election? Foroohar will leave you even more worried, but a lot better informed.”—Niall Ferguson, Milbank Family Senior Fellow at the Hoover Institution, Stanford, and author of *The Square and the Tower*

Your online and in-store purchasing patterns are recorded, and reveal if you're unemployed, sick, or pregnant. Your e-mails and texts expose your intimate and

casual friends. Google knows what you're thinking because it saves your private searches. Facebook can determine your sexual orientation without you ever mentioning it. The powers that surveil us do more than simply store this information. Corporations use surveillance to manipulate not only the news articles and advertisements we each see, but also the prices we're offered. Governments use surveillance to discriminate, censor, chill free speech, and put people in danger worldwide. And both sides share this information with each other or, even worse, lose it to cybercriminals in huge data breaches. Much of this is voluntary: we cooperate with corporate surveillance because it promises us convenience, and we submit to government surveillance because it promises us protection. The result is a mass surveillance society of our own making. But have we given up more than we've gained? In *Data and Goliath*, security expert Bruce Schneier offers another path, one that values both security and privacy. He brings his bestseller up-to-date with a new preface covering the latest developments, and then shows us exactly what we can do to reform government surveillance programs, shake up surveillance-based business models, and protect our individual privacy. You'll never look at your phone, your computer, your credit cards, or even your car in the same way again.

nevada business license for uber: Uber Chronicles Jessie Newburn, 2016-07-19 Have you ever wondered what it would be like to drive for Uber? Have you ever been curious as to what kind of people use Uber? Where they are going? What do they talk about during the ride? How do they behave, or misbehave? This is the book to read! Jessie Newburn's *Uber Chronicles: Field Notes from the Front Seat*, the first in a series, answers those questions and more ... in the form of storytelling. Driving for Uber since early 2016, Jessie chronicles her experiences with each--and every--passenger, from the conversations with interesting people with fascinating stories, to the incredibly everyday, ho-hum-ness of people who just need a ride from one place to another. But don't let the ho-hum-ness of the ride fool you. As Gabe Karpati, one of her earlier readers, says, There is a relaxing magical quality to the way she writes these stories. A sweet quiet zen silence that is shining through every line. Jessie presents these encounters like a meditation, where the seer observes but doesn't get entangled. Ten different days and nights out driving for Uber. Fifty-six passengers. Fifty-six stories. So, come along for the ride. Join in. Listen in. And experience what Uber is like from the front seat of the car.
