Pillars of New Hope Family Wellness: A Holistic Approach

Several key pillars underpin the New Hope Family Wellness philosophy. These aren't standalone elements, but interwoven threads creating a strong, supportive fabric for your overall health:

1. **Mindfulness and Stress Reduction:** In today's fast-paced world, stress is unavoidable. However, chronic stress wreaks havoc on our physical and mental well-being. New Hope Family Wellness emphasizes the importance of incorporating mindfulness practices like meditation, deep breathing exercises, and yoga to manage stress effectively and cultivate inner peace. 1. **Nutritional Optimization:** Food is medicine. We believe that nourishing your body with whole, unprocessed foods is fundamental to achieving optimal health. New Hope Family Wellness provides guidance on creating balanced meal plans, understanding nutritional needs, and making informed food choices that support your energy levels, immune system, and overall well-being. We work with you to understand your dietary preferences and restrictions to create a sustainable and enjoyable eating plan.
1. **Physical Activity and Movement:** Regular physical activity is not just about weight management; it's crucial for mental clarity, cardiovascular health, and stress reduction. We encourage finding enjoyable forms of movement, whether it's brisk walking, dancing, swimming, or team sports. The goal is to incorporate activity into your daily routine in a way that's sustainable and enjoyable, fostering a lifelong commitment to fitness.
1. **Strong Family Connections:** Family is the cornerstone of a supportive and fulfilling life. New Hope Family Wellness emphasizes the importance of nurturing strong family bonds through shared activities, open communication, and quality time together. We provide tools and strategies to improve family dynamics, resolve conflicts constructively, and build stronger relationships.
1. **Personalized Wellness Plans:** We recognize that everyone is unique. New Hope Family Wellness doesn't offer a one-size-fits-all approach. new hope family wellness: Promoting Wellness and Resiliency in Correctional Officers

Hayden P. Smith, 2022-12-26 Correctional officers face considerable stress, risk, and danger that lead to poor physical and mental health outcomes. In fact, their life expectancy is 15 years shorter than the national average. Public perception and media portrayals of correctional officers tend to reinforce stereotypes of brutish, improper, and uncontrolled behavior. Yet the reality is that correctional officers are operating a default public and mental health system for a sizeable portion of our society, a responsibility that exposes them to considerable risk. These negative effects have been compounded by an international staffing crisis that has made our jails and prisons far less safe for working officers. To address this situation, this book features an examination of a combined 11,313 correctional officers and 42 of their family members in the United States, Canada, and Europe. It explores proactive strategies that can reduce rates of posttraumatic stress disorder (PTSD) in correctional officers, which currently surpasses those found in returning military veterans who experienced combat. It then delves into the dynamics of correctional officer suicide, featuring the perspectives of their families. This book highlights innovative approaches that can build on existing strengths including the role of international exchange programs. It presents universal themes that impact the safety, wellbeing, and resiliency of correctional officers, along with positive outcomes related to evidence-based programs that maximize health in the correctional workplace. This book will be of interest to researchers and advanced students of criminology, mental health, public policy, social work, and sociology. The chapters in this book were originally published as a special issue of the journal Criminal Justice Studies.

new hope family wellness: Food Over Medicine Pamela A. Popper, Glen Merzer, 2013-06-11 Includes recipes from Chef Del Sroufe, author of the bestselling Forks Over Knives—The Cookbook and Better Than Vegan Nearly half of Americans take at least one prescription medicine, with almost a quarter taking three or more, as diseases such as diabetes, obesity, and dementia grow more prevalent than ever. The problem with medicating common ailments, such as high blood pressure or elevated cholesterol, is that drugs treat symptoms—and may even improve test results—without addressing the cause: diet. Overmedicated, overfed, and malnourished, most Americans fail to realize the answer to lower disease rates doesn't lie in more pills but in the foods we eat. With so much misleading nutritional information regarded as common knowledge, from “everything in moderation to “avoid carbs, the average American is ill-equipped to recognize the deadly force of abundant, cheap, unhealthy food options that not only offer no nutritional benefits but actually bring on disease. In Food Over Medicine, Pamela A. Popper, PhD, ND, and Glen Merzer invite the reader into a conversation about the dire state of American health—the result of poor nutrition choices stemming from food politics and medical misinformation. But, more important, they share the key to getting and staying healthy for life. Backed by numerous scientific studies, Food Over Medicine details how dietary choices either build health or destroy it. Food Over Medicine reveals the power and practice of optimal nutrition in an accessible way.

new hope family wellness: The Gospel of Sustainability Monica M. Emerich, 2011-10-15 From organic produce and clothing to socially conscious investing and eco-tourism, the lifestyles of health and sustainability, or LOHAS, movement encompasses diverse products and practices intended to contribute to a more sustainable lifestyle for people and the planet. In *The Gospel of Sustainability*, Monica M. Emerich explores the contemporary spiritual expression of this green cultural shift at the confluence of the media and the market. This is the first book to qualitatively study the LOHAS marketplace and the development of a discourse of sustainability of the self and the social and natural worlds. Emerich draws on myriad sources related to the notions of mindful consumption found throughout the LOHAS marketplace, including not just products and services but marketing materials, events, lectures, regulatory policies, and conversations with leaders and consumers. These disparate texts, she argues, universally project a spiritual message about personal and planetary health that is in turn reforming capitalism by making consumers more conscious.

new hope family wellness: The Cancer Revolution Leigh Erin Connealy, 2018-07-17 Integrative health pioneer offers her groundbreaking approach to treating (and preventing) cancer, based on 6 Revolutionary Findings, with a practical program and strategies. When it comes to

cancer, conventional doctors are trained to treat their patients exclusively with surgery, radiation, and chemotherapy. These methods are grueling on the whole body--and they don't treat beyond the tumor or the cancer itself. The focus is on the disease, not the whole person--and because of this, the outcomes in conventional medicine can be bleak. But it doesn't have to be this way. Dr. Leigh Erin Connealy has developed a whole-person approach to treating cancer--and these treatments have helped thousands of patients through her Cancer Center for Healing. In *The Cancer Revolution*, Dr. Connealy shows you how to get to the root causes of cancer and the practical steps you can take to get back on the path to healing--from balancing your body's chemistry with nutritional supplements, following a healthy food plan, detoxifying your body and home, exercising regularly, getting deep restful sleep every night, practicing stress reduction techniques, and putting together a supportive healing team. Chemotherapy and radiation have their place in treatment, but in many cases, they are simply not enough, because cancer isn't caused by one thing, but by many different factors. All of these causes must be addressed, not just the tumor. *The Cancer Revolution* will equip you to make impactful, achievable lifestyle choices that fight the root of the disease, and that offer hope for recovery and a cancer-free life.
