nordic wellness stockholm dobelnsgatan: Bitter Bitch Maria Sveland, 2011-01-27 On a miserable January morning Sarah is sitting on a plane to Tenerife - dickheads' destination of choice - for a week-long getaway. She's just realised that she's very angry and becoming a bitter bitch, despite being just thirty years old. With her on the plane she has a copy of Erica Jong's *Fear of Flying* and wishes it were 1975 instead of 2005. Sarah never intended for things to turn out the way they have: she just dreamed of love like everyone else. But now she's sitting here, thinking about all the injustices she's suffered. Thinking about how thoroughly fooled she was by the promise of love - the one that makes us want to start a family. Thinking about all the women she knows who, like her, were drained of all their energy by family hell - an inheritance passed down directly from generation to generation, from her restless mother's eczema-covered dishpan hands to her own nervous over-achiever complex. Angry and candid, *Bitter Bitch* is an uncompromising novel, at the heart of which is one of the most important women's issues: how can we ever have an egalitarian society when we can't even live in equality with those we love?

nordic wellness stockholm dobelnsgatan: *Elite Education* Claire Maxwell, Peter Aggleton, 2015-10-05 *Elite Education - International Perspectives* is the first book to systematically examine elite education in different parts of the world. Authors provide a historical analysis of the emergence of national elite education systems and consider how recent policy and economic developments are changing the configuration of elite trajectories and the social groups benefiting from these. Through country-level case studies, this book offers readers an in-depth account of elite education systems in

the Anglophone world, in Europe and in the emerging financial centres of Africa, Asia and Latin America. A series of commentaries highlight commonalities and differences between elite education systems, and offer insights into broader theoretical issues, with which educationalists, researchers and policy makers are engaging. With authors including Stephen J. Ball, Donald Broady, Rubén Gaztambide-Fernández, Heinz-Hermann Krüger, Maria Alice Nogueira, Julia Resnik and Agnès van Zanten, the book offers a benchmark perspective on issues frequently glossed over in comparative education, including the processes by which powerful groups retain privilege and 'elite' status in rapidly changing societies. *Elite Education – International Perspectives* will appeal to policy makers and academics in the fields of education and sociology. Simultaneously it will be of special relevance to post-graduates enrolled on courses in the sociology of education, education policy, and education and international development.

nordic wellness stockholm dobelnsgatan: Key Concepts in Geography Nicholas Clifford, Sarah Holloway, Stephen P Rice, Gill Valentine, 2008-12-18 Including ten new chapters on nature, globalization, development, and risk and a new section on practicing geography, this is a completely revised and updated edition of the bestselling, standard student resource. The Second Edition of *Key Concepts in Geography* explains the key terms – space, time, place, scale, landscape – that define the language of geography. It is unique in the reference literature as it provides – in one volume – concepts from both human geography and physical geography; especially relevant now that environment is so critical to our understanding of geography.

nordic wellness stockholm dobelnsgatan: The New North Laurence Smith, 2011-03-24 *The New North* is a book that turns the world literally upside down. Analysing four key 'megatrends' – population growth and migration, natural resource demand, climate change and globalisation – UCLA professor Larry Smith projects a world that by mid-century will have shifted its political and economic axes radically to the north. The beneficiaries of this new order, based on a bonanza of oil, natural gas, minerals and plentiful water will be the Arctic regions of Russia, Alaska and Canada, and Scandinavia. Meanwhile countries closer to the equator will face water shortages, aging populations, crowded megacities and coastal flooding. Smith draws on geography, economics, history, earth and climate science, but what makes his arguments so compelling is that he has spent many months exploring the region, talking to people in once-inaccessible Arctic towns, noting their economies, politics and stories.

nordic wellness stockholm dobelnsgatan: Educating Elites Adam Howard, Rubén A. Gaztambide-Fernandez, 2010 The gaze of educational researchers has traditionally been turned 'down' toward the experiences of communities deemed at-risk, presumably with the purpose of improving their plight. Indeed, theorizing about the relationship between education, culture, and society has typically emerged from the study of poor and marginalized groups in public schools. Seldom have educational researchers considered class privilege and educational advantage in their attempts at understanding inequality and fomenting social justice. This collection of groundbreaking studies breaks with this tradition by shifting the gaze of inquiry 'up,' toward the experiences of privilege in educational environments characterized by wealth and the abundance of material resources. This edited volume brings together established and emerging scholars in education and the social sciences working critically to interrogate a diversity of educational environments serving the interests of influential groups both within and beyond schools. The authors investigate the power relations that underlie various contexts of class privilege. They shed light into the ways in which the success of a few relates to the failure of many --

nordic wellness stockholm dobelnsgatan: The Darkest Room Johan Theorin, 2009-09-29 WINNER OF SWEDEN'S BEST CRIME NOVEL AWARD On the idyllic island of Öland, off the coast of northern Sweden, a young couple from Stockholm tries to start life afresh. For Joakim and Katrine Westin, reclaiming a long-neglected family manor will be a labor of love, as they slowly bring the sprawling home back to life and introduce their two children to the island's woodlands, glens, and beaches. But in the Westins' new home, there are things that cannot be repaired, lives that have gone wrong, and secrets that have followed them. When the family is struck by tragedy, it's up to

grief-stricken Joakim to put together a puzzle of inexplicable loss, unbearable suspicion, and tangled lives. In this powerhouse of suspense—at once a crime novel and a searing family drama—a home built as a shelter from the sea becomes a human storm of murder.

nordic wellness stockholm dobelnsgatan: Elite Schools in Globalising Circumstances Jane Kenway, Cameron McCarthy, 2017-10-02 Elite Schools in Globalizing Circumstances foregrounds the richly theoretical and empirically-based work of an international cast of scholars seeking to break out of the confines of the methodological nationalism that now governs so much of contemporary scholarship on schooling. Based on a 5-year extended global ethnography of elite schools in nine different countries—countries defined by colonial pasts linked to England—the contributors make a powerful case for the rethinking of elite schools and elite class formation theory in light of contemporary processes of globalization and transnational change. Prestigious, high-status schools have long been seen as critical institutional vehicles directly contributing to the societal processes of elite selection and reproduction. This book asserts that much has changed and that these schools can no longer rest on their past laurels and accomplishments. Instead they must re-cast their heritages and tradition in order to navigate the new globally competitive educational field enabling them to succeed in a world in which the globalization of educational markets, the global ambitions and imaginations of school youth, and the emergence of new powerful players peddling entrepreneurial models of curriculum and education, have placed contemporary schooling under tremendous pressure. This insightful and though-provoking volume provides a well-researched perspective on the nature of contemporary schooling in the globalizing era. This book was originally published as a special issue of Globalisation, Societies and Education.

nordic wellness stockholm dobelnsgatan: Preparing For Power Peter W Cookson Jr, Caroline Hodges Persell, 2008-08-04 Why do private boarding schools produce such a disproportionate number of leaders in business, government, and the arts? In the most comprehensive study of its kind to date, two sociologists describe the complex ways in which elite schools prepare students for success and power, and they also provide a lively behind-the-scenes look at prep-school life and underlife.

nordic wellness stockholm dobelnsgatan: Helping with Inquiries Louis Jacobs, 1989 This autobiography of one of the world's leading Jewish religious thinkers and teachers, and the central participant in the dramatic 'Jacobs affair', begins with his early boyhood in a poor district of Manchester. The story covers his student life at Gateshead and London University, his trips overseas and the showbiz world of Hollywood - all of which enhances the book's value as a historical source. For the first time, he provides an extended personal account of the 'Jacobs affair' of the 1960s, the bitter controversy over his theological writings which led to his being ostracised by many representatives of the Orthodox tradition from which he sprang.

nordic wellness stockholm dobelnsgatan: On Beer and Food Thomas Horne, 2015 Good beer is a taste-intensive and surprisingly versatile accompaniment to good food--often better suited than wine. This book presents recipes and fundamentals that explore the pairing of food and beer. Until recently, beer had been grossly underestimated as an accompaniment to sophisticated cuisine. But the booming craft beer movement is now sparking a fundamental shift. Diversity in aroma and nuance in flavor make these new beers a wonderful complement to food--at times even better and more original than wine. The Gourmet's Beer Cookbook shows what an extensive, vibrant, and interesting role beer can play in the dining experience. Aside from an introduction into the culture and flavors of craft beer, this book presents recipes from innovative chefs to create deliciously adventurous food and beer pairings. These include tarte flambee with green asparagus to be served

with Flemish red beer and saddle of veal with vanilla carrots and potato medallions to be served with pilsner. Desserts too can be coupled with the right beer for a unique taste experience, as with plum pancakes garnished with wheat beer zabaglione and served with wheat beer itself. Beer is not only for drinking. Used as an ingredient, it can provide dishes with the perfect seasoning. But when a strong companion for a meal is needed, a beer's spices and hoppy character make it an excellent choice. It can work as a harmonious complement to a dish or provide it with a surprising contrast, remaining distinct while not overshadowing any flavors. As an extension to our recent release *Barley & Hops*, *The Gourmet's Beer Cookbook* is a book for all who enjoy good food and drink, like to cook, and are enthusiastic about new taste experiences.

nordic wellness stockholm dobelnsgatan: *Global Education Inc.* Stephen J. Ball, 2012-03 Offers an account of contemporary trends in education reform and public sector governance, focusing on the increasing role of business and philanthropy in education service delivery and education policy and the emergence of new forms of network governance.

nordic wellness stockholm dobelnsgatan: *The Global Auction* Phillip Brown, Hugh Lauder, David Ashton, 2010-11-10 For decades, the idea that more education will lead to greater individual and national prosperity has been a cornerstone of developed economies. Indeed, it is almost universally believed that college diplomas give Americans and Europeans a competitive advantage in the global knowledge wars. Challenging this conventional wisdom, *The Global Auction* forces us to reconsider our deeply held and mistaken views about how the global economy really works and how to thrive in it. Drawing on cutting-edge research based on a major international study, the authors show that the competition for good, middle-class jobs is now a worldwide competition--an auction for cut-priced brainpower--fueled by an explosion of higher education across the world. They highlight a fundamental power shift in favor of corporate bosses and emerging economies such as China and India, a change that is driving the new global high-skill, low-wage workforce. Fighting for a dwindling supply of good jobs will compel the middle classes to devote more time, money, and effort to set themselves apart in a bare-knuckle competition that will leave many disappointed. The authors urge a new conversation about the kind of society we want to live in and about the kind of global economy that can benefit workers, but without condemning millions in emerging economies to a life of poverty. *The Global Auction* is a radical rethinking of the ideas that stand at the heart of the American Dream. It offers a timely exposé of the realities of the global struggle for middle class jobs, a competition that threatens the livelihoods of millions of American and European workers and their families.

nordic wellness stockholm dobelnsgatan: *Class Strategies and the Education Market* Stephen J. Ball, 2003-08-29 *Class Strategies and the Education Market* examines the ways in which the middle classes maintain and improve their social advantages in and through education. Drawing on an extensive series of interviews with parents and children, this book identifies key moments of decision making in the construction of the educational trajectories of middle class children. Stephen J. Ball organises his analysis around the key concepts of social closure, social capital, values and principles and risk, while bringing a broad range of up-to-date sociological theory to bear upon his subject. From this thorough analysis, valuable and thought-provoking insights emerge into the assiduous care and considerable effort and expenditure which goes into ensuring the educational success of the middle class child. The middle classes are a sociological enigma, presenting the social researcher with considerable analytic and theoretical difficulties. *Class Strategies and the Education Market* provides a set of working tools for class analysis and the examination of class practices. Above all, it offers new ways of thinking about class theory and the relationships between classes in late modern society.

nordic wellness stockholm dobelnsgatan: *Class Choreographies* Jane Kenway, Johannah Fahey, Debbie Epstein, Aaron Koh, Cameron McCarthy, Fazal Rizvi, 2017-01-04 Awarded Best Book prize by CIES Globalization and Education SIG Awarded 2nd Prize in the Society of Educational Studies Annual Book Prize Elite schools have always been social choreographers par excellence. The world over, they put together highly dexterous performances as they stage and restage changing

relations of ruling. They are adept at aligning their social choreographies to shifting historical conditions and cultural tastes. In multiple theatres, they now regularly rehearse the irregular art of being global. Elite schools around the world are positioned at the intersecting pinnacles of various scales, systems and regimes of social, cultural, political and economic power. They have much in common but are also diverse. They illustrate how various modalities of power are enjoyed and put to work and how educational and social inequalities are shaped and shifted. They, thus, speak to the social zeitgeist. This book dissects this intricate choreography.

nordic wellness stockholm dobelnsgatan: Algerian Sketches Pierre Bourdieu, 2013-11-04 In the late 1950s, like tens of thousands of young men of his generation, Pierre Bourdieu, having recently passed the agrégation in philosophy, found himself immersed in the Algerian war. Motivated by an impulse that, as he himself says, 'was civic rather than political', nothing seemed more important to him than to understand the Algerian situation and provide the elements that would enable others to come to an informed judgement about it. In extremely tough conditions and along with a small group of students, Bourdieu undertook a series of studies across an Algeria that was tightly patrolled by the army, leading him to discover the shocking reality of the resettlement camps and to analyse the mechanisms of destruction of Algerian society of which they were emblematic. To achieve the objectives he had set himself, Bourdieu had to carry out a genuine intellectual conversion, acquiring an ethnographic understanding of Algerian society, learning sociological analysis at a breakneck pace and inventing new instruments - both theoretical and empirical - that would enable him to understand the relations of domination specific to colonialism. These new tools also enabled him to analyse the nature of the crisis that the war had both produced and manifested. This unique volume brings together the first texts written by Bourdieu in the midst of the Algerian conflict, as well as later writings and interviews in which he returns to the topic of Algeria and the decisive role it played in the development of his work.

nordic wellness stockholm dobelnsgatan: Elite Schools Aaron Koh, Jane Kenway, 2016-02-19 Geography matters to elite schools — to how they function and flourish, to how they locate themselves and their Others. Like their privileged clientele they use geography as a resource to elevate themselves. They mark, and market, place. This collection, as a whole, reads elite schools through a spatial lens. It offers fresh lines of inquiry to the 'new sociology of elite schools.' Collectively the authors examine elite schools and systems in different parts of the world. They highlight the ways that these schools, and their clients, operate within diverse local, national, regional, and global contexts in order to shape their own and their clients' privilege and prestige. The collection also points to the uses of the transnational as a resource via the International Baccalaureate, study tours, and the discourses of global citizenship. Building on research about social class, meritocracy, privilege, and power in education, it offers inventive critical lenses and insights particularly from the 'Global South.' As such it is an intervention in global power/knowledge geographies.

nordic wellness stockholm dobelnsgatan: Global Ethnography Michael Burawoy, 2000-10 At last world.com meets ethnography.eudora. This book shows how ethnography can have a global reach and a global relevance, its humanistic and direct methods actually made more not less relevant by recent developments in global culture and economy. Globalisation is not a singular, unilinear process, fatalistically unfolding towards inevitable ends: it entails gaps, contradictions, counter-tendencies, and marked unevenness. And just as capital flows more freely around the globe, so do human ideas and imaginings, glimpses of other possible futures. These elements all interact in really existing sites, situations and localities, not in outer space or near-earth orbit. Unprefigurally, they are taken up into all kinds of local meanings-makings by active humans struggling and creating with conditions on the ground, so producing new kinds of meanings and identities, themselves up for export on the world market. This book, conceptually rich, empirically concrete, shows how global

neo-liberalism spawns a grounded globalisation, ethnographically observable, out of which is emerging the mosaic of a new kind of global civil society. As this book so richly shows, tracing the lineaments of these possibilities and changes is the special province of ethnography.—Paul Willis, author of *Learning to Labor* and editor of the journal *Ethnography* The authors of *Global Ethnography* bring globalization 'down to earth' and show us how it impacts the everyday lives of Kerala nurses, U.S. homeless recyclers, Irish software programmers, Hungarian welfare recipients, Brazilian feminists, and a host of other protagonists in a global postmodern world. This is superb ethnography -- refreshing and vivid descriptions grounded in historical and social contexts with important theoretical implications.—Louise Lamphere, President of the American Anthropological Association The global inhabits and constitutes specific structuration of the political, economic, cultural, and subjective. How to study this is a challenge. *Global Ethnography* makes an enormous contribution to this effort.—Saskia Sassen, author of *Globalization and Its Discontents* This fascinating volume will quickly find its place in fieldwork courses, but it should also be read by transnationalists and students of the political economy, economic sociologists, methodologists of all stripes--and doubting macrosociologists.—Herbert J. Gans, Robert S. Lynd Professor of Sociology, Columbia University Not only matches the originality and quality of *Ethnography Unbound*, but raises the ante by literally expanding the methodological and analytical repertory of ethnographic sociology to address the theoretical and logistical challenges of a globalized discipline and social world.—Judith Stacey, author of *In the Name of the Family: Rethinking Family Values in the Postmodern Age* In the best traditions of radical Berkeley scholarship, Burawoy's collective recaptures the ground(s) of an engaged sociology embedded in the culturalpolitics of the global without losing the ethnographer's magic—the local touch.—Nancy Scheper-Hughes, author of *Death without Weeping*

nordic wellness stockholm dobelnsgatan: Reinventing Anthropology Dell Hymes, 1969

nordic wellness stockholm dobelnsgatan: The New Political Economy of Urban Education Pauline Lipman, 2013-05-13 Urban education and its contexts have changed in powerful ways. Old paradigms are being eclipsed by global forces of privatization and markets and new articulations of race, class, and urban space. These factors and more set the stage for Pauline Lipman's insightful analysis of the relationship between education policy and the neoliberal economic, political, and ideological processes that are reshaping cities in the United States and around the globe. Using Chicago as a case study of the interconnectedness of neoliberal urban policies on housing, economic development, race, and education, Lipman explores larger implications for equity, justice, and the right to the city. She draws on scholarship in critical geography, urban sociology and anthropology, education policy, and critical analyses of race. Her synthesis of these lenses gives added weight to her critical appraisal and hope for the future, offering a significant contribution to current arguments about urban schooling and how we think about relations between neoliberal education reforms and the transformation of cities. By examining the cultural politics of why and how these relationships resonate with people's lived experience, Lipman pushes the analysis one step further toward a new educational and social paradigm rooted in radical political and economic democracy.

nordic wellness stockholm dobelnsgatan: Geographies of the Super-rich Iain Hay, 2014 Globalization, it seems, has propelled the world's uber-wealthy to new heights of power and money, with tremendous repercussions for the other 99.9 percent of us. At a time when neoliberalism has propelled the world into a new Gilded Age, with rising inequality everywhere, an aggressive class war being waged by the wealthy, and billionaires inserting themselves bluntly into the political arena, understanding the behavior and spatiality of the super-rich has acquired a pressing urgency. This volume offers a richly textured suite of essays concerning how the super-rich have restructured

local places, transforming landscapes as varied as London and Kentucky, Ireland and St. Barts, as well as domains as varied as art, thoroughbred horses, and housing.' - Barney Warf, University of Kansas, US 'The world's super-rich, made up of just 11 million people, have access to about US\$42.0 trillion of wealth. These are people who each have a spare million of 'liquid' wealth. Their wealth is roughly equal to two thirds of global GDP. They own most of everything. As the editor of this books states '... library shelves and the pages of journals remain largely devoid of geographical work on the super-rich a startling lacuna this volume sets out to fill'. The super-rich now own most of the planet. During the last year their share fell slightly. Times may be changing. Now is the time to begin to study the super-rich in detail, especially if you are worried about where all the wealth has gone.' - Danny Dorling, University of Sheffield, UK This timely and path-breaking book brings together a group of distinguished and emerging international scholars to critically consider the geographical implications of the world's super-rich, a privileged yet remarkably overlooked group. Emerging from this unique collection is an enlightening picture of the influence of the super-rich over a diverse range of affairs, extending from the shape of urban and rural landscapes to the future of art history. By concentrating on those at the apex of the economic pyramid, this book provides valuable insights to the institutions, practices and cultural values of our society, as well as allowing us a more comprehensive view of the consequences of global capitalism. Presenting case studies from across the globe from Singapore to St Barts, London to Lexington - the spatial and cultural span of the book is wide-ranging and diverse. This truly unique book will prove a fascinating read for academics, researchers and students in the fields of geography, regional and urban studies, sociology, political science and development studies. Contributors J.V. Beaverstock, S. Chauvin, B. Cousin, M. Fasche, S.J.E. Hall, I. Hay, P. McGuirk, P. McManus, L. Murphy, C. Paris, C.-P. Pow, S.M. Roberts, R.H. Schein, J.R. Short, T. Wainwright, K. nordic wellness stockholm dobelnsgatan: Elites in an Egalitarian Society Trygve Gulbrandsen, 2018-09-06 Based on two unique survey studies of elites in Norway, this book examines whether elite attitudes towards central national issues have changed in the wake of international and national events and developments since 2000. The chapters examine elite integration and relations between elites and citizens in Norway as a means to discuss the continued viability of the Nordic welfare state model. This insight into how elites relate to central issues in Norwegian society and how they look upon citizens' political interest and competence in general, will be of interest to academics within sociology and political science, as well as journalists and commentators and policy makers.
