oasis wellness message in eagan: America's Addiction to Automobiles Chad Frederick, 2017-09-21 A provocative look at our nation's dependency on the automobile and how its potential impact on urban design will either make or break our health, economy, and quality of life. In this thought-provoking work, author and urban planning expert Chad Frederick scrutinizes the use of automobiles in cities, investigating its role in exacerbating urban inequalities and thwarting sustainability of modern society. Through a comprehensive, thoughtful discussion, Frederick illustrates how the automobile is fundamentally at odds with the very nature of cities. He shows how cars impose huge burdens on our health, equity, environment, local and national economy, and quality of life. Most of all, he shows how automobile dependency has put our entire society at risk. The book delves into the monumental role of automobiles in the development of cities after the Great Depression, impacting the American identity and affecting the way we produce and manage urban spaces. Frederick provides compelling evidence that cities with more diverse modes of transportation are greener, healthier, more prosperous, and even more enjoyable places to live than automobile-dependent cities. He identifies one institution responsible for our inability to improve our cities: the social sciences, and examines the root cause of our inability to make progress toward more multi-modal cities. In conclusion, the author offers a radical solution for moving beyond the underlying logic that forces us to create automobile-dependent cities.

oasis wellness message in eagan: Volume Control David Owen, 2019-10-29 The surprising science of hearing and the remarkable technologies that can help us hear better Our sense of hearing makes it easy to connect with the world and the people around us. The human system for processing sound is a biological marvel, an intricate assembly of delicate membranes, bones, receptor cells, and neurons. Yet many people take their ears for granted, abusing them with loud restaurants, rock concerts, and Q-tips. And then, eventually, most of us start to go deaf. Millions of Americans suffer from hearing loss. Faced with the cost and stigma of hearing aids, the natural human tendency is to do nothing and hope for the best, usually while pretending that nothing is wrong. In Volume Control, David Owen argues this inaction comes with a huge social cost. He

demystifies the science of hearing while encouraging readers to get the treatment they need for hearing loss and protect the hearing they still have. Hearing aids are rapidly improving and becoming more versatile. Inexpensive high-tech substitutes are increasingly available, making it possible for more of us to boost our weakening ears without bankrupting ourselves. Relatively soon, physicians may be able to reverse losses that have always been considered irreversible. Even the insistent buzz of tinnitus may soon yield to relatively simple treatments and techniques. With wit and clarity, Owen explores the incredible possibilities of technologically assisted hearing. And he proves that ears, whether they're working or not, are endlessly interesting.

oasis wellness message in eagan: *Haunted Ground* Darryl V. Catherine, 2011-08-10 This fascinating and insightful tour through present-day meetings of Spiritualists, UFOlogists, and dowsers illuminates our obsession with the paranormal and challenges the misunderstanding of the paranormal as a marginal or inconsequential feature of America's religious landscape. According to a 2005 Gallup poll, 75 percent of Americans believe in some form of paranormal activity. The United States has had a collective fascination with the paranormal since the mid-1800s, and it remains an integral part of our culture. *Haunted Ground: Journeys through a Paranormal America* examines three of the most vibrant paranormal gatherings in the United States—Lily Dale, a Spiritualist summer camp; the Roswell UFO Festival; and the American Society of Dowsers' annual convention of water witches—to explore and explain the reasons for our obsession with the paranormal. Both academically informed and thoroughly entertaining, this book takes readers on a road trip through our nation, guided by professor of American religion Darryl V. Catherine, PhD. The author interprets seemingly unrelated case studies of phantasmagoria collectively as an integral part of the modern discourse about nature as ultimate reality. Along the way, Dr. Catherine reveals how Americans' interest in the paranormal is rooted in their anxieties about cultural, political, and economic instability—and in a historic sense of alienation and homelessness.

oasis wellness message in eagan: No Greater Love Helen Baylor, 2007 Look at Helen Baylor today and you don't see the anguish of childhood molestation, the isolation resulting from teen-age pregnancy, the desperation of being strung out on drugs, the vulnerability of being homeless, the numbing fear of having witnessed a murder or the pain of being forced to sell her body. You're too caught up in the purity of her singing, the anointing on her voice. You hear the joy of a changed life. As a gospel singer, Helen has few peers. There are many who are better known than she but few who can sing from such depth of conviction -- and with such passion. Her story is raw and compromised. She tells of becoming a teen-age singing sensation, of joining the cast of Hair, of hooking up with the Ike and Tina Turner Review, the Captain & Tennille, a Chaka Khan and Rufus. Then she tells of her friendship with cocaine and her promiscuity. She tells of bright highs and dark lows. She tells of the underside of life and of her glorious deliverance through Jesus Christ. For Helen Baylor, there truly is no greater love.

Its proximity to adjacent cities, cultural centers, shopping, and dining combines with these natural boundaries to give the area its beautiful topography, sense of peaceful isolation, and high desirability as a great place to live, work, and play. But long before there was a freeway, the area was part of the Kyrene farming community, a rural patchwork of hardy pioneer families typifying the country's agricultural way of life during the first half of the 20th century.
