online wellness certificate programs: Re-Imagining the End of Life Janet Booth, 2019-04-18 What does it mean to be prepared for the last part of our lives? One of the many lessons author and end-of-life nurse coach Janet Booth learned at the bedside of dying people is how painful it is to come unprepared to the end of life, whether it is our own or that of our loved ones. Much of the suffering we experience seems to come from our unfamiliarity with the journey at end of life and our not knowing how to prepare for it. So there is a need for a different kind of conversation about serious illness and dying in our country. Nurses are trusted professionals who are present with people through all of life's transitions. How might they take more leadership in these conversations? The purpose of this handbook is to provide nurses, coaches, and other health care professionals with opportunities for reflection and inspiration in their work. As nurses and health care professionals, many of us have seen firsthand that the process of navigating serious illness and death within our complex health care system is often confusing, isolating, crisis-driven, and dis-heartening. What outcomes might be possible if instead: * we reimagined the end of life as a vital, purposeful stage of human development? * practices of healing - forgiveness, gratitude, and letting go - became essential parts of our care plans? * wisdom instead of fear informed our challenging

decision points? * we prepared for death in order to live more fully the time that we have? * the hard work of caregiving was sustainable and meaningful for both family and professional caregivers? In this book you will find fresh ideas, tools, and reflective practices that encourage you to explore your personal beliefs and values about aging, advanced illness, and dying. It is intended to inspire you to reimagine the end of life as a vital part of how we become fully human - a time of life that holds value, meaning, and purpose.

online wellness certificate programs: *Forward-Facing Trauma Therapy* J. Eric Gentry, 1961-09-01 In this groundbreaking book, trauma expert J. Eric Gentry builds upon the pioneering insights of such luminaries as neuroscientist Stephen Porges, Judith Herman and Bessel van der Kolk to introduce Forward-Facing Trauma Therapy (FFTT), the next evolutionary leap in the treatment of traumatic stress. Unlike many traditional psychotherapies, FFTT eschews the assumption that psychological problems are caused by our faulty perceptions and skewed thought processes. Instead, FFTT addresses trauma and its destructive symptomology at its source: overcharged autonomic nervous systems and hypervigilant threat response resulting from our adaptation to painful past experiences. Dr. Gentry provides a step-by-step guide for implementing a three-pronged methodology and explains how and why the techniques work so effectively. He also demonstrates how anyone experiencing stress can apply FFTT to achieve immediate change and an enduring sense of joy, self-worth, and personal integrity.
