ottlite wellness series wireless charging lamp: Building Strong Friendships David C. Cook, 2002-09-01 *Building Strong Friendships . . . We Need Them!* Sin always tends to make us blind to our own faults, writes James Houston, quoted in the book *Connecting*. We need a friend to stop us from deceiving ourselves that what we are doing is not so bad after all. We need a friend to help us overcome our low-image, insulated self-importance, selfishness, pride, our deceitful nature, our dangerous fantasies. . . . True, but there are so many other reasons we need close friends! And they are happy reasons, having nothing to do with sin and dysfunction. After all, what good is a smashing success without a close friend to share in our joy? What would a scrumptious dinner be like without a pal across the table to savor it with? And how can we ever truly know the good in ourselves unless our friend reminds us to take a second look and —especially in the times when we're so down on ourselves, blinded to the wonderful gifts God has given us. The Scripture agrees when it says: Two are better than one, because they have a good return for their work. If one falls down, his friend can help him up. But pity the man who falls and has no one to help him up! - Ecclesiastes 4:9-10 Yes, we

need close friends because we often stumble and need help getting up. In short, we need encouragement, affirmation, warmth, and smiling eyes looking back into ours. We'll never grow beyond our need for close friends, so let's learn how to create those friendships and keep them going strong.

ottlite wellness series wireless charging lamp: The Problem with Survey Research George Beam, 2012-08-14 The Problem with Survey Research makes a case against survey research as a primary source of reliable information. George Beam argues that all survey research instruments, all types of asking—including polls, face-to-face interviews, and focus groups—produce unreliable and potentially inaccurate results. Because those who rely on survey research only see answers to questions, it is impossible for them, or anyone else, to evaluate the results. They cannot know if the answers correspond to respondents' actual behaviors (objective phenomena) or to their true beliefs and opinions (subjective phenomena). Reliable information can only be acquired by observation, experimentation, multiple sources of data, formal model building and testing, document analysis, and comparison. In fifteen chapters divided into six parts—Ubiquity of Survey Research, The Problem, Asking Instruments, Asking Settings, Askers, and Proper Methods and Research Designs—The Problem with Survey Research demonstrates how asking instruments, settings in which asking and answering take place, and survey researchers themselves skew results and thereby make answers unreliable. The last two chapters and appendices examine observation, other methods of data collection and research designs that may produce accurate or correct information, and shows how reliance on survey research can be overcome, and must be.

ottlite wellness series wireless charging lamp: *Poison Candy* Elizabeth Parker, Mark Ebner, 2014-02-04 In August 2009, former madam Dalia Dippolito conspired with a hit man to arrange her ex-con husband's murder. Days later, it seemed as if all had gone according to plan. The beautiful, young Dalia came home from her health club to an elaborate crime scene, complete with yellow tape outlining her townhome and police milling about. When Sgt. Frank Ranzie of the Boynton Beach, Florida, police informed her of her husband Michael's apparent murder, the newlywed Dippolito can be seen on surveillance video collapsing into the cop's arms, like any loving wife would—or any wife who was pretending to be loving would. The only thing missing from her performance were actual tears. ... And the only thing missing from the murder scene was an actual murder. Tipped off by one of Dalia's lovers, an undercover detective posing as a hit man met with Dalia to plot her husband's murder while his team planned, then staged the murder scenario—brazenly inviting the reality TV show Cops along for the ride. The Cops video went viral, sparking a media frenzy: twisted tales of illicit drugs, secret boyfriends, sex-for-hire, a cuckolded former con man, and the defense's ludicrous claim that the entire hit had been staged by the intended victim for reality TV fame. In *Poison Candy*, case prosecutor Elizabeth Parker teams with bestselling crime writer Mark Ebner take you behind and beyond the courtroom scenes with astonishing never-before-revealed facts, whipsaw plot twists, and exclusive photos and details far too lurid for the trial that led to 20 years in state prison for Dalia Dippolito.
