patrick duffy family business: *The American Villain* Richard A. Hall, 2020-12-02 The American Villain: Encyclopedia of Bad Guys in Comics, Film, and Television seeks to provide one go-to reference for the study of the most popular and iconic villains in American popular culture. Since the 1980s, pop culture has focused on what makes a villain a villain. The Joker, Darth Vader, and Hannibal Lecter have all been placed under the microscope to get to the origins of their villainy. Additionally, such bad guys as Angelus from Buffy the Vampire Slayer and Barnabas Collins from Dark Shadows have emphasized the desire for redemption—in even the darkest of villains. Various incarnations of Lucifer/Satan have even gone so far as to explore the very foundations of what we consider evil. The American Villain: Encyclopedia of Bad Guys in Comics, Film, and Television seeks to collect all of those stories into one comprehensive volume. The volume opens with essays about villains in popular culture, followed by 100 A-Z entries on the most notorious bad guys in film, comics, and more. Sidebars highlight ancillary points of interest, such as authors, creators, and tropes that illuminate the motives of various villains. A glossary of key terms and a bibliography provide students with resources to continue their study of what makes the baddest among us so bad.

Morris, 2024-10-23 On September 15, 1964, ABC launched a programming experiment--a prime time series similar to the daytime soap operas that were so successful. Peyton Place became a fixture on the network's schedule for the next five years. The success of Dallas in the early 1980s made the prime time soap opera a staple of television programming. From Bare Essence through The Yellow Rose, this reference work details the successes and failures of 37 prime time serials through 1993. For each show, a lengthy history covers the character development and provides production details, and season-by-season data provide start and end of the season, time slot, comprehensive cast and credits, and an episode guide.

patrick duffy family business: Alfred Herbert Ltd and the British Machine Tool Industry, 1887-1983 Roger Lloyd-Jones, M.J. Lewis, 2017-09-29 At the beginning of the twentieth century Britain was amongst the world leaders in the production of machine tools, yet by the 1980s the industry was in terminal decline. Focusing on the example of Britain's largest machine tool maker, Alfred Herbert Ltd of Coventry, this study charts the wider fortunes of this vital part of the manufacturing sector. Taking a chronological approach, the book explores how during the late nineteenth century the industry developed a reputation for excellence throughout the world, before the challenges of two world wars necessitated drastic changes and reorganisations. Despite meeting these challenges and emerging with confidence into the post-war market place, the British machine tool industry never regained its pre-eminent position, and increasingly lost ground to foreign competition. By using the example of Alfred Herbert Ltd to illuminate the broader economic and business history of the British machine tool industry, this study not only provides a valuable insight into British manufacturing, but also contributes to the ongoing debates surrounding Britain's alleged decline as a manufacturing nation.

patrick duffy family business: Across the Borders Günter Dinhl, 2017-03-02 Until now we have only had relatively narrow economic studies comparing investments in railways with investments in other fields of individual economies. 'Across the Borders' not only opens the door for fundamental new insights into a trans-national view of railway history, but also contributes to a breakthrough in the wider study of the subject, providing the first extensive historical investigation of the worldwide system of railway financing. This book provides a wide introduction to how financiers, governments and entrepreneurs in Europe managed to face the challenges of constructing and maintaining an integrated railway network, both in their own countries and their colonies. This volume offers analysis from a selection of experts exploring the trans-national investment policies of railway construction based on numerous historical case-studies. The chapters provide insight into the international opportunities that existed for railway financing, from the perspective of economic, social, transport and railway history. With contributions from authors from 19 countries the volume is a truly international work that will be of interest to academic researchers, museum staff, archivists, and anyone who has an interest in the history and development of railways.

patrick duffy family business: Rethinking Nineteenth-Century Liberalism Simon Morgan, 2017-05-15 Richard Cobden (1804-65) rose from humble beginnings to become the leading advocate of nineteenth-century free-trade and liberalism. As a fierce opponent of the Corn Laws and promoter of international trade he rapidly became an influential figure on the national stage, whose name became a byword for political and economic reform. Yet despite the familiarity with which contemporaries and historians refer to 'Cobdenism' his ideals and beliefs are not always easy to identify and classify in a coherent way. Indeed, as this volume makes clear, the variety, diversity and malleability of the 'Cobdenite project' attest to the lack of a strict dogma and highlight Cobden's underlying pragmatism. Divided into five sections, this collection of essays offers a timely reassessment of Cobden's career, its impact and legacy in the two hundred years since his birth. Beginning with an investigation into the intellectual and cultural background to his emergence as a

national political figure, the volume then looks at Cobden's impact on the making of Victorian liberal politics. The third section examines Cobden's wider influence in Europe, particularly the impact of his tour of 1846-47 which was in many ways a defining moment not only in the making of Cobden's liberalism but in the making of liberal Europe. Section four broadens the theme of Cobden's contemporary impact, including his contribution to the debate on peace, internationalism and the American Civil War; whilst the final section opens up the theme of Cobden's contested legacy, the variety of interpretations of Cobden's ideas and their influence on late nineteenth- and twentieth-century politics. Offering a broad yet coherent investigation of the 'Cobdenite project' by leading international scholars, this volume provides a fascinating insight into one of the nineteenth century's most important figures whose ideas still resonate today.

patrick duffy family business: Economics in Russia Joachim Zweynert, 2016-04-29 The history of Russian economic ideas from the sixteenth century to contemporary times is a fascinating, tumultuous yet neglected topic among Western scholars. Whilst over the last 15 years increasing amounts of work has been done on the subject, co-operation between Russian and Western researchers in this field leaves much to be desired. In order to improve this situation, this volume unites Russian and non-Russian researchers together to provide an overview of the current state of the topic and to give a stimulus for further research. Bringing together scholars from the UK, Germany, Japan, Australia, Finland and Russia, the collection puts forward differing, yet complimentary, perspectives on the long-term history of Russian economic ideas. Offering a broad collection of articles covering the period from the seventeenth to the twentieth centuries, authors have approached the subject from diverse theoretical angles. Contributions in the tradition of Blaug and Schumpeter focusing on economic analysis in a narrower sense, and contributions that - in line with authors like Pribram or Perlman/McCann - deal with economic thought in the context of history and culture, are all represented. In terms of content, the editors have encouraged approaches that represent different economic traditions in order to encourage a diversity of opinions on the national development of Russian economics. As such the volume offers a broad and very relevant assessment of the subject for both historians and economists alike.

patrick duffy family business: Estates, Enterprise and Investment at the Dawn of the Industrial Revolution David Oldroyd, 2017-05-15 At the beginning of the eighteenth century the landed estate represented the largest and most clearly defined type of business organisation in existence in pre-industrial England. Given the need for capital, wayleave rights and a ready supply of coal, iron and other raw materials it is unsurprising that most historians tend to place Britain's formative industrial development on such estates where all these elements were available. Yet despite this consensus, relatively little attention has been paid to the management and accountancy practices of these estates, which have the potential to reveal much about the development of the industrial revolution. In this study the management practice on estates in the north-east of England (c.1700-1780) is examined through the lens of the accounts and supporting documentation. Accounts encompassed every aspect of estate operations from the housekeeper's groceries to the lead and coal mines, and thus provide direct evidence of the underlying management systems over a diverse range of activities. The information flows on estates serve as an excellent medium for testing hypotheses concerning the management of estates and the attitudes of their owners and stewards. Focusing on the surviving accounts of three leading gentry families, Bowes, Ridley and Cotesworth, who came from contrasting social backgrounds, two main issues are addressed. The first concerns the productivity of estates. Were estates managed efficiently as productive investments, and more specifically, to what extent can the landowners and their stewards legitimately be described as capitalists? The second, related, question asks in what ways did accounting aid managerial activity at this early stage of industrial development? These are the central questions this book addresses through examination of the nature and function of accounts within the organisation. By looking in detail at records from this crucial region during the period of transition to an industrial

patrick duffy family business: British Mail Steamers to South America, 1851-1965 Robert E. Forrester, 2016-04-15 During the nineteenth century Britain's maritime, commercial and colonial interests all depended upon a regular and reliable flow of seaborne information from around the globe. Whilst the telegraph increasingly came to dominate long-distance communication, postal services by sea played a vital role in the network of information exchange, particularly to the more distant locations. Much importance was placed upon these services by the British government which provided large subsidies to a small number of commercial companies to operate them. Concentrating initially on the mail service between Britain and South America, this book explores the economic and political involvement of, at the outset, The Royal Mail Steam Packet Company (later, Royal Mail Lines) from 1851 until 1874. (The Company's West Indies services were subsidized from 1840 until the early years of the 20th century.) As well as providing a business history of the Royal Mail companies the book reveals much of the development of Brazil and Argentina as trading nations and the many and varied consequences of maintaining a long-distance mail service. Improved ship design led to larger vessels of greater cargo capacities, essential to the growth of the lucrative, and highly competitive, import/export trades between Britain and Europe and South America. The provision of increased passenger services contributed to the very considerable British financial, commercial and industrial interests in Latin America well into the 20th century. The book also addresses the international competition faced by Royal Mail Lines which reflected Britain's progressively diminishing dominance of global trade and shipping. In all this book has much to say that will interest not only business historians but all those seeking a better understating of Britain's maritime and economic history.

But with changing economic times and the race for ratings, the networks gradually dropped made-for-TV movies while basic cable embraced the format, especially the Hallmark Channel (with its numerous Christmas-themed movies) and the Syfy Channel (with its array of shark attack movies and other things that go bump in the night). From the waning days of the broadcast networks to the influx of basic cable TV movies, this encyclopedia covers 1,370 films produced during the period 2000-2020. For each film entry, the reader is presented with an informative storyline, cast and character lists,

technical credits (producer, director, writer), air dates, and networks. It covers the networks (ABC, CBS, Fox, Ion, and NBC) and such basic cable channels as ABC Family, Disney, Fox Family, Freeform, Hallmark, INSP, Lifetime, Nickelodeon, Syfy, TBS and TNT. There is also an appendix of Announced but Never Produced TV movies and a performer's index.

patrick duffy family business: The Skilled Compositor, 1850-1914 Patrick Duffy, 2017-03-02 For the first time since its invention over 500 years ago, the print medium is being challenged as the primary means of recording and communicating ideas. Indeed, within the printing industry itself the advent of digital technology has rendered the craft of hand setting metal type obsolete - the days of the skilled compositor are now at an end. Patrick Duffy's work sets out to examine the experiences of the skilled compositor in the period 1850 to 1914. Focusing primarily on the workplace and the workplace institutions, it aims to explore issues of control, co-operation and conflict in order to determine if the compositor did, as many labour historians claim, belong to an aristocracy of labour. Drawing on a wide range of source material from trade society minutes to Parliamentary Papers, the author explores the diversity of experience that compositors had in the workplace and the uneven patterns of change that the trade experienced. The study throws light on some of the issues raised by these changes: what part did ancient craft traditions play in the maintenance of control in the workplace? Why were women excluded from this particular work when they were accepted in most other parts of the trade? To what extent did trade society officials represent the aspirations of the rank and file membership? Starting with an overview of the nature, growth and development of the trade, the book goes on to examine the occupational and social aspects of the compositors' experience, with a chapter devoted to women's role in the printing trade. Finally, the formation, functions and development of relevant trades unions and employers' associations is discussed. This insightful analysis of the experience of the skilled compositor provides a valuable case study for labour historians at the same time furthering our understanding of a somewhat neglected aspect of printing history.

patrick duffy family business: Mining Tycoons in the Age of Empire, 1870-1945 Raymond E. Dumett, 2009 The years of the late nineteenth and early twentieth centuries, aptly described by Mark Twain as the 'Gilded Age' witnessed an unprecedented level of technological change, material excess, untrammelled pursuit of profit and imperial expansion. Within this dynamic and often ruthless environment many colorful characters strode across the world stage, among them the great mining tycoons, who constituted one of the major spearheads of global capitalistic expansion and colonial exploitation. This volume, which carries the epic story to the mid-twentieth century, provides a truly international perspective on the role of mining entrepreneurs, investors and engineers in shaping the economic and political map of the globe, in testing management techniques and in setting a vogue for extravagant displays of wealth among the world's rich.

patrick duffy family business: Personal Capitalism and Corporate Governance Myrddin John Lewis, Roger Lloyd-Jones, Mark David Matthews, 2016-05-13 This book is specifically aimed at

addressing a gap in the study of the evolution of corporate governance in Britain. In particular its key theme, the relationship between corporate governance and personal capitalism in British manufacturing in the first half of the twentieth century, provides the means for a systematic and critical examination of the dominant Chandlerian paradigm that the long-running persistence of personal capitalism shaped the governance of British manufacturing firms well into the twentieth century and acted to erode their competitive performance. The book helps to identify those aspects of corporate governance that have undergone change, with some critical observations on the magnitude of change and those aspects which have displayed characteristics of continuity. The empirical spine of this book is set out in a series of case studies which provide the basis for the examination of corporate governance in Britain during the period c. 1900 to 1950. By focusing particularly on the responses of a range of businesses to the turbulent environment of the inter-war years, this volume offers an insight into a much neglected, yet vital, area of business and economic history.

patrick duffy family business: British Entrepreneurship in Poland Sarah Dietz, 2016-03-09 Drawing upon an impressive range of international sources, this book explores the late-nineteenth century partnership between Bradford worsted manufacturers the Briggs brothers and the German merchant Ernst Posselt, and their subsequent foreign direct investment in a modern factory and workers' community at Marki, near Warsaw in Poland. Protectionism and increasing foreign competition are discussed, among many complex economic pressures on British industry, as likely catalysts for this enterprise and the general historiography of the Polish lands is explored to reveal a climate of extraordinary opportunity for well-capitalised foreign industrialists in this period. British, Polish and German press and archival documents, as well as Russian police and factory inspectors' reports reveal the everyday experience of Polish factory workers and British consular correspondence provides fascinating insight into the machinations of the entrepreneurs and Warsaw's cosmopolitan business community. Through the development and domination of market and raw materials sources, this venture is shown to have monopolised worsted manufacture in the Russian Empire, using state of the art technology to create, and modern marketing techniques to promote, its product range and evolving image. Marki was described in 1886 as 'a second edition of Saltaire' and latterly as 'the Polish Bournville or Port Sunlight', thus aspects of British and Polish social history are compared to assess the efficacy of introducing the model-community concept, in combination with a radical employment policy, to less industrially-developed Poland. The experiences of an expatriate community of skilled Yorkshire foremen and their instrumentality in diffusing British industrial technology throughout the Russian Empire are described. Against a backdrop of political instability and social upheaval, which dramatically impacted on business behaviour after 1905 and particularly during the interwar period of

patrick duffy family business: The River Pollution Dilemma in Victorian England Leslie Rosenthal, 2016-02-17 Nineteenth-century Britain witnessed a dramatic increase in its town population, as a hitherto largely rural economy transformed itself into an urban one. Though the political and social issues arising from these events are well-known, little is known about how the British legal process coped with the everyday strains that emerged from the unprecedented scale of these changes. This book explores the river pollution dilemma faced by the British courts during the second half of the nineteenth century when the legal process had to confront the new incompatible realities arising from the increasing amounts of untreatable waste flowing into the rivers. This dilemma struck at the heart of both Victorian urban and rural society, as the necessary sanitary reformation of the swelling cities and expanding industry increasingly poisoned the rivers, threatening the countryside and agricultural rents and livelihoods. Focusing on ten legal disputes, the book investigates the dilemma that faced the courts; namely how to protect the traditional and valued rights of landholders whose rivers and lands were being polluted by industrial waste and untreated sewage, whilst not hindering the progress of sanitary reform and economic progress in the towns. The case studies considered involve major industrialising centres, such as Birmingham, Leeds, Northampton, Wolverhampton and Barnsley, but also include smaller towns such as

Tunbridge Wells, Leamington Spa and Harrogate. The fundamental issues raised remain as important today as they did in Victorian times. The need for the courts to balance a variety of conflicting needs and rights within the limits of contemporary technological capabilities often played out in surprising ways, with outcomes not always in line with theoretical expectations. As such the historical context of the disputes provide fascinating insights into nineteenth-century legal process, and the environmental and social attitudes of the times.

patrick duffy family business: From Rail to Road and Back Again? Colin Divall, 2016-03-03

The coming of the railways signalled the transformation of European society, allowing the quick and cheap mass transportation of people and goods on a previously unimaginable scale. By the early decades of the twentieth century, however, the domination of rail transport was threatened by increased motorised road transport which would quickly surpass and eclipse the trains, only itself to be challenged in the twenty-first century by a renewal of interest in railways. Yet, as the studies in this volume make clear, to view the relationship between road and rail as a simple competition between two rival forms of transportation, is a mistake. Rail transport did not vanish in the twentieth century any more than road transport vanished in the nineteenth with the appearance of the railways. Instead a mutual interdependence has always existed, balancing the strengths and weaknesses of each system. It is that interdependence that forms the major theme of this collection. Divided into two main sections, the first part of the book offers a series of chapters examining how railway companies reacted to increasing competition from road transport, and exploring the degree to which railways depended on road transportation at different times and places. Part two focuses on road mobility, interpreting it as the innovative success story of the twentieth century. Taken together, these essays provide a fascinating reappraisal of the complex and shifting nature of European transportation over the last one hundred years.

patrick duffy family business: Taste, Trade and Technology Richard Perren, 2017-09-29

Focusing on the interactions of producers, sellers and consumers of meat across the world, Richard Perren elucidates aspects of the evolution of the international economy and the part played by the investment of capital and the enterprise of individuals. The study utilises the government reports and papers issued by all countries involved in the meat trade, including North and South America, Australia, New Zealand and Britain. Beginning in the nineteenth century allows a comprehensive analysis of how an efficient meat exporting industry was built. The industry required investment, which was part of the general process of economic development. Perren focuses on the nature of the firms involved with the trade, the part played in the industry's development by foreign investment and the encouragement given by governments. Close attention is also paid to the stimulus of war, the impact of animal health and food hygiene regulations on producers and the competing demands of interest groups involved in the food businesses. By taking an historical as well as a contemporary approach, the book contributes to the current discussion on the effectiveness of animal and meat inspection in identifying farm livestock diseases such as tuberculosis and BSE. This study advances our knowledge of the process of food distribution in the industrialising and post-industrial economies, and leads to a comprehensive understanding of an important component of the international food chain.
