placerville animal wellness clinic: The Hoarder in You Robin Zasio, 2012-11-13 We all have treasured possessions—a favorite pair of shoes, a much-beloved chair, an ever-expanding record collection. But sometimes, this emotional attachment to our belongings can spiral out of control and culminate into a condition called compulsive hoarding. From hobbyists and collectors to pack rats and compulsive shoppers—it is close to impossible for hoarders to relinquish their precious objects, even if it means that stuff takes over their lives and their homes. According to psychologist Dr. Robin Zasio, our fascination with hoarding stems from the fact that most of us fall somewhere on the hoarding continuum. Even though it may not regularly interfere with our everyday lives, to some degree or another, many of us hoard. *The Hoarder In You* provides practical advice for decluttering and organizing, including how to tame the emotional pull of acquiring additional things, make order out of chaos by getting a handle on clutter, and create an organizational system that reduces stress and anxiety. Dr. Zasio also shares some of the most serious cases of hoarding that she's encountered, and explains how we can learn from these extreme examples—no matter where we are on the hoarding continuum.

placerville animal wellness clinic: **The Deeper the Roots** Michael Tubbs, 2021-11-16 "Insightful, emotional, and enraging. By sharing his story in gripping detail, Michael Tubbs embodies an old feminist tradition whereby the personal is political. He empowers us to fight for equal opportunities for our communities, and encourages us to amass the courage to overcome loss and injustice." —Ibram X. Kendi, National Book Award-winning author of *Stamped from the Beginning* and *How to Be an Antiracist* The making of a visionary political leader—and a blueprint for a more equitable country "Don't tell nobody our business," Michael Tubbs's mother often told him growing up. For Michael, that meant a lot of things: don't tell anyone about the day-to-day struggle of being Black and broke in Stockton, CA. Don't tell anyone the pain of having a father incarcerated for 25 years to life. Don't tell anyone about living two lives, the brainy bookworm and the kid with the newest Jordans. And also don't tell anyone about the particular joys of growing up with three "moms"—a Nana who never let him miss church, an Auntie who'd take him to the library any time, and a mother, "She-Daddy", who schooled him in the wisdom of hip-hop and taught him never to take no for an answer. So for a long time Michael didn't tell anyone his story, but as he went on to a scholarship at Stanford and an internship in the Obama White House, he began to realize the power of his experience, the need for his perspective in the halls of power. By the time he returned to Stockton to become, in 2016 at age 26, its first Black mayor and the youngest-ever mayor of a major American city, he knew his story meant something. *The Deeper the Roots* is a memoir astonishing in its candor, voice, and clarity of vision. Tubbs shares with us the city that raised him, his family of badass women, his life-changing encounters with Oprah Winfrey and Barack Obama, the challenges of governing in the 21st century and everything in between—en route to unveiling his compelling vision for America rooted in his experiences in his hometown.

placerville animal wellness clinic: **Counterpoints** Anti-Eviction Mapping Project, 2021-08-03 *Counterpoints: A San Francisco Bay Area Atlas of Displacement and Resistance* brings together cartography, essays, illustrations, poetry, and more in order to depict gentrification and resistance struggles from across the San Francisco Bay Area and act as a roadmap to counter-hegemonic knowledge making and activism. Compiled by the Anti-Eviction Mapping Project, each chapter reflects different frameworks for understanding the Bay Area's ongoing urban upheaval, including: evictions and root shock, indigenous geographies, health and environmental racism, state violence, transportation and infrastructure, migration and relocation, and speculative futures. By weaving these themes together, *Counterpoints* expands normative urban-studies framings of gentrification to consider more complex, regional, historically grounded, and entangled horizons for understanding the present. Understanding the tech boom and its effects means looking beyond San Francisco's borders to consider the region as a socially, economically, and politically interconnected whole and

reckoning with the area's deep history of displacement, going back to its first moments of settler colonialism. Counterpoints combines work from within the project with contributions from community partners, from longtime community members who have been fighting multiple waves of racial dispossession to elementary school youth envisioning decolonial futures. In this way, Counterpoints is a collaborative, co-created atlas aimed at expanding knowledge on displacement and resistance in the Bay Area with, rather than for or about, those most impacted.

placerville animal wellness clinic: Digital Mammography Ulrich Bick, Felix Diekmann, 2010-03-11 Digital Radiography has been firmly established in diagnostic radiology during the last decade. Because of the special requirements of high contrast and spatial resolution needed for roentgen mammography, it took some more time to develop digital mammography as a routine radiological tool. Recent technological progress in detector and screen design as well as increased experience with computer applications for image processing have now enabled Digital Mammography to become a mature modality that opens new perspectives for the diagnosis of breast diseases. The editors of this timely new volume Prof. Dr. U. Bick and Dr. F. Diekmann, both well-known international leaders in breast imaging, have for many years been very active in the frontiers of theoretical and translational clinical research, needed to bring digital mammography firmly into the sphere of daily clinical radiology. I am very much indebted to the editors as well as to the other internationally recognized experts in the field for their outstanding state of the art contributions to this volume. It is indeed an excellent handbook that covers in depth all aspects of Digital Mammography and thus further enriches our book series Medical Radiology. The highly informative text as well as the numerous well-chosen superb illustrations will enable certified radiologists as well as radiologists in training to deepen their knowledge in modern breast imaging.

placerville animal wellness clinic: *The Firehouse Light* Janet Nolan, 2010-05-25 Day after day, year after year, the lightbulb did not burn out. Here is the true story of a little lightbulb, located in a firehouse, that has stayed lit for more than one hundred years. As horse-drawn carriages make room for automobiles, dirt roads give way to paved streets, and new buildings transform small clusters of homes into bustling neighborhoods, a small town grows and changes. And fighting fires changes, too: fires once fought by bucket brigades and hand-pulled hose carts are now attended by full-time firefighters and modern firetrucks. Yet now, just like then, the lightbulb glows, strong and steady, above the brave firefighters and their trucks.

placerville animal wellness clinic: The Animals: A Novel Christian Kiefer, 2015-03-23 Named one of the Best Books of the Year by Amazon and the San Francisco Chronicle Longlisted for the Grand Prix de Littérature Policière (Foreign Authors) "[A] galloping great read... [a] genuine work of art." —Porter Shreve, San Francisco Chronicle, front-page review Bill Reed manages a wildlife

sanctuary in rural Idaho, caring for injured animals unable to survive in the wild —raptors, a wolf, and his beloved bear, Majer, among them. He hopes to marry the local vet and live out a quiet life, until a childhood friend is released from prison and threatens to reveal Bill's darkest secrets. Suddenly forced to confront his criminal past, Bill battles fiercely to preserve both the shelter and his hard-won new identity. Alternating between the past and the present, *The Animals* builds powerfully toward the revelation of Bill's defining betrayal—and the drastic lengths he'll go to in order to escape the consequences.

placerville animal wellness clinic: *Engineering Eden* Jordan Fisher Smith, 2016-06-07 The fascinating story of a trial that opened a window onto the century-long battle to control nature in the national parks. When twenty-five-year-old Harry Walker was killed by a bear in Yellowstone Park in 1972, the civil trial prompted by his death became a proxy for bigger questions about American wilderness management that had been boiling for a century. At immediate issue was whether the Park Service should have done more to keep bears away from humans, but what was revealed as the trial unfolded was just how fruitless our efforts to regulate nature in the parks had always been. The proceedings drew to the witness stand some of the most important figures in twentieth century wilderness management, including the eminent zoologist A. Starker Leopold, who had produced a landmark conservationist document in the 1950s, and all-American twin researchers John and Frank Craighead, who ran groundbreaking bear studies at Yellowstone. Their testimony would help decide whether the government owed the Walker family restitution for Harry's death, but it would also illuminate decades of patchwork efforts to preserve an idea of nature that had never existed in the first place. In this remarkable excavation of American environmental history, nature writer and former park ranger Jordan Fisher Smith uses Harry Walker's story to tell the larger narrative of the futile, sometimes fatal, attempts to remake wilderness in the name of preserving it. Tracing a course from the founding of the national parks through the tangled twentieth-century growth of the conservationist movement, Smith gives the lie to the portrayal of national parks as Edenic

wonderlands unspoiled until the arrival of Europeans, and shows how virtually every attempt to manage nature in the parks has only created cascading effects that require even more management. Moving across time and between Yellowstone, Yosemite, and Glacier national parks, Engineering Eden shows how efforts at wilderness management have always been undone by one fundamental problem--that the idea of what is wild dissolves as soon as we begin to examine it, leaving us with little framework to say what wilderness should look like and which human interventions are acceptable in trying to preserve it. In the tradition of John McPhee's *The Control of Nature* and Alan Burdick's *Out of Eden*, Jordan Fisher Smith has produced a powerful work of popular science and environmental history, grappling with critical issues that we have even now yet to resolve.

placerville animal wellness clinic: *Smoke Gets in Your Eyes: And Other Lessons from the Crematory* Caitlin Doughty, 2014-09-15 Morbid and illuminating (Entertainment Weekly)—a young mortician goes behind the scenes of her curious profession. Armed with a degree in medieval history and a flair for the macabre, Caitlin Doughty took a job at a crematory and turned morbid curiosity into her life's work. She cared for bodies of every color, shape, and affliction, and became an intrepid explorer in the world of the dead. In this best-selling memoir, brimming with gallows humor and vivid characters, she marvels at the gruesome history of undertaking and relates her unique coming-of-age story with bold curiosity and mordant wit. By turns hilarious, dark, and uplifting, *Smoke Gets in Your Eyes* reveals how the fear of dying warps our society and will make you reconsider how our culture treats the dead (San Francisco Chronicle).

placerville animal wellness clinic: **Johnny's Girl** Kim Rich, 1999-09-01 *Johnny's Girl* the nationally acclaimed memoir of growing up in Alaska's underworld as the only child of gambler John F. "Johnny" Rich and exotic dancer, Frances "Ginger" Rich. It chronicles Alaska's mean streets and her parent's tragic lives that were cut short. Kim Rich was an ordinary girl trapped in an extraordinary childhood, someone who dreamed of going to parties and getting good grades while living in an after-hours hell of gamblers, pimps, and con men. She longed for normalcy, yet she was inescapably her father's child, and she had no choice but to grow up fast. Her mother, who suffered from mental illness, was a stripper and B-girl: her father was a major player in the underworld of Anchorage, Alaska in the sixties, a city flush with newfound oil money. Only after her father was gruesomely murdered when she was 15, and Kim became a journalist, was she able to fill in the missing pieces of one American dream gone horribly wrong. Kim's true story is a tale of a woman's search for her parent's secrets. What she finds is both shocking and tragic, but in the end she's able to discover her true self amid the remnants of her parents' lost lives.

placerville animal wellness clinic: **It Was Never About the Food** Dr. Tony Paulson, Dr. Eve Snyder, Mark Gibson LCSW, 2021-04-29 *It Was Never about the Food* shows that recovery from eating disorders is possible. Whether you are someone entering treatment, returning to treatment, supporting someone in treatment, or even contemplating treatment, it is intended to shine a spotlight on the path to recovery. The authors share the stories of four individuals who developed

and struggled with an eating disorder ... and overcame it. The stories answer questions such as: • What role does an eating disorder play in someone's life? • How does an eating disorder develop and how harmful can it be? • What does the path to recovery look like? Through these stories, you will see that recovery does not come from a predictable formula. You cannot say to anyone suffering from an eating disorder that if he or she would simply do X, Y, and Z, he or she will recover. Eating disorders require a personalized and comprehensive approach to recovery. A major component to recovery seems to be the willingness to ask for help and to accept support from others—and recognizing that it is never about the food.

placerville animal wellness clinic: Culture Centers in Higher Education Lori D. Patton, 2023-07-03 Are cultural centers ethnic enclaves of segregation, or safe havens that provide minority students with social support that promotes persistence and retention? Though Black cultural centers boast a 40-year history, there is much misinformation about them and the ethnic counterparts to which they gave rise. Moreover, little is known about their historical roots, current status, and future prospects. The literature has largely ignored the various culture center models, and the role that such centers play in the experiences of college students. This book fills a significant void in the research on ethnic minority cultural centers, offers the historic background to their establishment and development, considers the circumstances that led to their creation, examines the roles they play on campus, explores their impact on retention and campus climate, and provides guidelines for their management in the light of current issues and future directions. In the first part of this volume, the contributors provide perspectives on culture centers from the point of view of various racial/ethnic identity groups, Latina/o, Asian, American Indian, and African American. Part II offers theoretical perspectives that frame the role of culture centers from the point of view of critical race theory, student development theory, and a social justice framework. Part III focuses specifically on administrative and practice-oriented themes, addressing such issues as the relative merits of full- and part-time staff, of race/ethnic specific as opposed to multicultural centers, relations with the outside community, and integration with academic and student affairs to support the mission of the institution. For administrators and student affairs educators who are unfamiliar with these facilities, and want to support an increasingly diverse student body, this book situates such centers within the overall strategy of improving campus climate, and makes the case for sustaining them. Where none as yet exist, this book offers a rationale and blueprint for creating such centers. For leaders of culture centers this book constitutes a valuable tool for assessing their viability, improving their performance, and ensuring their future relevance - all considerations of increased importance when budgets and resources are strained. This book also provides a foundation for researchers interested in further investigating the role of these centers in higher education.
