portneuf wellness complex concerts: Incorrigible Velma Demerson, 2009-10-22 On a May morning in 1939, eighteen-year-old Velma Demerson and her lover were having breakfast when two police officers arrived to take her away. Her crime was loving a Chinese man, a "crime" that was compounded by her pregnancy and subsequent mixed-race child. Sentenced to a home for wayward girls, Demerson was then transferred (along with forty-six other girls) to Torontos Mercer Reformatory for Females. The girls were locked in their cells for twelve hours a day and required to work in the on-site laundry and factory. They also endured suspect medical examinations. When Demerson was finally released after ten months' incarceration weeks of solitary confinement, abusive medical treatments, and the state's apprehension of her child, her marriage to her lover resulted in the loss of her citizenship status. This is the story of how Demerson, and so many other girls, were treated as criminals or mentally defective individuals, even though their worst crime might have been only their choice of lover. Incorrigible is a survivor's narrative. In a period that saw the rise of psychiatry, legislation against interracial marriage, and a populist movement that believed in eradicating disease and sin by improving the purity of Anglo-Saxon stock, Velma Demerson, like many young women, found herself confronted by powerful social forces. This is a history of some of those who fell through the cracks of the criminal code, told in a powerful first-person voice.

portneuf wellness complex concerts: **Teaching Landscape** Karsten Jørgensen, Nilgöl Karadeniz, Elke Mertens, Richard Stiles, 2019-08-30 Teaching Landscape: The Studio Experience gathers a range of expert contributions from across the world to collect best-practice examples of teaching landscape architecture studios. They can simulate a professional situation and promote the development of creative solutions based on gaining an understanding of a specific project site or planning area; address existing challenges in urban and rural landscapes; and often involve interaction with real stakeholders, such as municipality representatives, residents or activist groups. portneuf wellness complex concerts: *Toward an Urban Ecology* Kate Orff, 2016-07-12 Kate Orff, 2017 MacArthur Fellow, has an optimistic and transformative message about our world: we can bring together social and ecological systems to sustainably remake our cities and landscapes. Part monograph, part manual, part manifesto, *Toward an Urban Ecology* reconceives urban landscape design as a form of activism, demonstrating how to move beyond familiar and increasingly outmoded ways of thinking about environmental, urban, and social issues as separate domains; and advocating for the synthesis of practice to create a truly urban ecology. In purely practical terms, SCAPE has already generated numerous tools and techniques that designers, policy makers, and communities can use to address some of the most pressing issues of our time, including the loss of biodiversity, the loss of social cohesion, and ecological degradation. *Toward an Urban Ecology* features numerous projects and select research from SCAPE, and conveys a range of strategies to engender a more resilient and inclusive built environment.

portneuf wellness complex concerts: *Landscape Architectural Research* M. Elen Deming, Simon Swaffield, 2011-03-11 A practical, single-source guide to successful strategies for landscape architecture research As the scope of landscape architecture expands to engage with other disciplines, and streams of information directing this field continue to grow and diversify, it becomes increasingly important for landscape architects to be able to implement a range of effective research strategies when seeking, creating, and validating knowledge. *Landscape Architecture Research* offers a framework for advancing better design thinking solutions by supplying readers with a system of inquiry tactics that open up a wider range of research possibilities. Landscape Architecture Research presents: Case studies that show how the range of presented research strategies have been successfully used in practice New perspective on the relationship between theory, research, practice, and critique, a relationship that is specific to landscape architecture Detailed coverage of the ways that new knowledge is produced through research activities and practical innovations in landscape architecture The first and only book on this topic of growing importance in landscape architecture, Landscape Architecture Research keeps professionals and students in step with the latest developments in landscape architecture, and delivers a dynamic and flexible game plan for verifying the integrity of their work.

portneuf wellness complex concerts: Battio Writers Sara Rafael Garcia, 2016-03-25

BarrioWriters brings an impressive breadth and depth of emotion and cultural insights which can't be overstated. These readings are extraordinary because, together, the prose and poetry collected here by these bright young writers capture, almost all at once, what their lives are truly about, how their lives have been challenged, and yet, most importantly, how these youth almost always manage to triumph, through the very act of writing. The tough insights into their lives these writings bring come to us because of the profound understanding these youth have of how precious and fragile their lives can be when the environments surrounding them fail to protect them and those they love. Interspersed throughout this volume are valuable writing prompts other young writers like those collected here can use to develop their own literacy and literary skills. These prompts allow writers to develop their perspectives on their own, while being aided with valuable insights other prospective young writers can follow to their own ends. This new set of young Barrio Writers delivers powerful and exemplary poetic and prosaic testaments which should inspire others to tell of their lives in as impressive a style as found in this new volume.

portneuf wellness complex concerts: Tschumi Parc de La Villette Bernard Tschumi,

Jacques Derrida, Anthony Vidler, 2014 Tschumi Parc de la Villette is the first publication to document comprehensively Bernard Tschumi's first, and arguably still most celebrated project. With new and republished writing including a text by Bernard Tschumi and Anthony Vidler's Trick-Track originally published in 1986, alongside a newly-commissioned essay assessing the Parc from a contemporary and historical perspective, this book documents Parc de la Villette from its conception, through the 30 years of its existence, to the present. Tschumi Parc de la Villette includes drawings, concept sketches, models and photographs showing the development of the Parc over three decades, brought together in a single volume for the first time since the 1980s. One of the Grands Projets commissioned by the French Government in the 1980s, Parc de la Villette set a benchmark for urban parks in the latter part of the twentieth century and into the twenty-first.

Tschumi constructed a series of follies across the site, creating what he called the largest discontinuous building in the world. Published to coincide with the 30th anniversary of the Parc, Tschumi Parc de la Villette broadly celebrates the project, and articularly the way in which it has been embraced by generations of Parisians and a diverse international public.

Composite Landscapes examines one of landscape architecture's most recognizable representational forms, the montage view. The volume gathers work from a select group of influential contemporary artists and a dozen of the world's leading landscape architects. These composite views reveal practices of photomontage depicting the conceptual, experiential, and temporal dimensions of landscape. *Composite Landscapes* illustrates the analog origins of a method now rendered ubiquitous through digital means. In revisiting the composite landscape view as a cultural form, *Composite Landscapes* illuminates the contemporary status of the photographically constructed image for the design disciplines, and beyond. Landscape architects and artists presented: Yves Brunier, Claude Cormier, James Corner, Jan Dibbets, Charles Eliot, Teresa Galí-Izard, Isabella Stewart Gardner, Adriaan Geuze, Booth Grey, Christopher Grubbs/Hargreaves Associates, Gary Hilderbrand, David Hockney, Kenneth Josephson, Kienast Vogt Partners, Anuradha Mathur/Dilip Da Cunha, Valerio Morabito, Eadweard Muybridge, Humphry Repton, Arthur Shurcliff, Ken Smith/Alice Adams, John Stezaker, Stöckli, Kienast & Koepfel, Superstudio, Michael Van Valkenburgh, Richard Weller, Byron Wolfe Ausstellung/Exhibition: Isabella Stewart Gardner Museum, Boston, Massachusetts, 27.6.-2.9.2013

portneuf wellness complex concerts: *The Environmental Humanities* Robert S. Emmett,

David E. Nye, 2017-10-13 A concise overview of this multidisciplinary field, presenting key concepts, central issues, and current research, along with concrete examples and case studies. The emergence of the environmental humanities as an academic discipline early in the twenty-first century reflects the growing conviction that environmental problems cannot be solved by science and technology alone. This book offers a concise overview of this new multidisciplinary field, presenting concepts, issues, current research, concrete examples, and case studies. Robert Emmett and David Nye show how humanists, by offering constructive knowledge as well as negative critique, can improve our understanding of such environmental problems as global warming, species extinction, and over-consumption of the earth's resources. They trace the genealogy of environmental humanities from European, Australian, and American initiatives, also showing its cross-pollination by postcolonial and feminist theories. Emmett and Nye consider a concept of place not synonymous with localism, the risks of ecotourism, and the cultivation of wild areas. They discuss the decoupling of energy use and progress, and point to OECD countries for examples of sustainable development. They explain the potential for science to do both good and harm, examine dark visions of planetary collapse, and describe more positive possibilities—alternative practices, including localization and degrowth. Finally, they examine the theoretical impact of new materialism, feminism, postcolonial criticism, animal studies, and queer ecology on the environmental humanities.

portneuf wellness complex concerts: *Representing Landscapes* Nadia Amoroso, 2012-03-12

What do you communicate when you draw an industrial landscape using charcoal; what about a hyper-realistic PhotoShop collage method? What are the right choices to make? Are there right and wrong choices when it comes to presenting a particular environment in a particular way? The choice of medium for visualising an idea is something that faces all students of landscape architecture and urban design, and each medium and style option that you select will influence how your idea is seen and understood. Responding to demand from her students, Nadia Amoroso has compiled successful and eye-catching drawings using various drawing styles and techniques to create this book of drawing techniques for landscape architects to follow and - more importantly - to be inspired by. More than twenty respected institutions have helped to bring together the very best of visual representation of ideas, the most powerful, expressive and successful images. Professors from these institutions provide critical and descriptive commentaries, explaining the impact of using different media to represent the same landscape. This book is recommended for landscape architecture and

urban design students from first year to thesis and is specifically useful in visual communications and graphic courses and design studios.
