prairie health and wellness wichita ks: The Fatburn Fix Catherine Shanahan, M.D., 2020-03-24 A proven plan to optimize your health by reclaiming your natural ability to burn body fat for fuel The ability to use body fat for energy is essential to health—but over decades of practice, renowned family physician Catherine Shanahan, M.D., observed that many of her patients could not burn their body fat between meals, trapping them in a downward spiral of hunger, fatigue, and weight gain. In The Fatburn Fix, Dr. Shanahan shows us how industrially produced vegetable oils accumulate in our body fat and disrupt our body's energy-producing systems, driving food addictions that hijack our moods and habits while making it nearly impossible to control our weight. To reclaim

our health, we need to detoxify our body fat and help repair our “fatburn” capabilities. Dr. Shanahan shares five important rules to fix your fatburn: 1) Eat natural fats, not vegetable oils. 2) Eat slow-digesting carbs, not starchy carbs or sweets. 3) Seek salt. 4) Drink plenty of water. 5) Supplement with vitamins and minerals. She then provides a revolutionary, step-by-step plan to help reboot your fatburn potential in as little as two weeks. This customizable two-phase plan is widely accessible, easy to follow, and will appeal to the full spectrum of diet ideologies, from plant-based to carnivore to keto and beyond. By making a few changes to what you eat and when, you will lose unwanted weight and restore your body’s ability to store and release energy. With The Fatburn Fix, Dr. Shanahan shows how regaining your fatburn is the key to effortless weight loss and a new, elevated life, paving the way to abundant energy and long-term health and happiness.

prairie health and wellness wichita ks: Raynaud’s Phenomenon Fredrick M. Wigley, Ariane L. Herrick, Nicholas A. Flavahan, 2014-10-24 Raynaud’s Phenomenon: A Guide to Pathogenesis and Treatment comprehensively reviews the understanding of a disorder that continues to challenge primary care clinicians and specialists alike. In the last decade, there have been important advances not only in understanding the pathophysiology of Raynaud’s Phenomenon (RP), but also in developing diagnostic methods and effective drug and non-drug therapies. Thoroughly discussing the various manifestations of RP, including childhood RP, RP secondary to connective tissue disease, and a variety of other associated disorders that include vascular perturbation that mimics RP, this title provides a wealth of new information available on normal and abnormal thermoregulation and helps physicians identify the best therapeutic approaches to treating RP. The work offers differential diagnosis options, reviews potential causes such as autoimmune disease, industrial trauma, drugs, and metabolic causes and provides clear recommendations for therapy. Engaging readers with case vignettes and a plethora of visual aids, Raynaud’s Phenomenon: A Guide to Pathogenesis and Treatment is a state-of-the-art, authoritative reference and invaluable contribution to the literature that will be of interest to physicians, patients, and individuals dealing with these disease processes.

prairie health and wellness wichita ks: Next Medicine Walter Bortz, MD, 2011-01-03 Every year, the average American spends about \$7,300 on medical expenses. The typical Canadian pays \$2,700, the Briton only \$2,000. And yet, according to the World Health Organization, our healthcare system, in terms of total quality, ranks thirty-eighth in the world, right between Costa Rica and Slovenia. Not only do 40 million Americans lack health insurance, but more than 200,000 die each year because of medical mistakes. Our average life expectancy is lower than Cuba's. In Next Medicine, Dr. Walter Bortz zeroes in on why the American medicine is spiraling toward disaster. A physician with fifty years of experience and a leading authority on aging, Bortz argues that the financial interests of biotech and drug companies have distorted the healthcare system. Thanks to them, medicine today is economically motivated to treat disease rather than to prevent it. Heart disease, for example, is widely treated with drug interventions and invasive surgery--both of which are extravagantly profitable for pharmaceutical giants and hospitals. Daily exercise and a healthy diet, on the other hand, can prevent heart disease, and can be obtained by patients essentially for free--but there's no money in that. The medical-industrial complex has a vested interest in keeping us sick, and until that changes medicine will fail to effectively address the leading cause of disability and mortality today: chronic diseases like diabetes that are largely preventable. Bortz proposes a medical system that emphasizes personal responsibility and provides incentives for healthy lifestyle choices, along with new training for medical professionals. Through a lively narrative full of personal anecdotes and jarring statistics, Bortz makes a powerful case for a radically new medical system--one that is based on rigorous science and loosens the strangle hold of corporate interests on American health.
