prime iv hydration wellness smyrna: *Business Strategies for Sustainability* Helen Borland, Adam Lindgreen, Francois Maon, Véronique Ambrosini, Beatriz Palacios Florencio, Joelle Vanhamme, 2018-10-03 *Business Strategies for Sustainability* brings together important research contributions that demonstrate different approaches to business strategies for sustainability. Many corporate initiatives toward what firms perceive to be sustainability are simply efficiency drives or competitive moves – falling far short of actual strategies for ecological sustainability. To suggest true ecological sustainability strategies, this new research anthology adopts an interdisciplinary, or transdisciplinary, approach to discern what business strategies might look like if they were underpinned by environmental and ecological science. The 23 chapters in this anthology reflect five main topic sections: (a) delineating sustainability challenges and visions; (b) contradiction, integration and transformation of business and sustainability logics; (c) innovating and developing strategic capabilities for sustainability; (d) assessing and valuing sustainability; and (e) toward multi-level engagement and collaboration.

prime iv hydration wellness smyrna: *Lying in Weight* Trisha Gura, PhD, 2009-10-13 A girl with an eating disorder grows up. And then what? In this groundbreaking book, science journalist Trisha Gura explodes the myth that those who suffer from eating disorders, including anorexia nervosa and bulimia nervosa, are primarily teenage girls. In truth, twenty-five to thirty million American women twenty-five and older suffer from serious food issues, from obsessions with calorie counting to compulsions to starve then overeat. These diseases often linger from adolescence or emerge anew in the lives of adult women in ways that we are only now starting to recognize. Drawing on her own experience with anorexia, as well as the most up-to-date research and extensive interviews with clinicians and sufferers, Gura presents a startling, timely, and imperative investigation of eating disorders all grown up, and offers hope through understanding.

prime iv hydration wellness smyrna: *Seeing with Different Eyes* Patrick Curry, Angela Voss, 2009-05-05 *Seeing with Different Eyes: Essays in Astrology and Divination* represents the cutting-edge of contemporary thought and research on divination. The thirteen authors come from a variety of academic disciplines, ranging from anthropology and classics to English literature and religious studies, and all address the question of divination, astrology and oracles in a spirit of critical but sympathetic inquiry. The emphasis is on a participatory and reflexive approach which is firmly post-positivist, seeking to understand the divinatory act on its own terms within widely varying contexts – ancient Greek and Chaldean philosophy and theurgy, Theravadan Buddhism, Biblical studies, Elizabethan Hermeticism, Jacobean drama, Heideggerian philosophy, Medieval scholasticism, 19th century occultism, contemporary Guatemalan divination and Western medical practice. The authors are all teachers or researchers in the area of divination and symbolism, which is a new disciplinary focus developing at the University of Kent, Canterbury under the aegis of the MA programme in the Cultural Study of Cosmology and Divination. The essays in this volume originally contributed to an international conference of the same name held there in April 2006.

prime iv hydration wellness smyrna: Carceral Communities in Latin America Sacha Darke, Chris Garces, Luis Duno-Gottberg, Andrés Antillano, 2021-03-27 This book gathers the very best academic research to date on prison regimes in Latin America and the Caribbean. Grounded in solid ethnographic work, each chapter explores the informal dynamics of prisons in diverse territories and countries of the region – Venezuela, Brazil, Bolivia, Honduras, Nicaragua, Colombia, Puerto Rico, Dominican Republic – while theorizing how day-to-day life for the incarcerated has been forged in tandem between prison facilities and the outside world. The editors and contributors to this volume ask: how have fastest-rising incarceration rates in the world affected civilians' lives in different national contexts? How do groups of prisoners form broader and more integrated 'carceral communities' across day-to-day relations of exchange and reciprocity with guards, lawyers, family, associates, and assorted neighbors? What differences exist between carceral communities from one national context to another? Last but not least, how do carceral communities, contrary to popular opinion, necessarily become a productive force for the good and welfare of incarcerated subjects, in addition to being a potential source of troubling violence and insecurity? This edited collection represents the most rigorous scholarship to date on the prison regimes of Latin America and the Caribbean, exploring the methodological value of ethnographic reflexivity inside prisons and theorizing how daily life for the incarcerated challenges preconceptions of prisoner subjectivity,

so-called prison gangs, and bio-political order. Sacha Darke is Senior Lecturer in Criminology at University of Westminster, UK, Visiting Lecturer in Law at University of São Paulo, Brazil, and Affiliate of King's Brazil Institute, King's College London, UK. Chris Garces is Research Professor of Anthropology at Universidad San Francisco de Quito, Ecuador, and Visiting Lecturer in Law at Universidad Andina Simón Bolívar, Ecuador. Luis Duno-Gottberg is Professor at Rice University, USA. He specializes in Caribbean culture, with emphasis on race and ethnicity, politics, violence, and visual culture. Andrés Antillano is Professor in Criminology at Universidad Central de Venezuela, Venezuela.

prime iv hydration wellness smyrna: *Medicine Before Science* Roger Kenneth French, 2003-02-20 This book offers an introduction to the history of university-trained physicians from the middle ages to the eighteenth-century Enlightenment. These were the elite, in reputation and rewards, and they were successful. Yet we can form little idea of their clinical effectiveness, and to modern eyes their theory and practice often seems bizarre. But the historical evidence is that they were judged on other criteria, and the argument of this book is that these physicians helped to construct the expectations of society--and met them accordingly.

prime iv hydration wellness smyrna: Alternative Tourism in Turkey Istvan Egresi, 2016-12-08 This book takes inventory of and evaluates the available resources for the development of alternative tourism in Turkey. It examines the role of alternative tourism in future tourism development plans and proposes public policies necessary to assure sustainability. Although tourism started later in Turkey than in the Western Mediterranean countries it has grown very rapidly during the last three decades and today the country ranks among the top ten countries in the world in terms of both arrivals and receipts. However, most of the tourism development has been in the mass tourism sector or the so-called sun-sea-sand tourism. While crucial for the economic development of Turkey, mass tourism, in the absence of proper planning, has happened in a haphazard manner leading to numerous environmental and socio-cultural problems. This book argues that, in order to mitigate these problems, Turkey should encourage the development of alternative forms of tourism.

prime iv hydration wellness smyrna: Monastic Economy Across Time Rumen Lûbenov Avramov, Aleksandar Fotić, 2021 The book aims at a readership of both economists and historians. Beyond the well-known Weberian thesis concerning the role of Protestantism in the development of capitalism, monastic economies are studied to assess their impact on the religious patterns of economic behavior. Those issues are discussed in the frame of key economic concepts such as rationality, state intervention, networking, agency, and governance. The book includes essays concerning Byzantine, Ottoman and modern South-Eastern Europe, and early modern Western Europe. Survival and continuity of the monastic wealth is considered as an example of successful handling of real estate transactions, flows of funds, and contacts with financial institutions. Moreover, the book focuses on the economic impact of the privileged relations of monasticism with the secular powers. Finally, the question is raised how the monastic economy (still) matters in the contemporary world.
