revive wellness oxford ms: Global Challenges Iris Marion Young, 2006-02-10 In the late twentieth century many writers and activists envisioned new possibilities of transnational cooperation toward peace and global justice. In this book Iris Marion Young aims to revive such hopes by responding clearly to what are seen as the global challenges of the modern day. Inspired by claims of indigenous peoples, the book develops a concept of self-determination compatible with stronger institutions of global regulation. It theorizes new directions for thinking about federated relationships between peoples which assume that they need not be large or symmetrical. Young argues that the use of armed force to respond to oppression should be rare, genuinely multilateral, and follow a model of law enforcement more than war. She finds that neither cosmopolitan nor nationalist responses to questions of global justice are adequate and so offers a distinctive conception of responsibility, founded on participation in social structures, to describe the obligations that both individuals and organizations have in a world of global interdependence. Young applies clear analysis and cogent moral arguments to concrete cases, including the wars against Serbia and Iraq, the meaning of the US Patriot Act, the conflict in Palestine/Israel, and working conditions in sweat shops.

Smith, László Puczkó, 2009 Health and Wellness Tourism takes an innovative look at this rapidly growing sector of today's thriving tourism industry. This book examines the range of motivations that drive this diverse sector of tourists, the products that are being developed to meet their needs and the management implications of these developments. A wide range of international case studies illustrate the multiple aspects of the industry and new and emerging trends including spas, medical wellness, life-coaching, meditation, festivals, pilgrimage and yoga retreats. The authors also evaluate marketing and promotional strategies and assess operational and management issues in the context of health and

wellness tourism. This text includes a number of features to reinforce theory for advanced students of hospitality, leisure and tourism and related disciplines.

revive wellness oxford ms: *Solidarity Economics* Manuel Pastor, Chris Benner, 2021-10-25 Traditional economics is built on the assumption of self-interested individuals seeking to maximize personal gain. This is far from the whole story, however: sharing, caring and a desire to uphold the collective good are also powerful individual motives. In a world wracked by inequality, social divisions, and ecological destruction, can we build an alternative economics based on our mutual co-operation? In this book Chris Benner and Manuel Pastor invite us to imagine and create a new sort of solidarity economics – an approach grounded in our instincts for connection and community – and in so doing, actually build a more robust, sustainable, and equitable economy. They argue that our current economy is already deeply dependent on mutuality, but that the inequality and fragmentation created by the status quo undermines this mutuality and with it our economic wellbeing. They outline the theoretical framing, policy agenda, and social movements we need to revive solidarity and apply it to whole societies. *Solidarity Economics* is an essential read for anyone who longs for an economy that can generate prosperity, provide for all, and preserve the planet.

revive wellness oxford ms: *Wellbeing, Recovery and Mental Health* Mike Slade, Lindsay Oades, Aaron Jarden, 2017-02-01 This book brings together two bodies of knowledge - wellbeing and recovery. Wellbeing and 'positive' approaches are increasingly influencing many areas of society. Recovery in mental illness has a growing empirical evidence base. For the first time, overlaps and cross-fertilisation opportunities between the two bodies of knowledge are identified. International experts present innovations taking place within the mental health system, which include wellbeing-informed new therapies, e-health approaches and peer-led recovery communities. State-of-the-art applications of wellbeing to the wider community are also described, across education, employment, parenting and city planning. This book will be of interest to anyone connected with the mental health system, especially people using and working in services, and clinical and administrators leaders, and those interested in using research from the mental health system in the wider community.

This book analyses the social and ethical implications of the globalization of emerging skin-whitening and anti-ageing biotechnology. Using an intersectional theoretical framework and a content analysis methodology drawn from cultural studies, the sociology of knowledge, the history of colonial medicine and critical race theory, it examines technical reports, as well as print and online advertisements from pharmaceutical and cosmetics companies for skin-whitening products. With close attention to the promises of 'ageless beauty', 'brightened', youthful skin and solutions to 'pigmentation problems' for non-white women, the author reveals the dynamics of racialization and biomedicalization at work. A study of a significant sector of the globalized health and wellness industries – which requires the active participation of consumers in the biomedicalization of their own bodies – *Wellness in Whiteness* will appeal to social scientists with interests in gender, race and ethnicity, biotechnology and embodiment.

Simon, Karen Clark Salinas, Natalie Rodriguez Jansorn, Frances L. Van Voorhis, Cecelia S. Martin, Brenda G. Thomas, Marsha D. Greenfeld, Darcy J. Hutchins, Kenyatta J. Williams, 2018-07-19 Strengthen programs of family and community engagement to promote equity and increase student success! When schools, families, and communities collaborate and share responsibility for students' education, more students succeed in school. Based on 30 years of research and fieldwork, the fourth edition of the bestseller *School, Family, and Community Partnerships: Your Handbook for Action*, presents tools and guidelines to help develop more effective and more equitable programs of family and community engagement. Written by a team of well-known experts, it provides a theory and framework of six types of

involvement for action; up-to-date research on school, family, and community collaboration; and new materials for professional development and on-going technical assistance. Readers also will find: Examples of best practices on the six types of involvement from preschools, and elementary, middle, and high schools Checklists, templates, and evaluations to plan goal-linked partnership programs and assess progress CD-ROM with slides and notes for two presentations: A new awareness session to orient colleagues on the major components of a research-based partnership program, and a full One-Day Team Training Workshop to prepare school teams to develop their partnership programs. As a foundational text, this handbook demonstrates a proven approach to implement and sustain inclusive, goal-linked programs of partnership. It shows how a good partnership program is an essential component of good school organization and school improvement for student success. This book will help every district and all schools strengthen and continually improve their programs of family and community engagement.

Yet it benefits few and demands monstrous social and ecological sacrifice. Is there a viable alternative? How can we halt the endless quest to grow global production and consumption and instead secure socio-ecological conditions that support lives worth living for all? In this compelling book, leading experts Giorgos Kallis, Susan Paulson, Giacomo D'Alisa and Federico Demaria make the case for degrowth - living well with less, by living differently, prioritizing wellbeing, equity and sustainability. Drawing on emerging initiatives and enduring traditions around the world, they advance a radical degrowth vision and outline policies to shape work and care, income and investment that avoid exploitative and unsustainable practices. Degrowth, they argue, can be achieved through transformative strategies that allow societies to slow down by design, not disaster. Essential reading for all concerned citizens, policy-makers, and students, this book will be an important contribution to one of the thorniest and most pressing debates of our era.

Growth, trade, and tourism collapsed in 2020, leading to the region's first economic contraction in nearly 6 decades. Governments across Asia acted quickly to contain the virus and its economic effects, and signs of bottoming out have now appeared. Inflation remains benign, constrained by depressed demand and declining food prices. A prolonged pandemic is the primary downside risk to the outlook. Persistent or renewed outbreaks and a return to stringent containment could possibly derail the recovery and trigger financial turmoil. Recovery depends on measures to address the health crisis and on continued policy support. The pandemic has highlighted the importance of wellness, both physical and mental. Wellness—the pursuit of holistic health and well-being—is a component of the UN's Sustainable Development Goals. This report evaluates the state of wellness in Asia, documents how the wellness economy is a large and growing part of the region's economy, and discusses how policy makers can promote wellness by creating healthy living environments, encouraging physical activity and healthy diets, and enhancing workplace wellness.

"A warm and loving reflection that, like good bourbon, will stand the test of time." —Eric Asimov, The New York Times "Bourbon is for sharing, and so is Pappyland."—The Wall Street Journal The story of how Julian Van Winkle III, the caretaker of the most coveted cult Kentucky Bourbon whiskey in the world, fought to protect his family's heritage and preserve the taste of his forebears, in a world where authenticity, like his product, is in very short supply. Following his father's death decades ago, Julian Van Winkle stepped in to try to save the bourbon business his grandfather had founded on the mission statement: "We make fine bourbon—at a profit if we can, at a loss if we must, but always fine bourbon." With the company in its wilderness years, Julian committed to safeguarding his namesake's legacy or going down with the ship. Then he discovered that hundreds of barrels from the family distillery had survived their sale to a multinational conglomerate. The whiskey that Julian produced after recovering those barrels would immediately be hailed as the greatest in the world—and soon would be the hardest to find. Once they had been used up, a fresh challenge began: preserving the taste of Pappy in a new age. Wright Thompson was invited to ride along as Julian undertook the task. From the Van Winkle family, Wright learned not only about great bourbon but about complicated legacies and the rewards of honoring your people and your craft—lessons that he couldn't help but apply to his own work and life. May we all be lucky enough to find some of ourselves, as Wright Thompson did, in Pappyland.

revive wellness oxford ms: Relieving Pain in America Institute of Medicine, Board on Health Sciences Policy, Committee on Advancing Pain Research, Care, and Education, 2011-10-26 Chronic pain costs the nation up to \$635 billion each year in medical treatment and lost productivity. The 2010 Patient Protection and Affordable Care Act required the Department of Health and Human Services (HHS) to enlist the Institute of Medicine (IOM) in examining pain as a public health problem. In this report, the IOM offers a blueprint for action in transforming prevention, care, education, and research, with the goal of providing relief for people with pain in America. To reach the vast multitude of people with various types of pain, the nation must adopt a population-level prevention and management strategy. The IOM recommends that HHS develop a comprehensive plan with specific goals, actions, and timeframes. Better data are needed to help shape efforts, especially on the groups of people currently underdiagnosed and undertreated, and the IOM encourages federal and state agencies and private organizations to accelerate the collection of data on pain incidence, prevalence, and treatments. Because pain varies from patient to patient, healthcare providers should increasingly aim at tailoring pain care to each person's experience, and self-management of pain should be promoted. In addition, because there are major gaps in knowledge about pain across health care and society alike, the IOM recommends that federal agencies and other stakeholders redesign education programs to bridge these gaps. Pain is a major driver for visits to physicians, a major reason for taking medications, a major cause of disability, and a key factor in quality of life and productivity. Given the burden of pain in human lives, dollars, and social consequences, relieving pain should be a national priority.

Although a substantial proportion of older adults suffer from Alzheimer's disease or another form of dementia, a majority retain a high level of cognitive skills throughout the life span. Identifying factors that sustain and enhance cognitive well-being is a growing area of original and translational research. In 2009, there are as many as 5.2 million Americans living with Alzheimer's disease, and that figure is expected to grow to as many as 16 million by 2050. One in six women and one in 10 men who live to be at least age 55 will develop Alzheimer's disease in their

remaining lifetime. Approximately 10 million of the 78 million baby boomers who were alive in 2008 can expect to develop Alzheimer's disease. Seventy percent of people with Alzheimer's disease live at home, cared for by family and friends. In 2008, 9.8 million family members, friends, and neighbors provided unpaid care for someone with Alzheimer's disease or another form of dementia. The direct costs to Medicare and Medicaid for care of people with Alzheimer's disease amount to more than \$148 billion annually (from Alzheimer's Association, 2008 Alzheimer's Disease Facts and Figures). This book will highlight the research foundations behind brain fitness interventions as well as showcase innovative community-based programs to maintain and promote mental fitness and intervene with adults with cognitive impairment. The emphasis is on illustrating the nuts and bolts of setting up and utilizing cognitive health programs in the community, not just the laboratory.

revive wellness oxford ms: From Enforcers to Guardians Hannah L. F. Cooper, Mindy Thompson Fullilove, 2020-01-14 A public health approach to understanding and eliminating excessive police violence. Excessive police violence and its disproportionate targeting of minority communities has existed in the United States since police forces first formed in the colonial period. A personal tragedy for its victims, for the people who love them, and for their broader communities, excessive police violence is also a profound violation of human and civil rights. Most public discourse about excessive police violence focuses, understandably, on the horrors of civilian deaths. In *From Enforcers to Guardians*, Hannah L. F. Cooper and Mindy Thompson Fullilove approach the issue from a radically different angle: as a public health problem. By using a public health framing, this book challenges readers to recognize that the suffering created by excessive police violence extends far outside of death to include sexual, psychological, neglectful, and nonfatal physical violence as

well. Arguing that excessive police violence has been deliberately used to marginalize working-class and minority communities, Cooper and Fullilove describe what we know about the history, distribution, and health impacts of police violence, from slave patrols in colonial times to war on drugs policing in the present-day United States. Finally, the book surveys efforts, including Barack Obama's 2015 creation of the Task Force on 21st Century Policing, to eliminate police violence, and proposes a multisystem, multilevel strategy to end marginality and police violence and to achieve guardian policing. Aimed at anyone seeking to understand the causes and distributions of excessive police violence—and to develop interventions to end it—*From Enforcers to Guardians* frames excessive police violence so that it can be understood, researched, and taught about through a public health lens.

revive wellness oxford ms: The Shaping of Ambient Intelligence and the Internet of Things Simon Elias Bibri, 2015-11-05 Recent advances in ICT have given rise to new socially disruptive technologies: AmI and the IoT, marking a major technological change which may lead to a drastic transformation of the technological ecosystem in all its complexity, as well as to a major alteration in technology use and thus daily living. Yet no work has systematically explored AmI and the IoT as advances in science and technology (S&T) and sociotechnical visions in light of their nature, underpinning, and practices along with their implications for individual and social wellbeing and for environmental health. AmI and the IoT raise new sets of questions: In what way can we conceptualize such technologies? How can we evaluate their benefits and risks? How should science-based technology and society's politics relate? Are science-based technology and society converging in new ways? It is with such questions that this book is concerned. Positioned within the research field of Science and Technology Studies (STS), which encourages analyses whose approaches are drawn from a variety of disciplinary perspectives, this book amalgamates an investigation of AmI and the IoT technologies based on a unique approach to cross-disciplinary integration; their ethical, social, cultural, political, and environmental effects; and a philosophical analysis and evaluation of the implications of such effects. An interdisciplinary approach is indeed necessary to understand the complex issue of scientific and technological innovations that S&T are not the only driving forces of the modern, high-tech society, as well as to respond holistically, knowledgeably, reflectively, and critically to the most pressing issues and significant challenges of the modern world. This book is the first systematic study on how AmI and the IoT applications of scientific discovery link up with other developments in the spheres of the European society, including culture, politics, policy, ethics and ecological philosophy. It situates AmI and the IoT developments and innovations as modernist science-based technology enterprises in a volatile and tense relationship with an inherently contingent, heterogeneous, fractured, conflictual, plural, and reflexive postmodern social world. The issue's topicality results in a book of interest to a wide readership in science, industry, politics, and policymaking, as well as of recommendation to anyone

interested in learning the sociology, philosophy, and history of AmI and the IoT technologies, or to those who would like to better understand some of the ethical, environmental, social, cultural, and political dilemmas to what has been labeled the technologies of the 21st century.

revive wellness oxford ms: *Integrative and Functional Medical Nutrition Therapy* Diana Noland, Jeanne A. Drisko, Leigh Wagner, 2020-03-27 This textbook is a practical guide to the application of the philosophy and principles of Integrative and Functional Medical Nutrition Therapy (IFMNT) in the practice of medicine, and the key role nutrition plays in restoring and maintaining wellness. The textbook provides an overview of recent reviews and studies of physiological and biochemical contributions to IFMNT and address nutritional influences in human health overall, including poor nutrition, genomics, environmental toxicant exposures, fractured human interactions, limited physical movement, stress, sleep deprivation, and other lifestyle factors. Ultimately, this textbook serves to help practitioners, healthcare systems, and policy makers better understand this different and novel approach to complex chronic disorders. It provides the reader with real world examples of applications of the underlying principles and practices of integrative/functional nutrition therapies and presents the most up-to-date intervention strategies and clinical tools to help the reader keep abreast of developments in this emerging specialty field. Many chapters include comprehensive coverage of the topic and clinical applications with supplementary learning features such as case studies, take-home messages, patient and practitioner handouts, algorithms, and suggested readings. Integrative and Functional Medical Nutrition Therapy: Principles and Practices will serve as an invaluable guide for healthcare professionals in their clinical application of nutrition, lifestyle assessment, and intervention for each unique, individual patient.

Riba, Thomas Wise, 2018-12-07 This book offers a resource to aid in implementing psychosocial screening, assessment, and consequently integrating prevention, care and treatment (i.e. pharmacological, psychosocial rehabilitation and psychotherapeutic) in medicine. It is becoming increasingly recognized that one method of combating spiraling health care costs in developed nations is to integrate psychiatric care into medicine including primary care settings. This volume reviews the main issues relative to the paradigm of a person-centered and recovery-oriented approach that should imbue all medical areas and specialties. It proposes integration methods in

screening and assessment, clinimetric approach, dignity conserving care, cross-cultural and ethical aspects, treatment and training as a basic and mandatory need of a whole psychosomatic approach bridging the several specialties in medicine. As such, the book addresses a topic that all physicians, including primary care and psychiatric professionals in a wide variety of mental health settings are currently discussing, planning and preoccupied with, namely the task of integrating mental health into all the medical fields, including primary care, cardiology, psychiatry, oncology and so on.

revive wellness oxford ms: The Everything Store Brad Stone, 2013-10-15 The authoritative account of the rise of Amazon and its intensely driven founder, Jeff Bezos, praised by the Seattle Times as the definitive account of how a tech icon came to life. Amazon.com started off delivering books through the mail. But its visionary founder, Jeff Bezos, wasn't content with being a bookseller. He wanted Amazon to become the everything store, offering limitless selection and seductive convenience at disruptively low prices. To do so, he developed a corporate culture of relentless ambition and secrecy that's never been cracked. Until now. Brad Stone enjoyed unprecedented access to current and former Amazon employees and Bezos family members, giving readers the first in-depth, fly-on-the-wall account of life at Amazon. Compared to tech's other elite innovators -- Jobs, Gates, Zuckerberg -- Bezos is a private man. But he stands out for his restless pursuit of new markets, leading Amazon into risky new ventures like the Kindle and cloud computing, and transforming retail in the same way Henry Ford revolutionized manufacturing. The Everything Store is the revealing, definitive biography of the company that placed one of the first and largest bets on the Internet and forever changed the way we shop and read.

revive wellness oxford ms: Food Processing J. Scott Smith, Y. H. Hui, 2008-02-28 Renowned international academicians and food industry professionals have collaborated to create Food Processing: Principles and Applications. This practical, fully illustrated resource examines the principles of food processing and demonstrates their application by describing the stages and operations for manufacturing different categories of basic food products. Ideal as an undergraduate text, Food Processing stands apart in three ways: The expertise of the contributing authors is unparalleled among food processing texts today. The text is written mostly by non-engineers for other non-engineers and is therefore user-friendly and easy to read. It is one of the rare texts to use commodity manufacturing to illustrate the principles of food processing. As a hands-on guide to the essential processing principles and their application, this book serves as a relevant primary or supplemental text for students of food science and as a valuable tool for food industry professionals.

Then there is the Cornwall she discovers when, feeling increasingly dislocated in London, she moves to Newlyn, a fishing town near Land's End. This Cornwall is messier and harder; it doesn't seem like a place that would welcome strangers. But before long, Lamorna finds herself on a week-long trawler trip with a crew of local fishermen, afforded a rare glimpse into their world, their warmth and their humour. Out on the water, miles from the coast, she learns how fishing requires you to confront who you are and what it is that tethers you to the land. Dark, Salt, Clear is a bracing journey of discovery and a captivating portrait of a community sustained and defined by the sea for centuries.

revive wellness oxford ms: Creative License Margherita Spagnuolo Lobb, Nancy Amendt-Lyon, 2011-06-28 The time is ripe, more than fifty years after the publication of the magnum opus by Perls, Hefferline & Goodman, to publish a book on the topic of creativity in Gestalt therapy. The idea for this book was conceived in March 2001, on the island of Sicily, at the very first European Conference of Gestalt Therapy Writers of the European Association [or Gestalt Therapy]. Our starting point was an article on art and creativity in Gestalt therapy, which was presented there by one of the editors, and illuminated by a vision, held by the other editor, of bringing together colleagues from around the world to contribute to a qualified volume on the subject of creativity within the realm of Gestalt therapy. We wanted to continue the professional discourse internationally and capture the synergetic effects of experienced colleagues' reflections on various

aspects of our chosen subject. Moreover, we intended to explore how the theoretical reflection of one's practice can inspire effective interventions and, vice versa, how the discussion of practical experiences can shape new theoretical directions. Hence, our aim in this book is to create a forum on the concept of creativity in Gestalt therapy.

revive wellness oxford ms: Tackling Health Inequities Through Public Health Practice Richard Hofrichter, Rajiv Bhatia, 2010-03-10 Social justice has always been a core value driving public health. Today, much of the etiology of avoidable disease is rooted in inequitable social conditions brought on by disparities in wealth and power and reproduced through ongoing forms of oppression, exploitation, and marginalization. Tackling Health Inequities raises questions and provides a starting point for health practitioners ready to reorient public health practice to address the fundamental causes of health inequities. This reorientation involves restructuring the organization, culture and daily work of public health. Tackling Health Inequities is meant to inspire readers to imagine or envision public health practice and their role in ways that question contemporary thinking and assumptions, as emerging trends, social conditions, and policies generate increasing inequities in health.

revive wellness oxford ms: Emotionally Naked Anne Moss Rogers, Kimberly H. McManama O'Brien, 2021-08-24 Discover effective strategies to help prevent youth suicide In Emotionally Naked: A Teacher's Guide to Preventing Suicide and Recognizing Students at Risk, trainer, speaker, and suicide loss survivor Anne Moss Rogers, and clinical social worker and researcher, Kimberly O'Brien, PhD, LICSW, empower middle and high school educators with the knowledge and skills to leverage their relationships with students to reduce this threat to life. The purpose of this book is not to turn teachers into therapists but given the pervasive public health problem of suicide in our youth, it's a critical conversation that all educators need to feel comfortable having. Educators will learn evidence-based concepts of suicide prevention, plus lesser known innovative strategies and small culture shifts for the classroom to facilitate connection and healthy coping strategies, the foundation of suicide prevention. Included is commentary from teachers, school psychologists, experts in youth suicidology, leaders from mental health nonprofits, program directors, and students. In addition, readers will find practical tips, and sample scripts, with innovative activities that can be incorporated into teaching curricula. You'll learn about: The teacher's role in suicide prevention, intervention, postvention, collaboration The different and often cryptic ways students indicate suicidality What to do/say when a student tells you they are thinking of suicide Small shifts that can create a suicide-prevention classroom/school environment How to address a class of grieving students and the empty desk syndrome Link to a download of resources, worksheets, activities, scripts, quizzes, and more Who is it for: Middle/high school teachers and educators, school counselors, nurses, psychologists, coaches, and administrators, as well as parents who wish to better understand the complex subject of youth suicide.

revive wellness oxford ms: The Clinical Management of Nicotine Dependence James A. Cocores, 2011-10-21 The 1980s have seen a remarkable degree of public and professional acceptance of cigarette smoking as the most widespread and devastating form of drug dependence. More medical schools now give required courses about drug dependence. Prestigious journals publish reports of investigations on the subject of nicotine dependence, and more conferences and workshops are held each year on various aspects of nicotine dependence. All this is in sharp contrast

to the earlier prevailing atmosphere of dis interest, ignorance, or professional disdain. These changes created an obvious place for a textbook oriented primarily toward the needs of clinicians working with patients who have nicotine dependence. Thus, in preparation of this book, most aspects of the management of nicotine dependence are incorporated, in order to address concerns of physicians in training and other health care professionals across the world. The final product, which I believe to be comprehensive and clinically relevant throughout, is a text that I hope will be of equal use to psychologists, social workers, nurses, counselors, and physicians in all specialties. An encyclopedic treatise was deliberately avoided because that approach can be cumbersome in size, readability, and cost, and for that reason, readers will find little mention of data involving animal research, nicotine-related politics, nicotine product advertising, medical consequences of smoking, psychotherapeutic techniques, and the extent of the problem.

These multiple perspectives provide a theme for the text as well as a framework for the way each chapter outlines different options open to managers in helping them to identify, in a reflective way, the actions and choices open to them.--Cover.

revive wellness oxford ms: *Rethinking Education Across Borders* Uttam Gaulee, Shyam Sharma, Krishna Bista, 2021-02-15 This book focuses on critical issues and perspectives concerning globally mobile students, aspects that have grown in importance thanks to major geopolitical, economic, and technological changes around the globe (i.e., in and across major origins and destinations of international students). Over the past few decades, the field of international higher education and scholarship has developed robust areas of research that guide current policy, programs, and pedagogy. However, many of the established narratives and wisdoms that dominate research agendas, scope, and foci have become somewhat ossified and are unable to reflect recent political upheavals and other changes (e.g. the Brexit, Trump era, and Belt and Road Initiative) that have disrupted a number of areas including mobility patterns and recruitment practices, understanding and supporting students, engagement of global mobile students with their local counterparts, and the political economy of international education at large. By re-assessing established issues and perspectives in light of the emerging global/local situations, the contributing authors - all experts on international education - share insights on policies and practices that can help adapt to emerging challenges and opportunities for institutions, scholars, and other stakeholders in international higher education. Including theoretical, empirical, and practitioner-based methods and perspectives provided by scholars from around the world, the book offers a unique and intriguing resource.
