river vista health and wellness: Ohio's Infirmary Buildings Holly Hartlerode Kirkendall, 2023-06-12 Ohio's Infirmary Buildings uses historic and documentary photography as a tool to examine the structures once used to house Ohio's poor. Ohio became a state in 1803, and it took 48 years to establish all 88 counties. On February 26, 1816, the Ohio General Assembly officially authorized boards of county commissioners to obtain farms that included housing for paupers (or the poor), and by 1874, each county in Ohio had what was originally called the poor farm. The former Wood County Infirmary story serves as an example of how superintendents and matrons managed people in need before modern programs helped designate specialized care. Collaboration with all 88 counties across the state of Ohio shows a unified story of public charity and highlights the importance of historic preservation. As early as 1937, Ohio counties began tearing down infirmaries, leaving behind few photographic records and institutional documentation.

river vista health and wellness: Health At Every Size Linda Bacon, Lindo Bacon, 2010-05-04 Fat isn't the problem. Dieting is the problem. A society that rejects anyone whose body shape or size doesn't match an impossible ideal is the problem. A medical establishment that equates thin with healthy is the problem. The solution? Health at Every Size. Tune in to your body's expert guidance. Find the joy in movement. Eat what you want, when you want, choosing pleasurable foods that help you to feel good. You too can feel great in your body right now—and Health at Every Size will show you how. Health at Every Size has been scientifically proven to boost health and self-esteem. The program was evaluated in a government-funded academic study, its data published in well-respected scientific journals. Updated with the latest scientific research and even more powerful messages, Health at Every Size is not a diet book, and after reading it, you will be convinced the best way to win the war against fat is to give up the fight.

river vista health and wellness: Spontaneous Healing Andrew Weil, M.D., 2011-05-04 The body can heal itself. Spontaneous healing is not a miracle but a fact of biology--the result of the natural healing system that each one of us is born with. Drawing on fascinating case histories as well as medical techniques from around the world, Dr. Andrew Weil shows how spontaneous healing has worked to resolve life-threatening diseases, severe trauma, and chronic pain. Weil then outlines an eight-week program in which you'll discover: - The truth about spontaneous healing and how it interacts with the mind - The foods, vitamins, supplements, and tonic herbs that will help you enhance your innate healing powers - Advice on how to avoid environmental toxins and reduce stress - The strengths and weaknesses of conventional and alternative treatments - Natural methods to ameliorate common kinds of illnesses And much more!

river vista health and wellness: Plunkett's Insurance Industry Almanac 2008 Jack W. Plunkett, 2007-11 Insurance and risk management make up an immense, complex global industry, one which is constantly changing. Competition continues to heat up, as mergers and acquisitions create financial services mega-firms. As the insurance industry grows more global, underwriters see huge potential in China, the world's fastest-growing business market. Meanwhile, technology is making back-office tasks easier and more efficient, while direct selling and e-commerce are changing the shape of the insurance industry. This carefully-researched book (which includes a database of leading companies on CD-ROM) is a complete insurance market research and business intelligence tool-- everything you need to know about the business of insurance and risk management. The book includes our analysis of insurance and risk management industry trends, dozens of statistical tables, an industry glossary, a database of industry associations and professional organizations, and our in-depth profiles of more than 300 of the world's leading insurance companies, both in the U.S. and abroad.

river vista health and wellness: The Stewardship of Higher Education David M. Callejo Perez, Joshua Ode, 2013-10-30 Understanding the entrepreneurial nature of universities—in particular, the relationship between education and health in relation to development and wellness of communities—this volume provides a description/narration of the efforts in how universities can address their shifting contexts while engaging their communities in social change. In the development of this book, we have explored how reforms in American higher education are impacting the role of universities and their faculty. Contributors were asked to imagine possibilities for research and outreach by providing salient examples of how higher education can lead and

change how we view the role of health and education within institutions and society. Each author writes across common themes that address the problems and possibilities of higher education curriculum and projects aligned with the mission of stewardship. The authors highlight interdisciplinary approaches and projects for faculty work, modification of the Teaching-Research-Service expectations, and community initiatives that can emerge from real-life problems (to impact wellbeing) and create rich and deep research possibilities for practitioners to impact both higher education and society. The process and research approaches used by the authors include imagining the community as part of a process of the change and part of what changes, exploring how community change can build on the strengths of local people, and why community organization and advocacy should revolve around social learning and community capacity theories. Given the diversity of topics and approaches, as editors we have tried to honour both the authors' words and style in expressing their opinions to provide a forum for the readers to envision stewardship.

river vista health and wellness: Multigenerational Approaches to Fostering Children's Health and Well-Being National Academies of Sciences, Engineering, and Medicine, Division of Behavioral and Social Sciences and Education, Board on Children, Youth, and Families, Forum for Children's Well-Being: Promoting Cognitive, Affective, and Behavioral Health for Children and Youth, 2019-12-12 The opioid crisis is especially prevalent in rural and economically disadvantaged communities where poverty is associated with poor physical and mental wellbeing, health access is limited, opioid prescription rates are higher, and treatment programs are few. Children are one of the most vulnerable populations caught in this public health crisis, as a growing number are sent to live with other relatives or placed in foster care following the death of a parent or a parent's inability to continue as a primary caretaker while in recovery. Additionally, health care systems around the country have seen a dramatic increase in babies who are born with neonatal abstinence syndrome. All children affected by the opioid crisis, whether born with withdrawal symptoms or struggling as an older child surrounded by uncertainty, need dedicated attention, likely including specialized services, to achieve optimal levels of health and well-being. Unfortunately, because so many resources directed to the crises have been dedicated to the immediate and long-term needs of people who have overdosed, children often become a forgotten population. In response to this need, the Forum for Children's Well-Being convened a workshop in June 2019 on Fostering Children's Physical, Developmental and Social/Behavioral Health in the Face of the Opioid Crisis. The goal of the workshop was to explore multigenerational approaches and policy strategies to promote health and well-being, using the opioid crisis as a case study. Multigenerational approaches and policy strategies that are successful in fostering children's health in this crisis may be adaptable in the future. This publication summarizes the presentation and discussion of the workshop.

river vista health and wellness: *Rivers of Power* Laurence C. Smith, 2020-04-21 An eye-opening, sometimes alarming, and ultimately inspiring natural history of rivers and their complex and ancient relationship with human civilization (Elizabeth Kolbert, Pulitzer Prize-winning author of *The Sixth Extinction*). Rivers, more than any road, technology, or political leader, have shaped the course of human civilization. They have opened frontiers, founded cities, settled borders, and fed billions. They promote life, forge peace, grant power, and can capriciously destroy everything in their path. Even today, rivers remain a powerful global force -- one that is more critical than ever to our future. In *Rivers of Power*, geographer Laurence C. Smith explores the timeless yet underappreciated relationship between rivers and civilization as we know it. Rivers are of course

important in many practical ways (water supply, transportation, sanitation, etc). But the full breadth of their influence on the way we live is less obvious. Rivers define and transcend international borders, forcing cooperation between nations. Huge volumes of river water are used to produce energy, raw commodities, and food. Wars, politics, and demography are transformed by their devastating floods. The territorial claims of nations, their cultural and economic ties to each other, and the migrations and histories of their peoples trace back to rivers, river valleys, and the topographic divides they carve upon the world. And as climate change, technology, and cities transform our relationship with nature, new opportunities are arising to protect the waters that sustain us. Beautifully told and expansive in scope, *Rivers of Power* reveals how and why rivers have so profoundly influenced our civilization and examines the importance this vast, arterial power holds for the future of humanity. As fascinating as it is beautifully written.---Jared Diamond, Pulitzer Prize-winning author of *Guns, Germs, and Steel*, *Collapse*, and *Upheaval*

This guide profiles a wide variety of rivers from all over Alaska, concentrating on trips for intermediate boaters, and including a few major expeditions for the experienced river-runner. A section on gear outlines what to take into the backcountry.
