riverpoint sports and wellness albuquerque new mexico: *Honky Tonk Hissy Fit* Jessie Jones, Nicholas Hope, Jamie Wooten, 2021-02-09 In this rollicking, hilarious comedy, the Doublewide, Texas, gang is back and life in their tiny town has gotten crazier than ever! Just when things are looking up—the population has grown to seventeen mobile homes and a weekend farmers' market—the rug is pulled out from under the residents yet again. It seems their vacation rental trailer has drawn unwanted attention from a mega-corporation in Austin. Suddenly the corporation is interested in Doublewide. Waaaay too interested. Mayor Joveeta Crumpler is the only one suspicious enough to sound the alarm, but no one is listening. Her mother, Caprice, is too self-involved with her "career" as a local celebrity to sense the growing threat, or to even realize that grumpy old Haywood Sloggett is increasingly drawn to her—and Sloggett is fighting those romantic feelings tooth and nail. Caprice is also hell-bent on keeping her neighbor and rival, Big Ethel Satterwhite, from horning in on her domain—the Stagger Inn bar. Big Ethel has her hands full trying to teach the town's good-ol'-boy police chief, Baby Crumpler, how to dirty-dance for a countywide competition. But Baby's got as much chance of winning as Georgia Dean Rudd has of not jinxing her relationship with Nash Sloggett—she's twisting herself into knots trying to dodge his constant marriage proposals. And as the danger to the town grows, Joveeta can't even count on the usually reliable and sweet health fanatic Lark Barken—because she's currently under the spell of a demon she's only recently discovered: caffeine. But as the tentacles of the corporation envelope them all, can the citizens of this little Texas town put aside their problems and unite behind Joveeta to fight "the big guys" and turn the tide in Doublewide? A heap of hilarity with a whole lot of heart—and a stand-alone play in its own right—HONKY TONK HISSY FIT is the third comedy in the trilogy that begins with Doublewide, Texas and continues with A Doublewide, Texas Christmas. By the triumphant finale of this ferociously funny Jones Hope Wooten comedy (Could there be a double wedding in Doublewide?), you'll be throwing fits, alright—fits of laughter that'll make your sides ache!

They are historical, political, and personal in the same breath: from the memories of Shigeko Sasamori, Hiroshima survivor, to the author's quieter struggle for dignity and respect in Albuquerque, New Mexico, resurgent city of the Southwest. This beautiful collection of poetry is a powerful work of conscience, a telling of 'the truest stories ever told' about how injustice wounds--and how those who survive can learn the secrets of dreaming the world anew. Mary Oishi has given us the perfect book for this moment in history.--Demetria Martínez, author of *Mother Tongue* and *Confessions of a Berlitz-Tape Chicana*

These two volumes meticulously select and examine nine of the most influential keywords from Western literary theory while identifying the intricate historical sources of these terms and analyzing their relevance to other disciplines and ideas. The result shows how these words function as heterogeneous cultural contexts in the complexity of experience but also how they function within the context of Chinese culture as well as Chinese literature and criticism. In this volume, the editors focus on metaphor, the other, ideology and the body from the perspectives of etymology, documentation, meanings and other core factors. Students of literature and languages, and especially Chinese literature, will benefit from this two-volume set.

riverpoint sports and wellness albuquerque new mexico: *Abandoned New Mexico* John M. Mulhouse, 2020 *Abandoned New Mexico: Ghost Towns, Endangered Architecture, and Hidden History* encompasses huge swathes of time and space. As rural populations decline and young people move to ever-larger cities, much of our past is left behind. Out on the plains or along now-quiet highways, changes in modes of livelihood and transportation have moved only in one direction. Stately homes and hand-built schools, churches and bars--these are not just the stuff of individual lives, but of an entire culture. New Mexico, among the least-dense states in the country, was crossed by both the Spanish and Route 66; the railroad stretched toward every hopeful mine and outlaws died in its arms. Its pueblos are among the oldest human habitations in the U.S., and the first atomic bomb was detonated nearly dead in its center. John Mulhouse spent almost a decade documenting the forgotten corners of a state like no other through his popular *City of Dust* project. From the sunbaked Chihuahuan Desert to the snow-capped Moreno Valley, travel through John's words and pictures across the legendary Land of Enchantment.--Back cover.

riverpoint sports and wellness albuquerque new mexico: *Report of a Workshop on the Scope and Nature of Computational Thinking* National Research Council, Division on Engineering and Physical Sciences, Computer Science and Telecommunications Board, Committee

for the Workshops on Computational Thinking, 2010-04-20 Report of a Workshop on the Scope and Nature of Computational Thinking presents a number of perspectives on the definition and applicability of computational thinking. For example, one idea expressed during the workshop is that computational thinking is a fundamental analytical skill that everyone can use to help solve problems, design systems, and understand human behavior, making it useful in a number of fields. Supporters of this viewpoint believe that computational thinking is comparable to the linguistic, mathematical and logical reasoning taught to all children. Various efforts have been made to introduce K-12 students to the most basic and essential computational concepts and college curricula have tried to provide a basis for life-long learning of increasingly new and advanced computational concepts and technologies. At both ends of this spectrum, however, most efforts have not focused on fundamental concepts. The book discusses what some of those fundamental concepts might be. Report of a Workshop on the Scope and Nature of Computational Thinking explores the idea that as the use of computational devices is becoming increasingly widespread, computational thinking skills should be promulgated more broadly. The book is an excellent resource for professionals in a wide range of fields including educators and scientists.

riverpoint sports and wellness albuquerque new mexico: Red Menace Lois Ruby, 2020-02-04 A suspenseful and heartfelt story about an era whose uncertainties, controversies, and dangers will seem anything but distant to contemporary readers. If thirteen-year-old Marty Rafner had his way, he'd spend the summer of 1953 warming the bench for his baseball team, listening to Yankees games on the radio, and avoiding preparations for his bar mitzvah. Instead, he has to deal with FBI agents staking out his house because his parents—professors at the local college—are suspected communist sympathizers. Marty knows what happens to communists, or Reds, as his friends call them: They lose their jobs, get deported...or worse. Two people he's actually met, Julius and Ethel Rosenberg, have been convicted of being communist spies, and they're slated to be executed in two months. Marty just wants everything to go back to normal, but that's impossible thanks to the rumors that his parents are traitors. As his friends and teammates turn on him and federal agents track his every move, Marty isn't sure what to believe. Is his family really part of a Red Menace working against the United States? And even if they're simply patriotic Americans who refuse to be bullied by the government, what will it cost them? As the countdown to the Rosenbergs' execution date continues, it may be up to Marty to make sure his family survives.

riverpoint sports and wellness albuquerque new mexico: The Concept of Morality Pratima Bowes, 2020-07-20 In this book, originally published in 1959, the author believes that general moral concepts embody conceptions of standards in accordance with which particular moral judgments proceed and these may become objects of theoretical understanding and knowledge – and hence be treated as facts in some context of a moral nature – in an ethical enquiry that is philosophical in character. The book clarifies the implications of conceptions which are used when aspects of our experiences are evaluated from a distinctive point of view, namely that of morality. It examines some of the theories which suggest that the function of ethical philosophy is something quite other than what traditional philosophers believed it to be, namely by asking what goodness or justice is.

riverpoint sports and wellness albuquerque new mexico: Deviant Maternity Angela Joy Muir, 2020-02-17 This is the first-ever book to explore illegitimacy in Wales during the eighteenth century. Drawing on previously overlooked archival sources, it examines the scope and context of Welsh illegitimacy, and the link between illegitimacy, courtship and economic precarity. It also goes beyond courtship to consider the different identities and relationships of the mothers and fathers of illegitimate children in Wales, and the lived experience of conception, pregnancy and childbirth for unmarried mothers. This book reframes the study of illegitimacy by combining demographic, social and cultural history approaches to emphasise the diversity of experiences, contexts and consequences.

riverpoint sports and wellness albuquerque new mexico: Jesus Christ and the Life of the Mind Mark A. Noll, 2013-10-16 In *The Scandal of the Evangelical Mind* (1994) Mark Noll offered a forthrightly critical assessment of the state of evangelical thinking and scholarship. Now, nearly twenty years later, in a sequel more attuned to possibilities than to problems, Noll updates his earlier assessment and charts a positive way forward for evangelical scholarship. Noll's *Jesus Christ and the Life of the Mind* shows how the orthodox Christology confessed in the ancient Christian creeds, far from hindering or discouraging serious scholarship, can supply the motives, guidance, and framework for learning. Christian faith, Noll argues, can richly enhance intellectual engagement in the various academic disciplines -- and he demonstrates how by applying his insights to the fields of history (his own area of expertise), science, and biblical studies in particular. In a substantial postscript Noll candidly addresses the question How fares the evangelical mind today? as he highlights hopeful signs of intellectual life in a host of evangelical institutions, individuals, and movements. -- From publisher description.

riverpoint sports and wellness albuquerque new mexico: Postcomposition Sidney I Dobrin, 2011-06-02 Leading a burgeoning self-critical moment in composition studies and writing program administration, *Postcomposition* is a fundamental reconsideration of the field that attempts to shift the focus away from pedagogy and writing subjects and toward writing itself. In this forceful and reasoned critique of many of the primary tenets and widely accepted institutional structures of composition studies, Sidney I. Dobrin delivers a series of shocks to the system meant to disrupt the pedagogical imperative and move beyond the existing limits of the discipline. Dobrin evaluates the current state of composition studies, underscoring the difference between composition and writing and arguing that the field's focus on the administration of writing students and its historically imposed prohibition on theory greatly limit what can be understood about writing. Instead he envisions a more significant approach to writing, one that questions the field's conservative allegiance to subject and administration and reconsiders writing as spatial and ecological. Using concepts from ecocomposition, spatial theory, network theory, complexity theory, and systems theory, *Postcomposition* lays the groundwork for a networked theory of writing, and advocates the abandonment of administration as a useful part of the field. He also challenges the usefulness of rhetoric in writing studies, showing how writing exceeds rhetoric. *Postcomposition* is a detailed

consideration of how posthumanism affects the field's understanding of subjectivity. It also tears at the seams of the contingent labor problem. As he articulates his own frustrations with the conservatism of composition studies and builds on previous critiques of the discipline, Dobrin stages a courageous-and inevitably polemical-intellectual challenge to the entrenched ideas and assumptions that have defined composition studies.

riverpoint sports and wellness albuquerque new mexico: *Working with Faculty Writers*

Anne Ellen Geller, Michele Eodice, 2013-06-15 The imperative to write and to publish is a relatively new development in the history of academia, yet it is now a significant factor in the culture of higher education. *Working with Faculty Writers* takes a broad view of faculty writing support, advocating its value for tenure-track professors, adjuncts, senior scholars, and graduate students. The authors in the volume imagine productive campus writing support for faculty and future faculty that allows for new insights about their own disciplinary writing and writing processes, as well as the development of fresh ideas about student writing. Contributors from a variety of institution types and perspectives consider who faculty writers are and who they may be in the future, reveal the range of locations and models of support for faculty writers, explore the ways these might be delivered and assessed, and consider the theoretical, philosophical, political, and pedagogical approaches to faculty writing support, as well as its relationship to student writing support. With the pressure on faculty to be productive researchers and writers greater than ever, this is a must-read volume for administrators, faculty, and others involved in developing and assessing models of faculty writing support.

riverpoint sports and wellness albuquerque new mexico: *Historical Dictionary of the*

Crusades Corliss K. Slack, 2013-05-09 The crusades were among the longest and most bitter wars in human history and consisted of no less than seven major expeditions from Western Europe from the late 11th to the early 14th centuries for the purpose of wresting Jerusalem and the Holy Land from the control of the Muslims. In the end, it was the Muslims who won, and the Christians who suffered a major setback, and the Middle East remained firmly in Muslim hands. This was one of the worst clashes between different religions and civilizations and, for long, it was largely forgotten or brushed over. That is no longer the case, with many Muslims regarding Western interference in the region as a repeat of the crusades while launching their own jihads. So, while an old conflict, it is still with us today. Even at the time, it was very hard to understand the causes and outcome of the crusades, and that remains a problem today. This *Historical Dictionary of the Crusades* cannot claim to have resolved it, but it most definitely does make the situation easier to understand. The introduction provides an overview, tracing the crusades from one expedition to the next, and assessing their impact. The actual flow of events is far easier to follow thanks to the chronology. And maps help to trace the events geographically. The entries, and there are more than 300 of them in this second edition, look more closely at notable figures, including Pope Gregory VII, Richard "the lionhearted," and Saladin, as well as important places (Jerusalem, Constantinople and others), events, battles and sieges, as well as the use of weapons and armor. The bibliography points to further reading.

riverpoint sports and wellness albuquerque new mexico: Changing of Knowledge in Composition Lance Massey, Richard C. Gephardt, 2011-07-16 Lance Massey and Richard Gebhardt offer in this collection many signs that composition again faces a moment of precariousness, even as it did in the 1980s—the years of the great divorce from literary studies. The contours of writing in the university again are rapidly changing, making the objects of scholarship in composition again unstable. Composition is poised to move not from modern to postmodern but from process to postprocess, from a service-oriented field to a research-driven discipline. Some would say we are already there. Momentum is building to replace composition and the pedagogical imperative long implied in that term with a writing studies model devoted to the study of composition as a fundamental tool of, and force within, all areas of human activity. Appropriately, contributors here use Stephen M. North's 1987 book *The Making of Knowledge in Composition* to frame and background their discussion, as they look at both the present state of the field and its potential futures. As in North's volume, *The Changing of Knowledge in Composition* describes a body of

research and pedagogy brimming with conflicting claims, methodologies, and politics, and with little consensus regarding the proper subjects and modes of inquiry. The deep ambivalence within the field itself is evident in this collection. Contributors here envision composition both as retaining its commitment to broad-based, generalized writing instruction and as heading toward content-based vertical writing programs in departments and programs of writing studies. They both challenge and affirm composition's pedagogical heritage. And they sound both sanguine and pessimistic notes about composition's future.
