rodos palladium leisure wellness: Hard Facts, Dangerous Half-Truths, and Total

Nonsense Jeffrey Pfeffer, Robert I. Sutton, 2006-02-14 The best organizations have the best talent. . . Financial incentives drive company performance. . . Firms must change or die. Popular axioms like these drive business decisions every day. Yet too much common management “wisdom” isn’t wise at all—but, instead, flawed knowledge based on “best practices” that are actually poor, incomplete, or outright obsolete. Worse, legions of managers use this dubious knowledge to make decisions that are hazardous to organizational health. Jeffrey Pfeffer and Robert I. Sutton show how companies can bolster performance and trump the competition through evidence-based management, an approach to decision-making and action that is driven by hard facts rather than half-truths or hype. This book guides managers in using this approach to dismantle six widely held—but ultimately flawed—management beliefs in core areas including leadership, strategy, change, talent, financial incentives, and work-life balance. The authors show managers how to find and apply the best practices for their companies, rather than blindly copy what seems to have worked elsewhere. This practical and candid book challenges leaders to commit to evidence-based management as a way of organizational life—and shows how to finally turn this common sense into common practice.

rodos palladium leisure wellness: Managing With Power Jeffrey Pfeffer, 1993-11-12 Although

much as been written about how to make better decisions, a decision by itself changes nothing. The big problem facing managers and their organizations today is one of implementation--how to get things done in a timely and effective way. Problems of implementation are really issues of how to influence behavior, change the course of events, overcome resistance, and get people to do things they would not otherwise do. In a word, power. *Managing With Power* provides an in-depth look at the role of power and influence in organizations. Pfeffer shows convincingly that its effective use is an essential component of strong leadership. With vivid examples, he makes a compelling case for the necessity of power in mobilizing the political support and resources to get things done in any organization. He provides an intriguing look at the personal attributes—such as flexibility, stamina, and a high tolerance for conflict—and the structural factors—such as control of resources, access to information, and formal authority—that can help managers advance organizational goals and achieve individual success.

rodos palladium leisure wellness: The Power of Purpose Michael Catt, 2017-10-01 Why am

I here? Why is the church here? Do we still have a place in the world? What is our purpose? In an age when formerly great churches struggle to survive, baptismal pools are dry and altars empty, and the church is aging, seemingly indifferent to the next generation, we are tempted to believe we have no purpose. We are tempted to give up on living the meaningful, countercultural lives to which Christ has called us, and to give in to a world that encourages us to go with the flow. How will we respond? In his letter to the Philippians, Paul gives advice that is invaluable to the twenty-first century church. The Philippians were assembled in the middle of a corrupt, sensual society, fighting against the norms of the world around them. They were God’s representatives in a secular society, and they maintained a singular focus, vision, and purpose. In *The Power of Purpose*, Pastor Michael Catt walks us through this letter to the Philippians, exploring how God is still calling His church, even in the rapidly changing world of the 21 st century, to be his representatives. He is calling us to maintain a singular focus and vision. He is calling us to the power of purpose.
