**ron suno standing on business: The Leader in Me** Stephen R. Covey, 2012-12-11 Children in today's world are inundated with information about who to be, what to do and how to live. But what if there was a way to teach children how to manage priorities, focus on goals and be a positive influence on the world around them? *The Leader in Me* is that programme. It's based on a hugely successful initiative carried out at the A.B. Combs Elementary School in North Carolina. To hear the parents of A. B Combs talk about the school is to be amazed. In 1999, the school debuted a programme that taught *The 7 Habits of Highly Effective People* to a pilot group of students. The parents reported an incredible change in their children, who blossomed under the programme. By the end of the following year the average end-of-grade scores had leapt from 84 to 94. This book will launch the message onto a much larger platform. Stephen R. Covey takes the 7 Habits, that have already changed the lives of millions of people, and shows how children can use them as they develop. Those habits -- be proactive, begin with the end in mind, put first things first, think win-win, seek to understand and then to be understood, synergize, and sharpen the saw -- are critical skills to learn at a young age and bring incredible results, proving that it's never too early to teach someone how to live well.

**ron suno standing on business: The Teeth and Claws of the Buddha** Mikael S. Adolphson, 2007-02-28 Japan’s monastic warriors have fared poorly in comparison to the samurai, both in terms of historical reputation and representations in popular culture. Often maligned and criticized for their involvement in politics and other secular matters, they have been seen as figures separate from the larger military class. However, as Mikael Adolphson reveals in his comprehensive and authoritative examination of the social origins of the monastic forces, political conditions, and warfare practices of the Heian (794–1185) and Kamakura (1185–1333) eras, these monk-warriors (*sōhei*) were in reality inseparable from the warrior class. Their negative image, Adolphson argues, is a construct that grew out of artistic sources critical of the established temples from the fourteenth century on. In deconstructing the *sōhei* image and looking for clues as to the characteristics, role, and meaning of the monastic forces, *The Teeth and Claws of the Buddha* highlights the importance of historical circumstances; it also points to the fallacies of allowing later, especially modern, notions of religion to exert undue influence on interpretations of the past. It further suggests that, rather than constituting a separate category of violence, religious violence needs to be understood in its political, social, military, and ideological contexts.

**ron suno standing on business: Grounds for Play** Kathryn Hansen, 2023-12-22 The nautanki performances of northern India entertain their audiences with often ribald and profane stories. Rooted in the peasant society of pre-modern India, this theater vibrates with lively dancing, pulsating drumbeats, and full-throated singing. In *Grounds for Play*, Kathryn Hansen draws on field research to describe the different elements of nautanki performance: music, dance, poetry, popular story lines, and written texts. She traces the social history of the form and explores the play of meanings within nautanki narratives, focusing on the ways important social issues such as political authority, community identity, and gender differences are represented in these narratives. Unlike other styles of Indian theater, the nautanki does not draw on the pan-Indian religious epics such as the Ramayana or the Mahabharata for its subjects. Indeed, their storylines tend to center on the vicissitudes of stranded heroines in the throes of melodramatic romance. Whereas nautanki performers were once much in demand, live performances now are rare and nautanki increasingly reaches its audiences through electronic media—records, cassettes, films, television. In spite of this change, the theater form still functions as an effective conduit in the cultural flow that connects urban centers and the hinterland in an ongoing process of exchange.

**ron suno standing on business: St. Tammany Parish** Frederick Stephen Ellis, 1999-04-01 A good local history is an excellent and agreeable thing. It pleases on two counts. It satisfies the curiosity of the inhabitants of a region, whether newcomers or old settlers, especially if no adequate history had existed before. It dispels myths, corrects old wives' tales. And, if the history is first-rate, it goes beyond a factual account of persons and places, the particularities of a region, and shows the significance of these human happenings in a larger scheme of things, in this case the emergence of a new nation. Ellis's history succeeds on both counts. It is a delightful and authoritative account of lore which not even St. Tammanyites may have heard of. Did you know, for example, that there was once a flourishing wine industry in St. Tammany Parish? That local vineyards produced excellent red and white wines, the red from Concord grapes, the white from Herbemont? Did you know that in 1891 a rice crop of 50,000 barrels was harvested, half the entire output of South Carolina? . . . Ellis has rendered this pleasant and authoritative history in a graceful and lively style and with a genuine affection for the people he writes about. Walker Percy

**ron suno standing on business: *The Culture of Print*** Roger Chartier, 2014-07-14 The leading historians who are the authors of this work offer a highly original account of one of the most important transformations in Western culture: the change brought about by the discovery and development of printing in Europe. Focusing primarily on printed matter other than books, *The Culture of Print* emphasizes the specific and local contexts in which printed materials, such as

broadsheets, flysheets, and posters, were used in modern Europe. The authors show that festive, ritual, cultic, civic, and pedagogic uses of print were social activities that involved deciphering texts in a collective way, with those who knew how to read leading those who did not. Only gradually did these collective forms of appropriation give way to a practice of reading--privately, silently, using the eyes alone--that has become common today. This wide-ranging work opens up new historical and methodological perspectives and will become a focal point of debate for historians and sociologists interested in the cultural transformations that accompanied the rise of modern societies. Originally published in 1989. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

**ron suno standing on business: One L** Scott Turow, 2010-08-03 One L, Scott Turow's journal of his first year at law school and a best-seller when it was first published in 1977, has gone on to become a virtual bible for prospective law students. Not only does it introduce with remarkable clarity the ideas and issues that are the stuff of legal education; it brings alive the anxiety and competitiveness--with others and, even more, with oneself--that set the tone in this crucible of character building. Each September, a new crop of students enter Harvard Law School to begin an intense, often grueling, sometimes harrowing year of introduction to the law. Turow's group of One Ls are fresh, bright, ambitious, and more than a little daunting. Even more impressive are the faculty. Will the One Ls survive? Will they excel? Will they make the Law Review, the outward and visible sign of success in this ultra-conservative microcosm? With remarkable insight into both his fellows and himself, Turow leads us through the ups and downs, the small triumphs and tragedies of the year, in an absorbing and thought-provoking narrative that teaches the reader not only about law school and the law but about the human beings who make them what they are. In the new afterword for this edition of One L, the author looks back on law school from the perspective of ten years' work as a lawyer and offers some suggestions for reforming legal education.

**ron suno standing on business: Black Under** Ashanti Anderson, 2021-09-28 The poem from which BLACK UNDER derives its title opens with a resounding declaration: I am black and black underneath. These words are an anthem that reverberates throughout Ashanti Anderson's debut short collection. We feel them as we navigate her poems' linguistic risks and shifts and trumpets, as we straddle scales that tip us toward trauma's still-bloody knife in one turn then into cutting wit and shrewd humor in the next. We hear them amplified through Anderson's dynamic voice, which sings of anguish and atrocities and also of discovery and beauty. BLACK UNDER layers outward perception with internal truth to offer an almost-telescopic examination of the redundancies--and incongruences--of marginalization and hypervisibility. Anderson torques the contradictions of oppression, giving her speakers the breathing room to discover their own agency. In these pages, declarations are reclamations, and joy is not an aspiration but a birthright.

**ron suno standing on business: Movies (And Other Things)** Shea Serrano, 2019-10-08 INSTANT #1 NEW YORK TIMES BESTSELLER WALL STREET JOURNAL BESTSELLER BARNES & NOBLE BESTSELLER AMAZON BESTSELLER Paging through Serrano's Movies (and Other Things) is like taking a long drive at night with a friend; there's that warmth and familiarity where the chat is more important than the fastest route from Point A to Point B...It's like a textbook gone right; your attention couldn't wander if it tried. -- Elisabeth Egan, New York Times Book Review Shea Serrano is back, and his new book, Movies (And Other Things), combines the fury of a John Wick shootout, the sly brilliance of Regina George holding court at a cafeteria table, and the sheer power of a Denzel monologue, all into one. Movies (And Other Things) is a book about, quite frankly, movies (and other things). One of the chapters, for example, answers which race Kevin Costner was able to white savior the best, because did you know that he white saviors Mexicans in McFarland, USA, and white saviors Native Americans in Dances with Wolves, and white saviors Black people in Black or White,

and white saviors the Cleveland Browns in Draft Day? Another of the chapters, for a second example, answers what other high school movie characters would be in Regina George's circle of friends if we opened up the Mean Girls universe to include other movies (Johnny Lawrence is temporarily in, Claire from The Breakfast Club is in, Ferris Bueller is out, Isis from Bring It On is out...). Another of the chapters, for a third example, creates a special version of the Academy Awards specifically for rom-coms, the most underrated movie genre of all. And another of the chapters, for a final example, is actually a triple chapter that serves as an NBA-style draft of the very best and most memorable moments in gangster movies. Many, many things happen in Movies (And Other Things), some of which funny, others of which are sad, a few of which are insightful, and all of which are handled with the type of care and dedication to the smallest details and pockets of pop culture that only a book by Shea Serrano can provide.

Upon turning thirty, she ventured to her mother's native Mexico to do some root-searching and stumbled upon a social movement that shook the nation to its core. Mexican Enough chronicles her adventures rumbling with luchadores (professional wrestlers), marching with rebel teachers in Oaxaca, investigating the murder of a prominent gay activist, and sneaking into a prison to meet with indigenous resistance fighters. She also visits families of the undocumented workers she befriended back home. Travel mates include a Polish thief, a Border Patrol agent, and a sultry dominatrix. Part memoir, part journalistic reportage, Mexican Enough illuminates how we cast off our identity in our youth, only to strive to find it again as adults -- and the lessons to be learned along the way.

**ron suno standing on business:** *Perfecting Sound Forever* Greg Milner, 2009-06-09 In 1915, Thomas Edison proclaimed that he could record a live performance and reproduce it perfectly, shocking audiences who found themselves unable to tell whether what they were hearing was an Edison Diamond Disc or a flesh-and-blood musician. Today, the equation is reversed. Whereas Edison proposed that a real performance could be rebuilt with absolute perfection, Pro Tools and digital samplers now allow musicians and engineers to create the illusion of performances that never were. In between lies a century of sonic exploration into the balance between the real and the represented. Tracing the contours of this history, Greg Milner takes us through the major breakthroughs and glorious failures in the art and science of recording. An American soldier monitoring Nazi radio transmissions stumbles onto the open yet revolutionary secret of magnetic tape. Japanese and Dutch researchers build a first-generation digital audio format and watch as their compact disc is marketed by the music industry as the second coming of Edison yet derided as

heretical by analog loyalists. The music world becomes addicted to volume in the nineties and fights a self-defeating loudness war to get its fix. From Les Paul to Phil Spector to King Tubby, from vinyl to pirated CDs to iPods, Milner's Perfecting Sound Forever pulls apart musical history to answer a crucial question: Should a recording document reality as faithfully as possible, or should it improve upon or somehow transcend the music it records? The answers he uncovers will change the very way we think about music.

**ron suno standing on business:** Miss Burma Charmaine Craig, 2017-05-02 "Craig wields powerful and vivid prose to illuminate a country and a family trapped not only by war and revolution, but also by desire and loss." —Viet Thanh Nguyen, Pulitzer Prize-winning author Miss Burma tells the story of modern-day Burma through the eyes of Benny and Khin, husband and wife, and their daughter Louisa. After attending school in Calcutta, Benny settles in Rangoon, then part of the British Empire, and falls in love with Khin, a woman who is part of a long-persecuted ethnic minority group, the Karen. World War II comes to Southeast Asia, and Benny and Khin must go into hiding in the eastern part of the country during the Japanese occupation, beginning a journey that will lead them to change the country's history. Years later, Benny and Khin's eldest child, Louisa, has a danger-filled, tempestuous childhood and reaches prominence as Burma's first beauty queen soon before the country falls to dictatorship. As Louisa navigates her newfound fame, she is forced to reckon with her family's past, the West's ongoing covert dealings in her country, and her own loyalty to the cause of the Karen people. Based on the story of the author's mother and grandparents, Miss Burma is a captivating portrait of how modern Burma came to be and of the ordinary people swept up in the struggle for self-determination and freedom. "At once beautiful and heartbreaking . . . An incredible family saga." —Refinery29 "Miss Burma charts both a political history and a deeply personal one—and of those incendiary moments when private and public motivations overlap." —Los Angeles Times

By drawing on each other's determination and individual strengths, they forged a brotherhood and created a bond so strong that it would carry them through college, medical school, and well beyond. Now they've come together in *Pulse* to share their stories and encourage young people of color to pursue high-level careers. Max grew up in New York City and Washington D.C., Pierre in Chicago, and Joe in New Orleans. Underperforming schools, instability in the home, the trappings of street life, or simply being expected to fail could have derailed their aspirations, yet all three men refused to accept failure as an option. No obstacle was too great, no ambition too high. Today, Dr. Maxime Madhere, Dr. Pierre Johnson, and Dr. Joseph W. Semien Jr. are each board-certified physicians, as well as fathers and community mentors. Their message in *Pulse* is both simple and complex: no matter where you're from, no matter what society tells you, you can realize your dreams with hard work, determination, and God's guidance.

**ron suno standing on business: I Feel To Believe** Jarvis DeBerry, 2020-09-24 For twenty years, starting in 1999, Jarvis DeBerry's New Orleans Times-Picayune column was the place where the city got its most honest look at itself: the good, the bad, the wonderful, and yes, also the weird. And the city took note. DeBerry's columns inspired letters to the editor, water cooler conversations, city council considerations, and barbershop pontification. *I Feel To Believe* collects his best columns, documenting two decades of constancy and upheaval, loss, racial injustice, and class strife. In a world of tradition in which lifelong New Orleanians hold strongly that one has to be us to truly see us, DeBerry arrived and began his journey. Generations from now, his readers will receive a deep look at the Crescent City before, during, and after Katrina. *I Feel To Believe* is all at once an accounting, a reckoning, a celebration.

**ron suno standing on business: System Modeling in Cellular Biology** Zoltan Szallasi, Jörg Stelling, Vipul Periwal, 2010 An introduction and overview of system modeling in biology that is accessible to researchers from different fields, including biology, computer science, mathematics, statistics, physics, and biochemistry. Research in systems biology requires the collaboration of researchers from diverse backgrounds, including biology, computer science, mathematics, statistics, physics, and biochemistry. These collaborations, necessary because of the enormous breadth of background needed for research in this field, can be hindered by differing understandings of the limitations and applicability of techniques and concerns from different disciplines. This comprehensive introduction and overview of system modeling in biology makes the relevant

background material from all pertinent fields accessible to researchers with different backgrounds. The emerging area of systems level modeling in cellular biology has lacked a critical and thorough overview. This book fills that gap. It is the first to provide the necessary critical comparison of concepts and approaches, with an emphasis on their possible applications. It presents key concepts and their theoretical background, including the concepts of robustness and modularity and their exploitation to study biological systems; the best-known modeling approaches, and their advantages and disadvantages; lessons from the application of mathematical models to the study of cellular biology; and available modeling tools and datasets, along with their computational limitations.

**ron suno standing on business:** *The Auditioners* Doug Rand, 2005 This audition was supposed to be simple: prepare one classical monologue and one contemporary monologue. But when this challenge is taken up by a beauty queen, a stand-up comic, a slam poet, an Esperanto-speaking mime, and a parade of other crazies -- most of whom insist on doing the same Lady Macbeth piece very badly -- what's a director to do?
