sha wellness clinic mexico: Yayoi Kusama: Give Me Love Yayoi Kusama, 2016-03-22 Yayoi Kusama: Give Me Love documents the artist's most recent exhibition at David Zwirner, New York, which marked the US debut of *The Obliteration Room*, an all-white, domestic interior that viewers are invited to cover with dot stickers of various sizes and colors. Widely recognized as one of the most popular artists in the world, Yayoi Kusama has shaped her own narrative of postwar and contemporary art. Minimalism and Pop art, abstraction and conceptualism coincide in her practice, which spans painting, sculpture, performance, room-sized and outdoor installation, the written word, films, fashion, design, and architectural interventions. Born in 1929 in Matsumoto, Japan, Yayoi Kusama briefly studied painting in Kyoto before moving to New York City in the late 1950s. In the mid-1960s, she established herself in New York as an important avant-garde artist by staging groundbreaking happenings, events, and exhibitions. Now in her late 80s, Kusama is entering one of the richest creative periods of her life. Immersed in her studio six days a week, Kusama has spoken of her renewed dedication to creating art over the past years: “[N]ew ideas come welling up every day....Now I am more keenly aware of the time that remains and more in awe of the vast scope of art.” Taking *The Obliteration Room* as its centerpiece, this catalogue reveals, in vivid large-scale plates, the transformation of the space from a clean white interior to a stunningly saturated room, with ceilings, walls, and furniture covered in myriad multicolored stickers put there by viewers over the course of the exhibition. The catalogue also includes beautiful reproductions of Kusama's new large-format paintings from *My Eternal Soul* series. Ranging from bright and densely pixelated forms, to umber figures with darker blues and muted oranges, these paintings demonstrate the artist's striking command of color, and her exceptional control over balance and contrast. Bold brushstrokes hover between figuration and abstraction; vibrant, animated, and intense, these paintings introduce their own powerful pictorial logic, at once contemporary and universal. The catalogue continues with a selection of new, large Pumpkin sculptures, a form that Kusama has been exploring since her studies in Japan in the 1950s, and which gained prominence in the 1980s,

continuing to remain an essential part of her practice. Made of shiny stainless steel and featuring painted dots or dot-shaped perforations that recall The Obliteration Room, these immersive works seem created on human scale, with the tallest measuring 70 inches (178 cm). Vibrant plates capture how color, shape, size, and surface merge in these sculptures and mesmerize the viewer. Texts include a Hymn to Yayoi Kusama by art critic and poet Akira Tatehata and a poem by the artist herself.

I would highly recommend it to students or researchers who are interested in wireless sensing technologies and the associated applications." Dr. Benny Lo Lecturer, The Hamlyn Centre, Imperial College of London "This timely addition to the literature on sensors covers the broad complexity of sensing, sensor types, and the vast range of existing and emerging applications in a very clearly written and accessible manner. It is particularly good at capturing the exciting possibilities that will occur as sensor networks merge with cloud-based 'big data' analytics to provide a host of new applications that will impact directly on the individual in ways we cannot fully predict at present. It really brings this home through the use of carefully chosen case studies that bring the overwhelming concept of 'big data' down to the personal level of individual life and health." Dermot Diamond Director, National Centre for Sensor Research, Principal Investigator, CLARITY Centre for Sensor Web Technologies, Dublin City University *Sensor Technologies: Healthcare, Wellness and Environmental Applications* takes the reader on an end-to-end journey of sensor technologies, covering the fundamentals from an engineering perspective, introducing how the data gleaned can be both

processed and visualized, in addition to offering exemplar case studies in a number of application domains. It is a must-read for those studying any undergraduate course that involves sensor technologies. It also provides a thorough foundation for those involved in the research and development of applied sensor systems. I highly recommend it to any engineer who wishes to broaden their knowledge in this area! Chris Nugent Professor of Biomedical Engineering, University of Ulster

Unfortunately, many people feel they're too busy to sit down for a relaxed meal, much less set aside time to meditate. The Three Minute Meditator was written for those harried souls who crave the benefits of mindfulness but who feel they just don't have the time. It offers an easy-to-follow seven-step program that can be put into practice immediately and by anyone. Written in plain, jargon-free English, this simple plan shows that meditation doesn't need to be arcane, difficult, or painful, that it won't take time away from anything else, and that it can be learned and practiced in quick spurts throughout the day. Also included are special sections on how to apply mindfulness techniques to physical pain, relationships, aging, parenting, and other issues.

Even as quality improves on specific measures, disparities often persist. Addressing these disparities must begin with the fundamental step of bringing the nature of the disparities and the groups at risk for those disparities to light by collecting health care quality information stratified by race, ethnicity and language data. Then attention can be focused on where interventions might be best applied, and on planning and evaluating those efforts to inform the development of policy and the application of resources. A lack of standardization of categories for race, ethnicity, and language data has been suggested as one obstacle to achieving more widespread collection and utilization of these data. Race, Ethnicity, and Language Data identifies current models for collecting and coding race, ethnicity, and language data; reviews challenges involved in obtaining these data, and makes recommendations for a nationally standardized approach for use in health care quality improvement.

sha wellness clinic mexico: *Trans Bodies, Trans Selves* Laura Erickson-Schroth, 2014-05-12

There is no one way to be transgender. Transgender and gender non-conforming people have many different ways of understanding their gender identities. Only recently have sex and gender been thought of as separate concepts, and we have learned that sex (traditionally thought of as physical or biological) is as variable as gender (traditionally thought of as social). While trans people share many common experiences, there is immense diversity within trans communities. There are an estimated 700,000 transgendered individuals in the US and 15 million worldwide. Even still, there's been a notable lack of organized information for this sizable group. *Trans Bodies, Trans Selves* is a revolutionary resource—a comprehensive, reader-friendly guide for transgender people, with each chapter written by transgender or genderqueer authors. Inspired by *Our Bodies, Ourselves*, the classic and powerful compendium written for and by women, *Trans Bodies, Trans Selves* is widely accessible to the transgender population, providing authoritative information in an inclusive and respectful way and representing the collective knowledge base of dozens of influential experts. Each chapter takes the reader through an important transgender issue, such as race, religion, employment, medical and surgical transition, mental health topics, relationships, sexuality, parenthood, arts and culture, and many more. Anonymous quotes and testimonials from transgender people who have been surveyed about their experiences are woven throughout, adding compelling, personal voices to every page. In this unique way, hundreds of viewpoints from throughout the community have united to create this strong and pioneering book. It is a welcoming place for transgender and gender-questioning people, their partners and families, students, professors, guidance counselors, and others to look for up-to-date information on transgender life.
