II. Utilizing the Utah Department of Commerce's Business Registry

The official source for Utah business information.

The Utah Department of Commerce's Business Registry is the definitive source for verified business information within the state. This online database provides access to a wealth of details on registered businesses.

Accessing the Utah Department of Commerce Business Registry website.

The website is user-friendly and easily accessible; a simple online search for "Utah Department of Commerce Business Registry" will usually lead you directly to the correct site.

Navigating the search functions and parameters.

The site typically offers several search options, allowing you to search by business name, registered agent, or other key identifiers. Use accurate and complete information for optimal results.

Understanding the data available in the registry.

The registry generally contains essential business information such as the business's legal name, address, registration date, business structure (LLC, corporation, etc.), and the name of the registered agent.

These services usually come at a cost, but they often provide more detailed financial data, contact information, and industry insights. Carefully compare features and pricing before subscribing.

Strengths and limitations of third-party business information.

Remember that while these databases offer valuable information, their data might not always be completely up-to-date, and there might be some discrepancies. Always cross-reference information from multiple sources.

Be critical of the source's credibility. Check for authoritative websites and cross-reference information whenever possible.

Critical evaluation of online data is crucial.

Not all information found online is accurate or up-to-date. Always cross-reference information from multiple sources to ensure accuracy.

Identifying potential inconsistencies and outdated information.

Look for inconsistencies in data across different sources. Outdated information can lead to inaccurate conclusions.

Prioritizing official sources for the most reliable data.

state of utah business lookup: Through Angela's Eye Angela Hart, 2010-12-08 Through Angela's Eye is the untold, inside story of Operation Firewall." After a series of unfortunate changes in circumstances, my life took an unwelcomed turn. What started out as my personal battle against those terrorizing me by stealing my identity through my personal computer turned into the largest case of identity theft in United States history! Not only did the computer hackers cause me financial distress, but they threatened my life! Not only did I get mad, but now I was determined to get justice. Little did I realize that my journey would lead to the exposing of corruption within our own government up to the vice president and president of the US and continued right up to the UN! Once the first domino fell, a series of events began to unfold. Operation Firewall began in July 2003 as an investigation into access device fraud before expanding into an investigation of global credit card fraud and identity theft. This case led to the inception of many laws being placed on the books to prosecute those who were perpetuating the crimes. The removal of spyware, malware, and malicious web sites that were trafficking in stolen identities, spam, hacking and even pornography are some of the positive results. My account of "Operation Firewall" will make Watergate look like child's play. It has led to over 4,000 cases and well over 64,000 arrests as of December 2005. The ramifications of this case will go on for years to come. As a result of the investigation, over \$260 billion per year is being saved by taking these criminals off the streets. It was a war that was fought without weapons but used computers coupled with a woman's intuition and common sense! Here is the inside story of "Operation Firewall," case number SSC_2003R01260 as told by someone who is seeking Divine Justice.
