steve harvey health and wellness: Pulse of Perseverance Pierre Johnson, 2017-11 What drove three young black men, each from America's most urban environments, to achieve their dreams of becoming doctors? The answer is in the Pulse of Perseverance. In 1998, Max Madhere, Pierre Johnson, and Joe Semien were three young, black, premedical students at Xavier University of Louisiana. Each was struggling with the demands of Xavier's rigorous curriculum, yet each was

determined to succeed, even if the statistics, or the stereotypes about black men, said otherwise. By drawing on each other's determination and individual strengths, they forged a brotherhood and created a bond so strong that it would carry them through college, medical school, and well beyond. Now they've come together in Pulse to share their stories and encourage young people of color to pursue high-level careers. Max grew up in New York City and Washington D.C., Pierre in Chicago, and Joe in New Orleans. Underperforming schools, instability in the home, the trappings of street life, or simply being expected to fail could have derailed their aspirations, yet all three men refused to accept failure as an option. No obstacle was too great, no ambition too high. Today, Dr. Maxime Madhere, Dr. Pierre Johnson, and Dr. Joseph W. Semien Jr. are each board-certified physicians, as well as fathers and community mentors. Their message in Pulse is both simple and complex: no matter where you're from, no matter what society tells you, you can realize your dreams with hard work, determination, and God's guidance.

steve harvey health and wellness: Natural Causes Barbara Ehrenreich, 2018-04-10 From the celebrated author of *Nickel and Dimed*, Barbara Ehrenreich explores how we are killing ourselves to live longer, not better. A razor-sharp polemic which offers an entirely new understanding of our bodies, ourselves, and our place in the universe, *Natural Causes* describes how we over-prepare and worry way too much about what is inevitable. One by one, Ehrenreich topples the shibboleths that guide our attempts to live a long, healthy life -- from the importance of preventive medical screenings to the concepts of wellness and mindfulness, from dietary fads to fitness culture. But *Natural Causes* goes deeper -- into the fundamental unreliability of our bodies and even our mind-bodies, to use the fashionable term. Starting with the mysterious and seldom-acknowledged tendency of our own immune cells to promote deadly cancers, Ehrenreich looks into the cellular basis of aging, and shows how little control we actually have over it. We tend to believe we have agency over our bodies, our minds, and even over the manner of our deaths. But the latest science shows that the microscopic subunits of our bodies make their own decisions, and not always in our favor. We may buy expensive anti-aging products or cosmetic surgery, get preventive screenings and eat more kale, or throw ourselves into meditation and spirituality. But all these things offer only the illusion of control. How to live well, even joyously, while accepting our mortality -- that is the vitally important philosophical challenge of this book. Drawing on varied sources, from personal experience and sociological trends to pop culture and current scientific literature, *Natural Causes* examines the ways in which we obsess over death, our bodies, and our health. Both funny and caustic, Ehrenreich then tackles the seemingly unsolvable problem of how we might better prepare ourselves for the end -- while still reveling in the lives that remain to us.

A readable introduction to the whole field and great on the making of our physicality.”—Nature In this book, Daniel E. Lieberman illuminates the major transformations that contributed to key adaptations to the body: the rise of bipedalism; the shift to a non-fruit-based diet; the advent of hunting and gathering; and how cultural changes like the Agricultural and Industrial Revolutions have impacted us physically. He shows how the increasing disparity between the jumble of adaptations in our Stone Age bodies and advancements in the modern world is occasioning a paradox: greater longevity but increased chronic disease. And finally—provocatively—he advocates the use of evolutionary information to help nudge, push, and sometimes even compel us to create a more salubrious environment and pursue better lifestyles.

steve harvey health and wellness: *The Ministry of Thin* Emma Woolf, 2014-05-19 We're obsessed with weight, we dislike our bodies, we worry about the food we eat, we feel guilty, we diet. Too many of us are locked into a war with our own bodies which we'll never win, and which will never make us happy. *The Ministry of Thin* takes a controversial, unflinching look at how the modern, international obsession with weight loss, youth, beauty, and perfection has spun out of control. Emma Woolf, author of *An Apple a Day*, explores how we might all be able to stop hating and start liking our own bodies again. She rallies against the industries of food, health, exercise, beauty, sex, and surgery that seek to create a world that verges on the Orwellian—with the victims of this onslaught trapped and dominated by the societal pressures to conform. And she dares to ask: if losing weight is the answer, what is the question?

steve harvey health and wellness: *The Shapeless Unease* Samantha Harvey, 2020-05-12
“Sleeplessness gets the Susan Sontag illness-as-metaphor treatment in this pensive, compact, lyrical inquiry into the author’s nighttime demons.” —Kirkus Reviews In 2016, Samantha Harvey began to lose sleep. She tried everything to appease her wakefulness: from medication to therapy, changes in her diet to changes in her living arrangements. Nothing seemed to help. *The Shapeless Unease* is Harvey’s darkly funny and deeply intelligent anatomy of her insomnia, an immersive interior monologue of a year without one of the most basic human needs. Original and profound, and narrated with a lucid breathlessness, this is a startlingly insightful exploration of memory, writing and influence, death and the will to survive, from “this generation’s Virginia Woolf” (Telegraph). “Captures the essence of fractious emotions—anxiety, fear, grief, rage—in prose so elegant, so luminous, it practically shines from the page. Harvey is a hugely talented writer, and this is a book to relish.” —Sarah Waters, New York Times–bestselling author “Harvey writes with hypnotic power and poetic precision about—well, about everything: grief, pain, memory, family, the night sky, a lake at sunset, what it means to dream and what it means to suffer and survive . . . The big surprise is that this book about ‘shapeless unease’ is, in the end, a glittering, playful and, yes, joyful celebration of that glorious gift of glorious life.” —Daily Mail “What a spectacularly good book. It is so controlled and yet so wild . . . easily one of the truest and best books I’ve read about what it’s like to be alive now, in this country.” —Max Porter, award-winning author of *Lanny*
