Understanding The Animal Hope and Wellness Foundation's Mission

The Animal Hope and Wellness Foundation isn't just another animal shelter; it's a comprehensive rescue and rehabilitation center dedicated to providing holistic care for animals suffering from neglect, abuse, and various medical conditions. Their mission is multifaceted, encompassing rescue, rehabilitation, education, and community outreach. They strive to not only save individual animals but also to promote a culture of compassion and responsibility towards all creatures. This goes beyond simply finding homes; it's about fostering long-term well-being and preventing future animal suffering.

A Deep Dive into Their Programs: Rescue, Rehabilitation, and Rehoming

The foundation's success hinges on its robust and interconnected programs:

1. **Rescue Operations:** The Animal Hope and Wellness Foundation actively responds to calls for help, rescuing animals from various distressing situations – from hoarding cases to abandoned pets. Their rescue teams are highly trained and equipped to handle a wide range of scenarios, ensuring the safe and humane extraction of animals in need. They prioritize swift intervention to minimize further suffering.

1. **Comprehensive Rehabilitation:** This is where the "wellness" part of their name truly shines. The foundation provides extensive veterinary care, addressing both immediate and long-term health needs. This includes emergency medical treatment, surgeries, ongoing medication, and specialized therapies. Beyond the physical, they also focus on the emotional well-being of the animals, providing a safe and nurturing environment to heal from trauma. This holistic approach ensures a complete recovery.

1. **Rehoming and Adoption:** Once an animal has been rehabilitated and deemed ready, the foundation works diligently to find loving and suitable forever homes. Their adoption process is thorough, ensuring a perfect match between the animal's needs and the prospective adopter's capabilities. They offer ongoing support to adopters, providing guidance and resources to ensure a successful transition and a happy life for the animal.

Beyond the Animals: Education and Community Outreach

The Animal Hope and Wellness Foundation recognizes that lasting change requires community involvement. They actively engage in educational programs, teaching children and adults about responsible pet ownership, animal welfare, and the importance of compassion. These initiatives extend to partnering with local schools, community centers, and other organizations to spread awareness and promote positive change. This proactive approach creates a ripple effect, fostering a more compassionate and responsible community.

How You Can Support The Animal Hope and Wellness Foundation

There are numerous ways you can contribute to the vital work of The Animal Hope and Wellness Foundation:

Donations: Monetary donations are crucial for funding their rescue operations, veterinary care, and rehabilitation programs. Even small contributions make a significant difference.

Volunteering: Lend your time and skills by volunteering at the foundation. Opportunities range from assisting with animal care to helping with administrative tasks or fundraising efforts.

Fundraising: Organize your own fundraising event or participate in existing initiatives to help raise awareness and generate funds.

Adoption: Consider opening your home to a deserving animal in need. Giving a rescued animal a loving home is one of the most impactful ways to support their mission.

Spreading Awareness: Share their story on social media, tell your friends and family, and help amplify their message of compassion and animal welfare.

The Impact and Future of The Animal Hope and Wellness Foundation

The Animal Hope and Wellness Foundation has already saved countless animals and made a profound impact on the lives of many. Their dedication, comprehensive approach, and unwavering commitment to animal welfare serve as an inspiration to other organizations and individuals. Their future plans include expanding their facilities, developing new programs, and continuing to advocate for stronger animal protection laws. Their ongoing success depends on the continued support of compassionate individuals and organizations who share their vision.

Conclusion:

The Animal Hope and Wellness Foundation is a beacon of hope for animals in need. Their holistic approach to rescue, rehabilitation, and rehoming, coupled with their commitment to education and community outreach, makes them a truly exceptional organization. By supporting their work, you become part of a movement that is transforming the lives of animals and building a more compassionate world. Learn more and get involved today! the animal hope and wellness foundation: *Rethinking Rescue* Carol Mithers, 2024-08-20
Rethinking Rescue boldly confronts two of the biggest challenges of our time—poverty and homelessness—in asking the question: Who deserves the love of a pet? In Los Angeles’s most underserved communities, Lori Weise is known as the Dog Lady, the woman who’s spent decades caring for people in poverty and the animals that love them. Long before anyone else, Weise grasped that animal and human suffering are inextricably connected and created a new rescue narrative: an enduring safety net empowering pet owners and providing resources to reduce the number of pets coming into shelters. *Rethinking Rescue: Dog Lady and the Story of America’s Forgotten People and Pets* unites the causes of animal welfare and social justice, moving between Weise’s story and that of the larger U.S. rescue movement. Through captivating storytelling and investigative reporting, Carol Mithers examines the consequences of bias within this overwhelmingly white movement, where an overemphasis on placing animals in affluent homes disregards pet owners in poverty. Weise’s innovative and ultimately triumphant efforts revealed a better way. As cities across the country witness some of the worst housing crises in history, and as the population of unhoused people and pets continues to skyrocket, *Rethinking Rescue* offers a story of compassion and hope.

the animal hope and wellness foundation: *Life's a Pooch* Boze Hadleigh, 2017-11-21 *Life's a Pooch* is, pardon the expression, catnip for dog lovers. Its five riveting chapters comprise hundreds of celebrity quotes and anecdotes about everyone’s best friend. By turns funny, touching, surprising, and informative, it embraces every aspect of the human-dog bond and explores our furry companions’ sometimes baffling world and celebrates their impact on ours. Those quoted range from animal superheroes Betty White and Doris Day to Leonardos da Vinci and DiCaprio to dog trainers, Lassie costars, singers and actors, presidents, Walt Disney, and Martha Stewart—to name a few! Did you know that . . . Comparing canines with people, Marilyn Monroe once said, “A dog will never tell you to shut up”? Aldous Huxley explained the pooch’s popularity: “To his dog, every man is Napoleon,” while President Harry Truman advised, “If you want a friend in Washington, get a dog”? For Renee Zellweger, “Finding exactly the right dog is a lot like falling in love”? Peanuts creator Charles M. Schulz felt, “Happiness is a warm puppy”? And singer Adele is happy to be “my dog’s best friend”? Poignant, silly, and heart-warming, *Life's a Pooch* is a must-have for every dog lover!

the animal hope and wellness foundation: *Food and Place* Pascale Joassart-Marcelli, Fernando J. Bosco, 2017-12-22 This text provides a comprehensive and critical exploration of food from the unique perspective of place. It shows that our experiences with food are deeply influenced by their cultural, social, economic, and political contexts. The authors explore a wide range of questions such as: Do GMOs threaten rural livelihoods? Why don't we eat dogs? Does your neighborhood make you fat? Do community gardens encourage urban gentrification? Can cheese save a local economy? Why are gourmet burgers appearing on menus all over the world? How do immigrants use food to create a sense of place? Does mainstream nutrition stigmatize bodies? Is the kitchen an oppressive place? Can celebrity chefs change the food system? Critically engaged and connected to current activist and academic debates, *Food and Place* will be an essential resource for students across the social sciences.

the animal hope and wellness foundation: *The Spirit of Animal Healing* Marty Goldstein, 2021-02-02 The *Spirit of Animal Healing* is the follow up to Dr. Marty Goldstein's bestselling book on holistic veterinary medicine, *The Nature of Animal Healing*. It is chock full of the very latest integrative medical knowledge (which combines conventional therapies with complementary and alternative medicine). Coupled with the vast amount of specialized expertise and learning Dr. Marty has gained from his own practice over the past 45 years, the book takes readers on a journey to the leading edge of integrative veterinary understanding to achieve greater insight into the minds and bodies of their animal companions. However, this book is not simply a new edition of Dr. Marty's first book with some refreshed content. It is a completely new book in which Dr. Marty turns the traditional approach to animal care upside down. *The Spirit of Animal Healing* provides readers with the most up to-date tools and knowledge they need to keep their dogs and cats healthy and prevent disease from occurring in the first place, instead of just treating their animal companions when they are sick. Topics covered include: *Nutrition and supplements *Integrative remedies and harmful treatments *Cutting edge therapies *The truth about vaccinations *The latest in cancer treatments *The spiritual nature of animals *True, mind-blowing cases from over the years -And much more!

the animal hope and wellness foundation: *The Humane Economy* Wayne Pacelle, 2016-04-19 A major new exploration of the economics of animal exploitation and a practical roadmap for how we can use the marketplace to promote the welfare of all living creatures, from the renowned animal-rights advocate Wayne Pacelle, President/CEO of the Humane Society of the United States and New York Times bestselling author of *The Bond*. In the mid-nineteenth century, New Bedford, Massachusetts was the whaling capital of the world. A half-gallon of sperm oil cost approximately \$1,400 in today's dollars, and whale populations were hunted to near extinction for profit. But with the advent of fossil fuels, the whaling industry collapsed, and today, the area around New Bedford is instead known as one of the best places in the world for whale watching. This transformation is emblematic of a new sort of economic revolution, one that has the power to transform the future of animal welfare. In *The Humane Economy*, Wayne Pacelle, President/CEO of the Humane Society of the United States, explores how our everyday economic decisions impact the survival and wellbeing of animals, and how we can make choices that better support them. Though most of us have never harpooned a sea creature, clubbed a seal, or killed an animal for profit, we are all part of an interconnected web that has a tremendous impact on animal welfare, and the decisions we make—whether supporting local, not industrial, farming; adopting a rescue dog or a shelter animal instead of one from a “puppy mill”; avoiding products that compromise the habitat of wild species; or even seeing Cirque du Soleil instead of Ringling Brothers—do matter. *The Humane Economy* shows us how what we do everyday as consumers can benefit animals, the environment, and human society, and why these decisions can make economic sense as well.

the animal hope and wellness foundation: *Dogs* Mark Alizart, 2019-11-01 Man's best friend, domesticated since prehistoric times, a travelling companion for explorers and artists, thinkers and

walkers, equally happy curled up by the fire and bounding through the great outdoors—dogs matter to us because we love them. But is that all there is to the canine's good-natured voracity and affectionate dependency? Mark Alizart dispenses with the well-worn clichés concerning dogs and their masters, seeing them not as submissive pets but rather as unexpected life coaches, ready to teach us the elusive recipes for contentment and joy. Dogs have faced their fate in life with a certain detachment that is not easy to understand. Unlike other animals in a similar situation, they have not become hardened, nor have they let themselves die a little inside. On the contrary, they seem to have softened. This book is devoted to understanding this miracle, the miracle of the joy of dogs – to understanding it and, if at all possible, to learning how it's done. Weaving elegantly and eruditely between historical myth and pop-culture anecdote, between the peculiar views of philosophers and the even more bizarre findings of science, Alizart offers us a surprising new portrait of the dog as thinker—a thinker who may perhaps know the true secret of our humanity.

the animal hope and wellness foundation: The Forever Dog Rodney Habib, Karen Shaw Becker, 2024-09-10 #1 New York Times Bestseller In this pathbreaking guide, two of the world's most popular and trusted pet care advocates reveal new science to teach us how to delay aging and provide a long, happy, healthy life for our canine companions. Like their human counterparts, dogs have been getting sicker and dying prematurely over the past few decades. Why? Scientists are beginning to understand that the chronic diseases afflicting humans--cancer, obesity, diabetes, organ degeneration, and autoimmune disorders--also beset canines. As a result, our beloved companions are vexed with preventable health problems throughout much of their lives and suffer shorter life spans. Because our pets can't make health and lifestyle decisions for themselves, it's up to pet parents to make smart, science-backed choices for lasting vitality and health. The Forever Dog gives us the practical, proven tools to protect our loyal four-legged companions. Rodney Habib and Karen Becker, DVM, globetrotted (pre-pandemic) to galvanize the best wisdom from top geneticists, microbiologists, and longevity researchers; they also interviewed people whose dogs have lived into their 20s and even 30s. The result is this unprecedented and comprehensive guide, filled with surprising information, invaluable advice, and inspiring stories about dogs and the people who love them. The Forever Dog prescriptive plan focuses on diet and nutrition, movement, environmental exposures, and stress reduction, and can be tailored to the genetic predisposition of particular breeds or mixes. The authors discuss various types of food--including what the commercial manufacturers don't want us to know--and offer recipes, easy solutions, and tips for making sure our dogs obtain the nutrients they need. Habib and Dr. Becker also explore how external factors we often don't think about can greatly affect a dog's overall health and wellbeing, from everyday insults to the body and its physiology, to the role our own lifestyles and our vets' choices play. Indeed, the health equation works both ways and can travel up the leash. Medical breakthroughs have expanded our choices for canine health--if you know what they are. This definitive dog-care guide empowers us with the knowledge we need to make wise choices, and to keep our dogs healthy and happy for years to come.

the animal hope and wellness foundation: The Soul of All Living Creatures Vint Virga, D.V.M., 2014-07-08 As profiled in the New York Times Magazine... Based on the author's twenty-five years of experience as a veterinarian and veterinary behaviorist, The Soul of All Living Creatures delves into the inner lives of animals – from whales, wolves, and leopards to mice, dogs, and cats – and explores the relationships we forge with them. As an emergency room clinician four years out of veterinary school, Dr. Vint Virga had a life-changing experience: he witnessed the power of simple human contact and compassion to affect the recovery of a dog struggling to survive after being hit by a car. Observing firsthand the remarkably strong connection between humans and animals inspired him to explore the world from the viewpoint of animals and taught him to respect the kinship that connects us. With The Soul of All Living Creatures, Virga draws from his decades in veterinary practice to reveal how, by striving to perceive the world as animals do, we can enrich our own appreciation of life, enhance our character, nurture our relationships, improve our communication with others, reorder our values, and deepen our grasp of spirituality. Virga

discerningly illuminates basic traits shared by both humans and animals and makes animal behavior meaningful, relevant, and easy to understand. Insightful and eloquent, *The Soul of All Living Creatures* offers an intimate journey into the lives of our fellow creatures and a thought-provoking promise of what we can learn from spending time with them.

the animal hope and wellness foundation: Animal Reiki Elizabeth Fulton, Kathleen Prasad, 2006-04-05 "A great introduction to the growing field of energy medicine. . . . From dogs and cats to horses and birds, this book is everything you need to understand and appreciate the power of Reiki to heal and deepen the bond with the animals in your life. "I learned a lot from *Animal Reiki* and highly recommend it to a wide audience." —Marc Bekoff, University of Colorado, author of *Minding Animals* and editor of the *Encyclopedia of Animal Behavior* "Fulton and Prasad have created a much-needed guide to a method of helping animals heal that is gentle, intuitive, safe and powerful." —Susan Chernak McElroy, author of *All My Relations: Living with Animals as Teachers and Healers* "A powerful reminder of the wider uses of the system of Reiki and how humanity can be of purposeful benefit to all." —Bronwen and Frans Stiene, International House of Reiki, authors of *A-Z of Reiki*, *The Japanese Art of Reiki* and *The Reiki Sourcebook*

the animal hope and wellness foundation: Still Life Henrietta L. Moore, 2013-05-20 How adequate are our theories of globalisation for analysing the worlds we share with others? In this provocative new book, Henrietta Moore asks us to step back and re-examine in a fresh way the interconnections normally labeled 'globalisation'. Rather than beginning with abstract processes and flows, Moore starts by analyzing the hopes, desires and satisfactions of individuals in their day-to-day lives. Drawing on a wide range of examples, from African initiation rituals to Japanese anime, from sex in virtual worlds to Schubert songs, Moore develops a theory of the ethical imagination, exploring how ideas about the human subject, and its capacities for self-making and social transformation, form a basis for reconceptualizing the role and significance of culture in a global age. She shows how the ideas of social analysts and ordinary people intertwine and diverge, and argues for an ethics of engagement based on an understanding of the human need to engage with cultural problems and seek social change. This innovative and challenging book is essential reading for anyone interested in the key debates about culture and globalization in the contemporary world.

the animal hope and wellness foundation: Tiny But Mighty Hannah Shaw, 2019-08-06 *A New York Times Bestseller* #1 National Bestseller Indie Bestseller From Kitten Lady, the professional kitten rescuer, humane educator, animal advocate, and owner of the popular Instagram @kittenxlady comes the definitive book on saving the most vulnerable—and adorable—feline population: newborn kittens. Hannah Shaw, better known as Kitten Lady, has dedicated her life to saving the tiniest felines, but one doesn't have to be a professional kitten rescuer to change—and save—lives. In *Tiny but Mighty*, Hannah not only outlines the dangers newborn kittens face and how she combats them, but how you can help every step of the way, from fighting feline overpopulation on the streets to fostering unweaned kittens, from combating illness to combating compassion fatigue, from finding a vet to finding the purrfect forever home. Filled with information on animal welfare, instructional guides, and personal rescue stories of kittens like Chloe, Tidbit, Hank, and Badger—not to mention hundreds of adorable kitten photos—*Tiny but Mighty* is the must-have kitten book for cat lovers, current-and-future rescuers, foster parents, activists, and advocates.

the animal hope and wellness foundation: Coping with Stress and Burnout as a Veterinarian Nadine Hamilton, 2019-02-07 Being a veterinarian can be a rewarding, challenging and demanding career requiring a passion for animals, great interpersonal skills and a strong work ethic. It also has a dark and very dangerous side. The suicide rate for veterinarians is almost four times higher than the general population across the UK, Australia, US, New Zealand and Canada. The effects of working long hours, performing euthanasia on animals, emotional pressure, financial issues, unrealistic expectations, and dealing with distressed clients places considerable stress on both the vet themselves and their families at home. Failure to cope with such stress upsets mental wellbeing and can lead to serious emotional, physical, and behavioural issues. For some it leads to death. If we are to reduce this suffering we need to find out what hinders a vet's wellbeing and use targeted solutions that work. In this unique book, psychologist Dr Nadine Hamilton presents an examination of the problem, the ways vet mental health is influenced by their daily work and the science we can use to tackle it head on. Drawing from the fields of positive psychology, acceptance and commitment therapy, career construction theory, and resiliency studies, she outlines a promising new weapon in the profession's fight against suicide. Included in this book is a concise self-help version of her ground-breaking Coping and Wellbeing Program for Veterinary Professionals — an evidence-based psycho-educational intervention to educate vets on how to develop protective attitudes, enhance wellbeing, and increase their coping skills. This is a book for every veterinarian, veterinary student and veterinary nurse.

the animal hope and wellness foundation: Why Zebras Don't Get Ulcers Robert M. Sapolsky, 2004-09-15 Renowned primatologist Robert Sapolsky offers a completely revised and updated edition of his most popular work, with over 225,000 copies in print Now in a third edition, Robert M. Sapolsky's acclaimed and successful Why Zebras Don't Get Ulcers features new chapters on how stress affects sleep and addiction, as well as new insights into anxiety and personality disorder and the impact of spirituality on managing stress. As Sapolsky explains, most of us do not lie awake at night worrying about whether we have leprosy or malaria. Instead, the diseases we fear-and the ones that plague us now-are illnesses brought on by the slow accumulation of damage, such as heart disease and cancer. When we worry or experience stress, our body turns on the same physiological responses that an animal's does, but we do not resolve conflict in the same way-through fighting or fleeing. Over time, this activation of a stress response makes us literally sick. Combining cutting-edge research with a healthy dose of good humor and practical advice, Why Zebras Don't Get Ulcers explains how prolonged stress causes or intensifies a range of physical and mental afflictions, including depression, ulcers, colitis, heart disease, and more. It also provides essential guidance to controlling our stress responses. This new edition promises to be the most comprehensive and engaging one yet.

the animal hope and wellness foundation: Ecovillages Karen T. Litfin, 2014-01-15 In a world of dwindling natural resources and mounting environmental crisis, who is devising ways of living that will work for the long haul? And how can we, as individuals, make a difference? To answer these fundamental questions, Professor Karen Litfin embarked upon a journey to many of the world's ecovillages—intentional communities at the cutting-edge of sustainable living. From rural to urban, high tech to low tech, spiritual to secular, she discovered an under-the-radar global movement making positive and radical changes from the ground up. In this inspiring and insightful book, Karen Litfin shares her unique experience of these experiments in sustainable living through four broad windows - ecology, economics, community, and consciousness - or E2C2. Whether we live in an ecovillage or a city, she contends, we must incorporate these four key elements if we wish to harmonize our lives with our home planet. Not only is another world possible, it is already being born in small pockets the world over. These micro-societies, however, are small and time is short. Fortunately - as Litfin persuasively argues - their successes can be applied to existing social

structures, from the local to the global scale, providing sustainable ways of living for generations to come. You can learn more about Karen's experiences on the Ecovillages website:

the animal hope and wellness foundation: Entangled Empathy Lori Gruen, 2015-02-01 In Entangled Empathy, scholar and activist Lori Gruen argues that rather than focusing on animal "rights," we ought to work to make our relationships with animals right by empathetically responding to their needs, interests, desires, vulnerabilities, hopes, and unique perspectives. Pointing out that we are already entangled in complex and life-altering relationships with other animals, Gruen guides readers through a new way of thinking about—and practicing—animal ethics. Gruen describes entangled empathy as a type of caring perception focused on attending to another's experience of well-being. It is an experiential process involving a blend of emotion and cognition in which we recognize we are in relationships with others and are called upon to be responsive and responsible in these relationships by attending to another. When we engage in entangled empathy we are transformed and in that transformation we can imagine less violent, more meaningful ways of being together.

the animal hope and wellness foundation: *My Dog Always Eats First* Leslie Irvine, 2013 A weary-looking man stands at an intersection, backpack at his feet. Curled up nearby is a mixed-breed dog, unfazed by the passing traffic. The man holds a sign that reads, ¿Two old dogs need help. God bless.¿ What¿s happening here? Leslie Irvine breaks new ground in the study of homelessness by investigating the frequently noticed, yet underexplored, role that animals play in the lives of homeless people. Irvine conducted interviews on streetcorners, in shelters, even at highway underpasses, to provide insights into the benefits and liabilities that animals have for the homeless. She also weighs the perspectives of social service workers, veterinarians, and local communities. Her work provides a new way of looking at both the meaning of animal companionship and the concept of home itself.

the animal hope and wellness foundation: Scientific Foundations of Zoos and Aquariums Allison B. Kaufman, Meredith J. Bashaw, Terry L. Maple, 2019-01-03 Using first-person stories and approachable scientific reviews, this volume explores how zoos conduct and support science around the world.

the animal hope and wellness foundation: Zoo Animal Welfare Terry Maple, Bonnie M. Perdue, 2013-03-22 Zoo Animal Welfare thoroughly reviews the scientific literature on the welfare of zoo and aquarium animals. Maple and Perdue draw from the senior author's 24 years of experience as a zoo executive and international leader in the field of zoo biology. The authors' academic training in the interdisciplinary field of psychobiology provides a unique perspective for evaluating the ethics, practices, and standards of modern zoos and aquariums. The book offers a blueprint for the implementation of welfare measures and an objective rationale for their widespread use. Recognizing the great potential of zoos, the authors have written an inspirational book to guide the strategic vision of superior, welfare-oriented institutions. The authors speak directly to caretakers working on the front lines of zoo management, and to the decision-makers responsible for elevating the priority of animal welfare in their respective zoo. In great detail, Maple and Perdue demonstrate how zoos and aquariums can be designed to achieve optimal standards of welfare and wellness.

the animal hope and wellness foundation: Karl Polanyi Gareth Dale, 2010-06-21 Karl Polanyi's *The Great Transformation* is generally acclaimed as being among the most influential works of economic history in the twentieth century, and remains as vital in the current historical conjuncture as it was in his own. In its critique of nineteenth-century 'market fundamentalism' it reads as a warning to our own neoliberal age, and is widely touted as a prophetic guidebook for those who aspire to understand the causes and dynamics of global economic turbulence at the end of the 2000s. Karl Polanyi: *The Limits of the Market* is the first comprehensive introduction to Polanyi's ideas and legacy. It assesses not only the texts for which he is famous – prepared during his spells in American academia – but also his journalistic articles written in his first exile in Vienna, and lectures and pamphlets from his second exile, in Britain. It provides a detailed critical analysis of *The Great*

Transformation, but also surveys Polanyi's seminal writings in economic anthropology, the economic history of ancient and archaic societies, and political and economic theory. Its primary source base includes interviews with Polanyi's daughter, Kari Polanyi-Levitt, as well as the entire compass of his own published and unpublished writings in English and German. This engaging and accessible introduction to Polanyi's thinking will appeal to students and scholars across the social sciences, providing a refreshing perspective on the roots of our current economic crisis.

the animal hope and wellness foundation: *Sexual Violence and Armed Conflict* Janie L. Leatherman, 2013-04-26 Every year, hundreds of thousands of women become victims of sexual violence in conflict zones around the world; in the Democratic Republic of Congo alone, approximately 1,100 rapes are reported each month. This book offers a comprehensive analysis of the causes, consequences and responses to sexual violence in contemporary armed conflict. It explores the function and effect of wartime sexual violence and examines the conditions that make women and girls most vulnerable to these acts both before, during and after conflict. To understand the motivations of the men (and occasionally women) who perpetrate this violence, the book analyzes the role played by systemic and situational factors such as patriarchy and militarized masculinity. Difficult questions of accountability are tackled; in particular, the case of child soldiers, who often suffer a double victimization when forced to commit sexual atrocities. The book concludes by looking at strategies of prevention and protection as well as new programs being set up on the ground to support the rehabilitation of survivors and their communities. Sexual violence in war has long been a taboo subject but, as this book shows, new and courageous steps are at last being taken at both local and international level - to end what has been called the "greatest silence in history".

the animal hope and wellness foundation: *State of Crisis* Zygmunt Bauman, Carlo Bordoni, 2014-07-17 Today we hear much talk of crisis and comparisons are often made with the Great Depression of the 1930s, but there is a crucial difference that sets our current malaise apart from the 1930s: today we no longer trust in the capacity of the state to resolve the crisis and to chart a new way forward. In our increasingly globalized world, states have been stripped of much of their power to shape the course of events. Many of our problems are globally produced but the volume of power at the disposal of individual nation-states is simply not sufficient to cope with the problems they face. This divorce between power and politics produces a new kind of paralysis. It undermines the political agency that is needed to tackle the crisis and it saps citizens' belief that governments can deliver on their promises. The impotence of governments goes hand in hand with the growing cynicism and distrust of citizens. Hence the current crisis is at once a crisis of agency, a crisis of representative democracy and a crisis of the sovereignty of the state. In this book the world-renowned sociologist Zygmunt Bauman and fellow traveller Carlo Bordoni explore the social and political dimensions of the current crisis. While this crisis has been greatly exacerbated by the turmoil following the financial crisis of 2007-8, Bauman and Bordoni argue that the crisis facing Western societies is rooted in a much more profound series of transformations that stretch back further in time and are producing long-lasting effects. This highly original analysis of our current predicament by two of the world's leading social thinkers will be of interest to a wide readership.

the animal hope and wellness foundation: *Planetary Health* Samuel Myers, Howard Frumkin, 2020-08-13 Human health depends on the health of the planet. Earth's natural systems—the air, the water, the biodiversity, the climate—are our life support systems. Yet climate change, biodiversity loss, scarcity of land and freshwater, pollution and other threats are degrading these systems. The emerging field of planetary health aims to understand how these changes threaten our health and how to protect ourselves and the rest of the biosphere. *Planetary Health: Protecting Nature to Protect Ourselves* provides a readable introduction to this new paradigm. With an interdisciplinary approach, the book addresses a wide range of health impacts felt in the Anthropocene, including food and nutrition, infectious disease, non-communicable disease, dislocation and conflict, and mental health. It also presents strategies to combat environmental changes and its ill-effects, such as controlling toxic exposures, investing in clean energy, improving

urban design, and more. Chapters are authored by widely recognized experts. The result is a comprehensive and optimistic overview of a growing field that is being adopted by researchers and universities around the world. Students of public health will gain a solid grounding in the new challenges their profession must confront, while those in the environmental sciences, agriculture, the design professions, and other fields will become familiar with the human consequences of planetary changes. Understanding how our changing environment affects our health is increasingly critical to a variety of disciplines and professions. Planetary Health is the definitive guide to this vital field.

the animal hope and wellness foundation: Wasted Lives Zygmunt Bauman, 2013-04-26 The production of 'human waste' - or more precisely, wasted lives, the 'superfluous' populations of migrants, refugees and other outcasts - is an inevitable outcome of modernization. It is an unavoidable side-effect of economic progress and the quest for order which is characteristic of modernity. As long as large parts of the world remained wholly or partly unaffected by modernization, they were treated by modernizing societies as lands that were able to absorb the excess of population in the 'developed countries'. Global solutions were sought, and temporarily found, to locally produced overpopulation problems. But as modernization has reached the furthest lands of the planet, 'redundant population' is produced everywhere and all localities have to bear the consequences of modernity's global triumph. They are now confronted with the need to seek - in vain, it seems - local solutions to globally produced problems. The global spread of the modernity has given rise to growing quantities of human beings who are deprived of adequate means of survival, but the planet is fast running out of places to put them. Hence the new anxieties about 'immigrants' and 'asylum seekers' and the growing role played by diffuse 'security fears' on the contemporary political agenda. With characteristic brilliance, this new book by Zygmunt Bauman unravels the impact of this transformation on our contemporary culture and politics and shows that the problem of coping with 'human waste' provides a key for understanding some otherwise baffling features of our shared life, from the strategies of global domination to the most intimate aspects of human relationships.

the animal hope and wellness foundation: Anti-Diet Christy Harrison, 2019-12-24 Reclaim your time, money, health, and happiness from our toxic diet culture with groundbreaking strategies from a registered dietitian, journalist, and host of the Food Psych podcast. 68 percent of Americans have dieted at some point in their lives. But upwards of 90% of people who intentionally lose weight gain it back within five years. And as many as 66% of people who embark on weight-loss efforts end

up gaining more weight than they lost. If dieting is so clearly ineffective, why are we so obsessed with it? The culprit is diet culture, a system of beliefs that equates thinness to health and moral virtue, promotes weight loss as a means of attaining higher status, and demonizes certain ways of eating while elevating others. It's sexist, racist, and classist, yet this way of thinking about food and bodies is so embedded in the fabric of our society that it can be hard to recognize. It masquerades as health, wellness, and fitness, and for some, it is all-consuming. In *Anti-Diet*, Christy Harrison takes on diet culture and the multi-billion-dollar industries that profit from it, exposing all the ways it robs people of their time, money, health, and happiness. It will turn what you think you know about health and wellness upside down, as Harrison explores the history of diet culture, how it's infiltrated the health and wellness world, how to recognize it in all its sneaky forms, and how letting go of efforts to lose weight or eat perfectly actually helps to improve people's health—no matter their size. Drawing on scientific research, personal experience, and stories from patients and colleagues, *Anti-Diet* provides a radical alternative to diet culture, and helps readers reclaim their bodies, minds, and lives so they can focus on the things that truly matter.

the animal hope and wellness foundation: *Your Robot Dog Will Die* Arin Greenwood, 2018-04-17 Fusing the heart of Julie of the Wolves with the imagination of Little Brother and Ship Breaker, this speculative YA is a must-read for any dog lover. When a global genetic experiment goes awry and canines stop wagging their tails, mass hysteria ensues and the species is systematically euthanized. But soon, Mechanical Tail comes to the rescue. The company creates replacements for “man’s best friend” and studies them on Dog Island, where 17-year-old Nano Miller was born and raised. Nano’s life has become a cycle of annual heartbreak. Every spring, she is given the latest robot dog model to test, only to have it torn from her arms a year later. But one day she makes a discovery that upends everything she’s taken for granted: a living puppy that miraculously wags its tail. And there is no way she’s letting this dog go.

the animal hope and wellness foundation: Alter-Globalization Geoffrey Pleyers, 2013-04-23 Contrary to the common view that globalization undermines social agency, ‘alter-globalization activists’, that is, those who contest globalization in its neo-liberal form, have developed new ways to become actors in the global age. They propose alternatives to Washington Consensus policies, implement horizontal and participatory organization models and promote a nascent global public space. Rather than being anti-globalization, these activists have built a truly global movement that has gathered citizens, committed intellectuals, indigenous, farmers, dalits and NGOs against neoliberal policies in street demonstrations and Social Forums all over the world, from Bangalore to Seattle and from Porto Alegre to Nairobi. This book analyses this worldwide movement on the bases of extensive field research conducted since 1999. *Alter-Globalization* provides a comprehensive account of these critical global forces and their attempts to answer one of the major challenges of our time: How can citizens and civil society contribute to the building of a fairer, sustainable and more democratic co-existence of human beings in a global world?

the animal hope and wellness foundation: Work's Intimacy Melissa Gregg, 2013-04-23 This book provides a long-overdue account of online technology and its impact on the work and lifestyles of professional employees. It moves between the offices and homes of workers in the new knowledge economy to provide intimate insight into the personal, family, and wider social tensions emerging in today's rapidly changing work environment. Drawing on her extensive research, Gregg shows that new media technologies encourage and exacerbate an older tendency among salaried professionals to put work at the heart of daily concerns, often at the expense of other sources of intimacy and fulfillment. New media technologies from mobile phones to laptops and tablet computers, have been marketed as devices that give us the freedom to work where we want, when we want, but little attention has been paid to the consequences of this shift, which has seen work move out of the office and into cafés, trains, living rooms, dining rooms, and bedrooms. This professional presence bleed leads to work concerns impinging on the personal lives of employees in new and unforeseen ways. This groundbreaking book explores how aspiring and established professionals each try to cope with the unprecedented intimacy of technologically-mediated work, and how its seductions seem poised to triumph over the few remaining relationships that may stand in its way.

the animal hope and wellness foundation: Over to You, Mr Brown Anthony Giddens, 2007-04-09 Labour stands at a decisive point in its history. A change of leadership can help reinvigorate the party, but winning a fourth term of government will be impossible unless Labour's ideological position and policy outlook are thoroughly refurbished. What form should these innovations take?
