the wellness way centennial: *The Front-Line Leader* Chris Van Gorder, 2014-10-20 Real leadership that leads to high engagement, higher performance, and a culture of accountability As president and CEO of Scripps Health, one of America's most prestigious health systems, Chris Van Gorder presided over a dramatic turnaround, catapulting Scripps from near bankruptcy to a dominant market position. While hospitals and health systems nationwide have laid people off or are closing their doors, Scripps is financially healthy, has added thousands of employees (even with a no-layoff philosophy), and has developed a reputation as a top employer. What are the secrets to this remarkable story? In *The Front-Line Leader*, Chris Van Gorder candidly shares his own incredible story, from police officer to CEO, and the leadership philosophy that drives all of his decisions and actions: people come first. Van Gorder began his unlikely career as a California police officer, which deeply instilled in him a sense of social responsibility, honesty, and public service. After being injured on the job and taking an early retirement, Van Gorder had to reinvent himself, taking a job as a hospital security director, a job that would change his life. Through hard work and determination, he rose to executive ranks, eventually becoming CEO of Scripps. But he never forgot his own roots and powerful work ethic, or the time when he was a security officer and a CEO would not make eye contact with him. Van Gorder leads from the front lines, making it a priority to know his employees and customers at every level. His values learned on the force—protecting the community, educating citizens, developing caring relationships, and ultimately doing the right thing—shape his approach to business. As much as companies talk about accountability, managers seldom understand what practical steps to take to achieve an ethic of service that makes accountability meaningful. *The Front-Line Leader* outlines specific tactics and steps anyone can use starting today to take responsibility, inspire others, and achieve breakout results for their organizations. Van Gorder reveals how a no-layoff philosophy led to higher accountability, how his own attention to seemingly minor details spurred larger change, and how his own high standards for himself and his team improved morale and productivity. From general strategy to the tiny, everyday steps leaders can take to create the kind of culture and accountability that translates into major competitive advantage, *The Front-Line Leader* charts a path to better leadership and a more engaged, higher-performing organization.

the wellness way centennial: *The Topography of Wellness* Sara Jensen Carr, 2021-06-15 The COVID-19 pandemic has re-ignited discussions of how architects, landscapes, and urban planners can shape the environment in response to disease. This challenge is both a timely topic and one with an illuminating history. In *The Topography of Wellness*, Sara Jensen Carr offers a chronological narrative of how six epidemics transformed the American urban landscape, reflecting changing views of the power of design, pathology of disease, and the epidemiology of the environment. From the infectious diseases of cholera and tuberculosis, to so-called social diseases of idleness and crime, to the more complicated origins of today's chronic diseases, each illness and its associated combat strategies has left its mark on our surroundings. While each solution succeeded

in eliminating the disease on some level, sweeping environmental changes often came with significant social and physical consequences. Even more unexpectedly, some adaptations inadvertently incubated future epidemics. From the Industrial Revolution to present day, this book illuminates the constant evolution of our relationship to wellness and the environment by documenting the shifting grounds of illness and the urban landscape.

the wellness way centennial: Investing in the Health and Well-Being of Young Adults National Research Council, Institute of Medicine, Board on Children, Youth, and Families, Committee on Improving the Health, Safety, and Well-Being of Young Adults, 2015-01-27 Young adulthood - ages approximately 18 to 26 - is a critical period of development with long-lasting implications for a person's economic security, health and well-being. Young adults are key contributors to the nation's workforce and military services and, since many are parents, to the healthy development of the next generation. Although 'millennials' have received attention in the popular media in recent years, young adults are too rarely treated as a distinct population in policy, programs, and research. Instead, they are often grouped with adolescents or, more often, with all adults. Currently, the nation is experiencing economic restructuring, widening inequality, a rapidly rising ratio of older adults, and an increasingly diverse population. The possible transformative effects of these features make focus on young adults especially important. A systematic approach to understanding and responding to the unique circumstances and needs of today's young adults can help to pave the way to a more productive and equitable tomorrow for young adults in particular and our society at large. Investing in The Health and Well-Being of Young Adults describes what is meant by the term young adulthood, who young adults are, what they are doing, and what they need. This study recommends actions that nonprofit programs and federal, state, and local agencies can take to help young adults make a successful transition from adolescence to adulthood. According to this report, young adults should be considered as a separate group from adolescents and older adults. Investing in The Health and Well-Being of Young Adults makes the case that increased efforts to improve high school and college graduate rates and education and workforce development systems that are more closely tied to high-demand economic sectors will help this age group achieve greater opportunity and success. The report also discusses the health status of young adults and makes recommendations to develop evidence-based practices for young adults for medical and behavioral health, including preventions. What happens during the young adult years has profound implications for the rest of the life course, and the stability and progress of society at large depends on how any cohort of young adults fares as a whole. Investing in The Health and Well-Being of Young Adults will provide a roadmap to improving outcomes for this age group as they transition from adolescence to adulthood.

the wellness way centennial: The Shining Path: Love, Madness, and Revolution in the Andes Orin Starn, Miguel La Serna, 2019-04-30 A narrative history of the unlikely Maoist rebellion that terrorized Peru even after the fall of global Communism. On May 17, 1980, on the eve of Peru's presidential election, five masked men stormed a small town in the Andean heartland. They set election ballots ablaze and vanished into the night, but not before planting a red hammer-and-sickle banner in the town square. The lone man arrested the next morning later swore allegiance to a group called Shining Path. The tale of how this ferocious group of guerrilla insurgents launched a decade-long reign of terror, and how brave police investigators and journalists brought it to justice, may be the most compelling chapter in modern Latin American history, but the full story has never been told. Described by a U.S. State Department cable as "cold-blooded and bestial," Shining Path orchestrated bombings, assassinations, and massacres across the cities, countryside, and jungles of Peru in a murderous campaign to seize power and impose a Communist government. At its helm was the professor-turned-revolutionary Abimael Guzmán, who launched his single-minded insurrection alongside two women: his charismatic young wife, Augusta La Torre, and the formidable Elena Iparraguirre, who married Guzmán soon after Augusta's mysterious death. Their fanatical devotion to an outmoded and dogmatic ideology, and the military's bloody response, led to the death of nearly 70,000 Peruvians. Orin Starn and Miguel La Serna's narrative history of Shining Path is both panoramic and intimate, set against the socioeconomic upheavals of Peru's rocky transition from military dictatorship to elected democracy. They take readers deep into the heart of the rebellion, and the lives and country it nearly destroyed. We hear the voices of the mountain villagers who organized a fierce rural resistance, and meet the irrepressible black activist María Elena Moyano and the Nobel Prize-winning novelist Mario Vargas Llosa, who each fought to end the bloodshed. Deftly written, The Shining Path is an exquisitely detailed account of a little-remembered war that must never be forgotten.

the wellness way centennial: Ordinary Insanity Sarah Menkedick, 2020-04-07 A groundbreaking exposé and diagnosis of the silent epidemic of fear afflicting new mothers, and a candid, feminist deep dive into the culture, science, history, and psychology of contemporary motherhood Anxiety among mothers is a growing but largely unrecognized crisis. In the transition to motherhood and the years that follow, countless women suffer from overwhelming feelings of fear, grief, and obsession that do not fit neatly within the outmoded category of “postpartum depression.” These women soon discover that there is precious little support or time for their care, even as expectations about what mothers should do and be continue to rise. Many struggle to distinguish normal worry from crippling madness in a culture in which their anxiety is often ignored, normalized, or, most dangerously, seen as taboo. Drawing on extensive research, numerous interviews, and the raw particulars of her own experience with anxiety, writer and mother Sarah Menkedick gives us a comprehensive examination of the biology, psychology, history, and societal conditions surrounding the crushing and life-limiting fear that has become the norm for so many. Woven into the stories of women’s lives is an examination of the factors—such as the changing structure of the maternal brain, the ethically problematic ways risk is construed during pregnancy, and the marginalization of motherhood as an identity—that explore how motherhood came to be an experience so dominated by anxiety, and how mothers might reclaim it. Writing with profound empathy, visceral honesty, and deep understanding, Menkedick makes clear how critically we need to expand our awareness of, compassion for, and care for women’s lives.

the wellness way centennial: Intermittent Fasting for Hungry People Michelle Stacey, 2021-01-05 Weight gain is a problem for most of us, especially during the holidays. Some may not be happy with that newly found weight and will be ready for some fasting! What if you could follow an eating plan (not a diet!) that helps you lose weight and burn body fat, improve your overall health—including cardiovascular, metabolic, insulin and blood sugar, brain function and anti-aging—while allowing you to eat your favorite foods most of the time? Intermittent fasting does all of that, which is why it is now the fastest-growing eating lifestyle. Fasting itself has a history that goes back millennia: the ancient Greeks used it for health and mental clarity, and all the major religions include some form of spiritual fasting. Today’s fasting offers two new twists: reams of science and clinical studies showing why and how it works, and various plans that incorporate intermittent periods of fasting, making it much more sustainable (and even enjoyable). This updated guide begins with a deep dive into how intermittent fasting works in your body, producing just enough occasional cellular stress to make you stronger, while lowering insulin to “unlock” your fat stores so you can burn them off. Then we present the nuts and bolts of following four different kinds of fasting, from time-restricted (eating within an 8-hour window) to alternate-day to the Warrior plan (one meal a day). Readers will learn strategies for how to start and break their fasts, how to choose the best form for them, what to do about hunger (it’s not as hard as you think!), getting past stuck points, using the right supplements, and dealing with side effects. Finally, we offer inspiration: stories of both “regular folks” and celebrities who swear by fasting, and an exploration of the way it can change your relationship with food and eating.

the wellness way centennial: East of Eden John Steinbeck, 2002-02-05 A masterpiece of Biblical scope, and the magnum opus of one of America’s most enduring authors, in a commemorative hardcover edition In his journal, Nobel Prize winner John Steinbeck called *East of Eden* the first book, and indeed it has the primordial power and simplicity of myth. Set in the rich farmland of California's Salinas Valley, this sprawling and often brutal novel follows the intertwined destinies of two families—the Trasks and the Hamiltons—whose generations helplessly reenact the fall of Adam and Eve and the poisonous rivalry of Cain and Abel. The masterpiece of Steinbeck’s

later years, *East of Eden* is a work in which Steinbeck created his most mesmerizing characters and explored his most enduring themes: the mystery of identity, the inexplicability of love, and the murderous consequences of love's absence. Adapted for the 1955 film directed by Elia Kazan introducing James Dean, and read by thousands as the book that brought Oprah's Book Club back, *East of Eden* has remained vitally present in American culture for over half a century.

the wellness way centennial: Wall Disease Jessica Wapner, 2020-10-06 We build border walls to keep danger out. But do we understand the danger posed by walls themselves? East Germans were the first to give the crisis a name: Mauerkrankheit, or "wall disease." The afflicted—everyday citizens living on both sides of the Berlin wall—displayed some combination of depression, anxiety, excitability, suicidal ideation, and paranoia. The Berlin Wall is no more, but today there are at least seventy policed borders like it. What are they doing to our minds? Jessica Wapner investigates, following a trail of psychological harm around the world. In Brownsville, Texas, the hotly contested US-Mexico border wall instills more feelings of fear than of safety. And in eastern Europe, a Georgian grandfather pines for his homeland—cut off from his daughters, his baker, and his bank by the arbitrary path of a razor-wire fence built in 2013. Even in borderlands riven by conflict, the same walls that once offered relief become enduring reminders of trauma and helplessness. Our brains, Wapner writes, devote "border cells" to where we can and cannot go safely—so, a wall that goes up in our town also goes up in our minds. Weaving together interviews with those living up against walls and expert testimonies from geographers, scientists, psychologists, and other specialists, she explores the growing epidemic of wall disease—and illuminates how neither those "outside" nor "inside" are immune.

In this pathfinding book, Bonita Lawrence reveals the ways in which mixed-blood urban Natives understand their identities and struggle to survive in a world that, more often than not, fails to recognize them. In *Real? Indians and Others* Lawrence draws on the first-person accounts of thirty Toronto residents of Native heritage, as well as archival materials, sociological research, and her own urban Native heritage and experiences. She sheds light on the Canadian government's efforts to define Native identity through the years by means of the Indian Act and shows how residential schooling, the loss of official Indian status, and

adoption have affected Native identity. Lawrence looks at how Natives with ?Indian status? react and respond to ?nonstatus? Natives and how federally recognized Native peoples attempt to impose an identity on urban Natives. Drawing on her interviews with urban Natives, she describes the devastating loss of community that has resulted from identity legislation and how urban Native peoples have wrestled with their past and current identities. Lawrence also addresses the future and explores the forms of nation building that can reconcile the differences in experiences and distinct agendas of urban and reserve-based Native communities.

the wellness way centennial: *At Home in the World* Joyce Maynard, 2010-04-01 New York Times bestselling author of *Labor Day* With a New Preface When it was first published in 1998, *At Home in the World* set off a furor in the literary world and beyond. Joyce Maynard's memoir broke a silence concerning her relationship—at age eighteen—with J.D. Salinger, the famously reclusive author of *The Catcher in the Rye*, then age fifty-three, who had read a story she wrote for *The New York Times* in her freshman year of college and sent her a letter that changed her life. Reviewers called her book shameless and powerful and its author was simultaneously reviled and cheered. With what some have viewed as shocking honesty, Maynard explores her coming of age in an alcoholic family, her mother's dream to mold her into a writer, her self-imposed exile from the world of her peers when she left Yale to live with Salinger, and her struggle to reclaim her sense of self in the crushing aftermath of his dismissal of her not long after her nineteenth birthday. A quarter of a century later—having become a writer, survived the end of her marriage and the deaths of her parents, and with an eighteen-year-old daughter of her own—Maynard pays a visit to the man who broke her heart. The story she tells—of the girl she was and the woman she became—is at once devastating, inspiring, and triumphant.

Callejo Perez, Joshua Ode, 2013-10-30 Understanding the entrepreneurial nature of universities—in particular, the relationship between education and health in relation to development and wellness of communities—this volume provides a description/narration of the efforts in how universities can address their shifting contexts while engaging their communities in social change. In the development of this book, we have explored how reforms in American higher education are impacting the role of universities and their faculty. Contributors were asked to imagine possibilities for research and outreach by providing salient examples of how higher education can lead and change how we view the role of health and education within institutions and society. Each author writes across common themes that address the problems and possibilities of higher education curriculum and projects aligned with the mission of stewardship. The authors highlight interdisciplinary approaches and projects for faculty work, modification of the Teaching-Research-Service expectations, and community initiatives that can emerge from real-life problems (to impact wellbeing) and create rich and deep research possibilities for practitioners to impact both higher education and society. The process and research approaches used by the authors include imagining the community as part of a process of the change and part of what changes, exploring how community change can build on the strengths of local people, and why community organization and advocacy should revolve around social learning and community capacity theories. Given the diversity of topics and approaches, as editors we have tried to honour both the authors' words and style in expressing their opinions to provide a forum for the readers to envision stewardship.

This documentary first-hand approach to the world aimed to break up unquestioned ideological structures and expose tabooed truths in order to engender much-needed social changes. New ways of depicting daily life, writing testimony or subjective reportage emerged that still shape cultural debates today.

Rather, it is fat free or high in fiber or loaded with calories-- it is an enemy that will steal life away, or a savior that will prolong it. In this provocative and entertaining look at the uniquely American obsession with food, Michelle Stacey chronicles the psychological and cultural forces that have transformed oat bran and broccoli into magical totems, and steak, butter, and eggs into killers. Stacey takes us on a revealing journey through the landscape of American food paranoia-- from supermarkets, to restaurant kitchens, to research labs-- and ultimately suggests a new answer to our fears, one that takes into account our ancient and abiding love for eating. Perceptive and original, Consumed will change the way you think about food.

the wellness way centennial: A Mighty Fine Road H. Roger Grant, 2020-10-06 "Grant has once again hit a home run . . . a detailed but readable history of the Chicago, Rock Island and Pacific, a major Midwestern railroad." —Carlos A. Schwantes, St. Louis Mercantile Library Professor Emeritus The Chicago, Rock Island & Pacific Railroad's history is one of big booms and bigger busts. When it became the first railroad to reach and then cross the Mississippi River in 1856, it emerged as a leading American railroad company. But after aggressive expansion and a subsequent change in management, the company struggled and eventually declared bankruptcy in 1915. What followed was a cycle of resurrections and bankruptcies; a grueling, ten-year, ultimately unsuccessful battle to

merge with the Union Pacific; and the Rock Island's final liquidation in 1981. But today, long after its glory days and eventual demise, the "Mighty Fine Road" has left behind a living legacy of major and feeder lines throughout the country. In his latest work, railroad historian H. Roger Grant offers an accessible, gorgeously illustrated, and comprehensive history of this iconic American railroad. "This handsome, well-illustrated book merits the attention of any reader interested in the history of Iowa. And just as important, the book reminds us of the importance of railroads to the history and vitality of American society. All aboard!" —Iowa City Press-Citizen "A Mighty Fine Road lays out the amazing, yet heartbreaking history of the railroad I loved. The historical opportunities and disappointments of the Rock Island is clearly explained in Grant's book, with visionaries keeping the dream moving forward, yet damaged and constrained by greed and lack of vision with the next management regime." —Dan Sabin, President, Iowa Northern Railway Company
