trash bin cleaning business: Picking Up Robin Nagle, 2013-03-19 A “gripping” behind-the-scenes look at New York’s sanitation workers by an anthropologist who joined the force (Robert Sullivan, author of *Rats*). America’s largest city generates garbage in torrents—11,000 tons from households each day on average. But New Yorkers don’t give it much attention. They leave their trash on the curb or drop it in a litter basket, and promptly forget about it. And why not? On a schedule so regular you could almost set your watch by it, someone always comes to take it away. But who, exactly, is that someone? And why is he—or she—so unknown? In *Picking Up*, the anthropologist Robin Nagle introduces us to the men and women of New York City’s Department of Sanitation and makes clear why this small army of uniformed workers is the most important labor force on the streets. Seeking to understand every aspect of the Department’s mission, Nagle accompanied crews on their routes, questioned supervisors and commissioners, and listened to story after story about blizzards, hazardous wastes, and the insults of everyday New Yorkers. But the more time she spent with the DSNY, the more Nagle realized that observing wasn’t quite enough—so she joined the force herself. Driving the hulking trucks, she obtained an insider’s perspective on the complex kinships, arcane rules, and obscure lingo unique to the realm of sanitation workers. Nagle chronicles New York City’s four-hundred-year struggle with trash, and

traces the city's waste-management efforts from a time when filth overwhelmed the streets to the far more rigorous practices of today, when the Big Apple is as clean as it's ever been. "An intimate look at the mostly male work force as they risk injury and endure insult while doing the city's dirty work [and] a fascinating capsule history of the department." —Publishers Weekly "[Nagle's] passion for the subject really comes to life." —The New York Times "Evokes the physical and psychological toll of this dangerous, filthy, necessary work." —Nature "Nagle joins the likes of Jane Jacobs and Jacob Riis, writers with the chutzpah to dig deep into the Rube Goldberg machine we call the Big Apple and emerge with a lyrical, clear-eyed look at how it works." — Mother Jones

trash bin cleaning business: The Business of Waste Raymond G. Stokes, Roman Köster,

Stephen C. Sambrook, 2013-09-02 The advent of consumer societies in the United Kingdom and West Germany after 1945 led to the mass 'production' of garbage. This book compares the social, cultural and economic fallout of the growing volume and changing composition of waste in the two countries from 1945 to the present through sustained attention to changes in the business of handling household waste. Though the UK and Germany are similar in population density, degrees of urbanisation, and standardisation, the two countries took profoundly different paths from low-waste to throwaway societies, and more recently, towards the goal of 'zero-waste'. The authors explore evolving balances between public and private provision in waste services; the transformation of public cleansing into waste management; the role of government legislation and regulation; emerging conceptualisations of recycling and resource recovery; and the gradual shift of the industry's regulatory and business context from local to national and then to international.

trash bin cleaning business: Magic Trash J. H. Shapiro, 2015-01-06 Vacant lots. Abandoned houses. Trash--lots of trash. Heidelberg Street was in trouble! Tyree Guyton loved his childhood home--that's where his grandpa Sam taught him to paint the world. So he wanted to wake people up... to make them see Detroit's crumbling communities. Paintbrush in hand, Tyree cast his artistic spell, transforming everyday junk into magic trash. Soon local kids and families joined Tyree in rebuilding their neighborhood, discovering the healing power of art along the way. This picture book biography of Tyree Guyton, an urban environmental artist, shows how he transformed his decaying, crime-ridden neighborhood into the Heidelberg Project, an interactive sculpture park. The story spans from Tyree's childhood in 1950s Detroit to his early efforts to heal his community through art in the 1980s. Tyree's awards include Michigan Artist of the Year and International Artist. MAGIC TRASH offers strong themes of working together, the power of art, and the importance of inspiring community--especially kids--to affect action. The Heidelberg Project is internationally recognized for providing arts education to children and adults and for the ongoing development of several houses on Heidelberg Street. Not only does the Heidelberg Project prove that when a community works

together it can rebuild itself, but it also addresses the issues of recycling, environmentalism, and community on a global level.
