TurboTax Premier: Best for Investors and Individuals with Complex Finances

This version is geared towards individuals with more complex financial situations, including investment income, rental properties, and various other income streams.

II. Key Features Comparison:

a. Deduction and Credit Coverage:

Both TurboTax Home & Business and Premier offer extensive deduction and credit coverage.

However, the depth and breadth of coverage may vary slightly. Premier often includes more specialized deductions relevant to investment and rental income.

TurboTax Premier provides more in-depth guidance on deductions related to capital gains and losses.

This is a significant advantage for investors who need precise calculations.

TurboTax Home & Business focuses on deductions relevant to self-employment and small business expenses.

Features like itemized deductions and business-specific credits are prominent.

b. Investment and Rental Income Support:

TurboTax Premier excels in handling investment and rental income.

It simplifies the process of reporting dividends, capital gains, rental income, and associated expenses.

TurboTax Home & Business offers basic investment income reporting, but lacks the detailed features of Premier.

For extensive investment portfolios or rental properties, Premier is the better choice.

c. Self-Employment Income Handling:

TurboTax Home & Business is the clear winner for handling self-employment income.

It provides comprehensive tools for calculating self-employment taxes, tracking business expenses, and preparing Schedule C.

TurboTax Premier includes self-employment income support, but its focus is less pronounced than in Home & Business.

While it can handle self-employment, it's not its primary strength.

d. Business Expense Deductions:

TurboTax Home & Business offers robust support for business expense deductions.

It allows for detailed categorization and tracking of various business-related costs, making it easier to claim all eligible deductions.

TurboTax Premier offers some business expense deduction capabilities but falls short of the specialized features found in Home & Business.

It's primarily designed for personal tax filings, not in-depth business accounting.

e. State Tax Support:

Both TurboTax Home & Business and Premier offer support for state taxes.

The specific states covered might vary depending on the year and software updates. Always check the current availability before purchasing.

III. Pricing and Value:

Pricing for both TurboTax Home & Business and Premier varies annually.

It's recommended to check the TurboTax website for the most up-to-date pricing information. Generally, Premier has a higher price point reflecting its expanded features.

The value proposition depends on individual needs.

If you have significant investment or rental income, the extra features in Premier might justify the higher cost. For self-employed individuals with simpler investment needs, Home & Business offers excellent value.

IV. Ease of Use and Interface:

Both TurboTax Home & Business and Premier are designed with user-friendly interfaces.

They guide users through the tax process with clear instructions and intuitive navigation.

The overall ease of use is comparable.

However, the specific features might require a slightly steeper learning

curve depending on your familiarity with tax terminology and your financial situation's complexity.

V. Customer Support:

Both software options offer various customer support channels, including phone, email, and online help.

The level and responsiveness of support can vary depending on the time of year (especially during tax season).

Conclusion:

The choice between TurboTax Home & Business and Premier ultimately depends on your individual tax situation. Home & Business is the ideal choice for self-employed individuals and small business owners needing robust business expense tracking and self-employment tax calculation tools. Premier is the better option for those with significant investment income, rental properties, or other complex financial situations requiring more advanced reporting features. Carefully consider your specific needs and financial complexity to determine which version best meets your requirements and offers the best value for your money.

turbotax home and business vs premier: Tcl/Tk in a Nutshell Paul Raines, Jeff Tranter, 1999-03-25
The Tcl language and Tk graphical toolkit are simple and powerful building blocks for custom applications. The Tcl/Tk combination is increasingly popular because it lets you produce sophisticated graphical interfaces with a few easy commands, develop and change scripts quickly, and conveniently tie together existing utilities or programming libraries. One of the attractive features of Tcl/Tk is the wide variety of commands, many offering a wealth of options. Most of the things you'd like to do have been anticipated by the language's creator, John Ousterhout, or one of the developers of Tcl/Tk's many powerful extensions. Thus, you'll find that a command or option probably exists to provide just what you need. And that's why it's valuable to have a quick reference that briefly describes every command and option in the core Tcl/Tk distribution as well as the most popular extensions. Keep this book on your desk as you write scripts, and you'll be able to find almost instantly the particular option you need. Most chapters consist of alphabetical listings. Since Tk and mega-widget packages break down commands by widget, the chapters on these topics are organized by widget along with a section of core commands where appropriate. Contents include: Core Tcl and Tk commands and Tk widgets C interface (prototypes) Expect [incr Tcl] and [incr Tk]

A vibrant tapestry of dreams, desire, and exploitation, *The Mailroom* is not only an engrossing read but a crash course, taught by the experts, on how to succeed in Hollywood.

turbotax home and business vs premier: Launch! Advertising and Promotion in Real Time Michael Solomon, 2009 Launch! Advertising and Promotion is written for advertising and promotion courses taught to students in the business school and journalism & mass communication students. This textbook is the first of its kind to teach advertising concepts by reverse engineering a real advertising campaign from beginning to end. In April 2007, SS+K, an innovative New York City communications agency, launched the first ever branding campaign for msnbc.com with the tag A Fuller Spectrum of News. Launch! follows that campaign from initial agency pitch through roll-out of print and media assets to post-campaign analysis. Throughout, it exposes readers to the theory and concepts of advertising and promotion, and the personalities and decisions that drove this campaign. The book takes a rare look behind the curtain - even letting you see some of the paths not chosen by the agency and client. Students get a realistic sense of how theory plays out in practice, and get a flavor for the exciting field of advertising and promotion. And, they consistently learn the perspectives of both the advertising agency (where many journalism and communications students will work) and the client (where many marketing majors will work). This is a unique book, with a unique perspective, by a unique author team, and you won't find this kind of insight in any other text on the market. We think you're going to love it! This textbook has been used in classes at: Ball State University, Emerson College, Florida Institute of Technology, Grand Valley State University, Johnson County Community College, Manchester Business School, McLennan Community College, Michigan State University, North Hennepin Community College, Pierce College, Rochester Institute of Technology, Saint Louis University, Salem State College, South Dakota State University, Texas State University, Texas Tech University, University of New Hampshire, University of North Carolina, University of Notre Dame, University of South Florida, Virginia Tech, Western Kentucky University.

turbotax home and business vs premier: The Innovator's Method Nathan Furr, Jeff Dyer,

2014-08-19 Have you ever come up with an idea for a new product or service but didn't take any action because you thought it would be too risky? Or at work, have you had what you thought could be a big idea for your company—perhaps changing the way you develop or distribute a product, provide customer service, or hire and train your employees? If you have, but you haven't known how to take the next step, you need to understand what the authors call the innovator's method—a set of tools emerging from lean start-up, design thinking, and agile software development that are revolutionizing how new ideas are created, refined, and brought to market. To date these tools have helped entrepreneurs, designers, and software developers manage uncertainty—through cheap and rapid experiments that systematically lower failure rates and risk. But many managers and leaders struggle to apply these powerful tools within their organizations, as they often run counter to traditional managerial thinking and practice. Authors Nathan Furr and Jeff Dyer wrote this book to address that very problem. Following the breakout success of The Innovator's DNA—which Dyer wrote with Hal Gregersen and bestselling author Clay Christensen to provide a framework for generating ideas—this book shows how to make those ideas actually happen, to commercialize them for success. Based on their research inside corporations and successful start-ups, Furr and Dyer developed the innovator's method, an end-to-end process for creating, refining, and bringing ideas to market. They show when and how to apply the tools of their method, how to adapt them to your business, and how to answer commonly asked questions about the method itself, including: How do we know if this idea is worth pursuing? Have we found the right solution? What is the best business

model for this new offering? This book focuses on the “how”—how to test, how to validate, and how to commercialize ideas with the lean, design, and agile techniques successful start-ups use. Whether you’re launching a start-up, leading an established one, or simply working to get a new product off the ground in an existing company, this book is for you.

turbotax home and business vs premier: *The Lean Startup* Eric Ries, 2011-09-13 Most startups fail. But many of those failures are preventable. The Lean Startup is a new approach being adopted across the globe, changing the way companies are built and new products are launched. Eric Ries defines a startup as an organization dedicated to creating something new under conditions of extreme uncertainty. This is just as true for one person in a garage or a group of seasoned professionals in a Fortune 500 boardroom. What they have in common is a mission to penetrate that fog of uncertainty to discover a successful path to a sustainable business. The Lean Startup approach fosters companies that are both more capital efficient and that leverage human creativity more effectively. Inspired by lessons from lean manufacturing, it relies on “validated learning,” rapid scientific experimentation, as well as a number of counter-intuitive practices that shorten product development cycles, measure actual progress without resorting to vanity metrics, and learn what customers really want. It enables a company to shift directions with agility, altering plans inch by inch, minute by minute. Rather than wasting time creating elaborate business plans, The Lean Startup offers entrepreneurs—in companies of all sizes—a way to test their vision continuously, to adapt and adjust before it’s too late. Ries provides a scientific approach to creating and managing successful startups in a age when companies need to innovate more than ever.

turbotax home and business vs premier: **Boss Bitch** Nicole Lapin, 2017-03-21 New York Times bestselling author Nicole Lapin is back with a sassy and actionable guide empowering women to be the boss of their lives and their careers. You don't need dozens of employees to be a boss, says financial expert and serial entrepreneur Nicole Lapin. Hell, you don't even need one. You just need

to find your inner Boss Bitch — your most confident, savvy, ambitious self — and own it. A Boss Bitch is the she-ro of her own story. She is someone who takes charge of her future and embraces being a “boss” in all aspects of the word: whether as the boss of her own life, family and career, the literal boss at work, or, as the boss of her own company. Whichever she chooses (or all three), a Boss Bitch is someone who gets out there and makes her success happen — and so can you. Lapin draws on raw and often hilariously real stories from her own career — the good, the bad, and the ugly — to show what it means to be a boss in twelve easy steps. In her refreshingly accessible and relatable style, she first shows how to embrace the “boss of you mentality by seizing the power that comes from believing in yourself and expanding your skillset. Then she offers candid no-nonsense advice for how to kill it at as the “boss at work” whether you have a high-up role or not. And finally, for those who want to take the plunge as an entrepreneur, she lays out the nuts and bolts of how to be the “boss of your own business” from raising money and getting it off the ground to hiring a kickass staff and dealing office drama to turning a profit. Being a badass in your career is something that should be worn as a badge of honor, says Lapin. Here, she inspires us to rise to the occasion and celebrate our successes — and then keep killing it like the Boss Bitches we are!
