Understanding UCF's Accounting Programs

UCF offers a range of accounting programs designed to cater to diverse learning styles and career aspirations. Let's break down the key offerings:

1. Bachelor of Science in Accounting (BSAcc):

This undergraduate program provides a solid foundation in accounting principles, financial reporting, auditing, and taxation. Students benefit from a rigorous curriculum that prepares them for entry-level accounting positions or further studies at the graduate level. The program emphasizes hands-on learning through case studies, simulations, and real-world projects, ensuring graduates are job-ready upon completion. The BSAcc at UCF is accredited by AACSB International - The Association to Advance Collegiate Schools of Business, a globally recognized mark of excellence. This accreditation significantly enhances the value and recognition of the UCF degree in the job market.

2. Master of Science in Accounting (MSAcc):

For those seeking advanced knowledge and specialization, UCF's MSAcc program offers a comprehensive curriculum covering advanced accounting topics, including financial statement analysis, forensic accounting, and international accounting. The program is ideal for students aiming for leadership roles in accounting, finance, or related fields. The MSAcc program often includes specialized tracks focusing on areas like taxation or auditing, allowing for greater professional focus.

3. Master of Accountancy (MAcc):

The Master of Accountancy program at UCF provides a pathway to obtaining the CPA (Certified Public Accountant) license. It covers the necessary accounting and auditing standards and prepares students for the CPA exam. This program is highly sought after by students wanting to build a career in public accounting, where the CPA license is often a requirement.

4. Minor in Accounting:

Students pursuing a degree in a related field like finance or business administration can enhance their skillset by adding an accounting minor to their curriculum. This provides a valuable complement to their primary degree and broadens their career options.

Faculty Expertise and Resources at UCF

The UCF accounting faculty comprises experienced professionals and renowned researchers. Many professors have extensive industry experience, bringing real-world perspectives to the classroom. The department boasts state-of-the-art facilities, including computer labs equipped with industry-standard software, fostering a dynamic learning environment.

The university also offers various resources to support student success, including:

ucf accounting: Information Systems Theory Yogesh K. Dwivedi, Michael R. Wade, Scott L. Schneberger, 2011-09-21 The overall mission of this book is to provide a comprehensive understanding and coverage of the various theories and models used in IS research. Specifically, it aims to focus on the following key objectives: To describe the various theories and models applicable to studying IS/IT management issues. To outline and describe, for each of the various theories and models, independent and dependent constructs, reference discipline/originating area, originating author(s), seminal articles, level of analysis (i.e. firm, individual, industry) and links with other theories. To provide a critical review/meta-analysis of IS/IT management articles that have used a particular theory/model. To discuss how a theory can be used to better understand how information systems can be effectively deployed in today’s digital world. This book contributes to our understanding of a number of theories and models. The theoretical contribution of this book is that it analyzes and synthesizes the relevant literature in order to enhance knowledge of IS theories and models from various perspectives. To cater to the information needs of a diverse spectrum of readers, this book is structured into two volumes, with each volume further broken down into two sections. The first section of Volume 1 presents detailed descriptions of a set of theories centered around the IS lifecycle, including the Success Model, Technology Acceptance Model, User Resistance Theories, and four others. The second section of Volume 1 contains strategic and economic theories, including a Resource-Based View, Theory of Slack Resources, Portfolio Theory, Discrepancy Theory Models, and eleven others. The first section of Volume 2 concerns socio-psychological theories. These include Personal Construct Theory, Psychological Ownership, Transactive Memory, Language-Action Approach, and nine others. The second section of Volume 2 deals with methodological theories, including Critical Realism, Grounded Theory, Narrative Inquiry, Work System Method, and four others. Together, these theories provide a rich tapestry of knowledge around the use of theory in IS research. Since most of these theories are from contributing disciplines, they provide a window into the world of external thought leadership.

ucf accounting: Confederate Conscription and the Struggle for Southern Soldiers John M. Sacher, 2021-12-08 Winner of the Jules and Frances Landry Award Finalist for the 2022 Gilder Lehrman Lincoln Prize In April 1862, the Confederacy faced a dire military situation. Its forces were badly outnumbered, the Union army was threatening on all sides, and the twelve-month enlistment period for original volunteers would soon expire. In response to these circumstances, the Confederate Congress passed the first national conscription law in United States history. This initiative touched off a struggle for healthy white male bodies—both for the army and on the home front, where they oversaw enslaved laborers and helped produce food and supplies for the front lines—that lasted till the end of the war. John M. Sacher's history of Confederate conscription serves as the first comprehensive examination of the topic in nearly one hundred years, providing fresh insights into and drawing new conclusions about the southern draft program. Often summarily dismissed as a detested policy that violated states' rights and forced nonslaveholders to fight for planters, the conscription law elicited strong responses from southerners wanting to devise the best way to guarantee what they perceived as shared sacrifice. Most who bristled at the compulsory draft did so believing it did not align with their vision of the Confederacy. As Sacher reveals, white southerners' desire to protect their families, support their communities, and ensure the continuation of slavery shaped their reaction to conscription. For three years, Confederates tried to achieve victory on the battlefield while simultaneously promoting their vision of individual liberty for whites and states' rights. While they failed in that quest, Sacher demonstrates that southerners' response to the 1862 conscription law did not determine their commitment to the Confederate cause. Instead, the implementation of the draft spurred a debate about sacrifice—both physical and ideological—as the Confederacy's insatiable demand for soldiers only grew in the face of a grueling war.

The finalization of the PFM Bill has reached an advanced stage with Parliamentary approval expected in the coming months. The IMF mission strongly recommends that the petroleum revenue management provisions in the Bill are revisited. In particular this should include clearly defining the nature of the funds and its objectives. The reporting arrangements should also be clarified and the specialist audit arrangements specified. Finally, the Bill should be enhanced to ensure that investment risks are limited and to protect against its use as a development fund.

ucf accounting: Creative and Innovative Approaches to the Science of Management Yuji Ijiri, 1993-07-30 Bringing together an internationally known group of scholars of management and accounting under the editorial direction of Yuji Ijiri, this volume explores new approaches to the science of management. The essays are grounded in general management theory. However, at the same time, they have a strong orientation toward practical applications. Together they provide a rigorous foundation for further creativity and innovation in management practice and management science. The volume is divided into seven sections. The first sets forth new approaches to accounting and control. This is followed by an examination of computer and decision support systems. The third section looks at resource management--human, economic, and financial; while the fourth highlights new approaches to organization design. Part five deals with industry and economy studies. Parts six and seven provide methodological contributions to the science of management. Together the essays provide a rigorous foundation for further creativity and innovation in actual management practice and management of science. This volume will be of interest to scholars of business management and accounting as well as practitioners in these areas.
