utopia wellness oldsmar fl: *Behind the Shine* Evelyn Ottili, 2020-12-02 BeHind the Shine chronicles the testimonies of author Evelyn Akullo Ottili from Uganda to Israel to Canada to the United States and beyond. During a period of seven days and nights, the Lord reminded Evelyn of these testimonies; the experiences she had lived; and the power of God at work in her life, even in the direst of situations. He showed her that these testimonies were weapons of warfare she would use as she became all God had created her to be in the seasons of her life During her childhood and youth, Evelyn endured many trials and tribulations designed to hold her captive and keep her from being whom God created, called, and commissioned her to be in life. Molestation; abandonment; disenfranchisement from family; false accusations; betrayals; misdirection; losses; spousal abuse. All this and more could and should have knocked Evelyn to the point that she would give up on everything she knew the Lord had planned for her. Instead, Evelyn rose up. The Holy Spirit invited her to look behind all the things she had endured to see the light of God that was continually shining in her life. And she did. Evelyn saw that the experiences of her past no longer gripped her. All those events had lost their sting; she was moving forward beyond the Shine of what others saw about her

but was not her reality. She was healed so she could advance in the ways God desired so she could touch and affect lives around the world for the glory of the Lord. BeHind the Shine is a weapon to diffuse the lies and arrows from the pits of hell that attack the people of God. This book will increase the reader's dependence of God as they seek Him and more of His Kingdom. BeHind the Shine is designed to reach out to those who might be going through the same or similar things Evelyn endured in her journey.

utopia wellness oldsmar fl: The Hormone Fix Anna Cabeca, DO, OBGYN, FACOG, 2023-08-29 NATIONAL BESTSELLER • For women approaching or in menopause, a revolutionary diet and holistic lifestyle program for easier weight loss, better sleep, diminished hot flashes, a clearer head, and a rejuvenated sex drive. “Hormone balance is within reach, and this is the definitive guide for reaching that goal.”—David Perlmutter, MD, author of Grain Brain As women approach menopause, many start to experience the physical and emotional indignities of hormonal fluctuation: metabolic stall and weight gain, hot flashes and night sweats, insomnia, memory loss or brain fog, irritability, low libido, and painful sex. Too often, doctors tell us that these discomforts are to be expected and that we will have to wait them out during “the change”; some of us even agree to be unnecessarily medicated. But Dr. Anna Cabeca’s research and experience with thousands of her patients show that there is a fast-acting and nonpharmaceutical way to dramatically and permanently alleviate these symptoms. The Hormone Fix introduces Dr. Cabeca’s unique Keto-Green protocol, a plan that pairs the hallmarks of ketogenic (low-carb/high fat) eating with diet and lifestyle changes that bring the body’s cellular pH to a healthy alkaline level. The proven result: balanced cortisol and reduced output of insulin, the hormones most responsible for belly fat and weight gain, plus an increase in oxytocin, the “love and happiness” hormone. Whether you are perimenopausal, menopausal, or postmenopausal, The Hormone Fix offers an easy-to-follow program, including • a 10-day quick-start detox diet to jump-start weight loss and reduce symptoms immediately • daily meal plans and weekly shopping lists to take the guesswork out of a month’s worth of Keto-Green eating • 65 delicious and easy-to-make recipes for breakfast, lunch, dinner, smoothies, and soups • detailed information on vitamin and mineral supplementation that optimizes hormone balance • simple self-assessments and recommended optional lab testing for a better understanding of your hormonal status • tested and trusted stress-reduction and oxytocin-amplifying advice and techniques With The Hormone Fix you can expect to trim down, tap into new and unexpected energy levels, enhance intimacy, and completely revitalize your life! Ready for your fix? “The Hormone Fix is a treasure trove of accurate and user-friendly information that all women who are suffering during menopause need to know and apply.”—Christiane Northrup, MD, author of The Wisdom of Menopause

utopia wellness oldsmar fl: Cancer and the New Biology of Water Thomas Cowan, 2019-09-24 When President Nixon launched the War on Cancer with the signing of the National Cancer Act of 1971 and the allocation of billions of research dollars, it was amidst a flurry of promises that a cure was within reach. The research establishment was trumpeting the discovery of oncogenes, the genes that supposedly cause cancer. As soon as we identified them and treated cancer patients accordingly, cancer would become a thing of the past. Fifty years later it's clear that the War on Cancer has failed--despite what the cancer industry wants us to believe. New diagnoses have continued to climb; one in three people in the United States can now expect to battle cancer during their lifetime. For the majority of common cancers, the search for oncogenes has not changed the treatment: We're still treating with the same old triad of removing (surgery), burning out (radiation), or poisoning (chemotherapy). In Cancer and the New Biology of Water, Thomas Cowan, MD, argues that this failure was inevitable because the oncogene theory is incorrect--or at least

incomplete--and based on a flawed concept of biology in which DNA controls our cellular function and therefore our health. Instead, Dr. Cowan tells us, the somatic mutations seen in cancer cells are the result of a cellular deterioration that has little to do with oncogenes, DNA, or even the nucleus. The root cause is metabolic dysfunction that deteriorates the structured water that forms the basis of cytoplasmic health. Despite mainstream medicine's failure to bring an end to suffering or deliver on its promises, it remains illegal for physicians to prescribe anything other than the standard of care for their cancer patients, despite the fact that gentler, more effective, and more promising treatments exist--

utopia wellness oldsmar fl: *Where the Jobs Are* John Dearie, Courtney Geduldig, 2013-08-28 A guide to ending America's jobs emergency by accelerating the true engine of job creation—start-ups Four years after the end of the Great Recession, 23 million Americans remain unemployed, underemployed, or have left the workforce discouraged. Even worse, Washington policymakers seem out of ideas. *Where the Jobs Are: Entrepreneurship and the Soul of the American Economy* shows how America can restore its great job-creation machine. Recent research has demonstrated that virtually all net new job creation in the United States over the past thirty years has come from businesses less than a year old—true start-ups. Start-up businesses create an average of three million new jobs each year, while existing businesses of any size or age shed a net average of about one million jobs annually. Unfortunately, the vital signs of America's job-creating entrepreneurial economy are flashing red alert. After remaining remarkably consistent for decades, the rate of new business formation has declined significant in recent years, and the number of new jobs created by new firms is also falling. In *Where the Jobs Are*, the authors recount the findings of a remarkable summer they spent traveling the country to meet and conduct roundtables with entrepreneurs in a dozen cities. More than 200 entrepreneurs participated—explaining in specific and vividly personal terms the issues, frustrations, and obstacles that are undermining their efforts to launch new businesses, expand existing young firms, and create jobs. Those obstacles include a dangerously underperforming education system, self-defeating immigration policies that thwart the attraction and retention of the world's best talent, access to capital difficulties, a mounting regulatory burden, unnecessary tax complexity, and severe Washington-produced economic uncertainty. Explains how start-ups are different from existing businesses, large or small, and why they represent the engine of job creation Reveals how policymakers' failure to understand the unique nature and needs of start-ups has undermined efforts to stimulate the economy following the Great Recession Presents a detailed, innovative, and uniquely credible 30-point policy agenda based on what America's job creators said they urgently need Engaging and informative, *Where the Jobs Are* reveals with unprecedented precision and clarity the major obstacles undermining the fragile economic recovery, and provides a vitally important game plan to unleash the job-creating capacity of the entrepreneurial economy and put a beleaguered nation back to work.

utopia wellness oldsmar fl: **The One World Schoolhouse** Salman Khan, 2012-10-02 A free, world-class education for anyone, anywhere: this is the goal of the Khan Academy, a passion project that grew from an ex-engineer and hedge funder's online tutoring sessions with his niece, who was struggling with algebra, into a worldwide phenomenon. Today millions of students, parents, and teachers use the Khan Academy's free videos and software, which have expanded to encompass nearly every conceivable subject; and Academy techniques are being employed with exciting results in a growing number of classrooms around the globe. Like many innovators, Khan rethinks existing assumptions and imagines what education could be if freed from them. And his core idea-liberating teachers from lecturing and state-mandated calendars and opening up class time for truly human interaction-has become his life's passion. Schools seek his advice about connecting to students in a digital age, and people of all ages and backgrounds flock to the site to utilize this fresh approach to learning. In *The One World Schoolhouse*, Khan presents his radical vision for the future of education, as well as his own remarkable story, for the first time. In these pages, you will discover, among other things: How both students and teachers are being bound by a broken top-down model invented in Prussia two centuries ago Why technology will make classrooms more human and

teachers more important How and why we can afford to pay educators the same as other professionals/DIV How we can bring creativity and true human interactivity back to learning/DIV Why we should be very optimistic about the future of learning. Parents and politicians routinely bemoan the state of our education system. Statistics suggest we've fallen behind the rest of the world in literacy, math, and sciences. With a shrewd reading of history, Khan explains how this crisis presented itself, and why a return to mastery learning, abandoned in the twentieth century and ingeniously revived by tools like the Khan Academy, could offer the best opportunity to level the playing field, and to give all of our children a world-class education now. More than just a solution, The One World Schoolhouse serves as a call for free, universal, global education, and an explanation of how Khan's simple yet revolutionary thinking can help achieve this inspiring goal.

utopia wellness oldsmar fl: College Andrew Delbanco, 2023-04-18 The strengths and failures of the American college, and why liberal education still matters As the commercialization of American higher education accelerates, more and more students are coming to college with the narrow aim of obtaining a preprofessional credential. The traditional four-year college experience—an exploratory time for students to discover their passions and test ideas and values with the help of teachers and peers—is in danger of becoming a thing of the past. In College, prominent cultural critic Andrew Delbanco offers a trenchant defense of such an education, and warns that it is becoming a privilege reserved for the relatively rich. In describing what a true college education should be, he demonstrates why making it available to as many young people as possible remains central to America's democratic promise. In a brisk and vivid historical narrative, Delbanco explains how the idea of college arose in the colonial period from the Puritan idea of the gathered church, how it struggled to survive in the nineteenth century in the shadow of the new research universities, and how, in the twentieth century, it slowly opened its doors to women, minorities, and students from low-income families. He describes the unique strengths of America's colleges in our era of globalization and, while recognizing the growing centrality of science, technology, and vocational subjects in the curriculum, he mounts a vigorous defense of a broadly humanistic education for all. Acknowledging the serious financial, intellectual, and ethical challenges that all colleges face today, Delbanco considers what is at stake in the urgent effort to protect these venerable institutions for future generations.

If so, then it is essential that you replenish your declining hormones. In Hormones, Health, and Happiness, Dr. Steven Hotze reveals how restoring hormones to optimal levels using natural, bioidentical hormones enables women and men to regain their vitality. Dr. Hotze discusses the frequently overlooked problem of hypothyroidism, which commonly affects women in midlife. Too often, women with all the signs of low thyroid are told that their blood results are normal. Find out why women should believe what their bodies are telling them rather than the results of a blood test. The conventional medical approach treats symptoms with anti drugs, such as antidepressants, antihistamines, antispasmodics, anti-arthritis, and others, rather than discovering and correcting the underlying problems of these symptoms. In Hormones, Health, and Happiness, Dr. Hotze discusses symptoms of women and men in midlife, which include fatigue, weight gain, headaches, depression, insomnia, hot flashes, joint and muscle pain, brain fog, loss of interest in sex, allergies, and recurrent infections, to name a few, and addresses their solutions. His comprehensive eight-point wellness program will help you strengthen your immune system, balance your hormones, and increase your energy level. This program encompasses: - Treatment of low thyroid - Treatment of hormonal decline and imbalance - Treatment of adrenal fatigue - Treatment of yeast overgrowth - Treatment of airborne allergies - Treatment of food allergies - Vitamin and mineral supplementation - Nutritionally balanced eating program Dr. Hotze demonstrates how many health problems can be solved safely, effectively, and naturally without drugs. Her first goal was simple; she wanted to stop the screaming, running, and self-injurious behaviors that her daughter exhibited. For ten years, Ann was told by professionals that she needed to accept Robin's disabilities. Not one to give up in the face of adversity, Ann finally found quality professionals to help her. Ann knew education and therapies were Robin's priority, but self-image and socialization became her focus. Ann also knew Robin's inappropriate behaviors were unacceptable in society. Ann and her husband, Bob, became Robin's case managers and Robin progressed beyond their wildest dreams. Today, Robin has two jobs, lives in her own condominium, drives her own car, and is a part of her community. This is her story! For more information, see: www.autism-believe-future.com. Autism is not a one-size-fits-all disability, so focusing on just one intervention did not lead Robin to successful adulthood. Many steps had to be taken along the way to get her successfully to her goal! Parents and autism professionals must work together, developing quality support and services that are cost-effective so we can all believe in the future for our children.

That is the seminal question addressed in *The U.S. Technology Skills Gap*, a comprehensive 104-year review of math and science education in America. Some claim this “skills gap” is “equivalent to a permanent national recession” while others cite how the gap threatens America’s future economic, workforce employability and national security. This much is sure: America’s math and science skills gap is, or should be, an issue of concern for every business and information technology executive in the United States and *The U.S. Technology Skills Gap* is the how-to-get involved guidebook for those executives laying out in a compelling chronologic format: The history of the science and math skills gap in America Explanation of why decades of astute warnings were ignored Inspiring examples of private company efforts to supplement public education A pragmatic 10-step action plan designed to solve the problem And a tantalizing theory of an obscure Japanese physicist that suggests America’s days as the global scientific leader are numbered Engaging and indispensable, *The U.S. Technology Skills Gap* is essential reading for those eager to see America remain a relevant global power in innovation and invention in the years ahead.

Micklem, 2010 In the case of water fluoridation, the chemicals used to fluoridate the water that more than 180 million people drink each day are not pharmaceutical grade, but rather hazardous waste products of the phosphate fertilizer industry; it is illegal to dump them into rivers and lakes or release them into the atmosphere. And water fluoridation is a prime example of one of the worst medical practices possible—forced medication with no control over the dose or who gets it. Perhaps most shocking of all, it is not subject to any federal regulation. At once painstakingly-documented and also highly-readable, *The Case Against Fluoride* brings new research to light, including links between fluoride and harm to the brain, bones, and kidneys, and argues that while there is possible

value in topical applications like brushing your teeth with fluoride toothpaste, the evidence that swallowing fluoride reduces tooth decay is surprisingly weak.

utopia wellness oldsmar fl: *Human Heart, Cosmic Heart* Dr. Thomas Cowan, 2016-10-22 [This book] deserves to be in everyone's library. . . . It's loaded with great information, and it can save your life or the life of someone you love.—Dr. Joseph Mercola This book is life-changing for those trying to understand their own bodies, or those of loved ones, and it's truly transformative in the hands of medical professionals, especially young doctors.—Foreword Reviews Thomas Cowan was a 20-year-old Duke grad—bright, skeptical, and already disillusioned with industrial capitalism—when he joined the Peace Corps in the mid-1970s for a two-year tour in Swaziland. There, he encountered the work of Rudolf Steiner and Weston A. Price—two men whose ideas would fascinate and challenge him for decades to come. Both drawn to the art of healing and repelled by the way medicine was—and continues to be—practiced in the United States, Cowan returned from Swaziland, went to medical school, and established a practice in New Hampshire and, later, San Francisco. For years, as he raised his three children, suffered the setback of divorce, and struggled with a heart condition, he remained intrigued by the work of Price and Steiner and, in particular, with Steiner's provocative claim that the heart is not a pump. Determined to practice medicine in a way that promoted healing rather than compounded ailments, Cowan dedicated himself to understanding whether Steiner's claim could possibly be true. And if Steiner was correct, what, then, is the heart? What is its true role in the human body? In this deeply personal, rigorous, and riveting account, Dr. Cowan offers up a daring claim: Not only was Steiner correct that the heart is not a pump, but our understanding of heart disease—with its origins in the blood vessels—is completely wrong. And this gross misunderstanding, with its attendant medications and risky surgeries, is the reason heart disease remains the most common cause of death worldwide. In *Human Heart, Cosmic Heart*, Dr. Thomas Cowan presents a new way of understanding the body's most central organ. He offers a new look at what it means to be human and how we can best care for ourselves—and one another.

The disease is common and its symptoms may be vague. Diagnosis of hypothyroidism and treatment of hypothyroidism originating in the thyroid gland (primary hypothyroidism) are tasks of the primary health care. Hypothyroidism is easy to confirm or exclude by determining serum TSH and free T4 (FT4) concentrations. Remember that hypothyroidism can be the cause of high serum cholesterol or creatine kinase (CK) concentrations. In replacement therapy, a young or middle-aged patient usually feels best if TSH concentration is about 1–2 mU/l and FT4 concentration is close to the upper limit of the reference range. Elderly patients with e.g. angina pectoris or arrhythmias often are more susceptible to the effects of thyroxine. In them, the maintenance dose remains slightly lower and TSH concentration respectively a little higher. Ultrasonography has no role in the investigation of hypothyroidism (unless it is indicated by the findings on palpation). Thyroxine should not be used for the treatment of e.g. depression, low energy level or overweight in a person who is biochemically euthyroid.

utopia wellness oldsmar fl: Female Brain Gone Insane Mia Lundin, 2010-01-01 The first book to specifically address the emotional issues of hormonal and brain chemistry imbalances Do you wake up every morning feeling flat and like you are going through the motions? Feel wired but tired? Do you feel like it's all you can do to get through another day? Ambivalent or lackluster about life? Is your brain foggy and are you worried about your lack of sleep? If any of these questions pertain to you, you may feel like you have gone insane, but there is an emergency guidebook that can rescue you. Female Brain Gone Insane is the hands-on manual for women who feel like they are falling apart, losing it, or going insane and focuses on the emotional symptoms of hormone and brain chemistry imbalances associated with the combination of stress-filled lives and life transitions such as PMS, perimenopause, menopause, and postmenopause. Unlike other hormone books on the market, Female Brain Gone Insane is less focused on physiological changes such as bone loss and weight gain and instead tackles the legitimate panic and distress women feel as they experience symptoms associated with emotional and intellectual turmoil, including mood swings, loss of concentration and/or memory, and mental acuteness, to name a few. Women who have asked 'Why do I feel like I am losing it?' 'How can I cope with the emotional changes I am experiencing?' and 'Will I ever feel like myself again?' will find real and compassionate help in this emergency guidebook. What's even more unique, is the author's contention that changes in the brain that affect a woman's mood, memory, concentration, and acuteness may not always be a hormone imbalance caused by menopause or other female-specific issues, as doctors often misdiagnose, but imbalances induced by the stress and anxiety levels associated with our fast-paced lifestyles that affect us at a deeper level. Bottom line, the key to a woman's well being is balanced brain chemistry, and Female Brain Gone Insane offers customizable solutions for every woman. Without lumping all women into one category, Female Brain Gone Insane helps each woman identify the symptoms of her particular emotional and psychological problems---be they depression, panic attacks, memory loss, or even acting out of character, and then offers support, information, and treatment so that she can rebalance herself. The core of the plan is to use bio-identical hormones (using the right hormone at the right time) and supplements carefully chosen to manipulate brain chemistry so that the body is happy again! Women will be liberated from their emotional turmoil with step-by-step, tailor-made rescue prescriptions based on the author's thriving practice of more than 3,000 satisfied patients. No more misdiagnoses or 'Band-aid' treatments such as antidepressants, birth-control pills, or even unnecessary surgeries Unique philosophy, accompanied with a combination of bio-identical hormones, nutritional supplements, good food, including targeted amino acid therapy, and lifestyle changes allows women to truly manipulate and support their brain chemistry Readers learn the

basic science behind the intricate dance between their hormones and brain chemistry and are then encouraged to respect and identify their own emotional and physical symptoms. Identifies the underlying causes of emotional symptoms and addresses women's unique bio-chemical composition with a new and unconventional approach to integrating bio-identical hormones, targeted amino acid therapy, and other nutritional supplements.

utopia wellness oldsmar fl: Powderburns Celerino Castillo, Dave Harmon, 1994 The truth about the remaining dark secret of the Iran-Contra scandal- the United States government's collaboration with drug smugglers. *Powderburns* is the story of Celerino Castillo III who spent 12

years in the Drug Enforcement Administration. During that time, he built cases against organized drug rings in Manhattan, raided jungle cocaine labs in the Amazon, conducted aerial eradication operations in Guatemala, and assembled and trained anti-narcotics units in several countries. The eerie climax of Agent Castillo's career with the DEA took place in El Salvador. One day, he received a cable from a fellow agent. He was told to investigate possible drug smuggling by Nicaraguan Contras operating from the El Pango air force base. Castillo quickly discovered that Contra pilots were, indeed, smuggling narcotics back into the United States - using the same pilots, planes, and hangars that the Central Intelligence Agency and the National Security Council, under the Direction of Lt. Col. Oliver North, used to maintain their covert supply operation to the Contras.

utopia wellness oldsmar fl: Age of Context Robert Scoble, Shel Israel, 2014 In 2006, co-authors Robert Scoble and Shel Israel wrote *Naked Conversations*, a book that persuaded businesses to embrace what we now call social media. Six years later they have teamed up again to report that social media is but one of five converging forces that promise to change virtually every aspect of our lives. You know these other forces already: mobile, data, sensors and location-based technology. Combined with social media they form a new generation of personalized technology that knows us better than our closest friends. Armed with that knowledge our personal devices can anticipate what we'll need next and serve us better than a butler or an executive assistant. The resulting convergent superforce is so powerful that it is ushering in an era the authors call the Age of Context. In this new era, our devices know when to wake us up early because it snowed last night; they contact the people we are supposed to meet with to warn them we're running late. They even find content worth watching on television. They also promise to cure cancer and make it harder for terrorists to do their damage. Astoundingly, in the coming age you may only receive ads you want to see. Scoble and Israel have spent more than a year researching this book. They report what they have learned from interviewing more than a hundred pioneers of the new technology and by examining hundreds of contextual products. What does it all mean? How will it change society in the future? The authors are unabashed tech enthusiasts, but as they write, an elephant sits in the living room of our book and it is called privacy. We are entering a time when our technology serves us best because it watches us; collecting data on what we do, who we speak with, what we look at. There is no doubt about it: Big Data is watching you. The time to lament the loss of privacy is over. The authors argue that the time is right to demand options that enable people to reclaim some portions of that privacy.
